NOTICE OF PUBLIC HEARING

NOTICE IS HEREBY GIVEN that an open record public hearing will be held before the Hearing Examiner on **Thursday, January 16th at 6:00 PM** at 501 Delta Avenue, 2nd Floor – Council Chambers to consider the following proposal:

Scan to View Project Materials

File Number: PA24-008

Project Title: Lakewood Heights Planned Residential Development

Applicant: MJS Investors

Project Location: 1125 & 1507 172nd Street NE

APN: 31051900400900 and 31051900401100

Date of Completeness: April 4, 2024

Proposal: Applicant has requested Planned Residential Development (PRD) and Binding Site Plan Approval in order to construct a 182-lot Planned Residential Development on approximately 29.48 acres, utilizing residential density incentives consistent with MMC 22G.090. The project contains one (1) Category III wetland and buffer from an off-site wetland extends on-site. Project will construct associated improvements, include clearing, grading, and utility and roadway extensions. The project proposes a concurrent rezone to align the split zoning of the underlying parcels with the project proposal.

Open Record Public Hearing: The public hearing will take place in person at 501 Delta Avenue, 2nd Floor – Council Chambers and via Zoom/teleconference. The Hearing Examiner and City's project manager will attend in person; however, other staff, the applicant, and the public may attend either in person or via Zoom. Access for the hearing impaired and others can be accommodated using Washington Relay Service at 1-800-833-6384 and at the below website:
https://www.dshs.wa.gov/altsa/odhh/telecommunication-relay-services.

The Council Chambers are handicap accessible. Arrangements to reasonably accommodate special needs, including handicap accessibility or interpreter, will be made upon receiving 48-hour advance notice. Contact the City Clerk's Office at 360.363.8000.

Lead Agency: City of Marysville – Community Development Department

Project Description: 182-lot Planned Residential Development on approximately 29.48 acres, utilizing residential density incentives consistent with MMC 22G.090. The project contains one (1) Category III wetland and buffer from an off-site wetland extends on-site. Project will construct associated improvements, include clearing, grading, and utility and roadway extensions. The project proposes a concurrent rezone to align the split zoning of the underlying parcels with the project proposal.

SEPA Threshold Determination: The lead agency has determined that this proposal does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is NOT required under RCW 43.21C.030(2)(c). This decision was made after review by the City of Marysville of a completed environmental checklist and other information on file with this agency. This information is available for public review upon request.

Public Comment Period: This MDNS is subject to a 14-day comment period. Written comments may be submitted by mail or e-mail to the lead agency's SEPA contact person. Comments must be received by December 17, 2024.

Appeals: This MDNS may be appealed pursuant to the requirements of MMC 22E.030.180. Any appeal must be accompanied by a filing fee as prescribed by MMC 22G.030, and be filed in writing at the City of Marysville Community Development Department, 510 Delta Avenue, Marysville, WA 98270. The appeal must be received by 4:30 p.m., by December 18, 2024. The appeal must contain the items set forth in MMC 22G.010.550.

1.0 EVALUATION

1. **Description of Proposal**
MJS Investors, applicant, has requested Preliminary Subdivision and Planned Residential Development (PRD) Approval to subdivide a 29.48 acre property into 182 detached single family lots, and modify the zoning boundary and concurrently Rezone approximately 1.38 acres of the site from Mixed Use (MU) to R-6.5 Single-family, High Density (R-6.5) and 1.64 acres from R-6.5 to MU. The realignment of the zoning boundaries allows for a more practical and efficient use of the properties. The project will involve approximately 46,000 cubic yards of cut and approximately 50,000 cubic yards of fill for the construction of the plat road, installation of utilities, and other site improvements.

2. **Project History**
An application was filed on March 24, 2024 and deemed complete on April 4, 2024. Notice was provided in accordance with MMC Section 22G.010.090, *Notice of development application*. Written public comments were received from citizens residing on 11th Avenue NE (Exhibit 022), and two public comments were provided verbally. Concerns were expressed regarding the impact of the new development on lifestyle, infrastructure and the traffic congestion in the area as well as installation of a round-about (RAB) at 11th Avenue and 172nd Street NE. A response letter (Exhibit 023) and phone message was provided to the citizen indicating that the RAB would not take any of his land and that a cut in the median would allow him full access to his driveway. Additionally, road improvement and traffic mitigation measures would be evaluated during project review, and any project decision would be conditioned in accordance with the Marysville Municipal Code (MMC) and the City's *Engineering Design and Development Standards* (EDDS). The addition of the RAB should mitigate many of the safety issues at the currently poorly controlled intersection.

3. **Site Location**
The subject property is addressed 1125 and 1507 172nd Street NE, and is located on the north east corner of the 172nd Street NE and 11th Avenue NE intersection, within the City of Marysville. The property is identified by Assessor's Parcel Numbers 31051900400900 and 31051900401100.

4. **Site Description**
The subject property consists of approximately 30 acres of which the southern portion is currently developed with residential and commercial structures. The remainder of the property is undeveloped and is primarily comprised of pasture with minimal treed areas. The site includes level and slightly sloped areas with relief of about 35 feet. The overall area slopes downward to the east. There are numerous graded areas with areas of fill throughout the central portion of the site. According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS), on-site soils primarily consist of type "B" Alderwood gravelly sandy loam soils, with areas of the eastern side mapped as Kitsap silt loam.

5. **Critical Areas**
Sewall Wetland Consulting, Inc. prepared a *Critical Areas Report* dated January 30, 2024 (Exhibit 005) which was submitted with the land use application. According to the *Critical Areas Report*, there is one wetland on-site, and one off-site wetland to the north. Wetland A is a Category III wetland requiring a 75 foot buffer under MMC Section 22E.010.100(4); the off-site wetland to the north ends at an agricultural ditch. A previous study of the parcel to the north (APN 31051900401600) was completed in October 2020 and identified a single Category III wetland. The hydrology of this area was not confirmed at that time as it was conducted in the dry season. With the lack of data, this area was presumed a wetland and also requires a 75 foot buffer.

According to the *Critical Areas Report* and *Wetland Mitigation Plan* prepared by Seawall Wetland Consulting, Inc. (Exhibit 008), the buffers or portions of the buffers for Wetland A and the off-site wetland provide inadequate buffer and are required to be enhanced consistent with MMC Sections 22E.010.100(3) and 22E.010.220(2). Approximately 27,098 square feet (0.62 acers) of buffer will be enhanced through replanting degraded areas with native trees and shrubs.

The applicant is proposing use of buffer averaging in accordance with MMC 22E.010.100(5)(a) to allow for the proposed development. A total of 2,429 square feet of buffer reduction will occur, with 2,446 square feet of addition, meeting the requirements for buffer averaging.

6. **Access and Circulation**
Primary access for the PRD subdivision will be via three new access points on 11th Avenue NE and one secondary access provided via the extension and improvement of the existing western access to the service station on 172nd Street NE (SR 531). A network of public streets and auto courts will provide access and circulation interior to the subdivision.

7. **Traffic Impacts**
A traffic impact analysis (TIA) was prepared by TENW dated November 15, 2023 (Exhibit 007), and a Supplemental Traffic Assessment dated May 22, 2024 (Exhibit 027) was submitted. An Intersection Control Evaluation (ICE) for 172nd Street NE (SR531)/11th Avenue NE was prepared by TENW, dated January 16, 2024. According to the TIA and supplemental assessment, the proposed development would generate approximately 1,762 Average Daily Trips (ADT), 129 AM peak hour trips (AMPHT), and 184 PM peak hour trips (PMPHT).

The City's Public Works Director and Traffic Engineering Manager reviewed the TIA and supplemental reports, and issued a written concurrency recommendation dated November 18, 2024 (Exhibit 030), informing the developer of the project's impacts and mitigation obligation pursuant to MMC Chapter 22D.030, *Traffic Impact Fees and Mitigation*. Pursuant to MMC 22D.030.070(1)(d), an applicant must make a written proposal for mitigation of traffic impacts to the Public Works Director, based on the concurrency recommendation. The applicant accepted the traffic concurrency recommendation on November 19, 2024 (Exhibit 031). The applicant shall be required to comply with the seven (7) conditions of concurrency outlined in Exhibit 030. As conditioned, the development would not result in adverse traffic impacts and adequate mitigation would be achieved.

Pursuant to MMC 22D.030.070(6)(a)(ii), the traffic concurrency determination and the project's impacts and mitigation obligations shall expire upon expiration of the subdivision.

8. **Park Impacts**
Pursuant to MMC Chapter 22D.020 *Parks, Recreation, Open Space and Trail Impact Fees and Mitigation,* the applicant shall mitigate City of Marysville parks impacts through payment of the park impact fees in effect at the time of building permit issuance.

9. **School Impacts**
Pursuant to MMC Chapter 22D.040 *School Impact Fees and Mitigation,* the applicant shall mitigate school impacts through the payment of the school impact fee in effect at the time of building permit issuance.

10. **Utilities**
The following utilities will be provided to the site:

Storm drainage: According to the *Stormwater Site Plan Report* prepared by Land Technologies, Inc., dated February 26, 2024 and revised July 2024, the majority of runoff from impervious surfaces and converted surfaces will be detained. A small portion of the site bypasses facilities for detention. The site as a whole meets the flow control threshold

requirement matching the fully-forested condition. Water quality will be met by percolating stormwater through bioretention treatment soils. The bioretention cell mitigates polluted stormwater through physical, chemical, and biological treatment processes.

All stormwater facilities will be designed in accordance with the 2019 Department of Ecology (DOE) *Stormwater Management Manual for Western Washington*, or as amended.

Water: A 12-inch cast iron (CI) water main is located in 172nd Street NE (SR 531). The water main is required to be extended along the street frontages of the proposed project, including 172nd Street NE (SR 531) and 11th Avenue NE, and within the right-of-way for all new plat roads.

Sewer: Sewer has not been extended to the property. The project will tie in to the force main in 172nd Street at 16th Drive NE, extend sewer within a 20-foot easement through parcels to the east to reach the subject property, and extend within new plat roads to serve the new lots.

All utility improvements will be addressed during civil construction plan review in order to ensure compliance with all of the applicable MMCs.

11. **SEPA**
A State Environmental Policy Act (SEPA) Mitigated Determination of Non-Significance (MDNS) was issued on November 25, 2024 (Exhibit 032). No appeals were filed on the SEPA determination.

12. **Agency Comments:** A *Request for Review* for the proposal was sent to the Local, County, State & Federal Agencies and Districts referenced on Page 1. The following were received; *if above referenced agencies are not listed below, no comments were received*:

	Nature of Comment
Public Works, Developmental Services	• *Provided information regarding the required improvements which are to be further reviewed with Civil Plan Review.* • *Provided information on right-of-way dedication and frontage improvements which are to be further reviewed with Civil Plan Review.* • *Capital facility fees would be required to be paid prior to issuance of the building permit.* • *Sewer has yet to be extended to the project property.* • *Sewer will need to be extended along street frontages of proposed project, and extended within new plat roads.* • *Connection to the force main within 172nd Street NE to this projects extension at 16th Drive NE is required.*
Public Works, Waste Water	*The project is vested under the 2019 Stormwater Management Manual for Western Washington. Formal drainage review will be conducted with formal Civil Plan Review.*
Public Works, Traffic	*Requirements and recommendations are addressed in the approved Traffic Concurrency Recommendation and Acceptance, dated November 18, 2024.*
Marysville Fire District	• *Provided general information related to fire code and hydrant/water supplies.* • *Discussed specific lots that may require fire sprinklers depending on access, height of structures, fire flow, and distance from ROW.* • *Access for fire apparatus appears to be acceptable.*

	Nature of Comment
	• *Fire hydrants shall be provided along the new and existing roadways at approved locations, at all intersections and with spacing not exceeding 300 ft. apart along roadways.*
Building Department	*Provided requirements for the building permit submittal.*
Snohomish County Public Works	*Agreed and accepted applicant's traffic mitigation offer form.*
Snohomish County PUD	• *Snohomish County PUD has adequate system capacity to serve the proposed development, but upgrades may be needed. Securing of easements for the necessary utilities would be required, if applicable.* • *The PUD requires a minimum 14 ft. clearance from any structure to accommodate workers, scaffolding, and ladders. Minimum worker safety clearance from 115kC transmission wires is 20 ft.* • *There is a three-phase overhead feeder circuit that will need to be undergrounded along the street frontage per city of Marysville. One-phase and three-phase service will be required to serve the project. Any relocation, removal or undergrounding of District facilities to accommodate this project and the worker safety clearances shall be at the expense of the project developer and must be coordinated with the PUD in advance of final design.*
WSDOT	*Agreed to use the approved ICE provided the developer submitted a new TIA to evaluate LOS for the approved one-lane RAB. If the one-lane RAB fails, the TIA should propose suitable improvements to the RAB such as right turn lanes.*
Community Transit	• *Provided feedback and direction of potential locations of future bus stops.* • *Provided draft round-about guidelines and access requirements for CT buses.*

13. **Application Review:** MMC 22G.010.140(3) requires the city to determine whether or not the project is consistent with the following items described in the applicable plans and regulations:

a. Type of land use permitted at the site, including uses that may be allowed under certain circumstances, such as planned residential development and conditional uses, if the criteria for their approval have been satisfied.

Staff Comment: The subject property is zoned R-6.5 Single-family, High Density with a portion zoned Mixed Use (MU). PRD subdivisions with single family residences are permitted outright in the R-6.5 zone, but are not a permitted use in the MU zone; however, the MU portion of the property is proposed to be rezoned to R-6.5 to allow for the use. The application has demonstrated compliance with the rezone criteria set forth in MMC Section 22G.010.440, Rezone criteria, as outlined in Sections 14 and 15 of this report.

b. Density of residential development in urban growth areas.

Staff Comment: The base density allowed in the R-6.5 Single-family, High Density zone is 6.5 units per acre; Planned Residential Development developments may increase density by up to 20 percent through the application of the residential density incentive provisions set forth in Chapter 22C.090 MMC. The proposed site has a gross project area of 29.48 acres (1,283,961 sq. ft.)

Based on the definition of "Net Project Area" per MMC 22A.020.150, as an alternative to an itemized deduction, the developer may elect to take a flat 20% deduction from the gross project area for right-of-way, private roads, access easements, and panhandles. Per the site plan of record, the applicant is opting to utilize the flat 20% deduction; therefore, the proposed site has a net project area of 23.58 acres (1,027,169 sq. ft.). The PRD subdivision proposes 182 lots, at a density of 7.72 dwelling units per acre (182 dwelling units per net acre/23.58 net acres) which complies with the density allowance outlined in MMC Section 22C.010.080(2).

The applicant has proposed utilizing RDI benefits pursuant to MMC 22C.090.030 to achieve bonus density. The following is the RDI calculation for the proposed development:

BASE DENSITY – 6.5 DU/Acre	23.58 acres x 6.5 DU/Acre = **153 Units**
MAX DENSITY ALLOWED – 20% above base	153 x 20% = **30 Bonus Units** 153 Units + 30 Bonus Units = **183 Units**
RDI CALCULATION	
Benefit 5a: Developments located within ¼ mile of transit routes, and within 1 mile of fire and police stations, medical, shopping and other community services. (5% increase above base density)	153 base units x 5% = **7 Units**
Benefit 6a: Developments that incorporate active recreation facilities that utilize the stormwater facility tract. (5 bonus units per acre of stormwater tract used for active recreation)	0.50 acres x 5 = **2 Units**
Benefit 6b: Developments that incorporate passive recreation facilities that utilize the stormwater facility tract. (2 bonus units per acre of the stormwater facility tract used for passive recreation)	0.5 acres x 2 = **1 Units**
Benefit 7c: Installation of perimeter fencing or landscaping, in order to improve design compatibility between neighboring land uses. This benefit shall not be pursued when any of the following circumstances apply: (i) fencing or landscaping is otherwise required by code, or (ii) landscaping is voluntarily provided in order to deviate from other code requirements. (1 bonus unit per 500 lineal	4,275 LF/500 = **8 Units**

feet of perimeter fencing or landscaping installed when not otherwise required by code)	
Benefit 7e: Private park and open space facilities integrated into project design. (5 bonus units per improved acre of park and open space area. Ongoing facility maintenance provisions are required as part of RDI approval)	2.58 acres x 5 = **12 Units**
Benefit 7f: Enhanced Entry landscaping. (1 bonus unit per 2,500 square feet of additional enhanced entry landscaped area (when not otherwise required by code). A minimum of 1,000 square feet of entry landscaping of exceptional, outstanding or unique design, as determined by the director, must be provided in order to qualify for this benefit)	19,867 SF/2,500 SF = **7 Units**
RDI BONUS UNITS ALLOWED	**37 Units Earned, Max. 30 Units**
TOTAL BONUS UNITS PROPOSED	**29 UNITS**

c. Availability and adequacy of public facilities identified in the Comprehensive Plan.

Staff Comment: The Comprehensive Plan designation for the subject property is Single-family, High Density and Mixed Use; however, will be only Single-Family, High Density after rezoning. The proposed development and subsequent use of the property will be consistent with the pertinent development policies outlined in the Marysville Comprehensive Plan as conditioned herein.

The following development policies outlined in the Comprehensive Plan that are specifically pertinent to the overall subdivision request, and were used to establish appropriate conditions, are as follows:

- **LAND USE ELEMENT – Policies:** LU-3, LU-5, LU-6, LU-7, LU-10, LU-20, LU-21, LU-23, LU-28, LU-29, LU-30, LU-31, LU-33, LU-34, LU-38, LU-41, LU-43
- **HOUSING ELEMENT – Policies:** HO-4, HO-7, HO-19, HO-25, HO-30, HO-32, HO-37
- **ENVIRONMENTAL ELEMENT – Policies:** EN-17, EN-20, EN-21, EN-26, EN-32
- **TRANSPORTATION ELEMENT – Policies:** T-3, T-7, T-8, T-25, T-27, T-29, T-30, T-40, T-43, T-48
- **UTILITIES ELEMENT – Policies**: UT-1, UT-3, UT-8, UT-14, UT-22
- **PARKS ELEMENT – Policies:** PK-12, PK-13
- **PUBLIC FACILITIES & SERVICES ELEMENT – Policies:**
  - **Police, Fire, Library:** PS-1, PS-3
  - **Schools:** SC-6
  - **Water, Sewer, Storm Drainage, Solid Waste:** PF-1, PF-2, PF-7, PF-9, PF-19, PF-20, PF-22, PF-23, PF-26, PF-28

d. Development Standards.

Staff Comment: The project site is currently zoned R-6.5 Single-family, High Density with a small portion zoned Mixed Use (MU) which is proposed to be rezoned to R-6.5. The R-6.5 zone is a high density single-family residential zone. The major type of new development will be detached single-family residences. It allows single family residences at a base density of 6.5 dwelling units per net project acre; the base density may be increased by a maximum of 20% utilizing Residential Density Incentives outlined in MMC Chapter 22C.090.

Lakewood Neighborhood Master Plan: The subject property is located within the Lakewood Neighborhood Master Plan (LNMP) Area. The project is subject to the design standards set forth in MMC Chapter 22C.065.

The proposed PRD would meet all bulk and dimensional requirements set forth in MMC 22G.080.080(1), *Modification of development regulations*. Demonstrated compliance with said development regulations would be reviewed at time of building permit submittal.

Fifteen percent (15%) (1,027,169 x 15% = 154,075 SF) of the net project area is required to be dedicated as open space with 35% of that total being dedicated as active open space (154,075 x 35% = 53,926) as required by MMC 22G.080.100. As proposed, the total area of dedicated open spaces exceed the required provisions. Improvements within the open space areas would include, but are not limited to, landscaping, benches, picnic tables, play structures, sports courts, and multi-purpose active recreation area.

As proposed and conditioned, the PRD meets all of the requirements set forth in 22G.080.050, *Procedures for review and approval*, including subsections: (a) Consistency with Applicable Plans and Laws, (b) Quality Design, (c) Design Criteria (i), (iii), and (iv), (d) Public Facilities, (e) Consistency with adjacent single family development, (f) Perimeter Design, (g) Open Space and Recreation, (h) Streets, Sidewalks, and Parking, (i) Landscaping, and (j) Maintenance Provisions.

The proposed development and subsequent use of the property would comply with the intent of the R-6.5 zoning as it is proposed to be wholly rezoned to, and as conditioned herein, complies with all of the applicable design and development standards outlined in Title 22 – *Unified Development Code*.

As conditioned, the proposed development makes appropriate provisions for the public use and interest, health, safety and general welfare.

14. **Comprehensive Plan Rezone Criteria:** MMC Section 22G.010.440(1) requires the applicant for a zone reclassification to demonstrate that the proposal is consistent with the Comprehensive Plan, and applicable functional plans, and complies with the following criteria:

a. There is a demonstrated need for additional zoning as the type proposed;

Applicant response: The definition of "need" is to "require (something) because it is essential or very important". In this case, it is very important that first, parcels are aligned in a single zone. Added to this need is that the resulting zones allow for logical boundaries consistent with other adjacent boundaries. Another partial reason for this request is that a portion of the existing MU zone has a choke point between a corner of adjacent properties and the boundary of the existing MU zone. This adjustment allows for more efficient use of the MU Zone. Similar arguments are made in other areas of the site where leaving narrow areas of MU zoning behind existing uses would allow for land that could not be efficiently used as MU and would be more efficiently used as R-6.5 per the current proposed PRD Application.

While it may not be "essential" it is "very important" lands are formed that will allow for efficient uses. This would certainly be consistent with keeping in line with the goals of GMA.

b. The zone reclassification is consistent and compatible with uses and zoning of the surrounding properties;

Applicant response: This is not really a "reclassification" of the zoning, it is simply a trade of area of the zoning on the surrounding properties as they currently exist. Compatibility was an issue of the original decisions to make these zoning classifications. This small trade of areas would not impact the compatibility with surrounding properties.

c. There have been significant changes in the circumstances of the property to be rezoned, or surrounding properties, to warrant a change in classification; and

Applicant response: Again, we are not asking for a change in "classification". We are just asking to adjust existing parcels and zoning boundaries to put each current zoning classification onto one parcel versus split zoning on one parcel. Second, we are wanting to adjust the zoning boundaries to more efficiently "line-up" with adjacent property uses and boundaries.

Since these parcels were originally classified, there has been changes in use and previous Boundary Line Adjustments that ended creating property lines and zoning boundaries that are in need of a little tweaking to make them more efficient.

d. The property is practically and physically suited for the uses allowed in the proposed zone reclassification.

Applicant response: Again, this is not a request to reclassify zoning on any parcel. It is a request to tweak the boundaries of the current zoning to be consistent with surrounding land uses and property boundaries.

The applicant's responses outlined above are excerpted from Exhibit 002. After evaluation of the applicant's written response, and other supporting documentation and application materials, the proposed rezone, as conditioned herein complies with the rezone criteria and applicable development standards outlined in Title 22 MMC, *Unified Development Code*.

15. **Rezone Criteria – Edge of Land Use Districts:** Pursuant to MMC Section 22G.010.440(2), properties at the edges of land use districts can make application to rezone property to the bordering zone without applying for a Comprehensive Plan map amendment is the proponent can demonstrate the following:

a. The proposed land use district will provide a more effective transition point and edge for the proposed land use district than strict application of the comprehensive plan map would provide due to neighboring land uses, topography, access, parcel lines or other property characteristics;

Applicant response: This property is at the "edge" of two land use districts and this proposal is requesting to trade areas of adjacent zoning classifications.

The small tweaks requested have little impact on neighboring land uses and are internal to the property itself. This is not a change in land use districts or classifications. The same zoning is to be applied to each area but the internal boundary for those zones will be slightly altered.

b. The proposed land use district supports and implements the goals, objectives, policies and text of the comprehensive plan more effectively than strict application of the comprehensive plan map; and

Applicant response: We are not changing the "land use district" or classification of the land use. Internally to the parcels involved and to the existing zoning classifications, we are asking for some adjustments to the boundaries and areas. We are essentially "swapping out" a small area zoned R-6.5 to make it MU and trading that area by rezoning a small area that is now MU to R-6.5.

This swap just makes the use of the land per each zoning more efficient without any compromise of to the goals, objectives, policies and text of the comprehensive plan. Since it is internal to the parcels involved, and not adjacent to a non-participating parcel, no other property is possibly impacted by a "change of use".

Modifying the boundaries of these two existing "land use districts" does make each zone more useable. Making each area more usable is consistent with Comprehensive Plan Goal 18 which is to *"Encourage the creation of a more desirable place to live and a quality standard of living for all citizens."*

c. The proposed land use change will not affect an area greater than 10 acres, exclusive of critical areas.

Applicant response: The total affected area is about 3.17 acres with about 1.38 acres going from R-6.5 to Mixed Use and about 1.79 acres going from Mixed Use to R-6.5.

The applicant's responses outlined above are excerpted from Exhibit 002. After evaluation of the applicant's written response, and other supporting documentation and application materials, the proposed rezone, as conditioned herein, will be consistent with the applicable development goals and policies outlined in the Marysville Comprehensive Plan.

16. **Public Hearing Notice.** The public hearing for the proposed request was advertised in accordance with MMC Section 22G.010.110, *Notice of public hearing.*

17. **Hearing Examiner – Required Findings.** MMC 22G.010.170(3) requires that the Hearing Examiner not approve a proposed development without first making the following findings and conclusions:

a. The development is consistent with the comprehensive plan and meets the requirements and intent of the Marysville Municipal Code.

Staff Comment: The Comprehensive Plan designation for the subject property is Mixed Use and R-6.5 Single Family High Density; however, 1.38 acres of the R-6.5 area is proposed to be rezoned to Mixed Use, and 1.79 acres of the Mixed Use area is proposed to be rezoned to R-6.5. This results in a reduction of Mixed Use zoning of approximately 0.42 acres. The proposed development and subsequent use of the property will be consistent with the pertinent development policies outlined in the Marysville Comprehensive Plan and the intent of the Marysville Municipal Code, as conditioned herein. For compliance with specific Comprehensive Plan policies, please see Section 13(c) above.

b. The development makes adequate provisions for open space, environmentally sensitive areas, drainage, streets and other public ways, transit stops, water supply, sanitary wastes, public utilities and infrastructure, parks and recreation facilities, playgrounds, sites for schools and school grounds.

Staff Comment: Based on a review of the preliminary PRD subdivision map and application materials, the development makes adequate provisions for open space, environmentally sensitive areas, drainage, streets and other public ways, transit stops, water supply, sanitary wastes, public utilities and infrastructure, parks and recreation facilities, playgrounds, sites for schools and school grounds.

c. The development is beneficial to the public health, safety and welfare and is in the public interest.

Staff Comment: Per Finding 13(d), the proposed PRD subdivision is beneficial to the public health, safety and welfare and is in the public interest as the PRD subdivision has been designed in accordance with applicable Marysville Municipal Code requirements.

d. The development does not lower the level of service of transportation and/or neighborhood park facilities below the minimum standards established within the comprehensive plan. If the development results in a level of service lower than those set forth in the comprehensive plan, the development may be approved if improvements or strategies to raise the level of service above the minimum standard are made concurrent with the development. For the purpose of this section, "concurrent with the development" is defined as the required improvements or strategies in place at the time of occupancy, or a financial commitment is in place to complete the improvements or strategies within six years of approval of the development.

   Staff Comment: As conditioned, the development does not lower the level of service of transportation and/or neighborhood park facilities below the minimum standards established within the comprehensive plan.

e. The area, location and features of land proposed for dedication are a direct result of the development proposal, are reasonably needed to mitigate the effects of the development, and are proportional to the impacts created by the development.

   Staff Comment: As conditioned, the area, location and features of land proposed for dedication are a direct result of the development proposal, are reasonably needed to mitigate the effects of the development, and are proportional to the impacts created by the development.

18. **Public hearing – Elements considered.** MMC 22G.090.130 requires the hearing examiner provide a basis for approval or disapproval of a proposed subdivision, as follows:

a. Public Use and Interest. Evaluation of the proposed subdivision to determine whether the public use and interest are served by permitting the proposed subdivision.

   Staff Comment: After evaluation of the application materials and other supporting documentation available to the City, staff concludes that, as conditioned, the public use and interest are served by the proposed subdivision.

b. Public Health, Safety and General Welfare. Evaluation of the proposed subdivision to determine whether the public health, safety and general welfare have been served.

   Staff Comment: After evaluation of the application materials and other supporting documentation available to the City, staff concludes that, as conditioned, the public health, safety and general welfare have been served and that the subdivision is consistent with the requirements of RCW 58.17.110.

c. Comprehensive Plan. Evaluation of all elements of the comprehensive plan and its consistency with the proposed subdivision.

   Staff Comment: The proposed subdivision and development of the parcel relate to all elements of the Comprehensive Plan. Compliance with the various elements of the Comprehensive Plan is specifically demonstrated in Section 13(c) above.

   Existing Zoning. Evaluation of existing zoning and its compliance with the proposed subdivision and MMC Chapter 22G.090, Article V, Land Division Requirements.

   Staff Comment: The existing zoning and its compliance with the proposed subdivision and Article V of this chapter, Land Division Requirements has been evaluated. Compliance with specific zoning regulations is demonstrated in Section 13(a)-(d) above.

d. Natural Environment. Evaluation of the impacts and provision for mitigation of all impacts on all elements of the natural environment including topography, vegetation, soils, geology and all environmental issues as defined in the State Environmental Policy Act, Chapter 197-11 WAC, and MMC Chapter 22G.090, Article V , Land Division Requirements.

   Staff Comment: The plat impacts and provision for mitigation of all impacts on all elements of the natural environment including topography, vegetation, soils, geology and all environmental issues have been evaluated pursuant to the State Environmental Policy Act, Chapter 197-11 WAC, Chapter 22E.010, Critical Areas Management, and Chapter 22G.090, Article V, Land Division Requirements has been provided for the project, as conditioned herein.

e. Drainage. Evaluation of all drainage impacts and provisions made for mitigation of all drainage impacts as defined in the city's drainage codes, and MMC Chapter 22G.090, Article V, Land Division Requirements.

   Staff Comment: All drainage impact have been evaluated, and adequate provisions have been made to mitigate for all drainage impacts as defined in the city's drainage codes, and MMC Chapter 22G.090, Article V, Land Division Requirements.

f. Open Space. Evaluation of all impacts and provision for open space as defined in MMC Chapter 22G.090, Article V, Land Division Requirements.

   Staff Comment: The proposed subdivision will be providing open space in accordance with the Planned Residential Development standards and Article V, Land Division Requirements. The proposed open space is of a grade and surface suitable for recreation, and is accessible and conveniently located for use by all residents.

g. Public Systems Capacity. Evaluation of all impacts and provisions made for mitigation of impacts on public systems including parks, schools, and community facilities as defined in MMC Chapter 22G.090, Article V, Land Division Requirements.

   Staff Comment: The applicant will pay mitigation fees for each new dwelling unit in accordance with MMC Chapters 22D.020 and 22D.040 in order to mitigate potential impacts on parks, schools, and community facilities.

h. Public Services. Evaluation of all impacts and provisions made for mitigation of impacts on public services including streets, all public utilities, and fire and police protection as defined in MMC Chapter 22G.090, Article V, Land Division Requirements.

   Staff Comment: The proposed subdivision will construct streets providing appropriate access and circulation to all proposed new lots. Public utilities will be extended to serve all new units in accordance with City standards. Appropriate improvements for fire safety in accordance with the city's fire code will be provided. Capital improvement fees will be collected for water, sewer, and stormwater.

i. Floodplain. Identification of subdivisions proposed in the floodplain and compliance with requirements of this chapter and Chapter 22E.020 MMC, Floodplain Management.

   Staff Comment: The project is not located within an identified floodplain.

2.0 RECOMMENDATION

Based on the foregoing findings and conclusions, review of the application materials and other supporting documentation available to the Community Development Department, and the City's regulatory authority to implement the policies, standards, and regulations of the Marysville Comprehensive Plan and Marysville Municipal Code, the Community Development Department respectfully recommends that the Hearing Examiner ***APPROVE*** the proposed Subdivision and Preliminary Planned Residential Development, known as Lakewood Heights, and make a

RECOMMENDATION OF APPROVAL of the concurrent rezone to City Council for affirmation and adoption by ordinance subject to the following conditions:

1. The preliminary subdivision configuration received on December 3, 2024 (Exhibit 034) shall be the approved plat configuration.
2. Prior to civil construction plan approval, a final landscape plan prepared in accordance with MMC Chapter 22C.120, *Landscaping and Screening*, and MMC Chapter 22C.065, *Lakewood Neighborhood Master Plan Area,* shall be submitted for review and approval.
3. Prior to civil construction plan approval, the applicant shall demonstrate that the active open space is of a grade and surface suitable for recreations as required by MMC Section 22G.080.100(2).
4. Applicant shall install a bus stop/pad in the location determined and approved by Community Transit and/or Washington State Department of Transportation (WSDOT).
5. Prior to civil construction plan approval, a lighting site plan which identifies lighting equipment, locations and standards, and implements the design standards set forth in MMC 22C.065.390 shall be submitted for review and approval. Appropriate lighting levels shall be provided in all areas used by pedestrians or automobiles.
    a. Decorative street-lighting, as required by the City Traffic Engineer and MMC 22C.065.390 shall be installed.
6. The applicant shall connect the existing service station, located at 1411 172nd Street NE, to sanitary sewer. The existing septic system shall be decommissioned in accordance with Snohomish Health District requirements and the septic easement extinguished. Applicant shall be responsible for any/all fees associated with connection.
7. Prior to final PRD subdivision approval, any existing on-site wells, if any, shall be abandoned in accordance with Snohomish Health District requirements.
8. The project shall comply with the phasing plan submitted December 3, 2024 (Exhibit 035), if phasing is pursued.
9. Future homes on lots 12-13, 36-39, 69-70, 88-89, 104, 166-167, 174-175, or as otherwise determined by the Marysville Fire Marshal, shall require installation of approved residential fire sprinkler systems.
10. Direct access from individual lots onto 11th Avenue NE is prohibited.
11. The joint use autocourts shall be constructed with scored concrete, paving blocks, bricks, or other ornamental pavers to clearly indicate that the entire surface is intended for pedestrians as well as vehicles, as outlined in the City of Marysville Design Guidelines and Engineering Design and Development Standard (EDDS) Section 3-219.
12. In order to achieve greater density as permitted by MMC 22G.080.080, the applicant shall be required to comply with MMC Chapter 22C.090 *Residential Density Incentives*. Demonstrated compliance shall be provided with final plat submittal.
    a. Any and all RDI financial contributions shall be paid prior to BSP/Plat recording with Snohomish County, WA.
    b. Any and all RDI improvements/facilities/amenities shall be installed prior to BSP/Plat recording with Snohomish County, WA.
13. Construction of the subdivision and units will be required to comply with all applicable standards outlined the Lakewood Neighborhood Design Standards and Guidelines.
    a. All lots less than 5,000 square feet shall adhere to the Small Lot Design Standards in MMC 22C.010.310.

14. Accessory dwelling units are prohibited pursuant to MMC Section 22G.080.070(1), or as otherwise amended.

15. Per the *Findings and Conclusions* of the Traffic Impact Analysis, the proposed development will impact Snohomish County capital improvement projects. Prior to recording, the applicant shall make payment in the amount of $65,194.00 for traffic impacts on Snohomish County roads to Snohomish County, and provide the City with receipt of payment.

16. The applicant shall submit payment to Lakewood School District No. 306 for school impacts caused by the development in accordance with MMC Chapter 22D.040, *School Impact Fees and Mitigation.* School mitigation fees will be based on the fee schedules in effect at the time an individual building permit application is accepted by the City, and will be required to be paid prior to building permit issuance unless deferred until a time preceding final building inspections being granted.

17. The applicant shall submit payment to the City of Marysville for park impacts caused by the development in accordance with MMC Chapter 22D.020, *Parks, Recreation, Open Space and Trail Impact Fees and Mitigation*. Park mitigation fees will be based on the fee schedules in effect at the time an individual building permit application is accepted by the City, and will be required to be paid prior to building permit issuance unless deferred until a time preceding final building inspections being granted.

18. The applicant shall install a decorative fence (not standard 6' cedar), decorative masonry wall, or other hardscape fencing in the landscape tracts adjacent to 11th Avenue NE, as approved by the Director. Detail shall be provided on civil construction plans.

19. A six-foot sight-obscuring fence may be required as determined by MMC 22G.090.580.

20. The maximum height of any fence located on the front property line is four (4) feet, unless the director finds that a taller fence is required by code for safety.

21. All proposed fencing shall be consistent with MMC 22C.065.120.

22. Prior to final PRD approval, the applicant shall submit to the City for its approval, covenants, deed restrictions, homeowners' association bylaws, and other documents providing for preservation and maintenance of all common open space, parking areas, walkways, landscaping, signs, lights, roads, and community facilities consistent with MMC Section 22G.080.120. All common areas and facilities shall be continuously maintained at a minimum standard at least equal to that required by the City, and shall be approved by the City at the time of initial occupancy. Said restrictive covenants shall also include provisions to address parking enforcement and a statement from a private attorney as the adequacy of the covenants to fulfill the requirement of the PRD.

23. All power lines, telephone wires, television cables, fire alarm systems and other communication wires, cables or line shall be placed underground either by direct burial or by means of conduit or ducts providing service to each building. This applies to frontages along 172nd Street NE, 11th Avenue NE, and all internal plat roads.

24. The project is subject to the seven (7) mitigation measures in the Concurrency Recommendation issued November 18, 2024 (Exhibit 030).

25. The subdivision is subject to the thirteen (13) conditions of approval outlined in the SEPA MDNS issued November 25, 2024 (Exhibit 032).

BEFORE THE HEARING EXAMINER

IN AND FOR THE CITY OF MARYSVILLE

35TH AVENUE COMMUNITY ACTION GROUP, LLC, a Washington limited liability company, Appellant, and THE CITY OF MARYSVILLE; KB HOMES LLC, Respondent.	**NO. PA24-024** **NOTICE OF APPEAL (MMC 22G.010.550)**

COMES NOW the Appellant, 35TH AVENUE COMMUNITY ACTION GROUP, LLC, by and through its attorney, William B. Foster, and submit this Notice of Appeal.

1. Decision Appealed. The Appellant hereby appeals the following decision(s): The issuance of The Mitigated Determination of Non-Significance ("MDNS") dated the 6th day of November, 2024 issued by the City of Marysville.[1].

2. The Appellant. The Appellant is:

35TH AVENUE COMMUNITY ACTION GROUP, LLC
c/o Mike Soderstrom
10117 – 35th Drive NE
Marysville, Washington 98270
Telephone: (425) 263-0080
Email: mjsody@gmail.com

Appellant's attorney:

2.1. **WILLIAM B. FOSTER, INC., P.S.**
Attn: William B. Foster
1907 Everett Avenue
Everett, Washington 98201
Telephone: (425) 776-2147

[1] Exhibit 1.

Facsimile: (425) 776-2140
Email: bfosteresq@comcast.net

3. Standing of Appellants. The Appellants are a limited liability company whose members are property owners of real property located in the vicinity of the proposed project. The Appellant is aggrieved by the decision appealed as owners of the real property that is the subject of the MDNS identified above, and is adversely affected by the issuance of the MDNS.

4. Decision Appealed. The Decision that is the subject of this Appeal is that certain MDNS issued by the City of Marysville (the "City") dated November 6, 2024, Exhibit 1 hereto.

5. Grounds for Appeal. This Appeal is based upon the following:

5.1. On the 6th day of November, 2024, the City issued a MDNS for the project identified above. The MDNS concluded that "this proposal does not have a probable significant adverse impact on the environment".

5.2. The City knew, or should have reasonably known, that the City's Decision to issue the MDNS were arbitrary, capricious, unlawful, and/or exceeded the City's lawful authority under the United States Constitution Amendment XIV regarding due process, Washington State Constitution Article 11, Section 11 regarding police powers, RCW 82.02.020, RCW 43.21C.030, 43.21C.033 and 43.21C.060, RCW 36.70B.060, Marysville Municipal Code, and common law based on the following reasons:

5.3. The City acted in an arbitrary, capricious and unlawful manner and/or exceeded the City's lawful authority, and erred in issuance of the MDNS;

5.4. The director committed an error of law or misinterpreted the applicable city regulation, ordinance or other state law or regulation;

5.5. The director's findings, conclusions and/or conditions are not supported by the record; and/or

5.6. Newly discovered evidence alleged to be material to the director's decision which could not reasonably have been produced prior to the director's decision.

6. Factual Basis of Appeal.

6.1. Standing of the Appellants. The Appellants are a group of residents owning property north of the proposed project. The Appellants will be adversely affected if the project is approved as proposed.

6.2. The Appellants only access to their respective parcels via 35th Avenue N.E., a public street. That access requires the use of the intersection of 88th Street N.E. and 36th Avenue NE. Access is further limited by the existence of train tracks located west of 88th Street N.E. and State Avenue, a public street.

6.3. The Appellants have no alternative access to their respective parcels other than stated above. This access is also the only access to the Appellants parcels for Fire, law enforcement or other similar emergency service providers.

6.4. The access afforded the Appellants under current conditions is inadequate. Often times during each day the traffic on 88th Street N.E. is severely congested and vehicles attempting to reach 36th Avenue NE are unable to do so because of the congestion. This congestion also restricts access to the Appellants properties by Fire, law enforcement or other similar emergency service providers. This traffic congestion is further impacted when a train is traveling along the train tracks that parallel State Avenue, resulting in a complete traffic stoppage between Interstate 5 (to the west) and State Avenue (to the east).

6.5. The addition of 509 additional daily trips will exacerbate the existing conditions to a point where the traffic congestion will result in a level of service ("LOS") that is below the LOS that is acceptable in the City.

6.6. Many of the Appellants' properties obtain water through private wells. The surface water that will be generated by the additional impermeable surfaces that result from 59 additional dwelling units threatens contamination of these private wells, depriving the residents of potable water.

7. Conclusion. The Appellant respectfully submits that the MDNS be withdrawn, and the Director issue a revised MDNS which includes additional mitigating

factors to address the significant impacts that will result from the approval of this land use application. In the alternative the City should withdraw the MDNS and issue a Determination of Significance.

DATED THIS 16th day of November, 2024.

William B. Foster
Attorney/Agent of Appellants

Date Issued:	**November 6, 2024**

Scan to View Project Materials

Project Description: The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.

SEPA Threshold Determination: The lead agency has determined that this proposal does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is NOT required under RCW 43.21C.030(2)(c). This decision was made after review by the City of Marysville of a completed environmental checklist and other information on file with this agency. This information is available for public review upon request.

Public Comment Period: This MDNS is subject to a 14-day comment period. Written comments may be submitted by mail or e-mail to the lead agency's SEPA contact person. Comments must be received by **November 20, 2024**.

Appeals: This MDNS may be appealed pursuant to the requirements of MMC 22E.030.180. Any appeal must be accompanied by a filing fee of $500.00 and be filed in writing at the City of Marysville Community Development Department, 501 Delta Avenue, Marysville, WA 98270. The appeal must be received by 4:30 p.m., by **November 20, 2024**. The appeal must contain the items set forth in MMC 22G.010.530.

Date

ENVIRONMENTAL IMPACTS	
The proposed construction and subsequent use of the property could result in the following adverse environmental impacts:	
1.	Increase in the amount and rate of stormwater runoff and attendant pollutants from the introduction of paved and building roof surfaces.
2.	Increase in erosion, surface water pollutants, siltation and sedimentation as a result of site preparation and construction.
3.	Increase in demand for police, fire protection, parks and other public services generated as a result of the development.
4.	Increase in noise, dust, light and glare from construction activity and subsequent use of the site.
5.	Increase in vehicular traffic on 36th Ave NE, 35th Ave NE, and 98th St NE, as well as other City streets and arterials in the vicinity.
MITIGATION MEASURES	
The following mitigation measures are required to minimize the probable significant adverse environmental impacts as a result of the proposed development activity:	
1.	Prior to civil construction plan approval, the applicant shall be required to submit a FINAL Geotechnical Assessment, prepared by a Professional Engineer registered in the State of Washington. Additionally, the applicant/contractor shall be required to adhere to the recommendations of the FINAL Geotechnical Assessment. Prior to granting occupancy permits, the applicant shall provide a letter from the project engineer to verify that final project grading has been completed consistent with the approved grading plans; that all recommendations outlined in the Geotechnical Assessment and subsequent amendments have been followed; and that all fill has been properly placed.
2.	If at any time during construction archaeological resources are observed in the project area, work shall be temporarily suspended at that location and a professional archaeologist shall document and assess the discovery. The Department of Archaeology and Historic Preservation (DAHP) and all concerned tribes shall be contacted for any issues involving Native American sites. If project activities expose human remains, either in the form of burials or isolated bones or teeth, or other mortuary items, work in that area shall be stopped immediately. Local law enforcement, DAHP, and affected tribes shall be immediately contacted. No additional excavation shall be undertaken until a process has been agreed upon by these parties, and no exposed human remains should be left unattended.
3.	Prior to civil construction plan approval, all trees identified to be retained per Tree Conservation Plan, prepared by Soundview Consultants, LLC, dated August 28, 2024, shall be clearly identified on the grading plans. Prior to commencement of ground disturbing activities, all retained trees shall be protected and marked in the field.
4.	Prior to civil construction plan approval, the on-site septic systems shall be decommissioned in accordance with WAC 246-272A-0300. Documentation demonstrating that the septic systems have been decommissioned shall be submitted prior to final plat approval.
5.	Any existing on-site well(s) shall be decommissioned in accordance with WAC 173-160-381. A copy of the well(s) contractor's decommissioning report(s) shall be submitted prior to final plat approval.
6.	The applicant shall prepare and provide a geotechnical wet season groundwater monitoring report to verify seasonal high water table depth and determine if ground water mounding analysis is required. The results of said monitoring shall be provided to the City prior to recording the final plat.
7.	Prior to civil plan approval, the applicant shall complete and provide a hydrogeologic site review and design report, prepared by a professional hydrogeologist, to supplement the stormwater design and address concerns pertaining to proposed stormwater infiltration Best Management Practices (BMPs) in the vicinity of existing wells surrounding the project site.

8.	The applicant shall develop an Operation and Maintenance Plan for the stormwater system that includes provisions for regular and perpetual maintenance of the infiltration BMPs, including replacement and/or reconstruction of any media relied upon for Runoff Treatment purposes.
9.	Pursuant to MMC 22D.030.070(6)(a)(ii), the traffic concurrency determination and the project's impacts and mitigation obligations shall expire upon expiration of the subdivision. The project is subject to the traffic mitigation obligations as required by the Traffic Concurrency Recommendation (Exhibit 021), dated October 16, 2024.

APPEALS

☒ This (M)DNS may be appealed pursuant to the requirements of MMC 22E.030.180. There is a 14-day appeal period on the DNS that commences from the date the (M)DNS was issued. Any appeal must be addressed to the responsible official, accompanied by a filing fee of $500.00, and be filed in writing at the City of Marysville Community Development Department, 501 Delta Avenue, Marysville, WA 98270. The appeal must be received by 4:30 p.m., **November 20, 2024.** The appeal must contain the items set forth in MMC 22G.010.530.

☐ There is no agency appeal.

Re: **Preliminary ~~Binding Site Plan~~ Subdivision / PRD Application – Project Narrative**
Stevens Planned Residential Development
3609 98th Street NE, Marysville, WA

Dear Ms. Morgan,

Latta Engineering, PLLC has prepared this project narrative letter to briefly summarize and supplement the referenced preliminary ~~binding site plan~~ Subdivision / planned residential development application.

Subject Property Background

The Stevens Planned Residential Development (Stevens PRD) is a proposed single family residential subdivision fronting 35th Avenue NE and 98th Street NE within the NW ¼ SW ¼ of Section 6, Township 30 North, Range 5 East, WM, City of Marysville, Snohomish County, WA.

The 13.676 acre subject property area is comprised of seven separate parcels (addressed 9815, 9907, 9909, 9921 35th Avenue NE and 3609, 3625, 3705 98th Street NE) in Marysville, Washington (Tax Parcel Numbers: 30051600301400, 30051600301500, 30051600301600, 30051600304500 30051600304501, 30051600305800, 30051600306500, 30051600306600).

The subject property zoning is R-4.5 (Medium Density Single Family Residential). A project vicinity map is enclosed which illustrates the subject property location and surrounding area.

Project Description

The preliminary project application is proposing a 59 lot planned residential subdivision development (single family detached dwellings) on the 13.676 acre site complete with new public roads, urban civil utilities, storm water management facilities, open space recreation areas and landscaping. The project will be served by urban utilities including City water and sewer that is available adjacent to the site. Public sewer will be extended to the site from 94th Place NE at 35th Ave NE (approx. 1,100 LF offsite sewer extension).

The project build-out is proposed to be constructed over a single phase. The "net project area" used for lot density calculations is 10.941 acres (i.e. 13.676 acre gross subject area less the flat 20% deduction for public right of way and private access road tracts per MMC 22A.020.150(6)).

The proposed lot density of 5.4 dwelling units per acre for the R-4.5 zoned net project area (4.5 base density increased utilizing a PRD bonus density) equates to 59 lots in total for the planned residential subdivision development.

Residential density incentives are proposed in accordance with MMC 22C.090 to achieve the proposed 59 lot density. A detailed summary of the proposed lot density and residential density incentives is provided on Sheet C-1 of the plat site plan application drawing set.

Open space and recreation facilities are proposed that are effectively integrated into the development to serve the proposed future PRD residents. A total of 15.6% of the net project area (1.709 acres) is proposed to be set aside as open space tracts with a combination of active and passive recreation elements in accordance with MMC 22G.080.100.

Project Concurrency Summary

The following information is provided to summary the overall project concurrency for the PRD application:

Date of Plat Submittal:	August 1, 2024
Project name:	Stevens Planned Residential Development
Project development schedule:	Anticipate construction to commence in the spring of 2025
Acreage of the Subject Property:	13.676 Ac
Legal description of the Subject Properties:	See attached information (Civil Sheet C-1, and property title report)
Tax Parcel ID No. of the Subject Properties:	30051600301400, 30051600301500, 30051600301600 30051600304500 30051600304501, 30051600305800 30051600306500, 30051600306600
Existing use of the Subject Property:	Single Family Residential
Proposed use:	Medium Density Residential (Single-Family Detached)
Proposed site design information:	See attached preliminary plat civil plans.
Phasing information:	Single Phase (59 lots)
Transportation concurrency:	See attached Traffic Analysis report by Kimley-Horn and Associates, Inc. with required traffic mitigation fees per City of Marysville requirements.
Open Space Recreation:	Open space tracts proposed with active and passive recreation in accordance with MMC 22G.080.100 per City of Marysville requirements.
Potable Water and Fire Flow:	Information provided by City Public Works staff indicate there is adequate water and available fire flow at the site to serve the proposed 59 single family residential lots.
Sewer:	Information provided by City Public Works staff indicate there is adequate sewer capacity to serve the proposed 59 single family residential lots (with 1,100 LF offsite sewer extension).

If you have any questions or require additional information about this project, please do not hesitate to call the undersigned at (360) 671-7002.

Sincerely,

Latta Engineering, PLLC

Re: Planned Residential Development (PRD) Decision Criteria Narrative Summary
Stevens Planned Residential Development (PREA 24-007)
3609 98th Street NE, Marysville, WA

Dear Ms. Morgan,

Latta Engineering, PLLC has prepared this narrative summary letter for the referenced project to demonstrate compliance with the Planned Residential Development (PRD) standards as outlined in MMC 22G.080.050(2). Below is a full outline of MMC 22G.080.050(2) in italic text with a corresponding narrative summary demonstrating PRD design compliance for the project.

MMC 22G.080.050(2) - Decision Criteria. It is the responsibility of the applicant to demonstrate the criteria have been met. The city may place conditions on the PRD approval in order to fulfill the requirements and intent of the city's development regulations, comprehensive plan, and subarea plan(s). The following criteria must be met for approval of a PRD to be granted:

(a) Consistency with Applicable Plans and Laws. The development will comply with all applicable provisions of state law, the Marysville Municipal Code, comprehensive plan, and any applicable subarea plan(s).

PRD Design Compliance:

- The PRD site plan and preliminary plat has been designed to comply with all applicable provisions of state law, Marysville Municipal Code and comprehensive plan.

(b) Quality Design. The development shall include high quality architectural design and well conceived placement of development elements including the relationship or orientation of structures.

PRD Design Compliance:

- The site plan design provides an efficient configuration with lots that access and are oriented to the public roads and private shared driveways. The PRD lot configuration has been designed to ensure no direct vehicular access to the 98th Street NE frontage. Enhanced landscaping in open space tracts adjacent to 98th Street NE which will create a beautiful and appealing streetscape.
- Proposed homes within the PRD will be designed to vary the size, architectural features, window placement, colors, siding materials and other elements on adjacent houses in order to provide unique differentiation (see attached architectural renderings for reference). The architectural designs will be similar to structures that have previously been approved for PRD construction by the City of Marysville after demonstrating compliance with City codes and requirements.

(c) Design Criteria. Design of the proposed development shall achieve two or more of the following results above the minimum requirements of this title and Chapters 22G.090 and 22G.100 MMC; provided, that such design elements may also be used to qualify for residential density incentives as provided in Chapter 22C.090 MMC:

(i) Improving circulation patterns or the screening of parking facilities;
(ii) Minimizing the use of impervious surfacing materials;
(iii) Increasing open space or recreational facilities on site;
(iv) Landscaping, buffering, or screening in or around the proposed PRD;
(v) Providing public facilities;
(vi) Preserving, enhancing, or rehabilitating natural features of the subject property such as significant woodlands, wildlife habitats or streams;
(vii) Incorporating energy-efficient site design or building features;
(viii) Incorporating a historic structure(s) or a historic landmark in such a manner as preserves its historic integrity and encourages adaptive reuse.

PRD Design Compliance:

- Item (iii) - The project design proposes a joint use open space area (Tract 999) that will provide active recreation facilities and an underground stormwater vault. The joint use of Tract 999, and placing the stormwater management facilities underground, is an efficient use of land that is not a standard requirement of the code and also serves to reduce the overall effective impervious surface area within the project.
- Item (iv) - The site plan design provides landscaping and perimeter fence screening around the proposed PRD lots,

(d) Public Facilities. The PRD shall be served by adequate public facilities including streets, bicycle and pedestrian facilities, fire protection, water, storm water control, sanitary sewer, and parks and recreation facilities.

PRD Design Compliance:

- The onsite public roads are proposed to provide access to the site via 35th Avenue NE and 98th Street NE. All proposed lots within the PRD will have vehicle access via the new public roads with no direct access to 98th Street NE being proposed. Private shared driveways are also included in the site development plan. These access facilities will provide adequate vehicular, bicycle and pedestrian facilities to serve the proposed development.
- Public water and sanitary sewer mains will extend through the site and provide adequate services to all lots. The proposed access roads and new water main with multiple fire hydrants throughout the site will provide adequate fire protection for the project.
- Storm water detention and water quality will be provided in accordance with City Standards via an underground Stormtech chamber infiltration facilities proposed within Tracts 999, 997 and 996.
- Community open space areas and recreation facilities will be provided in Tracts 999 and 998. The recreational facilities include a pickleball multi-use sports court, playground structure, picnic tables and park benches for the residents of the project.

(e) When PRDs are located within or adjacent to single-family residential zones and are, or may be, surrounded by traditional development with detached dwelling units, PRDs shall be designed and developed so as to be consistent with a single-family residential environment. If attached dwellings and multiple-family dwellings are part of the PRD they will be dispersed throughout the project to create an integrated mix of housing types.

PRD Design Compliance:

- The proposed PRD is located within the ~~High Density~~ Medium Single Family ~~(R-6.5)~~ (R-6.5) residential zone. The proposed project only consists of single-family detached dwelling on platted lots and is consistent with the existing and proposed surrounding single-family residential environment. No multi-family units or duplexes are proposed.

(f) Perimeter Design. The perimeter of the PRD shall be compatible in design, character, and appearance with the existing or intended character of development adjacent to the subject property and with the physical characteristics of the subject property.

PRD Design Compliance:

- The proposed PRD will only include single-family detached dwellings on platted lots which is consistent with a single-family residential environment.

(g) Open Space and Recreation. Open space and recreation facilities shall be provided and effectively integrated into the overall development of a PRD and surrounding uses.

PRD Design Compliance:

- Community open space areas and recreation facilities are proposed in Tracts 998 and 999. These areas are adjacent to and easily accessible from the public right-of-way and streets serving the project. These open space tracts and recreation facilities are within walking distance of all lots within the plat. Enhanced landscaping open space areas are proposed adjacent to the 98th Street NE frontage in Tracts 997 and 996.

(h) Streets, Sidewalks and Parking. Existing and proposed streets and sidewalks within a PRD shall be suitable and adequate to carry anticipated motorized and pedestrian traffic within the proposed project and in the vicinity of the subject property. A safe walking path to schools shall be provided if the development is within one-quarter mile of a school (measured via existing or proposed streets or pedestrian corridors) or if circumstances otherwise warrant. Adequate parking shall be provided to meet or exceed the requirements of the MMC.

PRD Design Compliance:

- Proposed internal streets within the PRD project will include two 14 ft travel lanes, 5 ft wide concrete sidewalks and planter strips on each side of the street per City standard plan 3-218-001 (PRD Access Street with Street Parking).
- Access along the proposed 35th Avenue NE extension will include two 10 ft travel lanes and a 5 ft wide concrete sidewalk and planter strip on the east side of the street per City standard plan 3-218-002 (PRD Access Street).
- The project frontage, 98th Street NE, is classified as a local access street (per City standard plan 3-202-002) which will be improved via ¾ street improvements (14 ft westbound travel lane with curb, gutter and sidewalk on the north side of the street and a 12 ft travel lane with a gravel shoulder only on the south side of the street).
- The 98th Street NE and 35th Avenue NE frontage improvements will include street and sidewalk improvements that will provide pedestrian connectivity to the adjacent neighborhoods and local bus stops. Each single family dwelling unit / lot will have a minimum of three parking stalls (i.e. a minimum of 177 parking stalls onsite). Additional onsite parking will be provided along the PRD interior public roads.

(i) Landscaping. Landscaping shall be provided for public and semi-public spaces and shall integrate them with private spaces. Landscaping shall create a pleasant streetscape and provide connectivity between homes and common areas, using trees, shrubs, and groundcover throughout the development and providing for shade and visual relief while maintaining a clear line of sight throughout the public and semi-public spaces.

PRD Design Compliance:

- Landscaping is proposed along all streetscape and park areas to create pleasing visual relief, shade, adequate visual lines of site, and connectivity throughout the development with evergreen and

deciduous trees, street trees, shrubs and groundcovers. The houses and private areas will also be landscaped when the homes are constructed to provide additional landscape and continuity throughout the plat for additional shade and visual relief.

- Existing significant trees on the site were located by the Project Surveyor and reviewed by the Project Arborist. Significant trees along the project perimeter, within proposed lot rear yard areas, that do not constitute a safety hazard and do not adversely constrain the buildable lot areas will be retained per the project Arborist's recommendations.
- Temporary orange clearing limit construction fencing shall be installed to the dripline of all significant trees to be retained.

(j) Maintenance Provisions. A means of maintaining all common areas, such as a homeowners' association, shall be established, and legal instruments shall be executed to provide maintenance funds and enforcement provisions.

PRD Design Compliance:

SUBDIVISION

- Prior to recording the FINAL ~~BSP~~/PRD, the applicant will create a home owners association for the project and shall record final restrictive CCR's as required by MMC 22G.080.120 that will define the maintenance requirements and responsibilities of the homeowners

---

SCHEDULE B

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto.

H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.

I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

J. Water rights, claims or title to water.

K. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

SCHEDULE B
(continued)

SPECIAL EXCEPTIONS

1. No search has been made as to property taxes and assessments. Property taxes and assessments will be searched upon request.

THE FOLLOWING MATTERS AFFECT PARCEL A:

2. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1190796

3. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1209089

4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution line
   Recording Date: March 12, 1965
   Recording No.: 1765370
   Affects: Lots 1 and 2 and other property

   The exact location and extent of said easement is not disclosed of record.

5. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County
   Purpose: Electric transmission and/or distribution line
   Recording Date: December 17, 1973
   Recording No.: 2323218
   Affects: West 65 feet of the South 140 feet of Lot 4

6. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a Statutory Warranty Deed:

   Purpose: Ingress, egress and utilities
   Recording Date: December 10, 1975
   Recording No.: 2416806
   Affects: West 20 feet of Lots 1 and 2 and other property

SCHEDULE B
(continued)

7. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. 103 (5-78):

   Recording No: 7805170302

8. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	City of Marysville
Purpose:	Storm sewer and sanitary sewer lines, water lines, pipes and appurtenances
Recording Date:	April 9, 2001
Recording No.:	200104090756
Affects:	West 30 feet of Lot 1

9. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	City of Marysville
Purpose:	Storm sewer and sanitary sewer lines, water lines, pipes and appurtenances
Recording Date:	April 9, 2001
Recording No.:	200104090757
Affects:	West 30 feet of Lot 2

10. Mobile home improvements are expressly excluded.

11. It appears Bonnie Stevens is deceased. The Company finds no probate of the decedent's estate in Snohomish County County. This commitment is therefore subject to the rights of heirs and devisees, creditors (including liens under RCW 43.20B.080), liability for inheritance tax, or other matters that a probate of the estate might disclose.

    If we are requested to insure title passing outside of probate, the Company will require the following:
    a. Completed, signed and acknowledged Lack of Probate Affidavits (both the Company's internal underwriting version and the shorter version for recording).
    b. A certified copy of the Death Certificate.
    c. A copy of the Community Property Agreement, if any.
    d. A copy of the decedent's Will and codicils, if any.
    e. A Real Estate Excise Tax Affidavit executed by the inheriting party(ies), to file at the time of recording the Lack of Probate Affidavit, as required by WAC 458-61A-202(6).

    The Company reserves the right to make additional requirements upon review.

12. Memorandum of Agreement and the terms and conditions thereof:

Recording Date:	July 11, 2024
Recording No.:	202407110061

SCHEDULE B
(continued)

13. Any unrecorded leaseholds, right of vendors and holders of security interests on personal property installed upon the Land and rights of tenants to remove trade fixtures at the expiration of the terms.

THE FOLLOWING MATTERS AFFECT PARCEL B:

14. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

Grantor: State of Washington
Recording No.: 1209089

15. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Purpose: ingress, egress and utilities
Recording Date: August 10, 1962
Recording No.: 1551572
Affects: West 20 feet

16. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to: Public Utility District No. 1 of Snohomish County
Purpose: Transmission and/or distribution system
Recording Date: March 12, 1966
Recording No.: 1765370

17. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to: General Telephone Company of Northwest Inc.
Purpose: Right of Way Easement
Recording Date: August 13, 1969
Recording No.: 2108228
Affects: North 3 feet of the West 190 Feet of Subject Property

18. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat Number 173(3-78):

Recording No: 7805170302

19. Road Maintenance Agreement and the terms and conditions thereof, as contained in City of Marysville Short Plat Number 173 (3-78) recorded under recording number 7805170302.

Recording Date: May 17, 1978
Recording No.: 7805170302

SCHEDULE B
(continued)

20. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to: City of Marysville
Purpose: storm sewer and sanitary sewer lines
Recording Date: April 9, 2001
Recording No.: 200104090758

Recording Date: December 11, 2020
Recording No.: 202012110574

SCHEDULE B
(continued)

31. A deed of trust to secure an indebtedness in the amount shown below,

Amount:	$100,000.00
Dated:	August 20, 2022
Trustor/Grantor:	Isaac Steimle and Rebekah Steimle, husband and wife
Trustee:	Trustee Services, Inc.
Beneficiary:	Boeing Employees' Credit Union
Recording Date:	August 30, 2022
Recording No.:	202208300421

The Deed of Trust set forth above is purported to be a “Credit Line” Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.

THE FOLLOWING MATTERS AFFECT PARCEL D:

32. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

Grantor:	State of Washington
Recording No.:	1209090

Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.

33. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
Purpose:	Electric transmission and/or distribution system
Recording Date:	December 27, 1962
Recording No.:	1581756
Affects:	Portion of said premises

34. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):

Recording No: 8003100173

Said short plat is a revision of short plat recorded under Recording No. 7810200401.

SCHEDULE B
(continued)

35. The property herein described is carried on the tax rolls as partially exempt under a Senior Citizen's exemption and the assessed values have been "frozen." If said taxes are not paid prior to the sale by or death of the qualifying taxpayer, the exemption will be disallowed, the assessed value will be adjusted and the full tax amount for the current and/or prior years, if any, will be due:

Levy Code: 00511
Estimated amount of tax without exemption, including special taxes and charges: $ 3,133.61

36. A deed of trust to secure an indebtedness in the amount shown below,

Amount:	$101,900.00
Trustor/Grantor:	Stanley G. Hipkiss and Christine J. Hipkiss, husband and wife
Trustee:	First American Title Insurance Company
Beneficiary:	Metlife Home Loans
Recording Date:	June 27, 2011
Recording No.:	201106270341

37. Memorandum of Agreement and the terms and conditions thereof:

Recording Date:	July 11, 2024
Recording No.:	202407110062

THE FOLLOWING MATTERS AFFECT PARCEL E:

38. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

Grantor: State of Washington
Recording No.: 1209090

Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.

39. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
Purpose:	Electric transmission and/or distribution system
Recording Date:	December 27, 1962
Recording No.:	1581756
Affects:	Portion of said premises

SCHEDULE B
(continued)

40. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):

Recording No: 8003100173

Said short plat is a revision of short plat recorded under Recording No. 7810200401.

41. Declaration of Covenant and the terms and conditions thereof:

Recording Date: November 16, 2010
Recording No.: 201011160271

42. Accessory Dwelling Unit and the terms and conditions thereof:

Recording Date: December 1, 2010
Recording No.: 201012010695

43. A deed of trust to secure an indebtedness in the amount shown below,

Amount: $50,000.00
Trustor/Grantor: Kelly M. Gleason and Kathleen Gleason, a married couple
Trustee: Trustee Services
Beneficiary: Qualstar Credit Union
Recording Date: December 2, 2013
Recording No.: 201312020470

The Deed of Trust set forth above is purported to be a “Credit Line” Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.

44. A deed of trust to secure an indebtedness in the amount shown below,

ALTA COMMITMENT FOR TITLE INSURANCE

issued by agent:

CHICAGO TITLE
COMPANY OF WASHINGTON

Commitment Number:

500150006

NOTICE

IMPORTANT - READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, Chicago Title Insurance Company, a Florida corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within one hundred eighty (180) days after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

EXHIBIT "A"

Legal Description

For APN/Parcel ID(s): 300516-003-016-00

LOT 1 OF SHORT PLAT 182 (4-78) RECORDED UNDER RECORDING NO. 8003100173, A REVISION OF SHORT PLAT RECORDED UNDER RECORDING NO. 7810200401, BEING A PORTION OF THE NORTHWEST QUARTER OF THE SOUTHWEST QUARTER OF SECTION 16, TOWNSHIP 30 NORTH, RANGE 5 EAST, W. M., RECORDS OF SNOHOMISH COUNTY, WASHINGTON.

SITUATE IN THE COUNTY OF SNOHOMISH, STATE OF WASHINGTON.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

5. Additional requirements and/or exceptions may be added as details of the transaction are disclosed to, or become known by the Company.

6. If the Seller or Borrower intends to sign documents required to insure the transaction utilizing a remote online notary, please notify the Company immediately as additional underwriting requirements will need to be satisfied.

7. Payment of the real estate excise tax, if required.

   The Land is situated within the boundaries of local taxing authority of the City of Marysville.

   The rate of real estate excise tax for properties which are not formally classified and specially valued as timberland or agricultural land is:

   State portion: 1.10% on any portion of the sales price of $525,000 or less;
   1.28% on any portion of the sales price above $525,000, up to $1,525,000;
   2.75% on any portion of the sales price above $1,525,000, up to $3,025,000;
   3.00% on any portion of the sales price above $3,025,000;

   The rate of excise for properties formally classified as timberland or agriculture land will be 1.28% for the State portion on the entire sales price.

   Local portion: 0.50% on the entire sales price.

   An additional $5.00 State Technology Fee must be included in all excise tax payments.

   If the transaction is exempt, an additional $5.00 Affidavit Processing Fee is required.

   Any conveyance document must be accompanied by the official Washington State Excise Tax Affidavit, which can be found online HERE <https://dor.wa.gov/get-form-or-publication/forms-subject/real-estate-excise-tax>. The applicable excise tax must be paid and the affidavit approved at the time of the recording of the conveyance documents. (NOTE: Real Estate Excise Tax Affidavits must be printed as legal size forms).

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements
(continued)

8. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below.

   Limited Liability Company: KBHPNW LLC

   a. A copy of its operating agreement, if any, and any and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.

   b. If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendment thereto with the appropriate filing stamps.

   c. If the Limited Liability Company is member-managed a full and complete current list of members certified by the appropriate manager or member.

   d. A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created

   e. If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

END OF REQUIREMENTS

NOTES

The following matters will not be listed as Special Exceptions in Schedule B of the policy. There will be no coverage for loss arising by reason of the matters listed below because these matters are either excepted or excluded from coverage or are not matters covered under the insuring provisions of the policy.

Note A: Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

Note B: The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

SCHEDULE B, PART I - Requirements
(continued)

Note C: Note: FOR INFORMATIONAL PURPOSES ONLY:

The following may be used as an abbreviated legal description on the documents to be recorded, per Amended RCW 65.04.045. Said abbreviated legal description is not a substitute for a complete legal description within the body of the document:

LT 1, SP NO. 182 (4-78), REC# 8003100173
Tax Account No.: 300516-003-016-00

Note D: Note: The Public Records indicate that the address of the improvement located on said Land is as follows:

9815 35th Avenue Northeast
Marysville, WA 98270

Note E: Note: There are NO conveyances affecting said Land recorded within 36 months of the date of this report.

Note F: Note: The Company finds no matters against the name(s) of KBHPNW LLC in the Public Records which would appear as exceptions in the policy.

Note G: Note: This map/plat is being furnished as an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances or acreage shown thereon.

Note H: Recording charges (per document title) for closings on January 1, 2024 and after for all Washington counties:

Deed of Trust - $304.50 and $1 for each additional page.
Most other Docs, except as noted below - $303.50 and $1 for each additional page.
Assignment of Deed of Trust, Substitution or Appointment of Successor Trustee - $18.00 and $1 for each additional page.
Multiple titled documents are charged per applicable title.

Our Company uses Simplifile, a third party vendor, for electronic submission of documents to the County. In addition to the County recording fee each document recorded electronically will be billed an additional $4.25 plus tax.

RECORDING CHARGES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

END OF NOTES

END OF SCHEDULE B, PART I

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto.

H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.

I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

J. Water rights, claims or title to water.

K. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions
(continued)

SPECIAL EXCEPTIONS

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1209090

   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.

2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Purpose: Ingress, egress and utilities
   Recording Date: August 17, 1962
   Recording No.: 1553273

3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution system
   Recording Date: December 27, 1962
   Recording No.: 1581756
   Affects: Portion of said premises

4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209

5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):

   Recording No: 8003100173

   Said short plat is a revision of short plat recorded under Recording No. 7810200401.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

SCHEDULE B, PART II - Exceptions
(continued)

6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:

   Recording Date: July 26, 1999
   Recording No.: 199907260975

7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines and/or water lines
   Recording Date: February 12, 2001
   Recording No.: 200102120728
   Affects: Portion of said premises

8. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):

   Year: 2024
   Tax Account No.: 300516-003-016-00
   Levy Code: 00511
   Assessed Value-Land: $272,800.00
   Assessed Value-Improvements: $219,700.00

   General and Special Taxes:
   Billed: $3,927.28
   Paid: $0.00
   Unpaid: $3,927.28

9. A deed of trust to secure an indebtedness in the amount shown below,

   Amount: $282,276.00
   Dated: December 7, 2020
   Trustor/Grantor: Isaac A. Steimle and Rebekah L. Steimle, who acquired title as Isaac Steimle and Rebekah Steimle, husband and wife
   Trustee: George C. Reinmiller Trustee Inc
   Beneficiary: Mortgage Electronic Registration Systems, Inc., solely as nominee for Boeing Employees' Credit Union
   Loan No.: 336148
   Recording Date: December 11, 2020
   Recording No.: 202012110574

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions
(continued)

10. A deed of trust to secure an indebtedness in the amount shown below,

Amount:	$100,000.00
Dated:	August 20, 2022
Trustor/Grantor:	Isaac Steimle and Rebekah Steimle, husband and wife
Trustee:	Trustee Services, Inc.
Beneficiary:	Boeing Employees' Credit Union
Recording Date:	August 30, 2022
Recording No.:	202208300421

The Deed of Trust set forth above is purported to be a “Credit Line” Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.

END OF SCHEDULE B, PART II

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

COMMITMENT CONDITIONS

1. DEFINITIONS

a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.

b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.

c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.

d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.

e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.

f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.

g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.

h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.

i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.

j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

a. the Notice;

b. the Commitment to Issue Policy;

c. the Commitment Conditions;

d. Schedule A;

e. Schedule B, Part I-Requirements; and

f. Schedule B, Part II-Exceptions; and

g. a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:

i. comply with the Schedule B, Part I-Requirements;

ii. eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or

iii. acquire the Title or create the Mortgage covered by this Commitment.

b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.

c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.

d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.

e. The Company is not liable for the content of the Transaction Identification Data, if any.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

(continued)

f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I-Requirements have been met to the satisfaction of the Company.

g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.

b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.

c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.

d. The deletion or modification of any Schedule B, Part II-Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.

e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.

f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION - INTENTIONALLY DELETED

END OF CONDITIONS

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

RECORDING REQUIREMENTS

Effective January 1, 1997, document format and content requirements have been imposed by Washington Law. Failure to comply with the following requirements may result in rejection of the document by the county recorder or imposition of a $50.00 surcharge.

First page or cover sheet:

3" top margin containing nothing except the return address.

1" side and bottom margins containing no markings or seals.

Title(s) of documents.

Recording no. of any assigned, released or referenced document(s).

Grantors names (and page no. where additional names can be found).

Grantees names (and page no. where additional names can be found).

Abbreviated legal description (Lot, Block, Plat Name or Section, Township, Range and Quarter, Quarter Section for unplatted). Said abbreviated legal description is not a substitute for a complete legal description which must also appear in the body of the document.

Assessor's tax parcel number(s).

Return address (in top 3" margin).

**A cover sheet can be attached containing the above format and data if the first page does not contain all required data.

Additional Pages:

1" top, side and bottom margins containing no markings or seals.

All Pages:

No stapled or taped attachments. Each attachment must be a separate page. All notary and other pressure seals must be smudged for visibility. Font size of 8 points or larger.

WIRE SAFE™ | Inquire before you wire!

WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

FIDELITY NATIONAL FINANCIAL
PRIVACY NOTICE

Effective December 1, 2023

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.* loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for these main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.
- To provide reviews and testimonials about our services, with your consent.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to affiliated or nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to affiliated or nonaffiliated third parties with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (https://fnf.com/pages/californiaprivacy.aspx) or call (888) 413-1748.

For Connecticut Residents: For additional information about your Connecticut consumer privacy rights, or to make a consumer privacy request, or to appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Colorado Residents: For additional information about your Colorado consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Nevada Residents: We are providing this notice pursuant to state law. You may be placed on our internal Do Not Call List by calling FNF Privacy at (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. For further information concerning Nevada's telephone solicitation law, you may contact: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: aginquiries@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Utah Residents: For additional information about your Utah consumer privacy rights, or to make a consumer privacy request, please call (888) 714-2710.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

For Virginia Residents: For additional information about your Virginia consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

Information From Children

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions or would like to correct your Personal Information, visit FNF's Privacy Inquiry Website or contact us by phone at (888) 714-2710, by email at privacy@fnf.com, or by mail to:

DECLARATION OF SHORT SUBDIVISION AND OF COVENANTS

8003100173

Know all men by these presents:

That we, the undersigned, having a real interest in the tract of land described by this declaration; and do hereby declare the herein described division of land approved as short plat number SP-182(4-78) on the 6th day of March, 1980, by the Planning Department of Snohomish County, subject to the following covenants and conditions:

1) That the land described by this declaration may not be further subdivided in any manner exceeding a total of four (4) parcels by anyone within five (5) years of the above date of approval without a final plat, having been filed for record with the Auditor of Snohomish County, pursuant to the provisions of Ch. 58.17 RCW, and the resolutions of Snohomish County, and subject to the penalties attendant thereto.

2) That all subsequent deeds will contain provisions for private roads in the manner described herein.

3) That all maintenance of any private road described by this declaration shall be by the owners of the parcels having legal access therefrom or their heirs, assigns, or successors, unless and until such roads are improved to Snohomish County standards, and dedicated to and accepted by Snohomish County.

4) That any private road will be subject to a utilities easement in favor of the grantor or his successor and of any electric, telephone, television cable, gas, water, or sewer company, public or private, or their permittees or assigns to install, construct, operate, maintain, alter, and repair their respective utilities, together with the right of ingress and egress for said purposes.

5) That with respect to any private road described by this declaration whether it remains private or becomes a dedicated county road, there is the additional right to make all necessary slopes for cuts and fills; and the right to continue to drain said roads and ways over and across any lot or lots where the water might take a natural course upon reasonable grading pursuant to improvement for dedication of the roads and ways shown herein, Following reasonable grading pursuant to improvement for dedication of the roads and ways shown herein, no drainage waters on any lot or lots shall be diverted or blocked from their natural course so as to discharge upon any public road rights-of-way or to hamper proper road drainage.

6) That the legal description and the illustrative map attached hereto of this short subdivision (are) (~~are not~~) based upon accurate surveys.

7) That the legal description of the land herein subdivided into not more than four (4) parcels is attached hereto and incorporated by reference as though fully set out herein.

8) That additional covenants, easements, and restrictions, if any, solely for the benefit of the grantor, and his heirs, successors and assigns enforceable only by such persons, are attached hereto as exhibits 2 and incorporated by reference as though only set out herein.

The recording of this short subdivision reflects a boundary line adjustment within that short subdivision recorded on October 20, 1978 under Auditor's recording number 7810200401, in Volume 1401, pages 709 through 716 records of Snohomish County.

DEEDS

EASEMENT

THIS INDENTURE, made this 21st day of August A. D. 1962

between John L. Brawley and Virginia L. Brawley, his wife,

hereinafter called the Grantor, part ies of the first part, PUBLIC UTILITY DISTRICT NO. 1 of SNOHOMISH COUNTY, and West Coast Telephone Company, hereinafter called the Grantee, party of the second part, and

hereinafter called the Mortgagee, party of the third part, WITNESSETH:

That the Grantor for and in consideration of the sum of One and no/100 Dollars ($ 1.00) and other valuable considerations, receipt of which is hereby acknowledged, hereby convey and grant to the Grantee, its successors and assigns, the right, privilege and authority to construct, erect, alter, improve, repair, operate and maintain an electric transmission and distribution line, consisting of a single line of poles, with necessary braces, guys and anchors, and to place upon or suspend from such poles transmission, distribution and signal wires, insulators, cross-arms, transformers and other necessary or convenient appurtenances, across, over and upon the following described lands and premises situated in the County of Snohomish, State of Washington, to-wit:

15841756

South half of northwest quarter of northwest quarter of southwest quarter, Section 16, Township 30 North, Range 5 East, W.M.
EXCEPT south 30 feet thereof for road.

NO SALES TAX REQUIRED

DEC 27 1962

VERNE SIEVERS, Snohomish County Treasurer
BY Charlotte Dunlap
Deputy

The center line of said transmission and distribution line to be located as follows:

As now staked and located or as hereafter may be relocated or extended by mutual consent of the parties hereto.

Together with the right of ingress to and egress from said lands across adjacent lands of the Grantor for the purpose of constructing, reconstructing, repairing, renewing, altering, changing, patrolling and operating said line, and the right at any time to remove said poles, wires and appurtenances from said lands.

Also the right at all times to cut all brush and timber, and trim all trees standing or growing upon said lands which, in the opinion of the Grantee constitute a menace or danger to said line.

The Grantors, their heirs, successors or assigns, covenant and agree not to do any blasting or discharge any explosives within a distance of three hundred (300) feet of said line without giving reasonable notice in writing to the Grantee, its successors or assigns, of intention so to do.

The rights, title, privileges and authority hereby granted shall continue and be in force until such time as the Grantee, its successors or assigns shall permanently remove said poles, wires and appurtenances from said lands, or shall otherwise permanently abandon said line, at which time all such rights, title, privileges and authority hereby granted shall terminate.

Any mortgage on said land held by the Mortgagee is hereby subordinated to the rights herein granted to the Grantee, but in all other respects the said mortgage shall remain unimpaired.

In WITNESS WHEREOF, this instrument has been executed the day and year first above written.

CITY OF MARYSVILLE
RECOVERY CONTRACT NO. 214

The CITY OF MARYSVILLE wishes to establish a fair fee for latecomers benefiting from 88th Street Sewage Lift Station, for which the City has utilized 100% City funding for the benefit of a specific area

WITNESSETH·

WHEREAS, the City has constructed and installed a sanitary sewage lift station and force main system to serve the properties within the service area designated on the attached **EXHIBIT A** Said utility system consists of a 500 gpm maximum capacity lift station, underlying property, associated appurtenances, and approximately 765 lineal feet of ten-inch ductile iron force main. The lift station and force main are shown on **EXHIBIT B** attached hereto.

WHEREAS, the City has constructed the utility system at its own cost and has accepted ownership and maintenance of the same under its sole jurisdiction, and

WHEREAS, the City desires to record the pro-rata costs pursuant to Chapter 35.91 RCW, providing for reimbursement to the City for construction and installation costs by subsequent users of the system; NOW, THEREFORE,

In consideration of the covenants bargained for and given in exchange, the City decrees the following

I. The original costs due to the City of that portion of the system covered by this Recovery Contract was Five Hundred Sixty Three Thousand Seven Hundred Forty Nine Dollars ($563,749 00) for the system, and such costs were borne solely by the City

2 The property subject to this Recovery Contract shall be all real property located within the boundaries depicted in **EXHIBITS A** and **B**, and which are within the service area legally described in **EXHIBIT C** Said property consists of approximately 218 3 acres

3 The maximum amount recoverable under this contract is $563,749 00 Itemized costs are shown on **EXHIBIT D** attached hereto

199907260975

4 For a period of fifteen (15) years from the date of this contract, the City shall require the owners of all real estate within the **EXHIBIT C** property who hereafter connect to the above-described system, to pay a fair pro-rata share of the cost of the original construction This fair pro-rata share shall be determined from the peak gallons per minute of wastewater generated by each property based on land use as detailed in **EXHIBIT C**. This, however, does not include any other capital improvement charges or connection fees levied by the City, whether it be by square footage of the area served and/or a flat fee No property extending beyond the limits of the service area of the above-described system shall be served by said system unless there is an extension which is constructed and financed in accordance with State and local laws and ordinances, and the benefited property owners pay their fair pro-rata share of the improvements described in this contract

5 The fair pro-rata share per peak gallon per minute is hereby established to be $1,232 91/gpm

6 No person, firm or corporation shall be granted a permit or be authorized by the City to connect to or use the above-described system without first paying the City, in addition to any and all of their costs and charges made or assessed for such connection or use, the amount as hereinabove required

DATED this 12th day of July, 1999.

AFTER RECORDING RETURN TO

City of Marysville
4822 Grove Street
Marysville, WA 98270

CITY OF MARYSVILLE
UTILITY EASEMENT

THIS INDENTURE made this 21st day of December 2000, between Orba E Johnson, hereinafter referred to as "Grantor," the CITY OF MARYSVILLE, a municipal corporation of the State of Washington, hereinafter referred to as "Grantee," and _____, hereinafter referred to as "Mortgagee," WITNESSETH

WHEREAS, Grantor is the owner of certain lands and premises situated in the County of Snohomish, State of Washington described as follows

See **EXHIBIT A** attached hereto

Abbreviated legal description
(i e , lot, block, plat or qtr , section, township, range)

Lot 1, SCSP 182 (4-78), Rec. 8003100173

Additional on page 3

Assessor's Tax Parcel ID# 163005-3-016-0007

and,

WHEREAS, Grantee is desirous of acquiring certain rights and privileges across, over, under and upon said lands and premises,

NOW, THEREFORE, Grantor, for valuable consideration, the adequacy and receipt of which is hereby acknowledged, hereby conveys and grants to the Grantee, its successors and assigns and its permittees and licensees, the perpetual right, privilege and authority to construct, alter, improve, repair, operate and maintain a storm sewer and sanitary sewer lines, and/or water lines, pipes and appurtenances, across, under, over and upon the following described lands and premises situated in the County of Snohomish, State of Washington, to-wit

See **EXHIBIT B** attached hereto

Together with the right of ingress to and egress from said lands across adjacent lands of the Grantor, for the purpose of constructing, reconstructing, repairing, renewing, altering, changing, patrolling and operating said lines, and the right at anytime to remove said lines and appurtenances from said lands

The Grantor reserves the right to use the surface of the above-described easement in the manner now existing, but shall not erect any buildings, structures, patios, or other construction of any nature on said easement This conveyance is conditioned upon the Grantee's obligation to replace any fences, lawn, shrubbery or land contours that are disturbed in connection with the exercise of the Grantee's rights hereunder, in as good condition as the same were immediately before the property was entered by the Grantee

The rights, title, privileges and authority hereby granted shall continue to be in force until such time as the Grantee, its successors or assigns, shall permanently remove said lines and appurtenances from said lands, or shall otherwise permanently abandon said lines, at which time all such rights, title, privileges and authority hereby granted shall terminate

The Grantor also covenants to and with the Grantee that Grantor is lawfully seized and possessed of the land aforesaid, has a good and lawful right and power to sell and convey same, that same is free and clear of encumbrances, except as above indicated, and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the

lawful claims and demands of all persons whomsoever This conveyance shall be a covenant running with the land, and shall be binding on the Grantor and its heirs, successors and assigns forever

Any mortgage on said land held by the Mortgagee is hereby subordinated to the rights herein granted to the Grantee, but in all other respects the said mortgage shall remain unimpaired

IN WITNESS WHEREOF, this instrument has been executed the day and year first above written

DEFINITIONS

Words used in multiple sections of this document are defined below and other words are defined in Sections 3, 11, 13, 18, 20 and 21. Certain rules regarding the usage of words used in this document are also provided in Section 16.

(A) "Security Instrument" means this document, which is dated **December 07, 2020**, together with all Riders to this document.
(B) "Borrower" is **Isaac A Steimle and Rebekah L Steimle, who acquired title as Isaac Steimle and Rebekah Steimle, husband and wife**. Borrower is the trustor under this Security Instrument.
(C) "Lender" is **Boeing Employees' Credit Union**. Lender is a **State Chartered Credit Union** organized and existing under the laws of **THE STATE OF WASHINGTON**. Lender's address is **12770 Gateway Drive, MS 1052-2, Tukwila, WA 98168. Lender is the beneficiary under this Security Instrument.**
(D) "Trustee" is **George C. Reinmiller Trustee Inc, 521 SW Clay, Suite 200, Portland, OR 97201**.
(E) "MERS" is Mortgage Electronic Registration Systems, Inc. Lender has appointed MERS as the nominee for Lender for this Loan, and attached a MERS Rider to this Security Instrument, to be executed by Borrower, which further describes the relationship between Lender and MERS, and which is incorporated into and amends and supplements this Security Instrument.
(F) "Note" means the promissory note signed by Borrower and dated **December 07, 2020**. The Note states that Borrower owes Lender **TWO HUNDRED EIGHTY TWO THOUSAND TWO HUNDRED SEVENTY SIX AND NO/100** Dollars (U.S. **$282,276.00**) plus interest. Borrower has promised to pay this debt in regular Periodic Payments and to pay the debt in full not later than **January 01, 2041**.
(G) "Property" means the property that is described below under the heading "Transfer of Rights in the Property."
(H) "Loan" means the debt evidenced by the Note, plus interest, any prepayment charges and late charges due under the Note, and all sums due under this Security Instrument, plus interest.
(I) "Riders" means all Riders to this Security Instrument that are executed by Borrower. The following Riders are to be executed by Borrower [check box as applicable]:

[ ] Adjustable Rate Rider	[ ] Condominium Rider	[ ] Second Home Rider
[ ] Balloon Rider	[ ] Planned Unit Development Rider	[ ] VA Rider
[ ] 1-4 Family Rider	[ ] Biweekly Payment Rider	[X] Other(s) [specify] **MERS Rider**

(J) "Applicable Law" means all controlling applicable federal, state and local statutes, regulations, ordinances and administrative rules and orders (that have the effect of law) as well as all applicable final, non-appealable judicial opinions.
(K) "Community Association Dues, Fees, and Assessments" means all dues, fees, assessments and other charges that are imposed on Borrower or the Property by a condominium association, homeowners association or similar organization.
(L) "Electronic Funds Transfer" means any transfer of funds, other than a transaction originated by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, computer, or magnetic tape so as to order, instruct, or authorize a financial institution to debit or credit an account. Such term includes, but is not limited to, point-of-sale transfers, automated teller machine transactions, transfers initiated by telephone, wire transfers, and automated clearinghouse transfers.
(M) "Escrow Items" means those items that are described in Section 3.

(N) "Miscellaneous Proceeds" means any compensation, settlement, award of damages, or proceeds paid by any third party (other than insurance proceeds paid under the coverages described in Section 5) for: (i) damage to, or destruction of, the Property; (ii) condemnation or other taking of all or any part of the Property; (iii) conveyance in lieu of condemnation; or (iv) misrepresentations of, or omissions as to, the value and/or condition of the Property.
(O) "Mortgage Insurance" means insurance protecting Lender against the nonpayment of, or default on, the Loan.
(P) "Periodic Payment" means the regularly scheduled amount due for (i) principal and interest under the Note, plus (ii) any amounts under Section 3 of this Security Instrument.
(Q) "RESPA" means the Real Estate Settlement Procedures Act (12 U.S.C. §2601 et seq.) and its implementing regulation, Regulation X (12 C.F.R. Part 1024), as they might be amended from time to time, or any additional or successor legislation or regulation that governs the same subject matter. As used in this Security Instrument, "RESPA" refers to all requirements and restrictions that are imposed in regard to a "federally related mortgage loan" even if the Loan does not qualify as a "federally related mortgage loan" under RESPA.
(R) "Successor in Interest of Borrower" means any party that has taken title to the Property, whether or not that party has assumed Borrower's obligations under the Note and/or this Security Instrument.

TRANSFER OF RIGHTS IN THE PROPERTY
This Security Instrument secures to Lender: (i) the repayment of the Loan, and all renewals, extensions and modifications of the Note; and (ii) the performance of Borrower's covenants and agreements under this Security Instrument and the Note. For this purpose, Borrower irrevocably grants and conveys to Trustee, in trust, with power of sale, the following described property located in the **COUNTY** of **Snohomish**:

**LOT 1 OF SHORT PLAT 182 (4-78) RECORDED UNDER RECORDING NO. 8003100173, A REVISION
OF SHORT PLAT RECORDED UNDER RECORDING NO. 7810200401, BEING A PORTION OF THE NORTHWEST QUARTER OF THE SOUTHWEST QUARTER OF SECTION 16, TOWNSHIP 30 NORTH,
RANGE 5 EAST, W. M., RECORDS OF SNOHOMISH COUNTY, WASHINGTON.**

SITUATE IN THE COUNTY OF SNOHOMISH, STATE OF WASHINGTON.

TAX ACCOUNT NO.: 300516-003-016-00

which currently has the address of **9815 35th Ave NE**, **Marysville**, Washington **98270** ("Property Address"):

TOGETHER WITH all the improvements now or hereafter erected on the property, and all easements, appurtenances, and fixtures now or hereafter a part of the property. All replacements and additions shall also be covered by this Security Instrument. All of the foregoing is referred to in this Security Instrument as the "Property."

BORROWER COVENANTS that Borrower is lawfully seised of the estate hereby conveyed and has the right to grant and convey the Property and that the Property is unencumbered, except for encumbrances of record. Borrower warrants and will defend generally the title to the Property against all claims and demands, subject to any encumbrances of record.

THIS SECURITY INSTRUMENT combines uniform covenants for national use and non-uniform covenants with limited variations by jurisdiction to constitute a uniform security instrument covering real property.

UNIFORM COVENANTS. Borrower and Lender covenant and agree as follows:

1. Payment of Principal, Interest, Escrow Items, Prepayment Charges, and Late Charges. Borrower shall pay when due the principal of, and interest on, the debt evidenced by the Note and any prepayment charges and late charges due under the Note. Borrower shall also pay funds for Escrow Items pursuant to Section 3. Payments due under the Note and this Security Instrument shall be made in U.S. currency. However, if any check or other instrument received by Lender as payment under the Note or this Security Instrument is returned to Lender unpaid, Lender may require that any or all subsequent payments due under the Note and this Security Instrument be made in one or more of the following forms, as selected by Lender: (a) cash; (b) money order; (c) certified check, bank check, treasurer's check or cashier's check, provided any such check is drawn upon an institution whose deposits are insured by a federal agency, instrumentality, or entity; or (d) Electronic Funds Transfer.

Payments are deemed received by Lender when received at the location designated in the Note or at such other location as may be designated by Lender in accordance with the notice provisions in Section 15. Lender may return any payment or partial payment if the payment or partial payments are insufficient to bring the Loan current. Lender may accept any payment or partial payment insufficient to bring the Loan current, without waiver of any rights hereunder or prejudice to its rights to refuse such payment or partial payments in the future, but Lender is not obligated to apply such payments at the time such payments are accepted. If each Periodic Payment is applied as of its scheduled due date, then Lender need not pay interest on unapplied funds. Lender may hold such unapplied funds until Borrower makes payment to bring the Loan current. If Borrower does not do so within a reasonable period of time, Lender shall either apply such funds or return them to Borrower. If not applied earlier, such funds will be applied to the outstanding principal balance under the Note immediately prior to foreclosure. No offset or claim which Borrower might have now or in the future against Lender shall relieve Borrower from making payments due under the Note and this Security Instrument or performing the covenants and agreements secured by this Security Instrument.

2. Application of Payments or Proceeds. Except as otherwise described in this Section 2, all payments accepted and applied by Lender shall be applied in the following order of priority: (a) interest due under the Note; (b) principal due under the Note; (c) amounts due under Section 3. Such payments shall be applied to each Periodic Payment in the order in which it became due. Any remaining amounts shall be applied first to late charges, second to any other amounts due under this Security Instrument, and then to reduce the principal balance of the Note.

If Lender receives a payment from Borrower for a delinquent Periodic Payment which includes a sufficient amount to pay any late charge due, the payment may be applied to the delinquent payment and the late charge. If more than one Periodic Payment is outstanding, Lender may apply any payment received from Borrower to the repayment of the Periodic Payments if, and to the extent that, each payment can be paid in full. To the extent that any excess exists after the payment is applied to the full payment of one or more Periodic Payments, such excess may be applied to any late charges due. Voluntary prepayments shall be applied first to any prepayment charges and then as described in the Note.

Any application of payments, insurance proceeds, or Miscellaneous Proceeds to principal due under the Note shall not extend or postpone the due date, or change the amount, of the Periodic Payments.

3. Funds for Escrow Items. Borrower shall pay to Lender on the day Periodic Payments are due under the Note, until the Note is paid in full, a sum (the "Funds") to provide for payment of amounts due for: (a) taxes and assessments and other items which can attain priority over this Security Instrument

as a lien or encumbrance on the Property; (b) leasehold payments or ground rents on the Property, if any; (c) premiums for any and all insurance required by Lender under Section 5; and (d) Mortgage Insurance premiums, if any, or any sums payable by Borrower to Lender in lieu of the payment of Mortgage Insurance premiums in accordance with the provisions of Section 10. These items are called "Escrow Items." At origination or at any time during the term of the Loan, Lender may require that Community Association Dues, Fees, and Assessments, if any, be escrowed by Borrower, and such dues, fees and assessments shall be an Escrow Item. Borrower shall promptly furnish to Lender all notices of amounts to be paid under this Section. Borrower shall pay Lender the Funds for Escrow Items unless Lender waives Borrower's obligation to pay the Funds for any or all Escrow Items. Lender may waive Borrower's obligation to pay to Lender Funds for any or all Escrow Items at any time. Any such waiver may only be in writing. In the event of such waiver, Borrower shall pay directly, when and where payable, the amounts due for any Escrow Items for which payment of Funds has been waived by Lender and, if Lender requires, shall furnish to Lender receipts evidencing such payment within such time period as Lender may require. Borrower's obligation to make such payments and to provide receipts shall for all purposes be deemed to be a covenant and agreement contained in this Security Instrument, as the phrase "covenant and agreement" is used in Section 9. If Borrower is obligated to pay Escrow Items directly, pursuant to a waiver, and Borrower fails to pay the amount due for an Escrow Item, Lender may exercise its rights under Section 9 and pay such amount and Borrower shall then be obligated under Section 9 to repay to Lender any such amount. Lender may revoke the waiver as to any or all Escrow Items at any time by a notice given in accordance with Section 15 and, upon such revocation, Borrower shall pay to Lender all Funds, and in such amounts, that are then required under this Section 3.

Lender may, at any time, collect and hold Funds in an amount (a) sufficient to permit Lender to apply the Funds at the time specified under RESPA, and (b) not to exceed the maximum amount a lender can require under RESPA. Lender shall estimate the amount of Funds due on the basis of current data and reasonable estimates of expenditures of future Escrow Items or otherwise in accordance with Applicable Law.

The Funds shall be held in an institution whose deposits are insured by a federal agency, instrumentality, or entity (including Lender, if Lender is an institution whose deposits are so insured) or in any Federal Home Loan Bank. Lender shall apply the Funds to pay the Escrow Items no later than the time specified under RESPA. Lender shall not charge Borrower for holding and applying the Funds, annually analyzing the escrow account, or verifying the Escrow Items, unless Lender pays Borrower interest on the Funds and Applicable Law permits Lender to make such a charge. Unless an agreement is made in writing or Applicable Law requires interest to be paid on the Funds, Lender shall not be required to pay Borrower any interest or earnings on the Funds. Borrower and Lender can agree in writing, however, that interest shall be paid on the Funds. Lender shall give to Borrower, without charge, an annual accounting of the Funds as required by RESPA.

If there is a surplus of Funds held in escrow, as defined under RESPA, Lender shall account to Borrower for the excess funds in accordance with RESPA. If there is a shortage of Funds held in escrow, as defined under RESPA, Lender shall notify Borrower as required by RESPA, and Borrower shall pay to Lender the amount necessary to make up the shortage in accordance with RESPA, but in no more than 12 monthly payments. If there is a deficiency of Funds held in escrow, as defined under RESPA, Lender shall notify Borrower as required by RESPA, and Borrower shall pay to Lender the amount necessary to make up the deficiency in accordance with RESPA, but in no more than 12 monthly payments.

Upon payment in full of all sums secured by this Security Instrument, Lender shall promptly refund to Borrower any Funds held by Lender.

4. Charges; Liens. Borrower shall pay all taxes, assessments, charges, fines, and impositions attributable to the Property which can attain priority over this Security Instrument, leasehold payments or ground rents on the Property, if any, and Community Association Dues, Fees, and Assessments, if any.

To the extent that these items are Escrow Items, Borrower shall pay them in the manner provided in Section 3.

Borrower shall promptly discharge any lien which has priority over this Security Instrument unless Borrower: (a) agrees in writing to the payment of the obligation secured by the lien in a manner acceptable to Lender, but only so long as Borrower is performing such agreement; (b) contests the lien in good faith by, or defends against enforcement of the lien in, legal proceedings which in Lender's opinion operate to prevent the enforcement of the lien while those proceedings are pending, but only until such proceedings are concluded; or (c) secures from the holder of the lien an agreement satisfactory to Lender subordinating the lien to this Security Instrument. If Lender determines that any part of the Property is subject to a lien which can attain priority over this Security Instrument, Lender may give Borrower a notice identifying the lien. Within 10 days of the date on which that notice is given, Borrower shall satisfy the lien or take one or more of the actions set forth above in this Section 4.

Lender may require Borrower to pay a one-time charge for a real estate tax verification and/or reporting service used by Lender in connection with this Loan.

5. Property Insurance. Borrower shall keep the improvements now existing or hereafter erected on the Property insured against loss by fire, hazards included within the term "extended coverage," and any other hazards including, but not limited to, earthquakes and floods, for which Lender requires insurance. This insurance shall be maintained in the amounts (including deductible levels) and for the periods that Lender requires. What Lender requires pursuant to the preceding sentences can change during the term of the Loan. The insurance carrier providing the insurance shall be chosen by Borrower subject to Lender's right to disapprove Borrower's choice, which right shall not be exercised unreasonably. Lender may require Borrower to pay, in connection with this Loan, either: (a) a one-time charge for flood zone determination, certification and tracking services; or (b) a one-time charge for flood zone determination and certification services and subsequent charges each time remappings or similar changes occur which reasonably might affect such determination or certification. Borrower shall also be responsible for the payment of any fees imposed by the Federal Emergency Management Agency in connection with the review of any flood zone determination resulting from an objection by Borrower.

If Borrower fails to maintain any of the coverages described above, Lender may obtain insurance coverage, at Lender's option and Borrower's expense. Lender is under no obligation to purchase any particular type or amount of coverage. Therefore, such coverage shall cover Lender, but might or might not protect Borrower, Borrower's equity in the Property, or the contents of the Property, against any risk, hazard or liability and might provide greater or lesser coverage than was previously in effect. Borrower acknowledges that the cost of the insurance coverage so obtained might significantly exceed the cost of insurance that Borrower could have obtained. Any amounts disbursed by Lender under this Section 5 shall become additional debt of Borrower secured by this Security Instrument. These amounts shall bear interest at the Note rate from the date of disbursement and shall be payable, with such interest, upon notice from Lender to Borrower requesting payment.

All insurance policies required by Lender and renewals of such policies shall be subject to Lender's right to disapprove such policies, shall include a standard mortgage clause, and shall name Lender as mortgagee and/or as an additional loss payee. Lender shall have the right to hold the policies and renewal certificates. If Lender requires, Borrower shall promptly give to Lender all receipts of paid premiums and renewal notices. If Borrower obtains any form of insurance coverage, not otherwise required by Lender, for damage to, or destruction of, the Property, such policy shall include a standard mortgage clause and shall name Lender as mortgagee and/or as an additional loss payee.

In the event of loss, Borrower shall give prompt notice to the insurance carrier and Lender. Lender may make proof of loss if not made promptly by Borrower. Unless Lender and Borrower otherwise agree in writing, any insurance proceeds, whether or not the underlying insurance was required by Lender, shall be applied to restoration or repair of the Property, if the restoration or repair is economically feasible and Lender's security is not lessened. During such repair and restoration period,

Lender shall have the right to hold such insurance proceeds until Lender has had an opportunity to inspect such Property to ensure the work has been completed to Lender's satisfaction, provided that such inspection shall be undertaken promptly. Lender may disburse proceeds for the repairs and restoration in a single payment or in a series of progress payments as the work is completed. Unless an agreement is made in writing or Applicable Law requires interest to be paid on such insurance proceeds, Lender shall not be required to pay Borrower any interest or earnings on such proceeds. Fees for public adjusters, or other third parties, retained by Borrower shall not be paid out of the insurance proceeds and shall be the sole obligation of Borrower. If the restoration or repair is not economically feasible or Lender's security would be lessened, the insurance proceeds shall be applied to the sums secured by this Security Instrument, whether or not then due, with the excess, if any, paid to Borrower. Such insurance proceeds shall be applied in the order provided for in Section 2.

If Borrower abandons the Property, Lender may file, negotiate and settle any available insurance claim and related matters. If Borrower does not respond within 30 days to a notice from Lender that the insurance carrier has offered to settle a claim, then Lender may negotiate and settle the claim. The 30-day period will begin when the notice is given. In either event, or if Lender acquires the Property under Section 22 or otherwise, Borrower hereby assigns to Lender (a) Borrower's rights to any insurance proceeds in an amount not to exceed the amounts unpaid under the Note or this Security Instrument, and (b) any other of Borrower's rights (other than the right to any refund of unearned premiums paid by Borrower) under all insurance policies covering the Property, insofar as such rights are applicable to the coverage of the Property. Lender may use the insurance proceeds either to repair or restore the Property or to pay amounts unpaid under the Note or this Security Instrument, whether or not then due.

6. Occupancy. Borrower shall occupy, establish, and use the Property as Borrower's principal residence within 60 days after the execution of this Security Instrument and shall continue to occupy the Property as Borrower's principal residence for at least one year after the date of occupancy, unless Lender otherwise agrees in writing, which consent shall not be unreasonably withheld, or unless extenuating circumstances exist which are beyond Borrower's control.

7. Preservation, Maintenance and Protection of the Property; Inspections. Borrower shall not destroy, damage or impair the Property, allow the Property to deteriorate or commit waste on the Property. Whether or not Borrower is residing in the Property, Borrower shall maintain the Property in order to prevent the Property from deteriorating or decreasing in value due to its condition. Unless it is determined pursuant to Section 5 that repair or restoration is not economically feasible, Borrower shall promptly repair the Property if damaged to avoid further deterioration or damage. If insurance or condemnation proceeds are paid in connection with damage to, or the taking of, the Property, Borrower shall be responsible for repairing or restoring the Property only if Lender has released proceeds for such purposes. Lender may disburse proceeds for the repairs and restoration in a single payment or in a series of progress payments as the work is completed. If the insurance or condemnation proceeds are not sufficient to repair or restore the Property, Borrower is not relieved of Borrower's obligation for the completion of such repair or restoration.

Lender or its agent may make reasonable entries upon and inspections of the Property. If it has reasonable cause, Lender may inspect the interior of the improvements on the Property. Lender shall give Borrower notice at the time of or prior to such an interior inspection specifying such reasonable cause.

8. Borrower's Loan Application. Borrower shall be in default if, during the Loan application process, Borrower or any persons or entities acting at the direction of Borrower or with Borrower's knowledge or consent gave materially false, misleading, or inaccurate information or statements to Lender (or failed to provide Lender with material information) in connection with the Loan. Material representations include, but are not limited to, representations concerning Borrower's occupancy of the Property as Borrower's principal residence.

9. Protection of Lender's Interest in the Property and Rights Under this Security

Instrument. If (a) Borrower fails to perform the covenants and agreements contained in this Security Instrument, (b) there is a legal proceeding that might significantly affect Lender's interest in the Property and/or rights under this Security Instrument (such as a proceeding in bankruptcy, probate, for condemnation or forfeiture, for enforcement of a lien which may attain priority over this Security Instrument or to enforce laws or regulations), or (c) Borrower has abandoned the Property, then Lender may do and pay for whatever is reasonable or appropriate to protect Lender's interest in the Property and rights under this Security Instrument, including protecting and/or assessing the value of the Property, and securing and/or repairing the Property. Lender's actions can include, but are not limited to: (a) paying any sums secured by a lien which has priority over this Security Instrument; (b) appearing in court; and (c) paying reasonable attorneys' fees to protect its interest in the Property and/or rights under this Security Instrument, including its secured position in a bankruptcy proceeding. Securing the Property includes, but is not limited to, entering the Property to make repairs, change locks, replace or board up doors and windows, drain water from pipes, eliminate building or other code violations or dangerous conditions, and have utilities turned on or off. Although Lender may take action under this Section 9, Lender does not have to do so and is not under any duty or obligation to do so. It is agreed that Lender incurs no liability for not taking any or all actions authorized under this Section 9.

Any amounts disbursed by Lender under this Section 9 shall become additional debt of Borrower secured by this Security Instrument. These amounts shall bear interest at the Note rate from the date of disbursement and shall be payable, with such interest, upon notice from Lender to Borrower requesting payment.

If this Security Instrument is on a leasehold, Borrower shall comply with all the provisions of the lease. If Borrower acquires fee title to the Property, the leasehold and the fee title shall not merge unless Lender agrees to the merger in writing.

10. Mortgage Insurance. If Lender required Mortgage Insurance as a condition of making the Loan, Borrower shall pay the premiums required to maintain the Mortgage Insurance in effect. If, for any reason, the Mortgage Insurance coverage required by Lender ceases to be available from the mortgage insurer that previously provided such insurance and Borrower was required to make separately designated payments toward the premiums for Mortgage Insurance, Borrower shall pay the premiums required to obtain coverage substantially equivalent to the Mortgage Insurance previously in effect, at a cost substantially equivalent to the cost to Borrower of the Mortgage Insurance previously in effect, from an alternate mortgage insurer selected by Lender. If substantially equivalent Mortgage Insurance coverage is not available, Borrower shall continue to pay to Lender the amount of the separately designated payments that were due when the insurance coverage ceased to be in effect. Lender will accept, use and retain these payments as a non-refundable loss reserve in lieu of Mortgage Insurance. Such loss reserve shall be non-refundable, notwithstanding the fact that the Loan is ultimately paid in full, and Lender shall not be required to pay Borrower any interest or earnings on such loss reserve. Lender can no longer require loss reserve payments if Mortgage Insurance coverage (in the amount and for the period that Lender requires) provided by an insurer selected by Lender again becomes available, is obtained, and Lender requires separately designated payments toward the premiums for Mortgage Insurance. If Lender required Mortgage Insurance as a condition of making the Loan and Borrower was required to make separately designated payments toward the premiums for Mortgage Insurance, Borrower shall pay the premiums required to maintain Mortgage Insurance in effect, or to provide a non-refundable loss reserve, until Lender's requirement for Mortgage Insurance ends in accordance with any written agreement between Borrower and Lender providing for such termination or until termination is required by Applicable Law. Nothing in this Section 10 affects Borrower's obligation to pay interest at the rate provided in the Note.

Mortgage Insurance reimburses Lender (or any entity that purchases the Note) for certain losses it may incur if Borrower does not repay the Loan as agreed. Borrower is not a party to the Mortgage Insurance.

Mortgage insurers evaluate their total risk on all such insurance in force from time to time, and may enter into agreements with other parties that share or modify their risk, or reduce losses. These agreements are on terms and conditions that are satisfactory to the mortgage insurer and the other party (or parties) to these agreements. These agreements may require the mortgage insurer to make payments using any source of funds that the mortgage insurer may have available (which may include funds obtained from Mortgage Insurance premiums).

As a result of these agreements, Lender, any purchaser of the Note, another insurer, any reinsurer, any other entity, or any affiliate of any of the foregoing, may receive (directly or indirectly) amounts that derive from (or might be characterized as) a portion of Borrower's payments for Mortgage Insurance, in exchange for sharing or modifying the mortgage insurer's risk, or reducing losses. If such agreement provides that an affiliate of Lender takes a share of the insurer's risk in exchange for a share of the premiums paid to the insurer, the arrangement is often termed "captive reinsurance." Further:

(a) Any such agreements will not affect the amounts that Borrower has agreed to pay for Mortgage Insurance, or any other terms of the Loan. Such agreements will not increase the amount Borrower will owe for Mortgage Insurance, and they will not entitle Borrower to any refund.

(b) Any such agreements will not affect the rights Borrower has – if any – with respect to the Mortgage Insurance under the Homeowners Protection Act of 1998 or any other law. These rights may include the right to receive certain disclosures, to request and obtain cancellation of the Mortgage Insurance, to have the Mortgage Insurance terminated automatically, and/or to receive a refund of any Mortgage Insurance premiums that were unearned at the time of such cancellation or termination.

11. Assignment of Miscellaneous Proceeds; Forfeiture. All Miscellaneous Proceeds are hereby assigned to and shall be paid to Lender.

If the Property is damaged, such Miscellaneous Proceeds shall be applied to restoration or repair of the Property, if the restoration or repair is economically feasible and Lender's security is not lessened. During such repair and restoration period, Lender shall have the right to hold such Miscellaneous Proceeds until Lender has had an opportunity to inspect such Property to ensure the work has been completed to Lender's satisfaction, provided that such inspection shall be undertaken promptly. Lender may pay for the repairs and restoration in a single disbursement or in a series of progress payments as the work is completed. Unless an agreement is made in writing or Applicable Law requires interest to be paid on such Miscellaneous Proceeds, Lender shall not be required to pay Borrower any interest or earnings on such Miscellaneous Proceeds. If the restoration or repair is not economically feasible or Lender's security would be lessened, the Miscellaneous Proceeds shall be applied to the sums secured by this Security Instrument, whether or not then due, with the excess, if any, paid to Borrower. Such Miscellaneous Proceeds shall be applied in the order provided for in Section 2.

In the event of a total taking, destruction, or loss in value of the Property, the Miscellaneous Proceeds shall be applied to the sums secured by this Security Instrument, whether or not then due, with the excess, if any, paid to Borrower.

In the event of a partial taking, destruction, or loss in value of the Property in which the fair market value of the Property immediately before the partial taking, destruction, or loss in value is equal to or greater than the amount of the sums secured by this Security Instrument immediately before the partial taking, destruction, or loss in value, unless Borrower and Lender otherwise agree in writing, the sums secured by this Security Instrument shall be reduced by the amount of the Miscellaneous Proceeds multiplied by the following fraction: (a) the total amount of the sums secured immediately before the partial taking, destruction, or loss in value divided by (b) the fair market value of the Property immediately before the partial taking, destruction, or loss in value. Any balance shall be paid to Borrower.

In the event of a partial taking, destruction, or loss in value of the Property in which the fair market value of the Property immediately before the partial taking, destruction, or loss in value is less

than the amount of the sums secured immediately before the partial taking, destruction, or loss in value, unless Borrower and Lender otherwise agree in writing, the Miscellaneous Proceeds shall be applied to the sums secured by this Security Instrument whether or not the sums are then due.

If the Property is abandoned by Borrower, or if, after notice by Lender to Borrower that the Opposing Party (as defined in the next sentence) offers to make an award to settle a claim for damages, Borrower fails to respond to Lender within 30 days after the date the notice is given, Lender is authorized to collect and apply the Miscellaneous Proceeds either to restoration or repair of the Property or to the sums secured by this Security Instrument, whether or not then due. "Opposing Party" means the third party that owes Borrower Miscellaneous Proceeds or the party against whom Borrower has a right of action in regard to Miscellaneous Proceeds.

Borrower shall be in default if any action or proceeding, whether civil or criminal, is begun that, in Lender's judgment, could result in forfeiture of the Property or other material impairment of Lender's interest in the Property or rights under this Security Instrument. Borrower can cure such a default and, if acceleration has occurred, reinstate as provided in Section 19, by causing the action or proceeding to be dismissed with a ruling that, in Lender's judgment, precludes forfeiture of the Property or other material impairment of Lender's interest in the Property or rights under this Security Instrument. The proceeds of any award or claim for damages that are attributable to the impairment of Lender's interest in the Property are hereby assigned and shall be paid to Lender.

All Miscellaneous Proceeds that are not applied to restoration or repair of the Property shall be applied in the order provided for in Section 2.

12. Borrower Not Released; Forbearance By Lender Not a Waiver. Extension of the time for payment or modification of amortization of the sums secured by this Security Instrument granted by Lender to Borrower or any Successor in Interest of Borrower shall not operate to release the liability of Borrower or any Successors in Interest of Borrower. Lender shall not be required to commence proceedings against any Successor in Interest of Borrower or to refuse to extend time for payment or otherwise modify amortization of the sums secured by this Security Instrument by reason of any demand made by the original Borrower or any Successors in Interest of Borrower. Any forbearance by Lender in exercising any right or remedy including, without limitation, Lender's acceptance of payments from third persons, entities or Successors in Interest of Borrower or in amounts less than the amount then due, shall not be a waiver of or preclude the exercise of any right or remedy.

13. Joint and Several Liability; Co-signers; Successors and Assigns Bound. Borrower covenants and agrees that Borrower's obligations and liability shall be joint and several. However, any Borrower who co-signs this Security Instrument but does not execute the Note (a "co-signer"): (a) is co-signing this Security Instrument only to mortgage, grant and convey the co-signer's interest in the Property under the terms of this Security Instrument; (b) is not personally obligated to pay the sums secured by this Security Instrument; and (c) agrees that Lender and any other Borrower can agree to extend, modify, forbear or make any accommodations with regard to the terms of this Security Instrument or the Note without the co-signer's consent.

Subject to the provisions of Section 18, any Successor in Interest of Borrower who assumes Borrower's obligations under this Security Instrument in writing, and is approved by Lender, shall obtain all of Borrower's rights and benefits under this Security Instrument. Borrower shall not be released from Borrower's obligations and liability under this Security Instrument unless Lender agrees to such release in writing. The covenants and agreements of this Security Instrument shall bind (except as provided in Section 20) and benefit the successors and assigns of Lender.

14. Loan Charges. Lender may charge Borrower fees for services performed in connection with Borrower's default, for the purpose of protecting Lender's interest in the Property and rights under this Security Instrument, including, but not limited to, attorneys' fees, property inspection and valuation fees. In regard to any other fees, the absence of express authority in this Security Instrument to charge a specific fee to Borrower shall not be construed as a prohibition on the charging of such fee. Lender may

not charge fees that are expressly prohibited by this Security Instrument or by Applicable Law.

If the Loan is subject to a law which sets maximum loan charges, and that law is finally interpreted so that the interest or other loan charges collected or to be collected in connection with the Loan exceed the permitted limits, then: (a) any such loan charge shall be reduced by the amount necessary to reduce the charge to the permitted limit; and (b) any sums already collected from Borrower which exceeded permitted limits will be refunded to Borrower. Lender may choose to make this refund by reducing the principal owed under the Note or by making a direct payment to Borrower. If a refund reduces principal, the reduction will be treated as a partial prepayment without any prepayment charge (whether or not a prepayment charge is provided for under the Note). Borrower's acceptance of any such refund made by direct payment to Borrower will constitute a waiver of any right of action Borrower might have arising out of such overcharge.

15. Notices. All notices given by Borrower or Lender in connection with this Security Instrument must be in writing. Any notice to Borrower in connection with this Security Instrument shall be deemed to have been given to Borrower when mailed by first class mail or when actually delivered to Borrower's notice address if sent by other means. Notice to any one Borrower shall constitute notice to all Borrowers unless Applicable Law expressly requires otherwise. The notice address shall be the Property Address unless Borrower has designated a substitute notice address by notice to Lender. Borrower shall promptly notify Lender of Borrower's change of address. If Lender specifies a procedure for reporting Borrower's change of address, then Borrower shall only report a change of address through that specified procedure. There may be only one designated notice address under this Security Instrument at any one time. Any notice to Lender shall be given by delivering it or by mailing it by first class mail to Lender's address stated herein unless Lender has designated another address by notice to Borrower. Any notice in connection with this Security Instrument shall not be deemed to have been given to Lender until actually received by Lender. If any notice required by this Security Instrument is also required under Applicable Law, the Applicable Law requirement will satisfy the corresponding requirement under this Security Instrument.

16. Governing Law; Severability; Rules of Construction. This Security Instrument shall be governed by federal law and the law of the jurisdiction in which the Property is located. All rights and obligations contained in this Security Instrument are subject to any requirements and limitations of Applicable Law. Applicable Law might explicitly or implicitly allow the parties to agree by contract or it might be silent, but such silence shall not be construed as a prohibition against agreement by contract. In the event that any provision or clause of this Security Instrument or the Note conflicts with Applicable Law, such conflict shall not affect other provisions of this Security Instrument or the Note which can be given effect without the conflicting provision.

As used in this Security Instrument: (a) words of the masculine gender shall mean and include corresponding neuter words or words of the feminine gender; (b) words in the singular shall mean and include the plural and vice versa; and (c) the word "may" gives sole discretion without any obligation to take any action.

17. Borrower's Copy. Borrower shall be given one copy of the Note and of this Security Instrument.

18. Transfer of the Property or a Beneficial Interest in Borrower. As used in this Section 18, "Interest in the Property" means any legal or beneficial interest in the Property, including, but not limited to, those beneficial interests transferred in a bond for deed, contract for deed, installment sales contract or escrow agreement, the intent of which is the transfer of title by Borrower at a future date to a purchaser.

If all or any part of the Property or any Interest in the Property is sold or transferred (or if Borrower is not a natural person and a beneficial interest in Borrower is sold or transferred) without Lender's prior written consent, Lender may require immediate payment in full of all sums secured by this Security Instrument. However, this option shall not be exercised by Lender if such exercise is prohibited

by Applicable Law.

If Lender exercises this option, Lender shall give Borrower notice of acceleration. The notice shall provide a period of not less than 30 days from the date the notice is given in accordance with Section 15 within which Borrower must pay all sums secured by this Security Instrument. If Borrower fails to pay these sums prior to the expiration of this period, Lender may invoke any remedies permitted by this Security Instrument without further notice or demand on Borrower.

19. Borrower's Right to Reinstate After Acceleration. If Borrower meets certain conditions, Borrower shall have the right to have enforcement of this Security Instrument discontinued at any time prior to the earliest of: (a) five days before sale of the Property pursuant to any power of sale contained in this Security Instrument; (b) such other period as Applicable Law might specify for the termination of Borrower's right to reinstate; or (c) entry of a judgment enforcing this Security Instrument. Those conditions are that Borrower: (a) pays Lender all sums which then would be due under this Security Instrument and the Note as if no acceleration had occurred; (b) cures any default of any other covenants or agreements; (c) pays all expenses incurred in enforcing this Security Instrument, including, but not limited to, reasonable attorneys' fees, property inspection and valuation fees, and other fees incurred for the purpose of protecting Lender's interest in the Property and rights under this Security Instrument; and (d) takes such action as Lender may reasonably require to assure that Lender's interest in the Property and rights under this Security Instrument, and Borrower's obligation to pay the sums secured by this Security Instrument, shall continue unchanged. Lender may require that Borrower pay such reinstatement sums and expenses in one or more of the following forms, as selected by Lender: (a) cash; (b) money order; (c) certified check, bank check, treasurer's check or cashier's check, provided any such check is drawn upon an institution whose deposits are insured by a federal agency, instrumentality or entity; or (d) Electronic Funds Transfer. Upon reinstatement by Borrower, this Security Instrument and obligations secured hereby shall remain fully effective as if no acceleration had occurred. However, this right to reinstate shall not apply in the case of acceleration under Section 18.

20. Sale of Note; Change of Loan Servicer; Notice of Grievance. The Note or a partial interest in the Note (together with this Security Instrument) can be sold one or more times without prior notice to Borrower. A sale might result in a change in the entity (known as the "Loan Servicer") that collects Periodic Payments due under the Note and this Security Instrument and performs other mortgage loan servicing obligations under the Note, this Security Instrument, and Applicable Law. There also might be one or more changes of the Loan Servicer unrelated to a sale of the Note. If there is a change of the Loan Servicer, Borrower will be given written notice of the change which will state the name and address of the new Loan Servicer, the address to which payments should be made and any other information RESPA requires in connection with a notice of transfer of servicing. If the Note is sold and thereafter the Loan is serviced by a Loan Servicer other than the purchaser of the Note, the mortgage loan servicing obligations to Borrower will remain with the Loan Servicer or be transferred to a successor Loan Servicer and are not assumed by the Note purchaser unless otherwise provided by the Note purchaser.

Neither Borrower nor Lender may commence, join, or be joined to any judicial action (as either an individual litigant or the member of a class) that arises from the other party's actions pursuant to this Security Instrument or that alleges that the other party has breached any provision of, or any duty owed by reason of, this Security Instrument, until such Borrower or Lender has notified the other party (with such notice given in compliance with the requirements of Section 15) of such alleged breach and afforded the other party hereto a reasonable period after the giving of such notice to take corrective action. If Applicable Law provides a time period which must elapse before certain action can be taken, that time period will be deemed to be reasonable for purposes of this paragraph. The notice of acceleration and opportunity to cure given to Borrower pursuant to Section 22 and the notice of acceleration given to Borrower pursuant to Section 18 shall be deemed to satisfy the notice and opportunity to take corrective action provisions of this Section 20.

21. Hazardous Substances. As used in this Section 21: (a) "Hazardous Substances" are those substances defined as toxic or hazardous substances, pollutants, or wastes by Environmental Law and the following substances: gasoline, kerosene, other flammable or toxic petroleum products, toxic pesticides and herbicides, volatile solvents, materials containing asbestos or formaldehyde, and radioactive materials; (b) "Environmental Law" means federal laws and laws of the jurisdiction where the Property is located that relate to health, safety or environmental protection; (c) "Environmental Cleanup" includes any response action, remedial action, or removal action, as defined in Environmental Law; and (d) an "Environmental Condition" means a condition that can cause, contribute to, or otherwise trigger an Environmental Cleanup.

Borrower shall not cause or permit the presence, use, disposal, storage, or release of any Hazardous Substances, or threaten to release any Hazardous Substances, on or in the Property. Borrower shall not do, nor allow anyone else to do, anything affecting the Property (a) that is in violation of any Environmental Law, (b) which creates an Environmental Condition, or (c) which, due to the presence, use, or release of a Hazardous Substance, creates a condition that adversely affects the value of the Property. The preceding two sentences shall not apply to the presence, use, or storage on the Property of small quantities of Hazardous Substances that are generally recognized to be appropriate to normal residential uses and to maintenance of the Property (including, but not limited to, hazardous substances in consumer products).

Borrower shall promptly give Lender written notice of (a) any investigation, claim, demand, lawsuit or other action by any governmental or regulatory agency or private party involving the Property and any Hazardous Substance or Environmental Law of which Borrower has actual knowledge, (b) any Environmental Condition, including but not limited to, any spilling, leaking, discharge, release or threat of release of any Hazardous Substance, and (c) any condition caused by the presence, use or release of a Hazardous Substance which adversely affects the value of the Property. If Borrower learns, or is notified by any governmental or regulatory authority, or any private party, that any removal or other remediation of any Hazardous Substance affecting the Property is necessary, Borrower shall promptly take all necessary remedial actions in accordance with Environmental Law. Nothing herein shall create any obligation on Lender for an Environmental Cleanup.

NON-UNIFORM COVENANTS. Borrower and Lender further covenant and agree as follows:

22. Acceleration; Remedies. Lender shall give notice to Borrower prior to acceleration following Borrower's breach of any covenant or agreement in this Security Instrument (but not prior to acceleration under Section 18 unless Applicable Law provides otherwise). The notice shall specify: (a) the default; (b) the action required to cure the default; (c) a date, not less than 30 days from the date the notice is given to Borrower, by which the default must be cured; and (d) that failure to cure the default on or before the date specified in the notice may result in acceleration of the sums secured by this Security Instrument and sale of the Property at public auction at a date not less than 120 days in the future. The notice shall further inform Borrower of the right to reinstate after acceleration, the right to bring a court action to assert the non-existence of a default or any other defense of Borrower to acceleration and sale, and any other matters required to be included in the notice by Applicable Law. If the default is not cured on or before the date specified in the notice, Lender at its option, may require immediate payment in full of all sums secured by this Security Instrument without further demand and may invoke the power of sale and/or any other remedies permitted by Applicable Law. Lender shall be entitled to collect all expenses incurred in pursuing the remedies provided in this Section 22, including, but not limited to, reasonable attorneys' fees and costs of title evidence.

If Lender invokes the power of sale, Lender shall give written notice to Trustee of the occurrence of an event of default and of Lender's election to cause the Property to be sold. Trustee and Lender shall take such action regarding notice of sale and shall give such notices to

Borrower and to other persons as Applicable Law may require. After the time required by Applicable Law and after publication of the notice of sale, Trustee, without demand on Borrower, shall sell the Property at public auction to the highest bidder at the time and place and under the terms designated in the notice of sale in one or more parcels and in any order Trustee determines. Trustee may postpone sale of the Property for a period or periods permitted by Applicable Law by public announcement at the time and place fixed in the notice of sale. Lender or its designee may purchase the Property at any sale.

Trustee shall deliver to the purchaser Trustee's deed conveying the Property without any covenant or warranty, expressed or implied. The recitals in the Trustee's deed shall be prima facie evidence of the truth of the statements made therein. Trustee shall apply the proceeds of the sale in the following order: (a) to all expenses of the sale, including, but not limited to, reasonable Trustee's and attorneys' fees; (b) to all sums secured by this Security Instrument; and (c) any excess to the person or persons legally entitled to it or to the clerk of the superior court of the county in which the sale took place.

23. Reconveyance. Upon payment of all sums secured by this Security Instrument, Lender shall request Trustee to reconvey the Property and shall surrender this Security Instrument and all notes evidencing debt secured by this Security Instrument to Trustee. Trustee shall reconvey the Property without warranty to the person or persons legally entitled to it. Such person or persons shall pay any recordation costs and the Trustee's fee for preparing the reconveyance.

24. Substitute Trustee. In accordance with Applicable Law, Lender may from time to time appoint a successor trustee to any Trustee appointed hereunder who has ceased to act. Without conveyance of the Property, the successor trustee shall succeed to all the title, power and duties conferred upon Trustee herein and by Applicable Law.

25. Use of Property. The Property is not used principally for agricultural purposes.

26. Attorneys' Fees. Lender shall be entitled to recover its reasonable attorneys' fees and costs in any action or proceeding to construe or enforce any term of this Security Instrument. The term "attorneys' fees," whenever used in this Security Instrument, shall include without limitation attorneys' fees incurred by Lender in any bankruptcy proceeding or on appeal.

ORAL AGREEMENTS OR ORAL COMMITMENTS TO LOAN MONEY, EXTEND CREDIT, OR TO FORBEAR FROM ENFORCING REPAYMENT OF A DEBT ARE NOT ENFORCEABLE UNDER WASHINGTON LAW.

BY SIGNING BELOW, Borrower accepts and agrees to the terms and covenants contained in this Security Instrument and in any Rider executed by Borrower and recorded with it.

MORTGAGE ELECTRONIC REGISTRATION SYSTEMS, INC. RIDER
(MERS Rider)

THIS MORTGAGE ELECTRONIC REGISTRATION SYSTEMS, INC. RIDER ("MERS Rider") is made this **7th** day of **December, 2020**, and is incorporated into and amends and supplements the Deed of Trust (the "Security Instrument") of the same date given by the undersigned (the "Borrower," whether there are one or more persons undersigned) to secure Borrower's Note to **Boeing Employees' Credit Union** ("Lender") of the same date and covering the Property described in the Security Instrument, which is located at:

9815 35th Ave NE, Marysville, WA 98270
[Property Address]

In addition to the covenants and agreements made in this Security Instrument, Borrower and Lender further covenant and agree that the Security Instrument is amended as follows:

A. DEFINITIONS

1. The Definitions section of the Security Instrument is amended as follows:

"Lender" is **Boeing Employees' Credit Union**. Lender is a **State Chartered Credit Union** organized and existing under the laws of **THE STATE OF WASHINGTON**. Lender's address is **12770 Gateway Drive, MS 1052-2, Tukwila, WA 98168**. **Lender is the beneficiary under this Security Instrument.**. The term "Lender" includes any successors and assigns of Lender.

"MERS" is Mortgage Electronic Registration Systems, Inc. MERS is a separate corporation that is the Nominee for Lender and is acting solely for Lender. MERS is organized and existing under the laws of Delaware, and has an address and telephone number of P.O. Box 2026, Flint, MI 48501-2026, tel. (888) 679-MERS. MERS is appointed as the Nominee for Lender to exercise the rights, duties and obligations of Lender as Lender may from time to time direct, including but not limited to appointing a successor trustee, assigning, or releasing, in whole or in part this Security Instrument, foreclosing or directing Trustee to institute foreclosure of this Security Instrument, or taking such other actions as Lender may deem necessary or appropriate under this Security Instrument. The term "MERS" includes any successors and assigns of MERS. This appointment shall inure to and bind MERS, its successors and assigns, as well as Lender, until MERS' Nominee interest is terminated.

2. The Definitions section of the Security Instrument is further amended to add the following definition:

"Nominee" means one designated to act for another as its representative for a limited purpose.

B. TRANSFER OF RIGHTS IN THE PROPERTY

The Transfer of Rights in the Property section of the Security Instrument is amended to read as follows:

This Security Instrument secures to Lender: (i) the repayment of the Loan, and all renewals, extensions and modifications of the Note; and (ii) the performance of Borrower's covenants and agreements under this Security Instrument and the Note. For this purpose, Borrower irrevocably grants and conveys to Trustee, in trust, with power of sale, the following described property located in the **COUNTY** of **Snohomish**:

**LOT 1 OF SHORT PLAT 182 (4-78) RECORDED UNDER RECORDING NO. 8003100173, A REVISION
OF SHORT PLAT RECORDED UNDER RECORDING NO. 7810200401, BEING A PORTION OF THE NORTHWEST QUARTER OF THE SOUTHWEST QUARTER OF SECTION 16, TOWNSHIP 30 NORTH,
RANGE 5 EAST, W. M., RECORDS OF SNOHOMISH COUNTY, WASHINGTON.**

SITUATE IN THE COUNTY OF SNOHOMISH, STATE OF WASHINGTON.

TAX ACCOUNT NO.: 300516-003-016-00

which currently has the address of **9815 35th Ave NE Marysville, Washington 98270** ("Property Address"):

TOGETHER WITH all the improvements now or hereafter erected on the property, and all easements, appurtenances, and fixtures now or hereafter a part of the property. All replacements and additions shall also be covered by this Security Instrument. All of the foregoing is referred to in this Security Instrument as the "Property."

Lender, as the beneficiary under this Security Instrument, designates MERS as the Nominee for Lender. Any notice required by Applicable Law or this Security Instrument to be served on Lender must be served on MERS as the designated Nominee for Lender. Borrower understands and agrees that MERS, as the designated Nominee for Lender, has the right to exercise any or all interests granted by Borrower to Lender, including, but not limited to, the right to foreclose and sell the Property; and to take any action required of Lender including, but not limited to, assigning and releasing this Security Instrument, and substituting a successor trustee.

C. NOTICES

Section 15 of the Security Instrument is amended to read as follows:

15. Notices. All notices given by Borrower or Lender in connection with this Security Instrument must be in writing. Any notice to Borrower in connection with this Security Instrument shall be deemed to have been given to Borrower when mailed by first class mail or when actually delivered to Borrower's notice address if sent by other means. Notice to any one Borrower shall constitute notice to all Borrowers unless Applicable Law expressly requires otherwise. The notice address shall be the Property Address unless Borrower has designated a substitute notice address by notice to Lender. Borrower shall promptly notify Lender of Borrower's change of address. If Lender specifies a procedure for reporting Borrower's change of address, then Borrower shall only report a change of address through that specified procedure. There may be only one designated notice address under this Security Instrument at any one time. Any notice to Lender shall be given by delivering it or by mailing it by first class mail to Lender's address stated herein unless Lender has designated another address by notice to Borrower. Borrower acknowledges that any notice Borrower provides to Lender must also be provided to MERS as Nominee for Lender until MERS' Nominee interest is terminated. Any notice provided by Borrower in connection with this Security Instrument will not be deemed to have been given to MERS until actually received by MERS. Any notice in connection with this Security Instrument shall not be deemed to have been given to Lender until actually received by Lender. If any notice required by this Security Instrument is also required under Applicable Law, the Applicable Law requirement will satisfy the corresponding requirement under this Security Instrument.

D. SALE OF NOTE; CHANGE OF LOAN SERVICER; NOTICE OF GRIEVANCE

Section 20 of the Security Instrument is amended to read as follows:

20. Sale of Note; Change of Loan Servicer; Notice of Grievance. The Note or a partial interest in the Note (together with this Security Instrument) can be sold one or more times without prior notice to Borrower. Lender acknowledges that until it directs MERS to assign MERS's Nominee interest in this Security Instrument, MERS remains the Nominee for Lender, with the authority to exercise the rights of Lender. A sale might result in a change in the entity (known as the "Loan Servicer") that collects Periodic Payments due under the Note and this Security Instrument and performs other mortgage loan servicing obligations under the Note, this Security Instrument, and Applicable Law. There also might be one or more changes of the Loan Servicer unrelated to a sale of the Note. If there is a change of the Loan Servicer, Borrower will be given written notice of the change which will state the name and address of the new Loan Servicer, the address to which payments should be made and any other information RESPA requires in connection with a notice of transfer of servicing. If the Note is sold and thereafter the Loan is serviced by a Loan Servicer other than the purchaser of the Note, the mortgage loan servicing obligations to Borrower will remain with the Loan Servicer or be transferred to a successor Loan Servicer and are not assumed by the Note purchaser unless otherwise provided by the Note purchaser.

Neither Borrower nor Lender may commence, join, or be joined to any judicial action (as either an individual litigant or the member of a class) that arises from the other party's actions pursuant to this Security Instrument or that alleges that the other party has breached any provision of, or any duty owed by reason of, this Security Instrument, until such Borrower or Lender has notified the other party (with such notice given in compliance with the requirements of Section 15) of such alleged breach and afforded the other party hereto a reasonable period after the giving of such notice to take corrective

action. If Applicable Law provides a time period which must elapse before certain action can be taken, that time period will be deemed to be reasonable for purposes of this paragraph. The notice of acceleration and opportunity to cure given to Borrower pursuant to Section 22 and the notice of acceleration given to Borrower pursuant to Section 18 shall be deemed to satisfy the notice and opportunity to take corrective action provisions of this Section 20.

E. SUBSTITUTE TRUSTEE

Section 24 of the Security Instrument is amended to read as follows:

24. Substitute Trustee. In accordance with Applicable Law, Lender or MERS may from time to time appoint a successor trustee to any Trustee appointed hereunder who has ceased to act. Without conveyance of the Property, the successor trustee shall succeed to all the title, power and duties conferred upon Trustee herein and by Applicable Law.

BY SIGNING BELOW, Borrower accepts and agrees to the terms and covenants contained in this MERS Rider.

DEFINITIONS

Words used in multiple sections of this document are defined below and other words are defined in Sections 6, 8, 13 and 15. Certain rules regarding the usage of words used in this document are also provided in Section 11.

(A) "Security Instrument" means this document, which is dated August 20, 2022 .
(B) "Borrower" is
Isaac Steimle and Rebekah Steimle, husband and wife

Borrower is the grantor under this Security Instrument.
(C) "Lender" is Boeing Employees' Credit Union .
Lender is a Credit Union
organized and existing under the laws of the State of Washington .
Lender's address is PO Box 97050, Seattle, Washington 98124 -9750 .
Lender is the beneficiary under this Security Instrument.
(D) "Trustee" is Trustee Services, Inc. PO Box 2980 3647 NW Byron Street #200 Silverdale, WA 98383 .
(E) "Agreement" means the
Credit Line Account Variable Interest Rate Home Equity Secured Open-End Credit Agreement and Truth-In-Lending Disclosure
signed by Borrower and dated August 20, 2022 . The Agreement states that Borrower may, from time to time, obtain advances not to exceed at any time an amount equal to the Maximum Credit Limit (as defined therein) of
One Hundred Thousand and 00 / 100 ********
Dollars (U.S. $ $100,000.00) plus interest. Borrower has promised to pay this debt in regular Periodic Payments and to pay the debt in full not later than August 25, 2047 .
(F) "Property" means the property that is described below under the heading "Transfer of Rights in the Property." Loan Reference Number 2016555722
Abbreviated Legal Description:
Lot 1 Short Plat 182 4-78 Rec 8003100173 Snohomish Co WA

Full Legal Description is on page 2.
Assessor's Property Tax Parcel Number: 30051600301600
(G) "Loan" means the debt owed under the Agreement, plus interest, any late charges or other fees and charges due under the Agreement, and all sums due under this Security Instrument, plus interest.
(H) "Riders" means all Riders to this Security Instrument that are executed by Borrower. The following Riders are to be executed by Borrower [check box as applicable]:

☐ Adjustable Rate Rider	☐ Condominium Rider	☐ Second Home Rider
☐ Balloon Rider	☐ Planned Unit Development Rider	☐ Other(s) [specify]
☐ 1-4 Family Rider	☐ Biweekly Payment Rider	_____

(I) "Applicable Law" means all controlling applicable federal, state and local statutes, regulations, ordinances and administrative rules and orders (that have the effect of law) as well as all applicable final, non-appealable judicial opinions.
(J) "Community Association Dues, Fees, and Assessments" means all dues, fees, assessments and other charges that are imposed on Borrower or the Property by a condominium association, homeowners association or similar organization.

(K) "Electronic Funds Transfer" means any transfer of funds, other than a transaction originated by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, computer, or magnetic tape so as to order, instruct, or authorize a financial institution to debit or credit an account. Such term includes, but is not limited to, point-of-sale transfers, automated teller machine transactions, transfers initiated by telephone, wire transfers, and automated clearinghouse transfers.
(L) "Miscellaneous Proceeds" means any compensation, settlement, award of damages, or proceeds paid by any third party (other than insurance proceeds paid under the coverages described in Section 3) for: (i) damage to, or destruction of, the Property; (ii) condemnation or other taking of all or any part of the Property; (iii) conveyance in lieu of condemnation; or (iv) misrepresentations of, or omissions as to, the value and/or condition of the Property.
(M) "Periodic Payment" means the regularly scheduled amount due for principal and interest under the Agreement.
(N) "Successor in Interest of Borrower" means any party that has taken title to the Property, whether or not that party has assumed Borrower's obligations under the Agreement and/or this Security Instrument.

TRANSFER OF RIGHTS IN THE PROPERTY

This Security Instrument secures to Lender: (i) the repayment of the Loan, and all renewals, extensions and modifications of the Agreement; and (ii) the performance of Borrower's covenants and agreements under this Security Instrument and the Agreement. For this purpose, Borrower irrevocably grants and conveys to Trustee, in trust, with power of sale, the following described property located in the County of Snohomish :
[Type of Recording Jurisdiction] [Name of Recording Jurisdiction]

LOT 1 OF SHORT PLAT 182 (4-78) RECORDED UNDER RECORDING NO. 8003100173, A REVISION OF SHORT PLAT RECORDED UNDER RECORDING NO. 7810200401, BEING A PORTION OF THE NORTHWEST QUARTER OF THE SOUTHWEST QUARTER OF SECTION 16, TOWNSHIP 30 NORTH, RANGE 5 EAST, W.M., RECORDS OF SNOHOMISH COUNTY, MARYLAND. Parcel ID: 30051600301600

which currently has the address of 9815 35th Ave NE [Street]
Marysville [City], Washington 98270 [Zip Code] ("Property Address"):

TOGETHER WITH all the improvements now or hereafter erected on the property, and all easements, appurtenances, and fixtures now or hereafter a part of the property. All replacements and additions shall also be covered by this Security Instrument. All of the foregoing is referred to in this Security Instrument as the "Property."

BORROWER COVENANTS that Borrower is lawfully seised of the estate hereby conveyed and has the right to grant and convey the Property and that the Property is unencumbered, except for encumbrances of record. Borrower warrants and will defend generally the title to the Property against all claims and demands, subject to any encumbrances of record.

Borrower and Lender covenant and agree as follows:
1. Payment of Principal, Interest, Late Charges or other Fees and Charges. Borrower shall pay when due the principal of, and interest on, the debt owed under the Agreement and late charges or other fees and charges due under the Agreement. Payments due under the Agreement and this Security Instrument shall be made in U.S. currency. However, if any check or other instrument received by Lender as payment under the Agreement or this Security Instrument is returned to Lender unpaid, Lender may

require that any or all subsequent payments due under the Agreement and this Security Instrument be made in one or more of the following forms, as selected by Lender: (a) cash; (b) money order; (c) certified check, bank check, treasurer's check or cashier's check, provided any such check is drawn upon an institution whose deposits are insured by a federal agency, instrumentality, or entity; or (d) Electronic Funds Transfer.

Payments are deemed received by Lender when received at the location designated in the Agreement or at such other location as may be designated by Lender in accordance with the notice provisions in Section 10. Lender may return any payment or partial payment if the payment or partial payments are insufficient to bring the Loan current. If Borrower has breached any covenant or agreement in this Security Instrument and Lender has accelerated the obligations of Borrower hereunder pursuant to Section 16 then Lender may accept any payment or partial payment insufficient to bring the Loan current, without waiver of any rights hereunder or prejudice to its rights to refuse such payment or partial payments in the future, but Lender is not obligated to apply such payments at the time such payments are accepted. If each Periodic Payment is applied as of its scheduled due date, then Lender need not pay interest on unapplied funds. Lender may hold such unapplied funds until Borrower makes payment to bring the Loan current. If Borrower does not do so within a reasonable period of time, Lender shall either apply such funds or return them to Borrower. If not applied earlier, such funds will be applied to the outstanding principal balance under the Agreement immediately prior to foreclosure. No offset or claim which Borrower might have now or in the future against Lender shall relieve Borrower from making payments due under the Agreement and this Security Instrument or performing the covenants and agreements secured by this Security Instrument.

2. Charges; Liens. Borrower shall pay all taxes, assessments, charges, fines, and impositions attributable to the Property which can attain priority over this Security Instrument, leasehold payments or ground rents on the Property, if any, and Community Association Dues, Fees, and Assessments, if any.

Borrower shall promptly discharge any lien which has priority over this Security Instrument unless Borrower: (a) agrees in writing to the payment of the obligation secured by the lien in a manner acceptable to Lender, but only so long as Borrower is performing such agreement; (b) contests the lien in good faith by, or defends against enforcement of the lien in, legal proceedings which in Lender's opinion operate to prevent the enforcement of the lien while those proceedings are pending, but only until such proceedings are concluded; or (c) secures from the holder of the lien an agreement satisfactory to Lender subordinating the lien to this Security Instrument. If Lender determines that any part of the Property is subject to a lien which can attain priority over this Security Instrument, Lender may give Borrower a notice identifying the lien. Within 10 days of the date on which that notice is given, Borrower shall satisfy the lien or take one or more of the actions set forth above in this Section 2.

3. Property Insurance. Borrower shall keep the improvements now existing or hereafter erected on the Property insured against loss by fire, hazards included within the term "extended coverage," and other hazards including, but not limited to, earthquakes and floods, for which Lender requires insurance. This insurance shall be maintained in the amounts (including deductible levels) and for the periods that Lender requires. What Lender requires pursuant to the preceding sentences can change during the term of the Loan. The insurance carrier providing the insurance shall be chosen by Borrower subject to Lender's right to disapprove Borrower's choice, which right shall not be exercised unreasonably. Borrower shall be responsible for the payment of any fees imposed by the Federal Emergency Management Agency in connection with the review of any flood zone determination resulting from an objection by Borrower.

If Borrower fails to maintain any of the coverages described above, Lender may obtain insurance coverage, at Lender's option and Borrower's expense. Lender is under no obligation to purchase any particular type or amount of coverage. Therefore, such coverage shall cover Lender, but might or might not protect Borrower, Borrower's equity in the Property, or the contents of the Property, against any risk, hazard or liability and might provide greater or lesser coverage than was previously in effect. Borrower acknowledges that the cost of the insurance coverage so obtained might significantly exceed the cost of insurance that Borrower could have obtained. Any amounts disbursed by Lender under this Section 3 shall become additional debt of Borrower secured by this Security Instrument. These amounts shall bear interest at the rate chargeable for advances under the Agreement from the date of disbursement and shall be payable, with such interest, upon notice from Lender to Borrower requesting payment.

All insurance policies required by Lender and renewals of such policies shall be subject to Lender's right to disapprove such policies, shall include a standard mortgage clause, and shall name Lender as mortgagee and/or as an additional loss payee. Lender shall have the right to hold the policies and renewal certificates. If Lender requires, Borrower shall promptly give to Lender all receipts of paid premiums and renewal notices. If Borrower obtains any form of insurance coverage, not otherwise required by Lender, for damage to, or destruction of, the Property, such policy shall include a standard mortgage clause and shall name Lender as mortgagee and/or as an additional loss payee.

In the event of loss, Borrower shall give prompt notice to the insurance carrier and Lender. Lender may make proof of loss if not made promptly by Borrower. Unless Lender and Borrower otherwise agree in writing, any insurance proceeds, whether or not the underlying insurance was required by Lender, shall be applied to restoration or repair of the Property, if the restoration or repair is economically feasible and Lender's security is not lessened. During such repair and restoration period, Lender shall have the right to hold such insurance proceeds until Lender has had an opportunity to inspect such Property to ensure the work has been completed to Lender's satisfaction, provided that such inspection shall be undertaken promptly. Lender may disburse proceeds for the repairs and restoration in a single payment or in a series of progress payments as the work is completed. Unless an agreement is made in writing or Applicable Law

requires interest to be paid on such insurance proceeds, Lender shall not be required to pay Borrower any interest or earnings on such proceeds. Fees for public adjusters, or other third parties, retained by Borrower shall not be paid out of the insurance proceeds and shall be the sole obligation of Borrower. If the restoration or repair is not economically feasible or Lender's security would be lessened, the insurance proceeds shall be applied to the sums secured by this Security Instrument, whether or not then due, with the excess, if any, paid to Borrower.

If Borrower abandons the Property, Lender may file, negotiate and settle any available insurance claim and related matters. If Borrower does not respond within 30 days to a notice from Lender that the insurance carrier has offered to settle a claim, then Lender may negotiate and settle the claim. The 30-day period will begin when the notice is given. In either event, or if Lender acquires the Property under Section 16 or otherwise, Borrower hereby assigns to Lender: (a) Borrower's rights to any insurance proceeds in an amount not to exceed the amounts unpaid under the Agreement or this Security Instrument; and (b) any other of Borrower's rights (other than the right to any refund of unearned premiums paid by Borrower) under all insurance policies covering the Property, insofar as such rights are applicable to the coverage of the Property. Lender may use the insurance proceeds either to repair or restore the Property or to pay amounts unpaid under the Agreement or this Security Instrument, whether or not then due.

4. Preservation, Maintenance and Protection of the Property; Inspections. Borrower shall not destroy, damage or impair the Property, allow the Property to deteriorate or commit waste on the Property. Whether or not Borrower is residing in the Property, Borrower shall maintain the Property in order to prevent the Property from deteriorating or decreasing in value due to its condition. Unless it is determined pursuant to Section 3 that repair or restoration is not economically feasible, Borrower shall promptly repair the Property if damaged to avoid further deterioration or damage. If insurance or condemnation proceeds are paid in connection with damage to, or the taking of, the Property, Borrower shall be responsible for repairing or restoring the Property only if Lender has released proceeds for such purposes. Lender may disburse proceeds for the repairs and restoration in a single payment or in a series of progress payments as the work is completed. If the insurance or condemnation proceeds are not sufficient to repair or restore the Property, Borrower is not relieved of Borrower's obligation for the completion of such repair or restoration.

Lender or its agent may make reasonable entries upon and inspections of the Property. If it has reasonable cause, Lender may inspect the interior of the improvements on the Property. Lender shall give Borrower notice at the time of or prior to such an interior inspection specifying such reasonable cause.

5. Protection of Lender's Interest in the Property and Rights Under this Security Instrument. If: (a) Borrower fails to perform the covenants and agreements contained in this Security Instrument; (b) there is a legal proceeding that might significantly affect Lender's interest in the Property and/or rights under this Security Instrument (such as a proceeding in bankruptcy, probate, for condemnation or forfeiture, for enforcement of a lien which may attain priority over this Security Instrument or to enforce laws or regulations); or (c) Borrower has abandoned the Property, then Lender may do and pay for whatever is reasonable or appropriate to protect Lender's interest in the Property and rights under this Security Instrument, including protecting and/or assessing the value of the Property, and securing and/or repairing the Property. Lender's actions can include, but are not limited to: (a) paying any sums secured by a lien which has priority over this Security Instrument; (b) appearing in court; and (c) paying reasonable attorneys' fees to protect its interest in the Property and/or rights under this Security Instrument, including its secured position in a bankruptcy proceeding. Securing the Property includes, but is not limited to, entering the Property to make repairs, change locks, replace or board up doors and windows, drain water from pipes, eliminate building or other code violations or dangerous conditions, and have utilities turned on or off. Although Lender may take action under this Section 5, Lender does not have to do so and is not under any duty or obligation to do so. It is agreed that Lender incurs no liability for not taking any or all actions authorized under this Section 5. Any amounts disbursed by Lender under this Section 5 shall become additional debt of Borrower secured by this Security Instrument. These amounts shall bear interest at the Note rate from the date of disbursement and shall be payable, with such interest, upon notice from Lender to Borrower requesting payment. If this Security Instrument is on a leasehold, Borrower shall comply with all the provisions of the lease. If Borrower acquires fee title to the Property, the leasehold and the fee title shall not merge unless Lender agrees to the merger in writing.

6. Assignment of Miscellaneous Proceeds; Forfeiture. All Miscellaneous Proceeds are hereby assigned to and shall be paid to Lender. If the Property is damaged, such Miscellaneous Proceeds shall be applied to restoration or repair of the Property, if the restoration or repair is economically feasible and Lender's security is not lessened. During such repair and restoration period, Lender shall have the right to hold such Miscellaneous Proceeds until Lender has had an opportunity to inspect such Property to ensure the work has been completed to Lender's satisfaction, provided that such inspection shall be undertaken promptly. Lender may pay for the repairs and restoration in a single disbursement or in a series of progress payments as the work is completed. Unless an agreement is made in writing or Applicable Law requires interest to be paid on such Miscellaneous Proceeds, Lender shall not be required to pay Borrower any interest or earnings on such Miscellaneous Proceeds. If the restoration or repair is not economically feasible or Lender's security would be lessened, the Miscellaneous Proceeds shall be applied to the sums secured by this Security Instrument, whether or not then due, with the excess, if any, paid to Borrower.

In the event of a total taking, destruction, or loss in value of the Property, the Miscellaneous Proceeds shall be applied to the sums secured by this Security Instrument, whether or not then due, with the excess, if any, paid to Borrower.

In the event of a partial taking, destruction, or loss in value of the Property in which the fair market value of the Property immediately before the partial taking, destruction, or loss in value is equal to or greater than the amount of the sums secured by this Security Instrument immediately before the partial taking, destruction, or loss in value, unless Borrower and Lender otherwise agree in writing, the sums secured by this Security Instrument shall be reduced by the amount of the Miscellaneous Proceeds multiplied by the following fraction: (a) the total amount of the sums secured immediately before the partial taking, destruction, or loss in value divided by (b) the fair market value of the Property immediately before the partial taking, destruction, or loss in value. Any balance shall be paid to Borrower.

In the event of a partial taking, destruction, or loss in value of the Property in which the fair market value of the Property immediately before the partial taking, destruction, or loss in value is less than the amount of the sums secured immediately before the partial taking, destruction, or loss in value, unless Borrower and Lender otherwise agree in writing, the Miscellaneous Proceeds shall be applied to the sums secured by this Security Instrument whether or not the sums are then due.

If the Property is abandoned by Borrower, or if, after notice by Lender to Borrower that the Opposing Party (as defined in the next sentence) offers to make an award to settle a claim for damages, Borrower fails to respond to Lender within 30 days after the date the notice is given, Lender is authorized to collect and apply the Miscellaneous Proceeds either to restoration or repair of the Property or to the sums secured by this Security Instrument, whether or not then due. "Opposing Party" means the third party that owes Borrower Miscellaneous Proceeds or the party against whom Borrower has a right of action in regard to Miscellaneous Proceeds.

Borrower shall be in default if any action or proceeding, whether civil or criminal, is begun that, in Lender's judgment, could result in forfeiture of the Property or other material impairment of Lender's interest in the Property or rights under this Security Instrument. Borrower can cure such a default and, if acceleration has occurred, reinstate as provided in Section 14, by causing the action or proceeding to be dismissed with a ruling that, in Lender's judgment, precludes forfeiture of the Property or other material impairment of Lender's interest in the Property or rights under this Security Instrument. The proceeds of any award or claim for damages that are attributable to the impairment of Lender's interest in the Property are hereby assigned and shall be paid to Lender.

7. Borrower Not Released; Forbearance by Lender Not a Waiver. Extension of the time for payment or modification of amortization of the sums secured by this Security Instrument granted by Lender to Borrower or any Successor in Interest of Borrower shall not operate to release the liability of Borrower or any Successors in Interest of Borrower. Lender shall not be required to commence proceedings against any Successor in Interest of Borrower or to refuse to extend time for payment or otherwise modify amortization of the sums secured by this Security Instrument by reason of any demand made by the original Borrower or any Successors in Interest of Borrower. Any forbearance by Lender in exercising any right or remedy including, without limitation, Lender's acceptance of payments from third persons, entities or Successors in Interest of Borrower or in amounts less than the amount then due, shall not be a waiver of or preclude the exercise of any right or remedy.

8. Joint and Several Liability; Co-signers; Successors and Assigns Bound. The covenants and agreements of this Security Instrument shall bind and benefit the successors and assigns of Lender and Borrower, subject to the provisions of paragraph 13. Borrower covenants and agrees that Borrower's obligations and liability shall be joint and several. However, any Borrower who co-signs this Security Instrument but is not personally liable under the Agreement (a "co-signer"): (a) is co-signing this Security Instrument only to mortgage, grant and convey the co-signer's interest in the Property under the terms of this Security Instrument; (b) is not personally obligated to pay the sums secured by this Security Instrument; and (c) agrees that Lender and any other Borrower can agree to extend, modify, forbear or make any accommodations with regard to the terms of this Security Instrument or the Agreement without the co-signer's consent.

9. Loan Charges. Lender may charge Borrower fees for services performed in connection with Borrower's default, for the purpose of protecting Lender's interest in the Property and rights under this Security Instrument, including, but not limited to, attorneys' fees, property inspection and valuation fees. In regard to any other fees, the absence of express authority in this Security Instrument to charge a specific fee to Borrower shall not be construed as a prohibition on the charging of such fee. Lender may not charge fees that are expressly prohibited by this Security Instrument or by Applicable Law.

If the Loan is subject to a law which sets maximum loan charges, and that law is finally interpreted so that the interest or other loan charges collected or to be collected in connection with the Loan exceed the permitted limits, then: (a) any such loan charge shall be reduced by the amount necessary to reduce the charge to the permitted limit; and (b) any sums already collected from Borrower which exceeded permitted limits will be refunded to Borrower. Lender may choose to make this refund by reducing the principal owed under the Agreement or by making a direct payment to Borrower. Borrower's acceptance of any such refund made by direct payment to Borrower will constitute a waiver of any right of action Borrower might have arising out of such overcharge.

10. Notices. All notices given by Borrower or Lender in connection with this Security Instrument must be in writing. Any notice to Borrower in connection with this Security Instrument shall be deemed to have been given to Borrower when mailed by first class mail or when actually delivered to Borrower's notice address if sent by other means. Notice to any one Borrower shall constitute notice to all Borrowers unless Applicable Law expressly requires otherwise. The notice address shall be the Property Address unless Borrower has designated a substitute notice address by notice to Lender. Borrower shall promptly notify Lender of Borrower's change of address. If Lender specifies a procedure for reporting Borrower's

change of address, then Borrower shall only report a change of address through that specified procedure. There may be only one designated notice address under this Security Instrument at any one time. Any notice to Lender shall be given by delivering it or by mailing it by first class mail to Lender's address stated herein unless Lender has designated another address by notice to Borrower. Any notice in connection with this Security Instrument shall not be deemed to have been given to Lender until actually received by Lender. If any notice required by this Security Instrument is also required under Applicable Law, the Applicable Law requirement will satisfy the corresponding requirement under this Security Instrument.

11. Governing Law; Severability; Rules of Construction. This Security Instrument shall be governed by federal law and the law of the jurisdiction in which the Property is located. All rights and obligations contained in this Security Instrument are subject to any requirements and limitations of Applicable Law. Applicable Law might explicitly or implicitly allow the parties to agree by contract or it might be silent, but such silence shall not be construed as a prohibition against agreement by contract. In the event that any provision or clause of this Security Instrument or the Agreement conflicts with Applicable Law, such conflict shall not affect other provisions of this Security Instrument or the Agreement which can be given effect without the conflicting provision.

As used in this Security Instrument: (a) words of the masculine gender shall mean and include corresponding neuter words or words of the feminine gender; (b) words in the singular shall mean and include the plural and vice versa; and (c) the word "may" gives sole discretion without any obligation to take any action.

12. Borrower's Copy. Borrower shall be given one copy of this Security Instrument.

13. Transfer of the Property or a Beneficial Interest in Borrower. As used in this Section 13, "Interest in the Property" means any legal or beneficial interest in the Property, including, but not limited to, those beneficial interests transferred in a bond for deed, contract for deed, installment sales contract or escrow agreement, the intent of which is the transfer of title by Borrower at a future date to a purchaser.

If all or any part of the Property or any Interest in the Property is sold or transferred (or if Borrower is not a natural person and a beneficial interest in Borrower is sold or transferred) without Lender's prior written consent, Lender may require immediate payment in full of all sums secured by this Security Instrument. However, this option shall not be exercised by Lender if such exercise is prohibited by Applicable Law.

If Lender exercises this option, Lender shall give Borrower notice of acceleration. The notice shall provide a period of not less than 30 days from the date the notice is given in accordance with Section 10 within which Borrower must pay all sums secured by this Security Instrument. If Borrower fails to pay these sums prior to the expiration of this period, Lender may invoke any remedies permitted by this Security Instrument without further notice or demand on Borrower.

14. Borrower's Right to Reinstate After Acceleration. If Borrower meets certain conditions, Borrower shall have the right to have enforcement of this Security Instrument discontinued at any time prior to the earliest of: (a) five days before sale of the Property pursuant to any power of sale contained in this Security Instrument; (b) such other period as Applicable Law might specify for the termination of Borrower's right to reinstate; or (c) entry of a judgment enforcing this Security Instrument. Those conditions are that Borrower: (a) pays Lender all sums which then would be due under this Security Instrument and the Agreement as if no acceleration had occurred; (b) cures any default of any other covenants or agreements; (c) pays all expenses incurred in enforcing this Security Instrument, including, but not limited to, reasonable attorneys' fees, property inspection and valuation fees, and other fees incurred for the purpose of protecting Lender's interest in the Property and rights under this Security Instrument; and (d) takes such action as Lender may reasonably require to assure that Lender's interest in the Property and rights under this Security Instrument, and Borrower's obligation to pay the sums secured by this Security Instrument, shall continue unchanged. Lender may require that Borrower pay such reinstatement sums and expenses in one or more of the following forms, as selected by Lender: (a) cash; (b) money order; (c) certified check, bank check, treasurer's check or cashier's check, provided any such check is drawn upon an institution whose deposits are insured by a federal agency, instrumentality or entity; or (d) Electronic Funds Transfer. Upon reinstatement by Borrower, this Security Instrument and obligations secured hereby shall remain fully effective as if no acceleration had occurred. However, this right to reinstate shall not apply in the case of acceleration under Section 13.

15. Hazardous Substances. As used in this Section 15: (a) "Hazardous Substances" are those substances defined as toxic or hazardous substances, pollutants, or wastes by Environmental Law and the following substances: gasoline, kerosene, other flammable or toxic petroleum products, toxic pesticides and herbicides, volatile solvents, materials containing asbestos or formaldehyde, and radioactive materials; (b) "Environmental Law" means federal laws and laws of the jurisdiction where the Property is located that relate to health, safety or environmental protection; (c) "Environmental Cleanup" includes any response action, remedial action, or removal action, as defined in Environmental Law; and (d) an "Environmental Condition" means a condition that can cause, contribute to, or otherwise trigger an Environmental Cleanup.

Borrower shall not cause or permit the presence, use, disposal, storage, or release of any Hazardous Substances, or threaten to release any Hazardous Substances, on or in the Property. Borrower shall not do, nor allow anyone else to do, anything affecting the Property: (a) that is in violation of any Environmental Law; (b) which creates an Environmental Condition; or (c) which, due to the presence, use, or release of a Hazardous Substance, creates a condition that adversely affects the value of the Property. The preceding two sentences shall not apply to the presence, use, or storage on the Property of small quantities of Hazardous Substances that are generally recognized to be appropriate to normal residential

uses and to maintenance of the Property (including, but not limited to, hazardous substances in consumer products).

Borrower shall promptly give Lender written notice of: (a) any investigation, claim, demand, lawsuit or other action by any governmental or regulatory agency or private party involving the Property and any Hazardous Substance or Environmental Law of which Borrower has actual knowledge; (b) any Environmental Condition, including but not limited to, any spilling, leaking, discharge, release or threat of release of any Hazardous Substance; and (c) any condition caused by the presence, use or release of a Hazardous Substance which adversely affects the value of the Property. If Borrower learns, or is notified by any governmental or regulatory authority, or any private party, that any removal or other remediation of any Hazardous Substance affecting the Property is necessary, Borrower shall promptly take all necessary remedial actions in accordance with Environmental Law. Nothing herein shall create any obligation on Lender for an Environmental Cleanup.

16. Acceleration; Remedies. Lender shall give notice to Borrower prior to acceleration following Borrower's breach of any covenant or agreement in the Agreement under which acceleration is permitted (but not prior to acceleration under Section 13 unless Applicable Law provides otherwise). The notice shall specify: (a) the default; (b) the action required to cure the default; (c) a date, not less than 30 days from the date the notice is given to Borrower, by which the default must be cured; and (d) that failure to cure the default on or before the date specified in the notice may result in acceleration of the sums secured by this Security Instrument and sale of the Property at public auction at a date not less than 120 days in the future. The notice shall further inform Borrower of the right to reinstate after acceleration, the right to bring a court action to assert the non-existence of a default or any other defense of Borrower to acceleration and sale, and any other matters required to be included in the notice by Applicable Law. If the default is not cured on or before the date specified in the notice, Lender at its option, may require immediate payment in full of all sums secured by this Security Instrument without further demand and may invoke the power of sale and/or any other remedies permitted by Applicable Law. Lender shall be entitled to collect all expenses incurred in pursuing the remedies provided in this Section 16, including, but not limited to, reasonable attorneys' fees and costs of title evidence.

If Lender invokes the power of sale, Lender shall give written notice to Trustee of the occurrence of an event of default and of Lender's election to cause the Property to be sold. Trustee and Lender shall take such action regarding notice of sale and shall give such notices to Borrower and to other persons as Applicable Law may require. After the time required by Applicable Law and after publication of the notice of sale, Trustee, without demand on Borrower, shall sell the Property at public auction to the highest bidder at the time and place and under the terms designated in the notice of sale in one or more parcels and in any order Trustee determines. Trustee may postpone sale of the Property for a period or periods permitted by Applicable Law by public announcement at the time and place fixed in the notice of sale. Lender or its designee may purchase the Property at any sale.

Trustee shall deliver to the purchaser Trustee's deed conveying the Property without any covenant or warranty, expressed or implied. The recitals in the Trustee's deed shall be prima facie evidence of the truth of the statements made therein. Trustee shall apply the proceeds of the sale in the following order: (a) to all expenses of the sale, including, but not limited to, reasonable Trustee's and attorneys' fees; (b) to all sums secured by this Security Instrument; and (c) any excess to the person or persons legally entitled to it or to the clerk of the superior court of the county in which the sale took place.

17. Reconveyance. Upon payment of all sums secured by this Security Instrument and termination of Borrower's ability to obtain further advances under the Agreement, Lender shall request Trustee to reconvey the Property and shall surrender this Security Instrument and the Agreement evidencing debt secured by this Security Instrument to Trustee. Trustee shall reconvey the Property without warranty to the person or persons legally entitled to it. Such person or persons shall pay any recordation costs and the Trustee's fee for preparing the reconveyance.

18. Substitute Trustee. In accordance with Applicable Law, Lender may from time to time appoint a successor trustee to any Trustee appointed hereunder who has ceased to act. Without conveyance of the Property, the successor trustee shall succeed to all the title, power and duties conferred upon Trustee herein and by Applicable Law.

19. Use of Property. The Property is not used principally for agricultural purposes.

20. Attorneys' Fees. Lender shall be entitled to recover its reasonable attorneys' fees and costs in any action or proceeding to construe or enforce any term of this Security Instrument. The term "attorneys' fees," whenever used in this Security Instrument, shall include without limitation attorneys' fees incurred by Lender in any bankruptcy proceeding or on appeal.

ORAL AGREEMENTS OR ORAL COMMITMENTS TO LOAN MONEY, EXTEND CREDIT, OR TO FORBEAR FROM ENFORCING REPAYMENT OF A DEBT ARE NOT ENFORCEABLE UNDER WASHINGTON LAW.

BY SIGNING BELOW, Borrower accepts and agrees to the terms and covenants contained in this Security Instrument.

ALTA COMMITMENT FOR TITLE INSURANCE

Issued By agent:

CHICAGO TITLE
COMPANY OF WASHINGTON

Commitment Number:

500148915
Amendment 1

NOTICE

IMPORTANT - READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, Chicago Title Insurance Company, a Florida corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within one hundred eighty (180) days after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

Chicago Title Insurance Company

SCHEDULE B, PART I
REQUIREMENTS

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

5. Additional requirements and/or exceptions may be added as details of the transaction are disclosed to, or become known by the Company.

6. The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

SCHEDULE B, PART I
REQUIREMENTS
(continued)

7. Payment of the real estate excise tax, if required.

The Land is situated within the boundaries of local taxing authority of City of Marysville.

The rate of real estate excise tax for properties which are not formally classified and specially valued as timberland or agricultural land is:

State portion: 1.10% on any portion of the sales price of $525,000 or less;
1.28% on any portion of the sales price above $525,000, up to $1,525,000;
2.75% on any portion of the sales price above $1,525,000, up to $3,025,000;
3.00% on any portion of the sales price above $3,025,000;

The rate of excise for properties formally classified as timberland or agriculture land will be 1.28% for the State portion on the entire sales price.

Local portion: 0.5% on the entire sales price.

An additional $5.00 State Technology Fee must be included in all excise tax payments.

If the transaction is exempt, an additional $5.00 Affidavit Processing Fee is required.

Any conveyance document must be accompanied by the official Washington State Excise Tax Affidavit, which can be found online HERE <https://dor.wa.gov/get-form-or-publication/forms-subject/real-estate-excise-tax>. The applicable excise tax must be paid and the affidavit approved at the time of the recording of the conveyance documents. (NOTE: Real Estate Excise Tax Affidavits must be printed as legal size forms).

SCHEDULE B, PART I
REQUIREMENTS
(continued)

8. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below.

   Limited Liability Company: KBHPNW LLC, a Delaware limited liability company

   a. A copy of its operating agreement, if any, and any and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.

   b. If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendment thereto with the appropriate filing stamps.

   c. If the Limited Liability Company is member-managed a full and complete current list of members certified by the appropriate manager or member.

   d. A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created

   e. If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

9. If the Seller or Borrower intends to sign documents required to insure the transaction utilizing a remote online notary, please notify the Company immediately as additional underwriting requirements will need to be satisfied.

10. This item intentionally deleted.

11. The Company will require an ALTA/NSPS LAND TITLE SURVEY. If the owner of the Land that is the subject of this transaction is in possession of a current ALTA/NSPS LAND TITLE SURVEY, the Company will require that said survey be submitted for review and approval; otherwise, a new survey, satisfactory to the Company, must be prepared by a licensed land surveyor and supplied to the Company prior to the close of escrow.

    The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I
REQUIREMENTS
(continued)

12. **TO PROVIDE THE EXTENDED COVERAGE POLICY AND/OR ALTA HOMEOWNER'S POLICY IDENTIFIED IN SCHEDULE A, GENERAL EXCEPTIONS A THROUGH D WILL BE CONSIDERED WHEN OUR INSPECTION AND/OR REVIEW OF SURVEY, IF REQUIRED, IS COMPLETED. A SUPPLEMENTAL COMMITMENT WILL FOLLOW.**

If there have been recent improvements on the property within 90 days prior to closing we will require a signed indemnity agreement and a recent financial statement from each indemnitor.

If construction financing is to be insured, please contact the title officer for requirements.

The Company reserves the right to add additional exceptions or make further requirements after review of the property inspection and requested documentation.

END OF REQUIREMENTS

NOTES

The following matters will not be listed as Special Exceptions in Schedule B of the policy. There will be no coverage for loss arising by reason of the matters listed below because these matters are either excepted or excluded from coverage or are not matters covered under the insuring provisions of the policy.

Note A: Note: The Public Records indicate that the address of the improvement located on said Land is as follows:

3705 98th St NE and 9907 & 9909 35th Ave NE
Marysville, WA 98270

Note B: Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

Note C: NOTE: The premium for the Extended Coverage Owner's Policy is itemized as follows:

Standard Coverage:	$6,127.00
Sales tax:	$606.57
Extended coverage surcharge:	$2,145.00
Sales tax on surcharge:	$212.36

TOTAL PREMIUM, INCLUDING TAX: $9,090.93

Note D: Note: Any map furnished with this Commitment is for convenience in locating the land indicated herein with reference to streets and other land. No liability is assumed by reason of reliance thereon.

This page is only a part of a 2021 ALTA Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Tax Account No.: 300516-003-014-00, 300516-003-045-00, 300516-003-045-01 and 300516-003-058-00

END OF NOTES

END OF SCHEDULE B, PART I

This page is only a part of a 2021 ALTA Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II
EXCEPTIONS

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto.

H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.

I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

J. Water rights, claims or title to water.

K. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II
EXCEPTIONS
(continued)

SCHEDULE B, PART II
EXCEPTIONS
(continued)

SPECIAL EXCEPTIONS

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1190796

2. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1209089

3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution line
   Recording Date: March 12, 1965
   Recording No.: 1765370
   Affects: Lots 1 and 2 and other property

   The exact location and extent of said easement is not disclosed of record.

4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County
   Purpose: Electric transmission and/or distribution line
   Recording Date: December 17, 1973
   Recording No.: 2323218
   Affects: West 65 feet of the South 140 feet of Lot 4

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II
EXCEPTIONS
(continued)

5. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a Statutory Warranty Deed:

Purpose:	Ingress, egress and utilities
Recording Date:	December 10, 1975
Recording No.:	2416806
Affects:	West 20 feet of Lots 1 and 2 and other property

6. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. 103 (5-78):

Recording No: 7805170302

7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	City of Marysville
Purpose:	Storm sewer and sanitary sewer lines, water lines, pipes and appurtenances
Recording Date:	April 9, 2001
Recording No.:	200104090756

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II
EXCEPTIONS
(continued)

20. It appears Bonnie Stevens is deceased. The Company finds no probate of the decedent's estate in Snohomish County County. This commitment is therefore subject to the rights of heirs and devisees, creditors (including liens under RCW 43.20B.080), liability for inheritance tax, or other matters that a probate of the estate might disclose.

    If we are requested to insure title passing outside of probate, the Company will require the following:
    a. Completed, signed and acknowledged Lack of Probate Affidavits (both the Company's internal underwriting version and the shorter version for recording).
    b. A certified copy of the Death Certificate.
    c. A copy of the Community Property Agreement, if any.
    d. A copy of the decedent's Will and codicils, if any.
    e. A Real Estate Excise Tax Affidavit executed by the inheriting party(ies), to file at the time of recording the Lack of Probate Affidavit, as required by WAC 458-61A-202(6).

    The Company reserves the right to make additional requirements upon review.

21. Any unrecorded leaseholds, right of vendors and holders of security interests on personal property installed upon the Land and rights of tenants to remove trade fixtures at the expiration of the terms.

END OF SCHEDULE B, PART II

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

COMMITMENT CONDITIONS

1. DEFINITIONS

a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.

b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.

c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.

d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.

e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.

f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.

g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.

h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.

i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.

j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

a. the Notice;

b. the Commitment to Issue Policy;

c. the Commitment Conditions;

d. Schedule A;

e. Schedule B, Part I-Requirements;

f. Schedule B, Part II-Exceptions; and

g. a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:

i. comply with the Schedule B, Part I-Requirements;

ii. eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or

iii. acquire the Title or create the Mortgage covered by this Commitment.

b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.

c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.

This page is only a part of a 2021 ALTA Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

(continued)

d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.

e. The Company is not liable for the content of the Transaction Identification Data, if any.

f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I-Requirements have been met to the satisfaction of the Company.

g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.

b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.

c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.

d. The deletion or modification of any Schedule B, Part II-Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.

e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.

f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION - INTENTIONALLY DELETED

END OF CONDITIONS

STATE OF WASHINGTON

IN CONSIDERATION OF Five Hundred and no /100 ($500.00) Dollars, the receipt of which is hereby acknowledged, the State of Washington does hereby grant, bargain, sell and convey unto Doris E. (Sales) Hartley, her heirs and assigns, the following described School lands, situated in Snohomish County, Washington, to-wit:

N½N½NW¼SW¼, section 16, township 30 north, range 5 east, W.M., containing 10.00 acres, more or less, according to the government survey thereof.

The above described lands are sold subject to all the provisions of Chapter 202 of the Session Laws of 1927, to which reference is hereby made, and which shall be as binding upon the grantee and any successor in interest of said grantee as though set out at length herein.

The grantor hereby expressly saves, excepts and reserves out of the grant hereby made, unto itself, its successors and assigns forever, all coal, oil, gas, coal, ores, minerals and fossils of every kind and character and value in and upon said lands above described, or any part thereof, and the right to explore the same for such coal, oil, gas, coal, ores, minerals and fossils; and it also hereby expressly saves and reserves out of the grant hereby made, unto itself, its successors and assigns forever the right to enter by itself, its agents, attorneys and servants upon said lands, or any part or parts thereof, at any and all times, for the purpose of opening, developing and working mines thereon, and taking out and removing therefrom all such coal, oil, gas, coal, ores, minerals and fossils, and to build, maintain and operate all necessary railroads, roads, flumes, canals, ditches, pipe lines, reservoirs and all structures, buildings, machinery, roads and railroads, and to do all things necessary in the search for, discovery, mining, excavation, production, removal and marketing thereof, and to occupy as much of said lands as may be necessary or convenient for such purposes hereby granting full and complete access for said purposes to the said coal, oil, gas, coal, ores, minerals and fossils in, upon or under said lands, or any part thereof, and the right to use, free of charge, sufficient water, timber and stone from said lands for mining purposes; provided, however, that no rights shall be reserved under this reservation by the State, its successors or assigns, to the use of any waters developed by the owner of the land upon which the rights hereby reserved to the State, its successors or assigns or sought to be exercised, full payment for all damages sustained by said owner, by reason of entering upon said land.

TO HAVE AND TO HOLD the said premises, with their appurtenances, unto the said Doris E. Sales, her heirs and assigns forever.

WITNESS the Seal of the State, affixed this 28th day of March, 1936.

Governor.

Attest: Assistant Secretary of State.

BY Justin Deputy

The center line of said transmission and distribution line to be located as follows:

As now staked and located or as hereafter may be relocated or extended by mutual consent of the parties hereto.

Together with the right of ingress to and egress from said lands across adjacent lands of the Grantor, for the purpose of constructing, reconstructing, repairing, renewing, altering, changing, patrolling and operating said line, and the right at any time to remove said poles, wires and appurtenances from said lands.

Also the right at all times to cut all brush and timber, and trim all trees standing or growing upon said lands which, in the opinion of the Grantee, constitute a menace or danger to said line.

The Grantor and the heirs, successors or assigns of Grantor covenant and agree not to do any blasting or discharge any explosives within a distance of three hundred (300) feet of said line without giving reasonable notice in writing to the Grantee, its successors or assigns, of intention so to do.

The rights, title, privileges and authority hereby granted shall continue to be in force until such time as the Grantee, its successors, or assigns shall permanently remove said poles, wires and appurtenances from said lands, or shall otherwise permanently abandon said line, at which time all such rights, title, privileges and authority hereby granted shall terminate.

Any mortgage on said land held by the Mortgagee is hereby subordinated to the rights herein granted to the Grantee, but in all other respects the said mortgage shall remain unimpared.

In WITNESS WHEREOF, this instrument has been executed the day and year first above written:

DISTRIBUTION EASEMENT

2323218

THIS INDENTURE made this 15th day of October, 19 73, between
Adrian Stevens and Bonnie Stevens, husband and wife

hereinafter referred to as Grantor; PUBLIC UTILITY DISTRICT NO. 1 OF SNOHOMISH COUNTY, , hereinafter referred to as Grantee; and , hereinafter referred to as Mortgagee, WITNESSETH:

WHEREAS, Grantor is the owner of certain lands and premises situated in the County of Snohomish, State of Washington, described as follows:

The west half of the west half of the south half of the northeast quarter of the northwest quarter of the southwest quarter of Section 16, Township 30 North, Range 5 East, W.M.,
EXCEPT County Road
Situate in the County of Snohomish, State of Washington.

AND WHEREAS, Grantee is desirous of acquiring certain rights and privileges across, over, under and upon the said lands and premises;

NOW, THEREFORE, Grantor, for and in consideration of the sum of ONE DOLLAR ($1.00) and other valuable consideration, receipt of which is hereby acknowledged, hereby conveys and grants to Grantee, its successors and assigns and its permittees and licensees, the perpetual right, privilege, and authority to construct, erect, alter, improve, repair, operate and maintain, together with the right to convert to an underground system, an electric distribution line, consisting of a single line of poles and/or structures with necessary braces, guys and anchors, and to place or allow or permit to be placed and operated upon or suspend from such poles and/or structures, distribution and signal wires, insulators, cross-arms, transformers, telephone or telegraph communication wires, and other necessary or convenient appurtenances, across, under, over and upon the following described lands and premises situated in the County of Snohomish, State of Washington, to-wit:

A strip of land 10 feet in width lying 5 feet on each side of the overhead electric facilities situated in the west 65 feet of the south 140 feet of the above described tract.

Deputy

Together with the right of ingress to and egress from said lands across adjacent lands of the Grantor, for the purpose of constructing, reconstructing, repairing, renewing, altering, changing, patrolling and operating said line, and the right at any time to remove said poles, wires and appurtenances from said lands.

Also the right at all times to cut and/or trim all brush, timber, trees or other growth standing or growing upon the lands of Grantor which, in the opinion of Grantee, constitute a menace or danger to said line. Grantor and the heirs, successors or assigns of Grantor hereby covenant and agree not to construct or permit to be constructed any structures of any kind on the easement area without written approval of the Manager of the District.

The Grantor and the heirs, successors or assigns of Grantor covenant and agree not to do any blasting or discharge any explosives within a distance of three hundred (300) feet of said line without giving reasonable notice in writing to the Grantee, its successors or assigns, of intention so to do.

The rights, title, privileges and authority hereby granted shall continue to be in force until such time as the Grantee, its successors, or assigns shall permanently remove said poles, wires and appurtenances from said lands, or shall otherwise permanently abandon said line, at which time all such rights, title, privileges and authority hereby granted shall terminate.

The Grantor also covenants to and with the Grantee that Grantor is lawfully seized and possessed of the land aforesaid; has a good and lawful right and power to sell and convey same; that same are free and clear of encumbrances, except as above indicated; and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the lawful claims and demands of all persons whomsoever.

Any mortgage on said land held by the Mortgagee is hereby subordinated to the rights herein granted to the Grantee, but in all other respects the said mortgage shall remain unimpaired.

IN WITNESS WHEREOF, this instrument has been executed the day and year first above written.

DECLARATION OF SHORT SUBDIVISION AND OF COVENANTS

7805170302

Know all men by these presents:

That we, the undersigned, having a real interest in the tract of land described by this declaration; and do hereby declare the herein described division of land approved as short plat number SP-103(3-78) on the 16th day of MAY, 1978, by the Planning Department of Snohomish County, subject to the following covenants and conditions:

I) That the land described by this declaration may not be further subdivided in any manner exceeding a total of four (4) parcels by anyone within five (5) years of the above date of approval without a final plat, having been filed for record with the Auditor of Snohomish County, pursuant to the provisions of Ch. 58.17 RCW, and the resolutions of Snohomish County, and subject to the penalties attendant thereto.

2) That all subsequent deeds will contain provisions for private roads in the manner described herein.

3) That all maintenance of any private road described by this declaration shall be by the owners of the parcels having legal access therefrom or their heirs, assigns, or successors, unless and until such roads are improved to Snohomish County standards, and dedicated to and accepted by Snohomish County.

4) That any private road will be subject to a utilities easement in favor of the grantor or his successor and of any electric, telephone, television cable, gas, water, or sewer company, public or private, or their permittees or assigns to install, construct, operate, maintain, alter, and repair their respective utilities, together with the right of ingress and egress for said purposes.

5) That with respect to any private road described by this declaration whether it remains private or becomes a dedicated county road, there is the additional right to make all necessary slopes for cuts and fills; and the right to continue to drain said roads and ways over and across any lot or lots where the water might take a natural course upon reasonable grading pursuant to improvement for dedication of the roads and ways shown herein. Following reasonable grading pursuant to improvement for dedication of the roads and ways shown herein, no drainage waters on any lot or lots shall be diverted or blocked from their natural course so as to discharge upon any public road rights-of-way or to hamper proper road drainage.

6) That the legal description and the illustrative map attached hereto of this short subdivision (are) (~~are not~~) based upon accurate surveys.

7) That the legal description of the land herein subdivided into not more than four (4) parcels is attached hereto and incorporated by reference as though fully set out herein.

8) That additional covenants, easements, and restrictions, if any, solely for the benefit of the grantor, and his heirs, successors and assigns enforceable only by such persons, are attached hereto as exhibits "A" and incorporated by reference as though only set out herein.

SHORT PLAT CERTIFICATE

Eklund Real Estate
Frontier Village
Lk.Stevens, WA 98258
Attn: Tom T. C. Nelson

Gentlemen:

This is a certificate as of April 5, 1978 at 8:00 A.M. for filing the proposed short plat, described as follows:

AS ATTACHED HERETO.

This Company certifies that record title is vested in Lois D. Gildersleeve, as her separate property, as to Parcel A; Troy D. Munday and Ernalee Munday, husband and wife, as to Parcel B; and in Adrian L. Stevens and Bonnie L. Stevens, husband and wife, as to Parcel C; free from all liens, encumbrances and objections, except as follows:

1. Mortgage dated January 19, 1965, recorded January 21, 1965 in Volume 757 of Mortgages, page 335 under Auditor's File No. 1753974, records of Snohomish County, Washington to secure an indebtedness of $15,400.00 and any interest, advances or other obligations secured thereby;
   Mortgagor: Troy D. Munday and Ernalee Munday, his wife, who took title as Ermalee Mundat
   Mortgagee: First Federal Savings & Loan Association of Everett, Washington

2. Mortgage dated December 9, 1975, recorded December 10, 1975 in Volume 926 of Mortgages, page 451 under Auditor's File No. 2416807, records of Snohomish County, Washington to secure an indebtedness of $5,253.54 and any interest, advances or other obligations secured thereby;
   Mortgagor: Lois D. Gildersleeve, a widow
   Mortgagee: Troy D. Munday and Ernalee Munday, husband and wife

3. Contract of Sale dated September 16, 1975, and recorded on October 4, 1976, under Auditor's File No. 7610040055;
   Seller : Troy D. Munday and Ernalee Munday, husband and wife
   Purchaser : Adrian L. Stevens and Bonnie L. Stevens, husband and wife
   (Excise tax paid October 4, 1976 under Receipt No. 12384)

4. Easement over the West 20 feet of said premises as granted in instrument recorded under Auditor's File No. 1551572.

(CONTINUED ON PAGE 2)

AGENT FOR
SAFECO TITLE INSURANCE COMPANY

7805170302

VOL 1310 PAGE 665

B-75019

5. Easement for electric transmission and distribution line, together with necessary appurtenances and the following:
Covenants against interference and blasting.
Rights of access for purposes of maintenance and repair.
Right to cut all brush and timber and trim all trees standing or growing which constitute a menace or danger to said line.
Grantee - Public Utility District No. 1 of Snohomish County and
West Coast Telephone Company
Auditor's File No. - 1765370

6. Easement as contained in instrument dated August 2, 1969, granted by Troy D. Munday and/or Ernalee K. Munday, to General Telephone Company of the Northwest, Inc., a corporation, recorded August 13, 1969, under Auditor's File No. 2108228, as follows:
Three feet along North side of property beginning at Northwest corner, Easterly for a distance of 190 feet.
Property located in the North half of the Northwest quarter of the Southwest quarter of Section 16, Township 30 North, Range 5 East, W.M., in Marysville, Washington.
Together with the right to install, inspect, and maintain all of the facilities necessary to provide communication service, power service, and other related services located on said right-of-way and easement, including the trimming or removal of any brush, trees, shrubs, structures or objects that may interfere with the construction, maintenance and operation of siad services.

7. Easement for electric transmission and distribution line, together with necessary appurtenances and the following:
Covenants against interference and blasting.
Rights of access for purposes of maintenance and repair.
Right to cut all brush and timber and trim all trees standing or growing which constitute a menace or danger to said line.
Grantee - Public Utility District No. 1 of Snohomish County
Auditor's File No. - 2323218 (Affects that portion vested in Stevens - unlocateable)

8. Exceptions and reservations contained in deed from the State of Washington under which title is claimed, recorded in the office of the Auditor of Snohomish County, Washington, whereby the grantor excepts and reserves all oils, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working mines, etc., provided that no rights shall be exercised until provision has been made for full payment of all damages sustained by reason of such entry.

NOTE: TAXES AND ASSESSMENTS NOT EXAMINED OR REPORTED.

This certificate does not purport to reflect a full report on conditions of title and shall have no force or effect except as a basis for the certificate applied for.

CITY OF MARYSVILLE
UTILITY EASEMENT

THIS INDENTURE made this 21 day of December, 2000, between Adrian L Stevens and Bonnie L Stevens, hereinafter referred to as "Grantor," the CITY OF MARYSVILLE, a municipal corporation of the State of Washington, hereinafter referred to as "Grantee," and _____, hereinafter referred to as "Mortgagee," WITNESSETH

WHEREAS, Grantor is the owner of certain lands and premises situated in the County of Snohomish, State of Washington described as follows

See **EXHIBIT A** attached hereto

Abbreviated legal description
(i e , lot, block, plat or qtr , section, township, range)

Lot 1, SCSP 103 (3-78), Rec 7805170302

Additional on page 3

Assessor's Tax Parcel ID#: 163005-3-058-0006

and,

WHEREAS, Grantee is desirous of acquiring certain rights and privileges across, over, under and upon said lands and premises;

NOW, THEREFORE, Grantor, for valuable consideration, the adequacy and receipt of which is hereby acknowledged, hereby conveys and grants to the Grantee, its successors and assigns and its permittees and licensees, the perpetual right, privilege and authority to construct, alter, improve, repair, operate and maintain a storm sewer and sanitary sewer lines, and/or water lines, pipes and appurtenances, across, under, over and upon the following described lands and premises situated in the County of Snohomish, State of Washington, to-wit

See **EXHIBIT B** attached hereto

Together with the right of ingress to and egress from said lands across adjacent lands of the Grantor, for the purpose of constructing, reconstructing, repairing, renewing, altering, changing, patrolling and operating said lines, and the right at anytime to remove said lines and appurtenances from said lands

The Grantor reserves the right to use the surface of the above-described easement in the manner now existing, but shall not erect any buildings, structures, patios, or other construction of any nature on said easement This conveyance is conditioned upon the Grantee's obligation to replace any fences, lawn, shrubbery or land contours that are disturbed in connection with the exercise of the Grantee's rights hereunder, in as good condition as the same were immediately before the property was entered by the Grantee

The rights, title, privileges and authority hereby granted shall continue to be in force until such time as the Grantee, its successors or assigns, shall permanently remove said lines and appurtenances from said lands, or shall otherwise permanently abandon said lines, at which time all such rights, title, privileges and authority hereby granted shall terminate

The Grantor also covenants to and with the Grantee that Grantor is lawfully seized and possessed of the land aforesaid, has a good and lawful right and power to sell and convey same, that same is free and clear of encumbrances, except as above indicated, and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the

200104090756

lawful claims and demands of all persons whomsoever This conveyance shall be a covenant running with the land, and shall be binding on the Grantor and its heirs, successors and assigns forever

Any mortgage on said land held by the Mortgagee is hereby subordinated to the rights herein granted to the Grantee, but in all other respects the said mortgage shall remain unimpaired

IN WITNESS WHEREOF, this instrument has been executed the day and year first above written

CITY OF MARYSVILLE
UTILITY EASEMENT

THIS INDENTURE made this 21 day of December, 2000, between Adrian L Stevens and Bonnie L Stevens, hereinafter referred to as "Grantor," the CITY OF MARYSVILLE, a municipal corporation of the State of Washington, hereinafter referred to as "Grantee," and _____, hereinafter referred to as "Mortgagee," WITNESSETH

WHEREAS, Grantor is the owner of certain lands and premises situated in the County of Snohomish, State of Washington described as follows

See **EXHIBIT A** attached hereto

Abbreviated legal description
(i.e , lot, block, plat or qtr , section, township, range)

Lot 2, SCSP 103 (3-78), Rec 7805170302

Additional on page 3

Assessor's Tax Parcel ID# 163005-3-045-0002

and,

WHEREAS, Grantee is desirous of acquiring certain rights and privileges across, over, under and upon said lands and premises,

NOW, THEREFORE, Grantor, for valuable consideration, the adequacy and receipt of which is hereby acknowledged, hereby conveys and grants to the Grantee, its successors and assigns and its permittees and licensees, the perpetual right, privilege and authority to construct, alter, improve, repair, operate and maintain a storm sewer and sanitary sewer lines, and/or water lines, pipes and appurtenances, across, under, over and upon the following described lands and premises situated in the County of Snohomish, State of Washington, to-wit

See **EXHIBIT B** attached hereto

Together with the right of ingress to and egress from said lands across adjacent lands of the Grantor, for the purpose of constructing, reconstructing, repairing, renewing, altering, changing, patrolling and operating said lines, and the right at anytime to remove said lines and appurtenances from said lands

The Grantor reserves the right to use the surface of the above-described easement in the manner now existing, but shall not erect any buildings, structures, patios, or other construction of any nature on said easement This conveyance is conditioned upon the Grantee's obligation to replace any fences, lawn, shrubbery or land contours that are disturbed in connection with the exercise of the Grantee's rights hereunder, in as good condition as the same were immediately before the property was entered by the Grantee

The rights, title, privileges and authority hereby granted shall continue to be in force until such time as the Grantee, its successors or assigns, shall permanently remove said lines and appurtenances from said lands, or shall otherwise permanently abandon said lines, at which time all such rights, title, privileges and authority hereby granted shall terminate

The Grantor also covenants to and with the Grantee that Grantor is lawfully seized and possessed of the land aforesaid, has a good and lawful right and power to sell and convey same, that same is free and clear of encumbrances, except as above indicated, and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the

lawful claims and demands of all persons whomsoever This conveyance shall be a covenant running with the land, and shall be binding on the Grantor and its heirs, successors and assigns forever

Any mortgage on said land held by the Mortgagee is hereby subordinated to the rights herein granted to the Grantee, but in all other respects the said mortgage shall remain unimpaired

IN WITNESS WHEREOF, this instrument has been executed the day and year first above written

Introducing inHere® Digital Title
The inHere Digital Title View is an easy-to-read digital view of your title report (or commitment/prelim). This report will tell you:

- the current state of the property's title
- what needs to be cleared in order for a title insurance policy to be issued (like mortgages or liens that need to be paid off)
- what will and will not be covered by the title insurance policy

The future of real estate is... inHere®.
The inhere Experience Platform transforms the entire experience, making it easy and safe to start, track, notarize, and close on your next home transaction.

ALTA COMMITMENT FOR TITLE INSURANCE

issued by agent:

CHICAGO TITLE
COMPANY OF WASHINGTON

Commitment Number:

500150661

NOTICE

IMPORTANT - READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, Chicago Title Insurance Company, a Florida corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within one hundred eighty (180) days after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

LOT 4 OF SHORT PLAT 182 (4-78) RECORDED UNDER RECORDING NO. 8003100173, A REVISION OF SHORT PLAT RECORDED UNDER RECORDING NO. 7810200401, BEING A PORTION OF THE NORTHWEST QUARTER OF THE SOUTHWEST QUARTER OF SECTION 16, TOWNSHIP 30 NORTH, RANGE 5 EAST, W. M., RECORDS OF SNOHOMISH COUNTY, WASHINGTON.

SITUATE IN THE COUNTY OF SNOHOMISH, STATE OF WASHINGTON.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

5. Additional requirements and/or exceptions may be added as details of the transaction are disclosed to, or become known by the Company.

6. The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

7. If the Seller or Borrower intends to sign documents required to insure the transaction utilizing a remote online notary, please notify the Company immediately as additional underwriting requirements will need to be satisfied.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements
(continued)

8. Payment of the real estate excise tax, if required.

   The Land is situated within the boundaries of local taxing authority of the City of Marysville.

   The rate of real estate excise tax for properties which are not formally classified and specially valued as timberland or agricultural land is:

   State portion: 1.10% on any portion of the sales price of $525,000 or less;
   1.28% on any portion of the sales price above $525,000, up to $1,525,000;
   2.75% on any portion of the sales price above $1,525,000, up to $3,025,000;
   3.00% on any portion of the sales price above $3,025,000;

   The rate of excise for properties formally classified as timberland or agriculture land will be 1.28% for the State portion on the entire sales price.

   Local portion: 0.50% on the entire sales price.

   An additional $5.00 State Technology Fee must be included in all excise tax payments.

   If the transaction is exempt, an additional $5.00 Affidavit Processing Fee is required.

   Any conveyance document must be accompanied by the official Washington State Excise Tax Affidavit, which can be found online HERE <https://dor.wa.gov/get-form-or-publication/forms-subject/real-estate-excise-tax>. The applicable excise tax must be paid and the affidavit approved at the time of the recording of the conveyance documents. (NOTE: Real Estate Excise Tax Affidavits must be printed as legal size forms).

9. The Company will require an ALTA/NSPS LAND TITLE SURVEY. If the owner of the Land that is the subject of this transaction is in possession of a current ALTA/NSPS LAND TITLE SURVEY, the Company will require that said survey be submitted for review and approval; otherwise, a new survey, satisfactory to the Company, must be prepared by a licensed land surveyor and supplied to the Company prior to the close of escrow.

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

10. To provide an extended coverage owner's policy, general exceptions A through D may be eliminated or limited after an inspection of the Land and/or review of the survey, if required, is completed. General exceptions E through J will remain in the owner's policy to be issued.

    If the anticipated closing date is less than 4 weeks from the date of this commitment, please contact your title officer immediately.

END OF REQUIREMENTS

NOTES

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements
(continued)

The following matters will not be listed as Special Exceptions in Schedule B of the policy. There will be no coverage for loss arising by reason of the matters listed below because these matters are either excepted or excluded from coverage or are not matters covered under the insuring provisions of the policy.

Note A: Note: The Public Records indicate that the address of the improvement located on said Land is as follows:

3625 98th Street Northeast
Marysville, WA 98270

Note B: Note: This map/plat is being furnished as an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances or acreage shown thereon.

Note C: Note: There are NO conveyances affecting said Land recorded within 36 months of the date of this report.

Note D: Note: Any map furnished with this Commitment is for convenience in locating the land indicated herein with reference to streets and other land. No liability is assumed by reason of reliance thereon.

Note E: Recording charges (per document title) for closings on Jan 2nd, 2023 and after for all Washington counties:

Deed of Trust - $304.50 and $1 for each additional page.
Most other Docs, except as noted below - $303.50 and $1 for each additional page.
Assignment of Deed of Trust, Substitution or Appointment of Successor Trustee - $18.00 and $1 for each additional page.
Multiple titled documents are charged per applicable title.

Our Company uses Simplifile, a third party vendor, for electronic submission of documents to the County. In addition to the County recording fee each document recorded electronically will be billed an additional $4.25 plus tax.

RECORDING CHARGES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

Note F: Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements
(continued)

Note G: Note: FOR INFORMATIONAL PURPOSES ONLY:

The following may be used as an abbreviated legal description on the documents to be recorded, per Amended RCW 65.04.045. Said abbreviated legal description is not a substitute for a complete legal description within the body of the document:

LT 4, SP NO 182 (4-78) REC NO 8003100173 & 7810200401 a PTN of NW-SW of 16-30N-5E wm

Tax Account No.: 300516-003-066-00

END OF NOTES

END OF SCHEDULE B, PART I

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto.

H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.

I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

J. Water rights, claims or title to water.

K. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions
(continued)

SPECIAL EXCEPTIONS

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1209090

   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.

2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Purpose: Ingress, egress and utilities
   Recording Date: August 17, 1962
   Recording No.: 1553273

3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution system
   Recording Date: December 27, 1962
   Recording No.: 1581756
   Affects: Portion of said premises

4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209

5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):

   Recording No: 8003100173

   Said short plat is a revision of short plat recorded under Recording No. 7810200401.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

1. DEFINITIONS

a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.

b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.

c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.

d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.

e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.

f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.

g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.

h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.

i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.

j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

a. the Notice;

b. the Commitment to Issue Policy;

c. the Commitment Conditions;

d. Schedule A;

e. Schedule B, Part I-Requirements; and

f. Schedule B, Part II-Exceptions; and

g. a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:

i. comply with the Schedule B, Part I-Requirements;

ii. eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or

iii. acquire the Title or create the Mortgage covered by this Commitment.

b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.

c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.

d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.

e. The Company is not liable for the content of the Transaction Identification Data, if any.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

(continued)

f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I-Requirements have been met to the satisfaction of the Company.

g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.

b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.

c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.

d. The deletion or modification of any Schedule B, Part II-Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.

e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.

f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION - INTENTIONALLY DELETED

END OF CONDITIONS

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

RECORDING REQUIREMENTS

Effective January 1, 1997, document format and content requirements have been imposed by Washington Law. Failure to comply with the following requirements may result in rejection of the document by the county recorder or imposition of a $50.00 surcharge.

First page or cover sheet:

3" top margin containing nothing except the return address.

1" side and bottom margins containing no markings or seals.

Title(s) of documents.

Recording no. of any assigned, released or referenced document(s).

Grantors names (and page no. where additional names can be found).

Grantees names (and page no. where additional names can be found).

Abbreviated legal description (Lot, Block, Plat Name or Section, Township, Range and Quarter, Quarter Section for unplatted). Said abbreviated legal description is not a substitute for a complete legal description which must also appear in the body of the document.

Assessor's tax parcel number(s).

Return address (in top 3" margin).

**A cover sheet can be attached containing the above format and data if the first page does not contain all required data.

Additional Pages:

1" top, side and bottom margins containing no markings or seals.

All Pages:

No stapled or taped attachments. Each attachment must be a separate page. All notary and other pressure seals must be smudged for visibility. Font size of 8 points or larger.

WIRE SAFE™ | Inquire before you wire!

WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

FIDELITY NATIONAL FINANCIAL
PRIVACY NOTICE

Effective December 1, 2023

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.* loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for these main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.
- To provide reviews and testimonials about our services, with your consent.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to affiliated or nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to affiliated or nonaffiliated third parties with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (https://fnf.com/pages/californiaprivacy.aspx) or call (888) 413-1748.

For Connecticut Residents: For additional information about your Connecticut consumer privacy rights, or to make a consumer privacy request, or to appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Colorado Residents: For additional information about your Colorado consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Nevada Residents: We are providing this notice pursuant to state law. You may be placed on our internal Do Not Call List by calling FNF Privacy at (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. For further information concerning Nevada's telephone solicitation law, you may contact: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: aginquiries@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Utah Residents: For additional information about your Utah consumer privacy rights, or to make a consumer privacy request, please call (888) 714-2710.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

For Virginia Residents: For additional information about your Virginia consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

Information From Children

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions or would like to correct your Personal Information, visit FNF's Privacy Inquiry Website or contact us by phone at (888) 714-2710, by email at privacy@fnf.com, or by mail to:

Introducing inHere® Digital Title
The inHere Digital Title View is an easy-to-read digital view of your title report (or commitment/prelim). This report will tell you:

- the current state of the property's title
- what needs to be cleared in order for a title insurance policy to be issued (like mortgages or liens that need to be paid off)
- what will and will not be covered by the title insurance policy

The future of real estate is... inHere®.
The inhere Experience Platform transforms the entire experience, making it easy and safe to start, track, notarize, and close on your next home transaction.

ALTA COMMITMENT FOR TITLE INSURANCE

issued by agent:

CHICAGO TITLE
COMPANY OF WASHINGTON

Commitment Number:

500150532

NOTICE

IMPORTANT - READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, Chicago Title Insurance Company, a Florida corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within one hundred eighty (180) days after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

5. Additional requirements and/or exceptions may be added as details of the transaction are disclosed to, or become known by the Company.

6. The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

7. If the Seller or Borrower intends to sign documents required to insure the transaction utilizing a remote online notary, please notify the Company immediately as additional underwriting requirements will need to be satisfied.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements
(continued)

8. Payment of the real estate excise tax, if required.

   The Land is situated within the boundaries of local taxing authority of the City of Marysville.

   The rate of real estate excise tax for properties which are not formally classified and specially valued as timberland or agricultural land is:

   State portion: 1.10% on any portion of the sales price of $525,000 or less;
   1.28% on any portion of the sales price above $525,000, up to $1,525,000;
   2.75% on any portion of the sales price above $1,525,000, up to $3,025,000;
   3.00% on any portion of the sales price above $3,025,000;

   The rate of excise for properties formally classified as timberland or agriculture land will be 1.28% for the State portion on the entire sales price.

   Local portion: 0.50% on the entire sales price.

   An additional $5.00 State Technology Fee must be included in all excise tax payments.

   If the transaction is exempt, an additional $5.00 Affidavit Processing Fee is required.

   Any conveyance document must be accompanied by the official Washington State Excise Tax Affidavit, which can be found online HERE <https://dor.wa.gov/get-form-or-publication/forms-subject/real-estate-excise-tax>. The applicable excise tax must be paid and the affidavit approved at the time of the recording of the conveyance documents. (NOTE: Real Estate Excise Tax Affidavits must be printed as legal size forms).

9. The Company will require an ALTA/NSPS LAND TITLE SURVEY. If the owner of the Land that is the subject of this transaction is in possession of a current ALTA/NSPS LAND TITLE SURVEY, the Company will require that said survey be submitted for review and approval; otherwise, a new survey, satisfactory to the Company, must be prepared by a licensed land surveyor and supplied to the Company prior to the close of escrow.

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

10. To provide an extended coverage owner's policy, general exceptions A through D may be eliminated or limited after an inspection of the Land and/or review of the survey, if required, is completed. General exceptions E through J will remain in the owner's policy to be issued.

    If the anticipated closing date is less than 4 weeks from the date of this commitment, please contact your title officer immediately.

END OF REQUIREMENTS

NOTES

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements
(continued)

The following matters will not be listed as Special Exceptions in Schedule B of the policy. There will be no coverage for loss arising by reason of the matters listed below because these matters are either excepted or excluded from coverage or are not matters covered under the insuring provisions of the policy.

Note A: Note: The Public Records indicate that the address of the improvement located on said Land is as follows:

3609 98th Street Northeast
Marysville, WA 98270

Note B: Note: This map/plat is being furnished as an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances or acreage shown thereon.

Note C: Note: There are NO conveyances affecting said Land recorded within 36 months of the date of this report.

Note D: Note: Any map furnished with this Commitment is for convenience in locating the land indicated herein with reference to streets and other land. No liability is assumed by reason of reliance thereon.

Note E: Recording charges (per document title) for closings on Jan 2nd, 2023 and after for all Washington counties:

Deed of Trust - $304.50 and $1 for each additional page.
Most other Docs, except as noted below - $303.50 and $1 for each additional page.
Assignment of Deed of Trust, Substitution or Appointment of Successor Trustee - $18.00 and $1 for each additional page.
Multiple titled documents are charged per applicable title.

Our Company uses Simplifile, a third party vendor, for electronic submission of documents to the County. In addition to the County recording fee each document recorded electronically will be billed an additional $4.25 plus tax.

RECORDING CHARGES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

Note F: Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

SCHEDULE B, PART I - Requirements
(continued)

Note G: Note: FOR INFORMATIONAL PURPOSES ONLY:

The following may be used as an abbreviated legal description on the documents to be recorded, per Amended RCW 65.04.045. Said abbreviated legal description is not a substitute for a complete legal description within the body of the document:

LT 3, SP NO 8003100173 rev of # 7810200401 a PTN of NW-SW of 16-30N-5E wm

Tax Account No.: 300516-003-065-00

END OF NOTES

END OF SCHEDULE B, PART I

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto.

H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.

I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

J. Water rights, claims or title to water.

K. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions
(continued)

SPECIAL EXCEPTIONS

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1209090

   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.

2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Purpose: Ingress, egress and utilities
   Recording Date: August 17, 1962
   Recording No.: 1553273

3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution system
   Recording Date: December 27, 1962
   Recording No.: 1581756
   Affects: Portion of said premises

4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209

5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):

   Recording No: 8003100173

   Said short plat is a revision of short plat recorded under Recording No. 7810200401.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions
(continued)

6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:

   Recording Date: July 26, 1999
   Recording No.: 199907260975

7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines and/or water lines
   Recording Date: February 12, 2001
   Recording No.: 200102120728
   Affects: Portion of said premises

8. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.

9. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):

   Year: 2024
   Tax Account No.: 300516-003-065-00
   Levy Code: 00511
   Assessed Value-Land: $278,500.00
   Assessed Value-Improvements: $385,400.00

   General and Special Taxes:
   Billed: $857.34
   Paid: $428.67
   Unpaid: $428.67

10. The property herein described is carried on the tax rolls as partially exempt under a Senior Citizen's exemption and the assessed values have been "frozen." If said taxes are not paid prior to the sale by or death of the qualifying taxpayer, the exemption will be disallowed, the assessed value will be adjusted and the full tax amount for the current and/or prior years, if any, will be due:

    Levy Code: 00511
    Estimated amount of tax without exemption, including special taxes and charges: $ 3,133.61

COMMITMENT CONDITIONS

1. DEFINITIONS

a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.

b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.

c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.

d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.

e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.

f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.

g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.

h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.

i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.

j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

a. the Notice;

b. the Commitment to Issue Policy;

c. the Commitment Conditions;

d. Schedule A;

e. Schedule B, Part I-Requirements; and

f. Schedule B, Part II-Exceptions; and

g. a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:

i. comply with the Schedule B, Part I-Requirements;

ii. eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or

iii. acquire the Title or create the Mortgage covered by this Commitment.

b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.

c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.

d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.

e. The Company is not liable for the content of the Transaction Identification Data, if any.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

(continued)

f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I-Requirements have been met to the satisfaction of the Company.

g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.

b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.

c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.

d. The deletion or modification of any Schedule B, Part II-Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.

e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.

f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION - INTENTIONALLY DELETED

END OF CONDITIONS

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

RECORDING REQUIREMENTS

Effective January 1, 1997, document format and content requirements have been imposed by Washington Law. Failure to comply with the following requirements may result in rejection of the document by the county recorder or imposition of a $50.00 surcharge.

First page or cover sheet:

3" top margin containing nothing except the return address.

1" side and bottom margins containing no markings or seals.

Title(s) of documents.

Recording no. of any assigned, released or referenced document(s).

Grantors names (and page no. where additional names can be found).

Grantees names (and page no. where additional names can be found).

Abbreviated legal description (Lot, Block, Plat Name or Section, Township, Range and Quarter, Quarter Section for unplatted). Said abbreviated legal description is not a substitute for a complete legal description which must also appear in the body of the document.

Assessor's tax parcel number(s).

Return address (in top 3" margin).

**A cover sheet can be attached containing the above format and data if the first page does not contain all required data.

Additional Pages:

1" top, side and bottom margins containing no markings or seals.

All Pages:

No stapled or taped attachments. Each attachment must be a separate page. All notary and other pressure seals must be smudged for visibility. Font size of 8 points or larger.

WIRE SAFE™ | Inquire before you wire!

WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

FIDELITY NATIONAL FINANCIAL
PRIVACY NOTICE

Effective December 1, 2023

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.* loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for these main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.
- To provide reviews and testimonials about our services, with your consent.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to affiliated or nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to affiliated or nonaffiliated third parties with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (https://fnf.com/pages/californiaprivacy.aspx) or call (888) 413-1748.

For Connecticut Residents: For additional information about your Connecticut consumer privacy rights, or to make a consumer privacy request, or to appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Colorado Residents: For additional information about your Colorado consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Nevada Residents: We are providing this notice pursuant to state law. You may be placed on our internal Do Not Call List by calling FNF Privacy at (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. For further information concerning Nevada's telephone solicitation law, you may contact: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: aginquiries@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Utah Residents: For additional information about your Utah consumer privacy rights, or to make a consumer privacy request, please call (888) 714-2710.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

For Virginia Residents: For additional information about your Virginia consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

Information From Children

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions or would like to correct your Personal Information, visit FNF's Privacy Inquiry Website or contact us by phone at (888) 714-2710, by email at privacy@fnf.com, or by mail to:

Attn: Chief Privacy Officer

ALTA COMMITMENT FOR TITLE INSURANCE

issued by agent:

CHICAGO TITLE
COMPANY OF WASHINGTON

Commitment Number:

500150591

NOTICE

IMPORTANT - READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, Chicago Title Insurance Company, a Florida corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within one hundred eighty (180) days after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

Chicago Title Insurance Company

By:

Michael J. Nolan, President

Countersigned By:

Brent Aune
Authorized Officer or Agent

Attest:

Marjorie Nemzura, Secretary

SCHEDULE B, PART I - Requirements

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

5. Additional requirements and/or exceptions may be added as details of the transaction are disclosed to, or become known by the Company.

6. The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

7. If the Seller or Borrower intends to sign documents required to insure the transaction utilizing a remote online notary, please notify the Company immediately as additional underwriting requirements will need to be satisfied.

8. In the event that the Land is occupied or intended to be occupied by the owner and a spouse or registered domestic partner as a homestead, the conveyance or encumbrance of the Land must be executed and acknowledged by both spouses or both registered domestic partners, pursuant to RCW 6.13 which now provides for an automatic homestead on such Land.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

SCHEDULE B, PART I - Requirements
(continued)

9. Payment of the real estate excise tax, if required.

   The Land is situated within the boundaries of local taxing authority of City of Marysville.

   The rate of real estate excise tax for properties which are not formally classified and specially valued as timberland or agricultural land is:

   State portion: 1.10% on any portion of the sales price of $525,000 or less;
   1.28% on any portion of the sales price above $525,000, up to $1,525,000;
   2.75% on any portion of the sales price above $1,525,000, up to $3,025,000;
   3.00% on any portion of the sales price above $3,025,000;

   The rate of excise for properties formally classified as timberland or agriculture land will be 1.28% for the State portion on the entire sales price.

   Local portion: 0.50% on the entire sales price.

   An additional $5.00 State Technology Fee must be included in all excise tax payments.

   If the transaction is exempt, an additional $5.00 Affidavit Processing Fee is required.

   Any conveyance document must be accompanied by the official Washington State Excise Tax Affidavit, which can be found online HERE <https://dor.wa.gov/get-form-or-publication/forms-subject/real-estate-excise-tax>. The applicable excise tax must be paid and the affidavit approved at the time of the recording of the conveyance documents. (NOTE: Real Estate Excise Tax Affidavits must be printed as legal size forms).

10. The Company will require an ALTA/NSPS LAND TITLE SURVEY. If the owner of the Land that is the subject of this transaction is in possession of a current ALTA/NSPS LAND TITLE SURVEY, the Company will require that said survey be submitted for review and approval; otherwise, a new survey, satisfactory to the Company, must be prepared by a licensed land surveyor and supplied to the Company prior to the close of escrow.

    The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

11. To provide an extended coverage owner's policy, general exceptions A through D may be eliminated or limited after an inspection of the Land and/or review of the survey, if required, is completed. General exceptions E through J will remain in the owner's policy to be issued.

    If the anticipated closing date is less than 4 weeks from the date of this commitment, please contact your title officer immediately.

END OF REQUIREMENTS

NOTES

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART I - Requirements
(continued)

The following matters will not be listed as Special Exceptions in Schedule B of the policy. There will be no coverage for loss arising by reason of the matters listed below because these matters are either excepted or excluded from coverage or are not matters covered under the insuring provisions of the policy.

Note A: Note: The Public Records indicate that the address of the improvement located on said Land is as follows:

9921 35th Avenue Northeast
Marysville, WA 98270

Note B: Note: This map/plat is being furnished as an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances or acreage shown thereon.

Note C: Note: Any map furnished with this Commitment is for convenience in locating the land indicated herein with reference to streets and other land. No liability is assumed by reason of reliance thereon.

Note D: Recording charges (per document title) for closings on Jan 2nd, 2023 and after for all Washington counties:

Deed of Trust - $304.50 and $1 for each additional page.
Most other Docs, except as noted below - $303.50 and $1 for each additional page.
Assignment of Deed of Trust, Substitution or Appointment of Successor Trustee - $18.00 and $1 for each additional page.
Multiple titled documents are charged per applicable title.

Our Company uses Simplifile, a third party vendor, for electronic submission of documents to the County. In addition to the County recording fee each document recorded electronically will be billed an additional $4.25 plus tax.

RECORDING CHARGES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

Note E: Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

Note F: Note: FOR INFORMATIONAL PURPOSES ONLY:

The following may be used as an abbreviated legal description on the documents to be recorded, per Amended RCW 65.04.045. Said abbreviated legal description is not a substitute for a complete legal description within the body of the document:

END OF NOTES

END OF SCHEDULE B, PART I

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto.

H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.

I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

J. Water rights, claims or title to water.

K. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions
(continued)

SPECIAL EXCEPTIONS

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1209089

2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Purpose: ingress, egress and utilities
   Recording Date: August 10, 1962
   Recording No.: 1551572
   Affects: West 20 feet

3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: Public Utility District No. 1 of Snohomish County
   Purpose: Transmission and/or distribution system
   Recording Date: March 12, 1966
   Recording No.: 1765370

4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: General Telephone Company of Northwest Inc.
   Purpose: Right of Way Easement
   Recording Date: August 13, 1969
   Recording No.: 2108228
   Affects: North 3 feet of the West 190 Feet of Subject Property

5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat Number 173(3-78):

   Recording No: 7805170302

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B, PART II - Exceptions
(continued)

6. Road Maintenance Agreement and the terms and conditions thereof, as contained in City of Marysville Short Plat Number 173 (3-78) recorded under recording number 7805170302.

   Recording Date: May 17, 1978
   Recording No.: 7805170302

7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: City of Marysville
   Purpose: storm sewer and sanitary sewer lines
   Recording Date: April 9, 2001
   Recording No.: 200104090758

8. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.

9. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):

   Year: 2024
   Tax Account No.: 300516-003-015-00
   Levy Code: 00511
   Assessed Value-Land: $250,600.00
   Assessed Value-Improvements: $128,800.00

   General and Special Taxes:
   Billed: $3,027.71
   Paid: $1,513.85
   Unpaid: $1,513.86

10. A deed of trust to secure an indebtedness in the amount shown below,

    Amount: $277,916.00
    Trustor/Grantor: Aaron L DeCann, a single man
    Trustee: Chicago Title
    Beneficiary: Mortgage Research Center, LLC dba Veterans United Home Loans, as lender
    Recording Date: June 2, 2021
    Recording No: 202106020705

END OF SCHEDULE B, PART II

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

COMMITMENT CONDITIONS

1. DEFINITIONS

a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.

b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.

c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.

d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.

e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.

f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.

g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.

h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.

i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.

j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

a. the Notice;

b. the Commitment to Issue Policy;

c. the Commitment Conditions;

d. Schedule A;

e. Schedule B, Part I-Requirements; and

f. Schedule B, Part II-Exceptions; and

g. a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:

i. comply with the Schedule B, Part I-Requirements;

ii. eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or

iii. acquire the Title or create the Mortgage covered by this Commitment.

b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.

c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.

d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.

e. The Company is not liable for the content of the Transaction Identification Data, if any.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Chicago Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

(continued)

f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I-Requirements have been met to the satisfaction of the Company.

g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.

b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.

c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.

d. The deletion or modification of any Schedule B, Part II-Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.

e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.

f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION - INTENTIONALLY DELETED

END OF CONDITIONS

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

RECORDING REQUIREMENTS

Effective January 1, 1997, document format and content requirements have been imposed by Washington Law. Failure to comply with the following requirements may result in rejection of the document by the county recorder or imposition of a $50.00 surcharge.

First page or cover sheet:

3" top margin containing nothing except the return address.

1" side and bottom margins containing no markings or seals.

Title(s) of documents.

Recording no. of any assigned, released or referenced document(s).

Grantors names (and page no. where additional names can be found).

Grantees names (and page no. where additional names can be found).

Abbreviated legal description (Lot, Block, Plat Name or Section, Township, Range and Quarter, Quarter Section for unplatted). Said abbreviated legal description is not a substitute for a complete legal description which must also appear in the body of the document.

Assessor's tax parcel number(s).

Return address (in top 3" margin).

**A cover sheet can be attached containing the above format and data if the first page does not contain all required data.

Additional Pages:

1" top, side and bottom margins containing no markings or seals.

All Pages:

No stapled or taped attachments. Each attachment must be a separate page. All notary and other pressure seals must be smudged for visibility. Font size of 8 points or larger.

WIRE SAFE™ | Inquire before you wire!

WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

FIDELITY NATIONAL FINANCIAL
PRIVACY NOTICE

Effective December 1, 2023

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.* loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for these main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.
- To provide reviews and testimonials about our services, with your consent.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to affiliated or nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to affiliated or nonaffiliated third parties with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (https://fnf.com/pages/californiaprivacy.aspx) or call (888) 413-1748.

For Connecticut Residents: For additional information about your Connecticut consumer privacy rights, or to make a consumer privacy request, or to appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Colorado Residents: For additional information about your Colorado consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

For Nevada Residents: We are providing this notice pursuant to state law. You may be placed on our internal Do Not Call List by calling FNF Privacy at (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. For further information concerning Nevada's telephone solicitation law, you may contact: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: aginquiries@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Utah Residents: For additional information about your Utah consumer privacy rights, or to make a consumer privacy request, please call (888) 714-2710.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

For Virginia Residents: For additional information about your Virginia consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710.

Information From Children

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions or would like to correct your Personal Information, visit FNF's Privacy Inquiry Website or contact us by phone at (888) 714-2710, by email at privacy@fnf.com, or by mail to:

SEPA ENVIRONMENTAL CHECKLIST
APPLICATION REVIEW

Purpose of checklist
Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants
This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal,** even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies
Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals
For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

Application Format
The application will only be accepted if the original form is used (with typewritten answers in the spaces provided) or the application is reproduced in identical form.

Submittal Instructions
Electronic copies of all application materials are required. Please email a request to landusesubmittals@marysvillewa.gov and a link will be provided to upload the application materials; a file number will be provided with your upload link. Please email city staff at landusesubmittals@marysvillewa.gov when the upload is complete to ensure timely processing of your submittal (the system does not generate a notice).

NOTE: The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. You may be asked to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Required Attachments

1. Vicinity map clearly showing the location of the project with respect to public streets and other parcels and development
2. Site plan*
3. Conceptual building elevations
4. Preliminary civil plans
5. Wetland Delineation, if applicable
6. Geotechnical Reports, if applicable
7. Critical Areas Report (fish and wildlife habitat), if applicable

**The site plan must show north arrow and engineering scale; any significant or natural features such as creeks, wetlands, steep slopes; dimensions and shape of the lot; location and size of existing and proposed buildings and development, including parking and landscape areas, adjacent streets and point of ingress and egress, and adjacent uses.*

Correspondence

Note that all correspondence regarding the environmental review of your project will be sent to the person listed as **Applicant.**

Fees

There is a nonrefundable application fee for all environmental checklists. Submit the fee with the application(s) and make checks payable to the City of Marysville. The required fees for SEPA Review may be found here: https://www.codepublishing.com/WA/Marysville/#!/Marysville22G/Marysville22G030.html#22G.030.020

Pre-Application Conference

Most projects that are not categorically exempt from SEPA will require a pre-application conference; in some cases, at the discretion of the Community Development Director, the pre-application conference may be waived. The pre-application conference must be conducted prior to the submittal of the environmental checklist.

SEPA Exempt Determinations

Projects that meet the thresholds for categorical exemptions of Chapter 22E.030 MMC are exempt from filing an environmental checklist. All other project and non-project actions require a completed environmental checklist and a project permit application to be submitted. If an applicant feels that their proposal should be considered to be SEPA-exempt, the applicant can submit a letter requesting a SEPA exempt determination with the environmental checklist and fee. The Community Development Director will review the request and if the application is determined to be SEPA exempt, a letter will be issued confirming the SEPA exempt status.

Project Phasing

The Checklist questions apply to all parts of your proposal, even if you plan to phase the project over a period of time or on different parcels of land. You must include any additional information that helps describe your proposal or its environmental effects. You may be asked to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact(s).

SEPA Appeals

Any agency or person may appeal a Determination of Non Significance (DNS) or Determination of Significance (DS) by completing and submitting an appeal form to the Hearing Examiner within fourteen (14) calendar days of the date the determination is final. Such appeals must be filed with the City Clerk. Appeals of environmental determinations under SEPA, including administrative appeals of a threshold determination, shall be heard by the Hearing Examiner and shall proceed pursuant to Chapter 22G.010 Article VIII *Appeals*. There is a nonrefundable $500 Administrative Appeal fee to be submitted with appeal.

A. Background Find help answering background questions

1. Name of proposed project, if applicable:
Stevens Planned Residential Development.
2. Name of applicant:
KB Home - Seattle (Attn: Aron Golden)
3. Address and phone number of applicant and contact person:
KB Home - Seattle (Attn: Aron Golden) 320 120th Ave NE, Suite 200 Bellevue, WA 98005 Ph: 425-462-1080
4. Date checklist prepared:
August 1, 2024
5. Agency requesting checklist:
City of Marysville Community Development Department
6. Proposed timing or schedule (including phasing, if applicable):
It is anticipated that the project subdivision infrastructure development will commence in the spring / summer 2025. Construction will proceed as a single phased development.
7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.
No.
8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
Wetland and Fish and Wildlife Habitat Assessment Report dated June 20, 2024 by Soundview Consultants LLC. Geotechnical Report; Arborist Tree Retention Plan
9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
None known.
10. List any government approvals or permits that will be needed for your proposal, if known.
Preliminary ~~Binding Site Plan~~ Subdivision and Planned Residential Development approvals, *SEPA Determination,* *Clearing and grading permits,* *Utilities, road and storm drainage approvals,* *WSDOE National Pollutant Discharge Elimination System (NPDES),* *Building permits.*
11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)
Proposed 59 lot single family planned residential development subdivision (detached dwellings) on a 13.67 Ac site located fronting 35th Avenue NE and 98th Street NE in Marysville, WA. Subject property is zoning R-4.5 (Medium Density Single Family Residential). The project build-out is proposed to be constructed in a single phase.
12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not

Reviewed by Emily Morgan, project planner

1050 EM

required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.
Proposed 59 lot single family planned residential development subdivision (detached dwellings) on a 13.67 Ac site located fronting 35th Avenue NE and 98th Street NE in Marysville, WA. Subject property is zoning R-4.5 (Medium Density Single Family Residential). The project build-out is proposed to be constructed in a single phase.

B. Environmental Elements

1. EARTH Find help answering earth questions
a. General description of the site, check all that apply:
☒ **Flat** ☐ **Rolling** ☐ **Hilly** ☐ **Steep Slopes** ☐ **Mountainous** ☐ **Other:**
b. What is the steepest slope on the site (approximate percent slope)?
Approx. 5%.
c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.
The USDA NRCS Web Soil Survey maps the project area as Ragnar fine sandy loam, 0 to 8 percent slopes (Map Unit 57). The project geotechnical report provides a detailed soil investigation analysis
d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.
No
e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.
Approx. 13 acres will be subject to grading activity. There will be site grading for the proposed roads, lots and future home sites. Quarry spalls and gravel will need to be imported for roadway construction. The grading earthwork quantity is estimated to be approx. 50,000 CY over the full project build-out.
f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.
Yes construction erosion is possible, however engineered erosion and sediment control plan with BMP's will be provided to mitigate any potential erosion.
g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?
Approx 65%
h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:
Multiple runoff and source control BMPs will be implemented in accordance with WSDOE Stormwater Management Manual for Western Washington.

2. AIR Find help answering air questions
a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.
Exhaust from heavy-construction equipment anticipated during site work – no emissions anticipated after site prep is completed.
b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.
No off-site emissions or odors are known currently or will be present.
c. Proposed measures to reduce or control emissions or other impacts to air, if any.
None.

3. WATER Find help answering water questions
a. Surface Water: Find help answering surface water questions
(1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.
No. A Wetland and Fish and Wildlife Habitat Assessment Report prepared by Soundview Consultants LLC dated June 20, 2024 did not identify any potentially regulated wetlands, aquatic areas, and/or fish and wildlife habitat conservation areas on or within 300 feet of the subject property.
(2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.
No
(3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.
None
(4) Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.
No
(5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.
No
(6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.
No
b. Ground Water: Find help answering ground water questions
(1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.

No

(2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None

Existing septic systems to be decommissioned in accordance with Snohomish County Health District standards

c. Water Runoff (including stormwater):

(1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Roof, driveway and road and landscape area runoff will be routed to engineered stormwater collection and treatment BMPs (underground Stormtech chamber infiltration facilities) to treat and fully mitigate stormwater runoff in accordance with the WSDOE Stormwater Management Manual for Western Washington.

(2) Could waste materials enter ground or surface waters? If so, generally describe.

Runoff containing small amounts of automotive discharges could potentially enter the storm drainage system. This potential will be mitigated by the proposed stormwater treatment BMPs.

(3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No

(4) Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any.

Engineered flow control and water quality treatment BMPs shall be implemented in accordance with WSDOE and City requirements.

4. PLANTS Find help answering plants questions

a. Check the types of vegetation found on the site:

- ☒ Deciduous Tree: alder, maple, aspen, other
- ☒ Evergreen Tree: fire, cedar, pine, other
- ☒ Shrubs
- ☒ Grass
- ☐ Pasture
- ☐ Crop or grain
- ☐ Orchards, vineyards, or other permanent crops
- ☐ Wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other
- ☐ Water plants: water lily, eelgrass, milfoil, other
- ☐ Other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

The site vegetation includes a mix of forested areas as well as understory brush and lawn area. Proposed lot and road right of way areas of the site will be cleared for the proposed development.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

Landscape plan proposed to provide street trees, landscape areas and related enhancements.

e. List all noxious weeds and invasive species known to be on or near the site.

Himalayan blackberry.

5. ANIMALS Find help answering animal questions

a. Check any birds and other animals that have been observed on or near the site or are known to be on or near the site.

Birds:

- ☒ Hawk
- ☒ Songbirds
- ☐ Heron
- ☐ Other:
- ☐ Eagle

Mammals:

- ☒ Deer
- ☐ Beaver
- ☐ Bear
- ☐ Other:
- ☐ Elk

Fish:

- ☐ Bass
- ☐ Herring
- ☐ Salmon
- ☐ Shellfish
- ☐ Trout
- ☐ Other:

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

Like most of western Washington, this site is part of bird's seasonal migration routes.

d. Proposed measures to preserve or enhance wildlife, if any.

None.

e. List any invasive animal species known to be on or near the site.

None known.

6. ENERGY AND NATURAL RESOURCES Find help answering energy and natural resource questions

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Homes are to be heated via electricity or gas based on utility availably.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.

All homes will be constructed to meet or exceed current building codes for efficiency.

7. ENVIRONMENTAL HEALTH Find help with answering environmental health questions

a. Potential Site Contamination

(1) Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.

Residential plat with no hazards are anticipated.

(2) Describe any known or possible contamination at the site from present or past uses.

Existing on-site septic systems (to be removed).

(3) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

(4) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None.

(5) Describe special emergency services that might be required.

Standard law enforcement, fire and ambulance service commensurate with residential subdivision construction is all that will be required.

(6) Proposed measures to reduce or control environmental health hazards, if any.

Prevent, reduce, or eliminate the discharge of pollutants from material delivery and storage. Minimize the storage of hazardous materials on-site, store materials in a designated area, and install secondary containment as required. Prevent or reduce the discharge of pollutants from concrete waste to stormwater by conducting washout off-site, or performing on-site washout in a designated area.

b. Noise

(1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

(2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?

Short term construction equipment noise would be present during the site prep portion of construction.

(3) Proposed measures to reduce or control noise impacts, if any.

All heavy equipment used will be properly maintained and muffled, and construction would only take place during permitted working hours.

8. LAND AND SHORELINE USE Find help answering land and shoreline use questions

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Single family residential. No adverse effect to adjacent properties is anticipated.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or non-forest use?

No.

(1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?

No.

c. Describe any structures on the site.

5 existing single family homes with associated outbuildings including garages, barns and sheds.

d. Will any structures be demolished? If so, what?

Yes. Existing single family homes and outbuildings will be removed.

e. What is the current zoning classification of the site?

R-4.5

f. What is the current comprehensive plan designation of the site?

Medium density single family residential

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.	
No	
i. Approximately how many people would reside or work in the completed project?	
Based on 59 proposed single-family dwelling units, with estimated 3.5 capita per household, equates to approx 207 people.	
j. Approximately how many people would the completed project displace?	
Based on 5 existing single-family dwelling units, with estimated 3.5 capita per household, equates to approx 18 people.	
k. Proposed measures to avoid or reduce displacement impacts, if any.	
None	
l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.	
Development shall be completed in compliance with City zoning standards.	
m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:	
N/A	
9. HOUSING Find help answering housing questions	
a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.	
59 homes will be constructed (middle income housing anticipated).	
b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.	
5 homes will be eliminated (middle income housing).	
c. Proposed measures to reduce or control housing impacts, if any.	
None.	
10. AESTHETICS Find help answering aesthetics questions	
a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?	
Homes will comply with City height restrictions and any covenants and restrictions proposed by the Homeowners Association.	
b. What views in the immediate vicinity would be altered or obstructed?	
None.	
c. Proposed measures to reduce or control aesthetic impacts, if any.	
Covenants and restrictions shall be proposed per Homeowners Association.	
11. LIGHT AND GLARE Find help answering light and glare questions	
a. What type of light or glare will the proposal produce? What time of day would it mainly occur?	
Standard street lights and residential lighting for safety will be all that is visible during hours of darkness.	
b. Could light or glare from the finished project be a safety hazard or interfere with views?	
No known views will be impacted by the residential lighting.	

c. What existing off-site sources of light or glare may affect your proposal?

Potential light from vehicles on the Interstate 5 corridor to the west of the project site.

d. Proposed measures to reduce or control light and glare impacts, if any.

None.

12. RECREATION Find help answering recreation questions

a. What designated and informal recreational opportunities are in the immediate vicinity?

None known.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any.

Open space tracts are proposed in the project with active and passive recreational amenities (sports court, benches, picnic tables and similar amenities).

13. HISTORIC & CULTURAL PRESERVATION Find help with historic/cultural preservation questions

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

None known.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

Preliminary historical property review and SEPA notification to public agencies.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

N/A

14. TRANSPORTATION Find help with answering transportation questions

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Roadway access proposed to 35th Avenue NE and 98th Street NE as shown on the project site plans. Refer to project Traffic Impact Analysis report completed by Kimley-Horn and Associates, Inc dated July 2024.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No. Closest public transit stop is located to the south on 88 Street NE at State Ave.

c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Project will provide a new on-site public roads to be constructed in accordance with City development standards. Road improvements are also proposed to 98th Street NE as required to serve the project.

d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No

e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and non-passenger vehicles). What data or transportation models were used to make these estimates?

Based on 9.43 trips per day, the 59 lots would generate approx. 556 trips per day with peaks occurring at am/pm weekday commute times.

f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No

g. Proposed measures to reduce or control transportation impacts, if any.

Traffic impact fees shall be paid to the City per development regulations.

15. PUBLIC SERVICES Find help answering public service questions

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

Increase in public services will be commensurate as with any typical new single family detached residential project.

b. Proposed measures to reduce or control direct impacts on public services, if any.

Mitigation fees shall be paid to the City per development regulations.

16. UTILITIES Find help answering utilities questions

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

Electricity, water, refuse service, telephone. Public sewer located approx 1,100 LF to the south of the site.

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Sewer: City of Marysville
Water: City of Marysville
Electricity: Snohomish County PUD #1
Cable: Verizon
Site construction activities will generally include clearing, grading, utilities (sewer, water, storm drainage) and public roadways.

EM

C. Signature [Find help about who should sign]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

x _____

Name of signee: NEIL LATTA, PE

Position and agency/organization: LATTA ENGINEERING, PLLC (AUTHORIZED AGENT)

Date submitted: 8/1/2024

D. Supplemental sheet for non-project actions [Find help for the nonproject actions worksheet]

IT IS NOT REQUIRED to use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?
Proposed measures to avoid or reduce such increases are:
2. How would the proposal be likely to affect plants, animals, fish, or marine life?
Proposed measures to protect or conserve plants, animals, fish, or marine life are:
3. How would the proposal be likely to deplete energy or natural resources?
Proposed measures to protect or conserve energy and natural resources are:

CRITICAL AREAS REVIEW APPLICATION

PLAT RESTRICTION NOTES - PRD DEVELOPMENT STANDARDS

1. ACCESSORY DWELLING UNITS SHALL NOT BE PERMITTED FOR SINGLE-FAMILY DETACHED DWELLINGS.
2. EACH SINGLE-FAMILY DETACHED UNIT SHALL HAVE AT LEAST 200 SQUARE FEET OF PRIVATE OPEN SPACE SET ASIDE AS PRIVATE SPACE FOR THAT DWELLING UNIT. NO DIMENSION OF SUCH OPEN SPACE SHALL BE LESS THAN 10 FEET. THE OPEN SPACE DOES NOT NEED TO BE FENCED OR OTHERWISE SEGREGATED FROM OTHER DWELLINGS OR OPEN SPACE IN THE DEVELOPMENT UNLESS SO CONDITIONED THROUGH THE APPROVAL PROCESS.
3. PURSUANT TO MMC 22G.080.080, MODIFICATION OF DEVELOPMENT REGULATIONS, A MINIMUM OF THREE PARKING STALLS ARE REQUIRED TO BE PROVIDED FOR EACH DETACHED SINGLE-FAMILY DWELLING UNIT. TWO OF THE STALLS MUST BE ON THE SITE AND READILY AVAILABLE TO THE DWELLING UNIT. THE THIRD STALL MAY BE ON-STREET PARKING OR PROVIDED NEARBY TO THE DWELLING. COMPLIANCE FOR THESE PARKING REQUIREMENTS SHALL BE VERIFIED BASED ON REVIEW OF THE FINAL CIVIL CONSTRUCTION PLANS AND SUBMITTAL OF THE BUILDER'S HOUSE PLANS AT THE TIME OF BUILDING PERMIT SUBMITTAL.
4. NO DIRECT ACCESS IS PERMITTED FROM LOTS WITHIN THE SUBDIVISION ONTO 98th STREET NE.
5. PURSUANT TO MMC 22G.080.070, AT LEAST 25% OF THE DWELLING ON LOTS LESS THAN 5,000 SF MUST HAVE VEHICLE ACCESS POINTS VIA SHARED OR SINGLE-CAR-WIDTH DRIVEWAY, ALLEY, AUTO COURT, OR OTHER METHOD OF ACCESSING DWELLINGS OTHER THAN DIRECT STREET ACCESS:
   - ALL 59 PROPOSED LOTS ARE GREATER THAN 5,000 SF (NOT APPLICABLE).
6. ANY LOT UNDER 5,000 SF MUST DEMONSTRATE COMPLIANCE WITH MMC 22C.010.310, SMALL LOT SINGLE FAMILY DEVELOPMENT STANDARDS, PRIOR TO BUILDING PERMIT ISSUANCE.
7. PURSUANT TO MMC 22G.080.050(2)(C), DESIGN OF THE PROPOSED DEVELOPMENT ACHIEVES THE FOLLOWING RESULTS:
   - (iv) LANDSCAPING, BUFFERING, OR SCREENING IN OR AROUND THE PROPOSED PRD
   - (vii) INCORPORATING ENERGY-EFFICIENT SITE DESIGN OR BUILDING FEATURES
8. PER MARYSVILLE FIRE DISTRICT REVIEW, FIRE SPRINKLERS ARE REQUIRED FOR ALL HOMES DUE TO THE SINGLE ACCESS POINT VIA 35 AVE NE.

LOT DENSITY AND RESIDENTIAL DENSITY INCENTIVES SUMMARY

1. NET PROJECT AREA (PER MMC 22A.020.150)

GROSS SUBJECT PROPERTY AREA (R-4.5 ZONE):	595,713 SF	13.676 Ac
LESS FLAT 20% REDUCTON PER MMC 22A.020.150 (R-6.5 ZONE):	(119,143 SF)	(2.735 Ac)
NET PROJECT AREA (FOR DENSITY CALCULATIONS):	476,570 SF	10.941 Ac

2. LOT DENSITY CALCULATION (PER MMC 22C.010.080)

BASE DENSITY (4.5 DWELLING UNITS PER AC):	(13.676 Ac – 2.735 Ac) x 4.5 DU/Ac = 49.2 (49)
MAX. BONUS DENSITY (20% PRD INCREASE):	BASE DENSITY (49) x 0.20 = 9.8 (10) *
MAX. ALLOWABLE DENSITY:	49.2 + 9.8 = 59.0 (59 DU)

*BONUS DENSITY ACHIEVED VIA APPLICATION OF RESIDENTIAL DENSITY INCENTIVES (RDI'S).

PROPOSED PROJECT PRD DENSITY: BASE DENSITY (49) + BONUS (10) = 59 LOTS **

** NOTE:
REQUIRE 10 RDI BONUS UNITS TO ACHIEVE PROPOSED 59 LOT PRD DENSITY
(RDI UNITS REQUIRED = 10)

3. LOT PROPOSAL SUMMARY

TOTAL NUMBER OF SINGLE FAMILY LOTS PROPOSED:	49 LOTS
AVERAGE LOT SIZE:	6,776 SF
SMALLEST LOT SIZE:	5,000 SF
LARGEST LOT SIZE:	10,314 SF

4. PROPOSED RESIDENTIAL DENSITY INCENTIVES (PER MMC 22C.090)

RDI BENEFIT DESCRIPTION	RDI BONUS UNITS
(6a) DUAL USE STORM DETENTION TRACT 5 BONUS UNITS PER ACRE OF STORMWATER FACILITY TRACT USED FOR ACTIVE RECREATION (1.239 AC x 5 = 6.20 UNITS)	6.20
(7c) PROJECT DESIGN – PERIMETER FENCING 1 BONUS UNIT PER 500 LF OF PERIMETER FENCING 425 LF / 500 = 0.85 UNITS	0.85
(7f) PROJECT DESIGN – ENHANCED ENTRY LANDSCAPING 1 BONUS UNIT PER 2,500 SF OF ENHANCED ENTRY LANDSCAPING TRACT 997 (2,466 SF) & TRACT 996 (5,483 SF) 7,979 SF / 2,500 = 3.18 UNITS	3.18
TOTAL RESIDENTIAL DENSITY INCENTIVE BONUS UNITS: (NOTE: EXCEEDS MINIMUM RDI UNITS REQUIRED)	10.23

5. OPEN SPACE REQUIREMENT (PER MMC 22G.080.100)

OPEN SPACE REQUIRED:		
15% OF 10.941 Ac NET PROJECT AREA	71,486 SF	1.641 Ac
OPEN SPACE TRACTS PROPOSED:		
TRACT 999 – STORM WATER & ACTIVE OPEN SPACE***	53,984 SF	1.239 Ac
TRACT 998 – PASSIVE RECREATION OPEN SPACE	12,500 SF	0.287 Ac
TRACT 997 – ENHANCED ENTRY OPEN SPACE	2,466 SF	0.057 Ac
TRACT 996 – ENHANCED ENTRY OPEN SPACE	5,483 SF	0.126 Ac
TOTAL OPEN SPACE PROPOSED:	74,433 SF	1.709 Ac
ACTIVE OPEN SPACE SUMMARY:***		
MIN. 35% OF REQUIRED OPEN SPACE TO BE ACTIVE OPEN SPACE	25,020 SF	0.574 Ac
ACTIVE OPEN SPACE AREA PROPOSED	53,984 SF	1.239 Ac

CITY PROJECT FILE #: PREA24-007

TITLE REPORT ENCUMBRANCES: PARCEL A

TPN 300516-003-016-00

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry
   Grantor: State of Washington
   Recording No.: 1209090
   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.
2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress, egress and utilities
   Recording Date: August 17, 1962
   Recording No.: 1553273
3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution system
   Recording Date: December 27, 1962
   Recording No.: 1581756
   Affects: Portion of said premises
4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209
5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):
   Recording No: 8003100173
   Said short plat is a revision of short plat recorded under Recording No. 7810200401.
6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:
   Recording Date: July 26, 1999
   Recording No.: 199907260975
7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines and/or water lines
   Recording Date: February 12, 2001
   Recording No.: 200102120728
   Affects: Portion of said premises
8. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
   Year: 2024
   Tax Account No.: 300516-003-016-00
   Levy Code: 00511
   Assessed Value-Land: $272,800.00
   Assessed Value-Improvements: $219,700.00
   General and Special Taxes:
   Billed: $3,927.28
   Paid: $0.00
   Unpaid: $3,927.28
9. A deed of trust to secure an indebtedness in the amount shown below,
   Amount: $282,276.00
   Dated: December 7, 2020
   Trustor/Grantor: Isaac A. Steimle and Rebekah L. Steimle, who acquired title as Isaac Steimle and Rebekah Steimle, husband and wife
   Trustee: George C. Reinmiller Trustee Inc
   Beneficiary: Mortgage Electronic Registration Systems, Inc., solely as nominee for Boeing Employees' Credit Union
   Loan No.: 336148
   Recording Date: December 11, 2020
   Recording No.: 202012110574
10. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $100,000.00
    Dated: August 20, 2022
    Trustor/Grantor: Isaac Steimle and Rebekah Steimle, husband and wife
    Trustee: Trustee Services, Inc.
    Beneficiary: Boeing Employees' Credit Union
    Recording Date: August 30, 2022
    Recording No.: 202208300421
    The Deed of Trust set forth above is purported to be a "Credit Line" Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.

TITLE REPORT ENCUMBRANCES: PARCELS B1, B2 AND B3

TPNs 300516-003-014-00, 300516-003-045-00, 300516-003-045-01, & 300516-003-058-00

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry
   Grantor: State of Washington

5. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a Statutory Warranty Deed:
   Purpose: Ingress, egress and utilities
   Recording Date: December 10, 1975
   Recording No.: 2416806
   Affects: West 20 feet of Lots 1 and 2 and other property
6. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. 103 (5-78):
   Recording No: 7805170302
7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines, water lines, pipes and appurtenances
   Recording Date: April 9, 2001
   Recording No.: 200104090756
   Affects: West 30 feet of Lot 1
8. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines, water lines, pipes and appurtenances
   Recording Date: April 9, 2001
   Recording No.: 200104090757
   Affects: West 30 feet of Lot 2
9. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
   Year: 2024
   Tax Account No.: 300516-003-058-00
   Levy Code: 00505
   Assessed Value-Land: $260,700.00
   Assessed Value-Improvements: $0.00
   General and Special Taxes:
   Billed: $1,821.61
   Paid: $0.00
   Unpaid: $1,821.61
   Affects: Lot 1
10. Delinquent general taxes for 2014:
    Amount: $157.43, Plus interest and penalties
    Tax Account No.: 300516-003-045-01
    School District No.: 00511
    Affects: Lot 2
11. Delinquent general taxes for 2015:
    Amount: $337.17, Plus interest and penalties
    Tax Account No.: 300516-003-045-01
    School District No.: 00511
    Affects: Lot 2
12. Delinquent general taxes for 2016:
    Amount: $234.31, Plus interest and penalties
    Tax Account No.: 300516-003-045-01
    School District No.: 00511
    Affects: Lot 2
13. Delinquent general taxes for 2021:
    Amount: $277.14, Plus interest and penalties
    Tax Account No.: 300516-003-045-01
    School District No.: 00511
    Affects: Lot 2
14. Delinquent general taxes for 2022:
    Amount: $301.07, Plus interest and penalties
    Tax Account No.: 300516-003-045-01
    School District No.: 00511
    Affects: Lot 2
15. Delinquent general taxes for 2023:
    Amount: $261.32, Plus interest and penalties
    Tax Account No.: 300516-003-045-01
    School District No.: 00511
    Affects: Lot 2
16. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
    Year: 2024
    Tax Account No.: 300516-003-045-00
    Levy Code: 00511
    Assessed Value-Land: $320,000.00
    Assessed Value-Improvements: $8,100.00
    General and Special Taxes:
    Billed: $2,643.43
    Paid: $0.00
    Unpaid: $2,643.43
    Affects: Lot 2
17. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
    Year: 2024
    Tax Account No.: 300516-003-045-01
    Levy Code: 00511
    Assessed Value-Land: $0.00
    Assessed Value-Improvements: $32,000.00
    General and Special Taxes:
    Billed: $254.51
    Paid: $0.00
    Unpaid: $254.51
    Affects: Mobile home on Lot 2
18. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
    Year: 2024
    Tax Account No.: 300516-003-014-00
    Levy Code: 00511
    Assessed Value-Land: $308,300.00
    Assessed Value-Improvements: $290,100.00
    General and Special Taxes:
    Billed: $4,769.56
    Paid: $0.00
    Unpaid: $4,769.56
    Affects: Lot 4
19. Mobile home improvements are expressly excluded.
20. It appears Bonnie Stevens is deceased. The Company finds no probate of the decedent's estate in Snohomish County County. This commitment is therefore subject to the rights of heirs and devisees, creditors (including liens under RCW 43.20B.080), liability for inheritance tax, or other matters that a probate of the estate might disclose.
    If we are requested to insure title passing outside of probate, the Company will require the following:
    a. Completed, signed and acknowledged Lack of Probate Affidavits (both the Company's internal underwriting version and the shorter version for recording).
    b. A certified copy of the Death Certificate.
    c. A copy of the Community Property Agreement, if any.
    d. A copy of the decedent's Will and codicils, if any.
    e. A Real Estate Excise Tax Affidavit executed by the inheriting party(ies), to file at the time of recording the Lack of Probate Affidavit, as required by WAC 458-61A-202(6).
    The Company reserves the right to make additional requirements upon review.
21. Any unrecorded leaseholds, right of vendors and holders of security interests on personal property installed upon the Land and rights of tenants to remove trade fixtures at the expiration of the terms.

BOUNDARY AND TOPOGRAPHIC SURVEY NOTE:

SUBJECT PROPERTY BOUNDARIES AND SITE TOPOGRAPHY SHOWN ON THIS EXISTING CONDITION PLAN IS BASED ON A RECORD OF SURVEY COMPLETED BY ATWELL SURVEYING, MARK PENDERGRAFT PLS# 48383 DATED 6/17/2024.

TPN 300516-003-065-00

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry
   Grantor: State of Washington
   Recording No.: 1209090
   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.
2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress, egress and utilities
   Recording Date: August 17, 1962
   Recording No.: 1553273
3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution system
   Recording Date: December 27, 1962
   Recording No.: 1581756
   Affects: Portion of said premises
4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209
5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):
   Recording No: 8003100173
   Said short plat is a revision of short plat recorded under Recording No. 7810200401.
6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:
   Recording Date: July 26, 1999
   Recording No.: 199907260975
7. Declaration of Covenant and the terms and conditions thereof:
   Recording Date: November 16, 2010
   Recording No.: 201011160271
8. Accessory Dwelling Unit and the terms and conditions thereof:
   Recording Date: December 1, 2010
   Recording No.: 201012010695
9. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.
10. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
    Year: 2024
    Tax Account No.: 300516-003-066-00
    Levy Code: 00511
    Assessed Value-Land: $306,500.00
    Assessed Value-Improvements: $532,400.00
    General and Special Taxes:
    Billed: $6,681.61
    Paid: $0
    Unpaid: $6,681.61
11. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $50,000.00
    Trustor/Grantor: Kelly M. Gleason and Kathleen Gleason, a married couple
    Trustee: Trustee Services
    Beneficiary: Qualstar Credit Union
    Recording Date: December 2, 2013
    Recording No.: 201312020470
    The Deed of Trust set forth above is purported to be a "Credit Line" Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.
12. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $150,000.00
    Trustor/Grantor: Kelly M. Gleason and Kathleen Gleason, a married couple
    Trustee: Trustee Services
    Beneficiary: Qualstar Credit Union
    Recording Date: August 7, 2017
    Recording No.: 201708070212
    The Deed of Trust set forth above is purported to be a "Credit Line" Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.
13. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $400,000.00
    Trustor/Grantor: Kelly M. Gleason and Kathleen Gleason, a married couple
    Trustee: Trustee Services
    Beneficiary: Qualstar Credit Union
    Recording Date: May 31, 2022
    Recording No.: 202205310704
    The Deed of Trust set forth above is purported to be a "Credit Line" Deed of Trust. Technical Memorandum

To: **Aaron Golden – KB Home** **File Number: 2072.0015**

From: **Elisabeth Gonzalez, Soundview Consultants LLC** **Date: June 20, 2024**

Re: **Wetland and Fish and Wildlife Habitat Assessment**
9907/9909 35th Avenue Northeast and 3705 98th Street Northeast Marysville, Washington 98271

Dear Aaron,

Soundview Consultants LLC (SVC) conducted a wetland and fish and wildlife habitat assessment on an approximately 14.08-acre site located at 9907/9909 35th Avenue Northeast and 3705 98th Street Northeast within the City of Marysville, Washington (Figure 1). The subject property consists of seven tax parcels situated in the Southwest ¼ of Section 16, Township 30 North, Range 5 East, W.M. (Snohomish County Tax Parcels 30051600301400, 30051600301500, 30051600301600, 30051600304501, 30051600305800, 30051600306500, 30051600306600). SVC investigated the subject property for potentially regulated wetlands, waterbodies, or other fish and wildlife habitat conservation areas within 300 feet. An Existing Conditions Exhibit is provided in Attachment A.

Figure 1. Subject Property Location.

Background Data

Prior to the site investigation, SVC staff conducted background research using the Snohomish County Geographic Information Systems (GIS) data, Washington Department of Fish and Wildlife (WDFW) Priority Habitat and Species (PHS) mapping tools, WDFW and Northwest Indian Fisheries Commission (NWIFC) Statewide Integrated Fish Distribution (SWIFD) mapping tools, U.S. Fish and Wildlife Service (USFWS) National Wetland Inventory (NWI), Washington Department of Natural Resources (DNR) water typing map, and Natural Resource Conservation Service (NRCS) Soil Survey. Onsite determinations were made using observable vegetation, hydrology, and soils in conjunction with the sources listed above, local precipitation data, and various orthophotographic resources. Background maps are provided in Attachment B.

The USFWS NWI map (Attachment B1), WDFW PHS (Attachment B2), WDFW and NWIFC SWIFD (Attachment B3), DNR water typing map (Attachment B4), nor Snohomish County GIS data (Appendix B5) identify critical areas on or within 300 feet of the subject property.

Soils Onsite

The NRCS Soil Survey Map (Attachment B6) identifies one soil type within the study area: Ragnar fine sandy loam, 0 to 8 percent slopes.

Ragnar fine sandy loam, 0 - 8 percent slopes is listed as non-hydric on the NRCS State Hydric Soils List (NRCS, n.d.).

Precipitation

Precipitation data was obtained from the National Oceanic and Atmospheric Administration (NOAA) weather station at the Seattle - Tacoma International Airport to obtain percent of normal precipitation for the general Snohomish County region during the investigation. A summary of data collected is provided in Table 1.

Table 1. Precipitation Summary[1].

Date	Day Of	Day Before	1 Week Prior	2 Weeks Prior	30 Days Prior (Observed/Normal)	Year to Date (Observed/Normal)[2]	Percent of Normal (Month/Year)[3]
3/13/2024	0.00	0.15	0.00	0.95	4.12/3.96	28.65/27.29	104/105
5/21/2024	0.66	0.00	0.00	0.01	1.69/2.22	31.30/34.04	76/92

1. Precipitation volume provided in inches. Data obtained from NOAA (http://w2.weather.gov/climate/xmacis.php?wfo=sew) for Seattle - Tacoma International Airport
2. Year-to-date precipitation is for the water year from October 1st to the onsite date for the March and May site visits.
3. Percent of normal is shown for the prior 30 days and 2023/2024 water year from October 1st to the March and May site visit dates.

Precipitation for the site investigations on March 13, 2024 and May 21, 2024 were within the statistical normal range (70 to 130 percent of normal) for the last 30 days and the 2023/2024 water year (approximately 104 and 105 percent of normal, respectively and approximately 76 and 92 percent of normal, respectively). This precipitation data suggests that hydrologic conditions were relatively normal at the time of the site investigations. Such conditions were considered in making professional wetland determinations.

Methods

A formal site investigation was performed by qualified SVC staff in March and May of 2024. The investigation consisted of a formal walk-through survey for wetlands, waterbodies, and other fish and wildlife habitat conservation areas on the subject property and on publicly accessible areas with 300 feet of the subject property.

Wetlands, streams and select fish and wildlife habitat conservation areas are regulated features under Marysville Municipal Code (MMC) Chapter 22E.010 – Critical Areas Management and subject to restricted uses/activities under the same title.

Wetland presence/absence was determined using the routine approach outlined in the U.S. Army Corps of Engineers (USACE) *Wetlands Delineation Manual* (Environmental Laboratory, 1987) and modified according to the guidelines established in the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Western Mountains, Valleys, and Coast Region, Version 2.0* (USACE, 2010) and *Field Indicators of Hydric Soils in the United States* (NRCS, n.d.). Pink surveyor's flagging was labeled alpha-numerically and tied to 3-foot lath or vegetation at formal sampling locations to mark the points where detailed data was collected (DP-1 to DP-7) (Attachment D). Additional test pits were excavated at regular intervals throughout the study area to further confirm or exclude wetland absence.

The fish and wildlife habitat assessment was conducted during the same site visit by qualified fish and wildlife biologists. The experienced biologists made visual and auditory observations using stationery and walking survey methods for both upland and aquatic habitats noting any special habitat features and direct and indirect signs of fish and wildlife activity (e.g. nesting, foraging, and migration/movement). Special attention was given to assessing the presence of fish and wildlife habitat as defined under MMC 22E.010.170.

Results

The 14.08-acre subject property is located in a residential setting in the City of Marysville and is partially developed with six single-family residences and associated infrastructure. The residences are located on six parcels along the south and east perimeter of the subject site. The remainder of the site consists of undeveloped forested areas. The subject site abuts single-family residences to the north and east, single-family residences and 98th Street Northeast to the south, and 35th Avenue Northeast to the west. Topography onsite is generally flat with elevations at approximately 62 feet above mean sea level (amsl) (See the USGS contours map; Attachment B7). The subject site is located within the Snohomish watershed (Water Resource Inventory Area (WRIA 7).

Vegetation throughout the majority of the subject property is largely forested dominated by Douglas fir (*Pseudotsuga menziesii*) with an understory of salal (*Gaultheria shallon*), western bracken fern (*Pteridium aquilinum*), and non-native invasive Himalayan blackberry (*Rubus armeniacus*). The areas surrounding the residences consist of maintained lawn and ornamental nonnative species such as Kentucky bluegrass (*Poa pratensis*) and common dandelion (*Taraxacum officinale*).

The site investigation confirmed the absence of wetlands on the subject property. Three parcels along the south the of the subject property were not accessible, however they were visually assessed for the presence of hydrology and facultative species. No presence of hydrology was observed and vegetation within these areas consists of maintained lawn and ornamental nonnative species. Data was collected directly adjacent of these parcels and no indication of hydrology, hydric soils or hydrophytic vegetation

was observed. No other potentially regulated wetlands, aquatic areas, and/or fish and wildlife habitat conservation areas were observed on or within 300 feet of the subject property.

Onsite Wetland Absence

Seven data plots (DP-1 – DP-7) were collected on the subject property during the site investigation to confirm onsite wetland absence. Data was collected in different topographic low points throughout the study area most likely to show wetland indicators.

DP-1 is located in the western portion of the subject site within a maintain lawn as a general representative point of upland conditions. DP-1 did not meet hydrophytic vegetation criteria due to the dominance of mostly FACU species and presence of only two species. DP-1 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-1 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches. As the area around DP-1 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-2 is located in the northeastern portion of the forested area. DP-2 did not meet hydrophytic vegetation criteria due to the dominance of mostly FACU species. DP-2 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-2 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-2 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-3 is located in the central portion of the subject site within in what appears to have been a cleared and graded area in the past. DP-3 met hydrophytic vegetation criteria through the dominance test, however this was due to the presence of only two FAC species. DP-3 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-3 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-3 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-4 is located in the northeastern portion of the subject site within the forested area. DP-4 did not meet hydrophytic vegetation criteria due to the dominance of mostly FACU species. DP-4 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-4 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-4 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-5 is located in the south-central portion of the subject site, directly adjacent to the north of one of the single-family residence yards. DP-5 met hydrophytic vegetation criteria through the dominance test, however this was due to the dominance of only one FAC species. DP-5 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-5 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-5 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-6 is located in the northwest portion of the subject site in a previously cleared area adjacent tot to large cement pad. DP-6 met hydrophytic vegetation criteria through the dominance test, however this was due to the dominance of only one FAC species. DP-6 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-6 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-6 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-7 is located in the southwestern portion of the subject site in a maintained lawn area. DP-7 met hydrophytic vegetation criteria through the dominance test, however this was due to the presence of mostly FAC species. DP-7 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-7 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-7 did not meet for any wetland criteria, this area was determined to be non-wetland.

Fish and Wildlife Habitat Conservation Areas

Per MMC 22E.010.170, habitat conservation areas (HCAs) consist of the following:

(1) Primary fish and wildlife habitat conservation areas shall include the following:

(a) Habitats with federally designated endangered, threatened, and candidate species and state designated endangered, threatened, and sensitive species which have a primary association as defined in Chapter 22A.020 MMC. Federally designated endangered, threatened and candidate species are those fish and wildlife species identified by the U.S. Fish and Wildlife Service and the National Marine Fisheries Service that are in danger of extinction or threatened to become endangered. The U.S. Fish and Wildlife Service and the National Marine Fisheries Service should be consulted for current listing status. State designated endangered, threatened, and sensitive species are those fish and wildlife species native to the state of Washington identified by the Washington State Department of Fish and Wildlife, that are in danger of extinction, threatened to become endangered, vulnerable, or declining and are likely to become endangered or threatened in a significant portion of their range within the state without cooperative management or removal of threats. State designated endangered, threatened, and sensitive species are periodically recorded in WAC 232-12-014 (State Endangered Species) and 232-12-011 (State Threatened and Sensitive Species). The State Department of Fish and Wildlife maintains the most current listing and should be consulted for current listing status.

According to the USFWS IPaC mapping database, North American wolverine (*Gulo gulo luscus*), marbled murrelet (*Brachyramphus marmoratus*), yellow-billed cuckoo (*Coccyzus americanus*), and bull trout (*Salvelinus confluentus*) have the potential to occur within 300 feet of the subject property.

North American Wolverines commonly occur in boreal forests and tundra ecosystems and in Washington they occupy alpine and subalpine forests within the North Cascades National Park and the wilderness areas of the Okanogan-Wenatchee National Forest where heavy snowpack persists well into the spring months (WDFW, n.d.). As the subject property does not contain any alpine or subalpine forests where wolverines commonly occur, North American wolverines are not likely present on or within 300 feet of the subject property.

Marbled murrelet that occur in the state of Washington are year-round residents on coastal waters and primarily feed in waters within 500 feet of the shore out to 1.2 miles from shore at depths of less than 100 feet; preferred pray is includes small fish and crustaceans although nestlings may feed on larger fish (WDFW, 1991). Nests and roosts are found in mature and old growth forests of western Washington. Nest trees are typically greater than thirty-two inches diameter at breast height, with nesting preferences on large flat conifer branches, often covered in moss (WDFW, 1991). Marbled murrelets have been observed in the largest numbers near the coastal waters surrounding the Olympic Peninsula and are more sparsely distributed elsewhere in this region. The subject property mainly contains sparse forested patches that are not considered mature or

old-growth and are fragmented by surrounding residential land uses and previously cleared areas, therefore marbled murrelet are not likely present on or within 300 feet of the subject property.

Yellow-billed cuckoo habitat consists of low to mid-level riparian forests dominated by cottonwoods and willows. Additional riparian species may include ash, walnut, mesquite, and tamarisk. Breeding cuckoos prefer larger and wider patches of riparian habitat. Habitat assessments of yellow-billed cuckoo from California indicate that suitable habitat is approximately 100 to 198 acres and wider than 200 meters; marginal habitat is approximately 20 to 100 acres and 100 to 200 meters wide; and unsuitable habitat is smaller than approximately 37 acres and less than 100 meters wide (Wiles & Kalasz, 2017). Twenty sightings have been confirmed in Washington between the 1950s and 2017; none of these sightings were breeding birds. Further, sixteen of these twenty sightings were east of the Cascades, and the sighted birds were likely vagrants or migrants (Wiles & Kalasz, 2017). The subject property is dominated by a homogeneous canopy of Douglas fir and lacks sufficient riparian habitat, providing unsuitable habitat for yellow-billed cuckoo. In addition, yellow-billed cuckoo is unlikely to be present on or near the subject property due to limited sightings in Washington.

Bull trout have the most specific habitat requirements of salmonids. They require cold water temperatures, clean stream substrates for spawning and rearing, complex habitats including streams with riffles and deep pools, undercut banks and large logs, and they also rely on river, lake, and ocean habitats that connect to headwater streams for annual spawning and feeding migrations (Shellberg, 2002). In Washington, bull trout are typically found in major tributaries from the Cascades that flow into the Puget Sound as well as major tributaries for the Olympic Mountains that flow into the Hood Canal, Strait of Juan de Fuca, and the Pacific Ocean (USFWS, 2015). The subject property does not contain streams on site, therefor the site does not provide suitable habitat for bull trout.

WDFW PHS does not identify any priority species on or near the site.

(b) State designated priority habitats and areas that are associated with state designated endangered, threatened, and sensitive species in subsection (1)(a) of this section. Priority habitats and species are considered to be priorities for conservation and management. Priority species require protective measures for their perpetuation due to their population status, sensitivity to habitat alteration, and/or recreational, commercial, or tribal importance. Priority habitats are those habitat types or elements with unique or significant value to a diverse assemblage of species. A priority habitat may consist of a unique vegetation type or dominant plant species, a described successional state, or a specific structural element. Priority habitats and species are identified by the Department of Fish and Wildlife.

WDFW PHS does not identify any priority habitats on or near the site.

(c) Naturally occurring ponds under 20 acres or not less than 0.50 acres (lakes greater than 20 acres are covered under shoreline regulations).

No naturally occurs ponds are located on or within vicinity of the site.

(d) Lakes, ponds, streams and rivers planted with game fish by a governmental or tribal entity.

No lakes, ponds or streams have been identified on or within vicinity of the subject site.

(e) State natural area preserves and natural resource conservation areas.

No natural area preserves, aquatic reserves, or natural resource conservation areas are present on or near the site.

(f) Areas of rare plant species and high quality ecosystems as documented by the State Department of Natural Resources Heritage Program.

No rare plants are identified on or near the site by DNR.

(g) Land that provides essential connections between habitat blocks and open space and that is designated by the State Department of Fish and Wildlife as a priority habitat in association with state endangered, threatened, or sensitive species in subsection (1)(a) of this section.

The surrounding area does not provide essential connections between habitats due to the extent of residential development and existing paved roads.

(h) Streams as defined and classified in Chapter 22A.020 MMC.

No streams are located on or within 300 feet of the subject site.

(2) Habitats and species of local importance are those identified by the city, including but not limited to those habitats and species that, due to their population status or sensitivity to habitat manipulation, warrant protection. Habitats may include a seasonal range or habitat element with which a species has a primary association, and which, if altered, may reduce the likelihood that the species will maintain and reproduce over the long term.

There are currently no species of local importance listed by the City. Habitats of local importance include Type S, F, Np, and Ns streams and bald eagle habitat.

Regulatory Considerations

Local Requirements

The City of Marysville regulated wetland and streams under its Critical Areas Management chapter (MMC 22E.010)

No critical areas are located on or within 300 feet of the subject site. No impacts are proposed to critical areas or associated buffers.

Abbreviated State and Federal Considerations

On January 18, 2023, USACE and EPA published a revised definition of "Waters of the United States" (USACE and EPA, 2023a). The revised rule became effective on March 20, 2023. On May 25, 2023, the U.S. Supreme Court issued a decision affecting the definition of Waters of the United States, or "WOTUS", in *Sackett Et Ux. V Environmental Protection Agency Et Al.* On August 29, 2023, the US EPA and USACE issued a final rule to amend the final "Revised Definition of 'Waters of the United States'" rule. The amendment conforms the definition of "Waters of the United States" to the U.S. Supreme Court's decision in the Sackett Et Ux. V Environmental Protection Agency Et Al case. The revised and amended definition of "Waters of the United States" is as follows:

(a) Waters of the United States means:

(1) Waters which are: (i) Currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide; (ii) The territorial seas; or (iii) Interstate waters;

(2) Impoundments of waters otherwise defined as waters of the United States under this definition, other than impoundments of waters identified under paragraph (a)(5) of this section;

(3) Tributaries of waters identified in paragraph (a)(1) or (2) of this section that are relatively permanent, standing or continuously flowing bodies of water;

(4) Wetlands adjacent to the following waters: (i) Waters identified in paragraph (a)(1) of this section; or (ii) Relatively permanent, standing or continuously flowing bodies of water identified in paragraph (a)(2) or (a)(3) of this section and with a continuous surface connection to those waters;

(5) Intrastate lakes and ponds not identified in paragraphs (a)(1) through (4) of this section that are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (a)(1) or (a)(3) of this section;

(b) The following are not "waters of the United States" even where they otherwise meet the terms of paragraphs (a)(2) through (5) of this section:

(1) Waste treatment systems, including treatment ponds or lagoons, designed to meet the requirements of the Clean Water Act;

(2) Prior converted cropland designated by the Secretary of Agriculture. The exclusion would cease upon a change of use, which means that the area is no longer available for the production of agricultural commodities. Notwithstanding the determination of an area's status as prior converted cropland by any other Federal agency, for the purposes of the Clean Water Act, the final authority regarding Clean Water Act jurisdiction remains with EPA;

(3) Ditches (including roadside ditches) excavated wholly in and draining only dry land and that do not carry a relatively permanent flow of water;

(4) Artificially irrigated areas that would revert to dry land if the irrigation ceased;

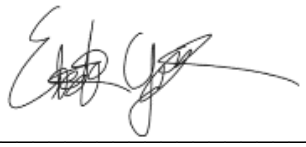
(5) Artificial lakes or ponds created by excavating or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing;

(6) Artificial reflecting or swimming pools or other small ornamental bodies of water created by excavating or diking dry land to retain water for primarily aesthetic reasons;

(7) Waterfilled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States; and

(8) Swales and erosional features (e.g., gullies, small washes) characterized by low volume, infrequent, or short duration flow.

The 2023 revised and amended definition of Waters of the United States defines "adjacent" as "having a continuous surface connection."



No potentially regulated wetland or stream are located on or within 300 feet of the subject site. As no features or located on site, there's no surface water connection to a federally regulated water.

Conclusions

The site investigation did not identify potentially regulated wetlands, aquatic areas, and/or fish and wildlife habitat conservation areas were observed on or within 300 feet of the subject property.

If you have any further questions, please contact us at your earliest convenience.

Sincerely,

Elisabeth Gonzalez
Environmental Scientist/Planner II

Attachment E – Qualifications

All field inspections, jurisdictional wetland absence determinations, habitat assessments, and supporting documentation, including this ***Wetland and Fish and Wildlife Habitat Assessment Technical Memorandum*** prepared for the ***Stevens*** project, were prepared by, or under the direction of, Elisabeth Gonzalez of SVC. In addition, the site investigations were performed Elisabeth Gonzalez, William Bethel, and Shaun Sweeney and report preparation was completed by Shaun Sweeney and additional project oversight and final report review was completed by Elisabeth Gonzalez.

Elisabeth Gonzalez is an Environmental Project Manager and Scientist with 3 years of professional experience. Elizabeth has a background in project management, shoreline permitting, forest and marine ecology, and wetland delineations. Elisabeth brings experience in managing bulkhead repair and replacement projects, single-family residence planning and wetland delineations, and extensive permitting projects for marina renovations. Previously, she has managed multiple shoreline projects in assisting clients with permitting processes while implementing regulations within engineering designs. She completed her training in wetland delineations with the Wetland Training Institute in October of 2021 and has since been involved in wetland delineations all across western Washington. Elisabeth has also completed two internships with the US Forest Service and Maui Ocean Center, where she performed a variety of research-based field work and worked as a research assistant with Saving the Blue collecting data on shark species and environmental impacts on the ocean.

Education: Bachelor of Science in Environmental Science with a concentration in Forest and Marine Ecology and Oceanography from the University of Colorado, Boulder.

William Bethel is a Staff Scientist with 4 years of professional experience. William has a background in environmental science in Washington State. At Simon Fraser University, he worked in a research lab, studying the distribution and prediction of forest soils. Previously William has managed wetland site assessments and mitigation projects for Hamer Environmental and Aqua Terr Systems Inc., managed environmental compliance at the Phillips 66 refinery in Ferndale, WA, and organized environmental education programs for the Chief Seattle Council. His education and experience have provided him with extensive knowledge on forests ecology, remote sensing, GIS, soil science, hazardous waste management and wetland monitoring. Currently, William assists in wetland, stream and shoreline delineations and fish and wildlife habitat assessments; conducts environmental code analysis; and prepares environmental assessment and mitigation reports, biological evaluations, and permit applications.

Education: Master of Science degree in Soil Science from Simon Fraser University, Burnaby British Columbia. Bachelor of Science degree in Environmental Science with a GIS minor from Western Washington University. *Professional Trainings:* 40-hour USACE wetland delineation training with Richard Chinn. Using the Revised Washington State Wetland Rating System (2014) in Western Washington from the Washington State Department of Ecology. Ordinary High Water Mark in Washington From the Washington State Department of Ecology.

Shaun Sweeney is an Environmental Scientist with 4 years of professional experience. Shaun has a background in wetland delineations, project management, vegetation monitoring, shoreline and stream assessments, and permitting processes. She currently performs wetland and ordinary highwater delineations, conducts environmental code analysis and prepares environmental assessments. Previously Shaun has managed multiple single family and residential development projects in assisting clients with permitting processes, mitigation planning and implementing regulations within engineering designs. She completed her training in wetland delineations with the Wetland Training Institute in August of 2021 and has since been involved in wetland delineations across western Washington. Her noteworthy experiences include supporting clients with navigating environmental regulations related to land use and development, managing mitigation and restoration projects, leading wetland and ordinary high-water delineations throughout the Puget Sound region, and experience in conducted various ecological surveys while studying abroad courses in South Africa.

Education: Bachelor of Arts in Environmental Studies with a minor in Geography from Western Washington University. *Professional Trainings:* Basic Wetland Delineator Training with the Wetland Training Institute 40-hour USACE wetland delineation training. Shaun has been formally trained through the Washington State Department of Ecology, Coastal Training Program, How to Determine the Ordinary High Water Mark, Using the Washington State Wetland Rating System (2014), and forage fish survey.

Tree Conservation Plan

To: **Aron Golden, KB Home**

File Number: 2072.0015

Date: August 28, 2024

From: **Shauna Willett, Soundview Consultants LLC**
Elisabeth Gonzalez, Soundview Consultants LLC

Re: **Tree Conservation Plan**
9907 and 9909 35th Avenue NE and 3705 98th Street NE, Marysville, WA 98271

Dear Mr. Golden,

Soundview Consultants LLC (SVC) is assisting KB Homes (Applicant) with a Tree Conservation Plan to support the residential development of an approximately 14.08-acre site located at 9907/9909 35th Avenue Northeast and 3705 98th Street Northeast in the City of Marysville, Washington (Figure 1). The subject property consists of seven tax parcels situated in the Southwest ¼ of Section 16, Township 30 North, Range 05 East, W.M (Snohomish County Tax Parcel Numbers 30051600301400, 30051600301500, 30051600301600, 30051600304501, 30051600305800, 30051600306500, and 30051600306600). Soundview Consultant's certified Arborist, Shauna Willett, completed an investigation to assess the size and condition of significant trees present on the subject property. This report documents the results of the assessment of significant trees on/adjacent to the site.

Figure 1: Subject Property Location

Site Description

The subject site is located in a residential setting in the City of Marysville, Washington and is currently developed with six single-family residences and associated infrastructure. The residences are located on six parcels along the south and west perimeter of the subject site. The central and eastern portion of the site is forested with a sparse understory, the west and south portion of the site consists of maintained lawn and landscaping surrounding the residences. The subject property abuts Interstate 5 to the west and residential development to the north, east and south. Topography onsite is generally flat with minor depressions and undulations throughout the forested area.

Methods

Three forms of assessment including an individual significant tree survey and plot-based sampling method were conducted in the Spring and Summer, by SVC's Certified Arborist to determine the approximate number, location, condition and forest structure of the trees located throughout the subject site. A complete significant tree survey was conducted along the periphery of the site boundary to assess individual trees, landscaped trees, or fragmented, smaller stands; a plot-based tree assessment was utilized for the larger tree stands where representative data could be obtained. Using aerial imagery, forested and non-forested areas were identified, resulting in an approximate forested canopy area comprising 8.2 acres of the 14.08-acre site. The combined acreage total of the 5 plots was 0.5 acres (21,780 square feet) or 6 percent of the identified forested areas onsite. Sample sizes of 3 to 6 percent achieve tree inventory estimates that are accurate to approximately 10 percent (ISA, 2006). One-tenth acre plots are considered to be standard plot sizes in forestry (Zobrist et al., 2012). Sample plot locations were randomly assigned within the two parcels using GIS-based random sample plot tools.

Trees tagged with yellow flagging and circular tree tags with one to three digits were collected by SVC. Trees tagged with rectangular tree tags with 4 to 5 digits were collected by Survey. Tree species, trunk diameter, condition and location data were collected on trees determined to be significant per Marysville Municipal Code (MMC) 22G.090.570, which include evergreen trees 8 inches in diameter or greater or deciduous trees 12 inches or greater in diameter at 4.5 feet above grade.

Estimates of tree units and significant trees onsite were then calculated for the upland forest areas, using the following equation:

$$total\ sampled\ trees\ x\ [subarea\ acreage \div total\ acreage\ of\ sample\ plots]$$

Results

The subject property is located in a residential setting and is developed with six single family residences and associated driveways and utilities. The majority of the central and central eastern portions of the project site are forested with several old structures and an excavated ditch covered in conduction sheeting that was intended to be a manmade fishpond. The western and southernmost portions of the subject property consist of maintained lawn and landscaped yards, while the northern and eastern portions of the subject property consist of mixed deciduous and coniferous forest. The dominant vegetation within the maintained field onsite consisted of Kentucky bluegrass (*Poa pratensis*) and common dandelion (*Taraxacum officinale*). The dominant vegetation within the forested area consisted of Douglas fir (*Pseudotsuga menziesii*), salal (*Gaultheria shallon*), hairy brackenfern (*Pteridium aquilinum*), non-native invasive Himalayan blackberry (*Rubus armeniacus*) and Kentucky bluegrass.

Of the areas onsite that were physically surveyed, the site investigation identified and assessed a total of 77 trees within the property bounds, of which 76 trees were considered to be in good or fair condition. The remaining 1 tree of significant size was assessed in poor condition and is not counted towards total significant tree numbers on site. Of the 76 significant trees in good or fair condition, 59 were Douglas fir, 2 were western red cedar (*Thuja plicata*), 1 was a western hemlock *(Tsuga heterophylla)* 1 was a bitter cherry (*Prunus emarginata*), and 13 were ornamental species within landscaped areas around the residences.

Within the five one-tenth acre interior forested plots, a total of 32 significant trees were identified. Douglas fir trees were the dominant species within the forested portion of the site. Trees identified on the perimeter of the site near the residences consist of ornamental species and fruit trees. The five plots account for 6 percent of the identified forested areas onsite. By dividing the number of significant trees identified throughout the surveyed plots by the sample area, a total number of trees may be extrapolated. The five sample plots identified 32 significant trees and account for a total of 6 percent (0.06) of the total forested area onsite, resulting in an extrapolated total of approximately 525 significant trees in the two interior forested parcels. Per MMC 22G.090.570, trees shall be retained in order of priority (a) within perimeter landscaped areas or (b) within NGPA tracts, specifically along the fringes. When and where it is not feasible to retain healthy significant trees, the trees shall be replaced onsite within a proposed planting plan, an alternative site plan, or by payment into the city tree fund per MMC 22G.090.570 (2)(d). Based on the significant tree data collected throughout the peripheral parcels and the extrapolated data based on the plot assessment, 575 will be removed and shall be replaced throughout the tree tracts, where feasible, interior landscaping and street tree installations.

Of the perimeter trees identified, 97 have been assessed as having the highest potential for retention, with the majority situated along the northern property boundary. Within this group, 28 trees are in good condition, 64 are in fair condition, and 5 are in poor condition. The retention of these perimeter trees will be determined on a case-by-case basis during construction, taking into account several key factors. These factors include the current health and structural integrity of each tree, as the majority are noted to be in fair condition and several are in poor condition, the need to maintain continuity with adjacent retained trees to preserve the overall landscape and ecological value, and the specific grading limits of the site. Additionally, considerations such as the impact on root zones, proximity to construction activities, and the potential for future growth and stability will also play a critical role in the final decision-making process.

Table 1. Tree Assessment Summary

Sample Plot Tree Calculations*	
Total Significant Trees Assessed	32
Total Sample Plot Area (square feet)	21,780
Total Sample Forest Area (square feet)	357,650
Formula	total sampled trees x [forest area / sample plot area]
Total Estimated Significant Trees	525
*Based on forested interior parcels 30051600305800 and 30051600304501	

Significant Tree Calculations*	
Total Significant Trees Assessed Onsite	77
Significant trees in Good/Fair Condition	76

Significant trees in Poor Condition	1
Potential Onsite Perimeter Trees to be Retained	97
Trees to be Removed (Significant +Total from Sample Plots)	575
Trees to be Planted based on Proposed Landscape Plan	To Be Determined
*Based on supplemental exterior parcels 30051600301600, 30051600306500, 30051600301400 and 30051600301500	

Five offsite trees (Tree numbers 5, 6, 66, 68 and 5758 – on parcel boundary) were inventoried and assessed due to their proximity to the subject property and the extent of their critical root zones (CRZs). Three trees (T-5 and T-6 and a portion of T-5758) were offsite on the neighboring parcel to the southwest, yet adjacent to a parcel extension that will be required for road expansion. The two trees to the south of the southcentral parcel are located within the City's Right of Way. All five of these offsite trees will be impacted by road improvements, so retaining the full CRZ may not be feasible. The CRZ is calculated as 1-inch DBH per 1 foot radius of the CRZ. A reduced critical root zone, or tree protection zone (TPZ) calculated using the trunk diameter and a multiplication factor (6 or 8) based on the species tolerance to construction and age of the tree (Komen, 2022) should be applied to T-5 and T-6. Additionally, a Certified Arborist shall be consulted if any roots greater than 3 inches in diameter are encountered during clearing, grading or excavation activities. All large roots encountered shall be cleanly cut with a sharp tool, not left torn by excavation equipment.

All trees being retained shall have tree protection fencing installed at the extent of their driplines or their critical root zones (CRZ). Tree protection fencing shall consist of high visibility mesh fencing or chain link fencing. Fencing shall be installed prior to the commencement of sitework. No traffic or materials shall enter the tree protection zone. Fencing shall not be moved to accommodate construction.

Conclusions

All observations regarding trees in this report were made by an ISA Certified Arborist, independently, based on education and professional experience. All determinations of health condition, structural condition, or hazard potential of a tree or trees at issue are based on current methodology and best available science. All health and hazard determinations are limited by the visual nature of the assessment. Defects may be obscured by soil, brush, vines, aerial foliage, branches, multiple trunks, or other trees. Even structurally sound, healthy trees are wind thrown during severe storms or fail due to other weather conditions. As such a determination is not a guarantee of sound health, or lack of risk.

The findings and conclusions documented in this assessment report have been prepared for specific application to the Stevens site. These findings and conclusions have been developed in a manner consistent with that level of care and skill normally exercised by members of the arboricultural profession currently practicing under similar conditions in the area. The conclusions and recommendations presented in this report are professional opinions based on an interpretation of information currently available to us and are made within the operation scope, budget, and schedule of this project. No warranty, expressed or implied, is made. In addition, changes in government codes, regulations, or laws may occur. Due to such changes, our observations and conclusions applicable to this assessment may need to be revised wholly or in part in the future.

Any trees to be retained shall be in good health and free from damage and defects. During and following site clearing and construction activities, trees designated for retention that are determined to be unhealthy or damaged and pose a hazard shall be re-evaluated by a Certified Arborist and

removed. Due to the inherent risk of failure from severe weather, undetectable and hidden disease, defect and damage of the trees to be retained, Soundview Consultants LLC assumes no liability of bodily injury, death, or property damage resulting from failure of the trees to be retained.

Sincerely,

CERTIFIED ARBORIST

Attachment A – Tree Health and Condition Definitions

Condition	Symbol	Definition
Excellent	E	Nearly ideal specimen with excellent form and vigor
		Well-balanced and nearly symmetric crown
		Normal to excellent shoot elongation on new growth
		Little to no twig dieback or discoloration of leaves
		No apparent pest or disease problems
		Sound, solid trunk free of defects and mechanical damage
		Tree should live to full life expectancy for species
Good	G	Vigor is normal for the species
		Full or nearly full canopy
		Well-balanced or partially asymmetric crown
		No dieback to branches > 2" in diameter
		Twig dieback and leaf discoloration are minor
		Minor pest or disease problems are manageable
		Tree is reacting appropriately to damage
		Sound, solid trunk free of defects and mechanical damage
		Tree should live to full life expectancy for species
Fair	F	Reduced vigor, new growth may be stunted
		Thinning canopy, asymmetric or inconsistent form
		Suckering or secondary growth may be present
		Twig and branch dieback may comprise up to 50% of canopy
		Minor pest or disease problems are visible but not fatal
		Tree is reacting appropriately to damage
		Single or multiple defects (codominant stem, uncorrected lean, forked leader) are not practical to correct
		Life expectancy shortened to 10-40 years depending on species
Poor	P	Tree is declining and appears unhealthy
		Thinning canopy, asymmetric or inconsistent form
		Suckering or secondary growth may be present
		Twig and branch dieback may comprise more than 50% of crown
		Pest or disease problems are uncontrollable and likely fatal
		Extensive decay or cavities present in trunk and/or branches
		Single or multiple defects (codominant stem, forked leader, uncorrected lean) are not practical to correct
		Life expectancy shortened to 1-5 years depending on species
Dying	DY	Tree is dying and lacks vigor
		Little live foliage
		Suckering or secondary growth is dominant growth
		Twig and branch dieback may comprise more than 80% of crown
		Life expectancy shortened to 1-3 years depending on species
Dead	D	Tree is dead

Attachment D – Qualifications

Project Manager: Elisabeth Gonzalez
Field Scientist(s): Shauna Willet
Report Preparation By: Shaun Sweeney
Map Preparation By: Dana Scott
Document Quality Assurance By: Rachael Hyland

Elisabeth Gonzalez is an Environmental Project Manager and Scientist with 3 years of professional experience. Elizabeth has a background in project management, shoreline permitting, forest and marine ecology, and wetland delineations. Elisabeth brings experience in managing bulkhead repair and replacement projects, single-family residence planning and wetland delineations, and extensive permitting projects for marina renovations. Previously, she has managed multiple shoreline projects in assisting clients with permitting processes while implementing regulations within engineering designs. She completed her training in wetland delineations with the Wetland Training Institute in October of 2021 and has since been involved in wetland delineations all across western Washington. Elisabeth has also completed two internships with the US Forest Service and Maui Ocean Center, where she performed a variety of research-based field work and worked as a research assistant with Saving the Blue collecting data on shark species and environmental impacts on the ocean.

Education: Bachelor of Science in Environmental Science with a concentration in Forest and Marine Ecology and Oceanography from the University of Colorado, Boulder.

Shauna Willett is an Environmental Scientist and ISA Certified Arborist with 19 years of professional experience. She has performed individual tree assessments, tree inventories and environmental assessments of many habitats including oak woodlands, forests, riparian corridors, and wetlands of the Puget Sound region and throughout California. She has worked as a consulting arborist in the residential, commercial, and utility sectors of arboriculture where she conducted preventative maintenance inspections of distribution and high voltage transmission lines for Puget Sound Energy. Her assessment work has involved field identification of tree and plant species, pest and disease diagnosis, data collection and analysis in public and private sectors. Her research background is highly varied, spanning the fields of agriculture, horticulture, nutrition - domestically and internationally, aquatic toxicology and urban forestry. Her graduate research focused on the validity of tree inventory data collected by volunteers using the iTree forestry analysis and benefits assessment tools developed by USDA Forest Service. She has extensive knowledge of local plant taxonomy and ecological vegetative indicators. Shauna currently performs tree assessments, wetland and stream delineations, fish, and wildlife habitat assessments; conducts environmental code analysis; creates and modifies maps and tree surveys using AutoCAD, prepares environmental assessment and mitigation reports, biological evaluations, and permit applications to support clients through the regulatory and planning process for various land use projects.

Education: Bachelor of Science degree in Landscape Architecture from the University of California, Davis, with a focus on the relationship between communities and their urban forest ecosystems. Master's degree in geography with a dual emphasis in urban forestry and landscape architecture at the University of California, Davis. *Professional Certifications:* ISA Certified Arborist, ISA Tree Risk Assessment Qualified Arborist. *Professional Trainings:* Using the Revised Washington State Wetland Rating System (2014) in Western Washington from Washington State Department of Ecology

Shaun Sweeney is an Environmental Scientist with 4 years of professional experience. Shaun has a background in wetland delineations, project management, vegetation monitoring, shoreline and

stream assessments, and permitting processes. She currently performs wetland and ordinary highwater delineations, conducts environmental code analysis and prepares environmental assessments. Previously Shaun has managed multiple single family and residential development projects in assisting clients with permitting processes, mitigation planning and implementing regulations within engineering designs. She completed her training in wetland delineations with the Wetland Training Institute in August of 2021 and has since been involved in wetland delineations across western Washington. Her noteworthy experiences include supporting clients with navigating environmental regulations related to land use and development, managing mitigation and restoration projects, leading wetland and ordinary high-water delineations throughout the Puget Sound region, and experience in conducted various ecological surveys while studying abroad courses in South Africa.

Education: Bachelor of Arts in Environmental Studies with a minor in Geography from Western Washington University. *Professional Trainings:* Basic Wetland Delineator Training with the Wetland Training Institute 40-hour USACE wetland delineation training. Shaun has been formally trained through the Washington State Department of Ecology, Coastal Training Program, How to Determine the Ordinary High Water Mark, Using the Washington State Wetland Rating System (2014), and forage fish survey.

Dana Scott is Design Lead with 15 years of professional experience. Dana has a background in habitat assessment and restoration, marine science, geospatial technologies, and drafting. She currently ensures that Soundview Consultants have a successful, well supported team of design professionals that provide expert level design and spatial services. Her skill set also encompasses overseeing quality assurance, managing data, and reviewing reports, ensuring the precision and reliability of critical information essential for well-informed decision-making.

Education: Master of Geospatial Technologies from University of Washington, Tacoma. Bachelor of Science from University of Washington, Tacoma. Bachelor in Business Administration, University of Washington, Tacoma. Professional Certifications: GIS Certificate Professional Trainings: Puget Sound Harmful Algal Bloom Data Collection and Publication From National Oceanic and Atmospheric Administration, Designing and Installing Mitigation and Restoration Projects, Coastal Inundation Mapping From National Oceanic and Atmospheric Administration, 2021 Interagency Wetland Mitigation Guidance, PMEP Estuaries Explorer and Estuary Viewer Data Tools Training, Puget Sound Coastal Processes, Training Series for Alternatives to Bulkheads, Using Wetland Rating System, Using the Marine Shoreline Design Guidelines for Marine Shoreline Stabilization from Washington State Department of Ecology. Publications: Chambers Creek Tributary Remote Sensing Study, Soil Analysis Survey of Point Defiance Park, Study of Microplastic Impacts on Aquatic Environments from University of Washington, Tacoma, Coauthor of "Biodiversity Survey of Benthic Communities of Commencement Bay", 2011 Final Report for Citizens for a Healthy Bay from Washington State Department of Ecology.

Rachael Hyland is a Senior Environmental Scientist with 11 years of professional experience and is a Professional Wetland Scientist (PWS #3480) through the Society of Wetland Scientists as well as a Certified Ecologist through the Ecological Society of America. Rachael has a background in wetland and ecological habitat assessments in various states, most notably Washington, Connecticut, Massachusetts, Rhode Island, and Ohio. She currently performs wetland, stream, and shoreline delineations and fish and wildlife habitat assessments; conducts environmental code analysis; coordinates with regulatory parties and provides quality assurance on environmental assessment and mitigation reports, biological evaluations, and permit applications to support clients through the regulatory and planning process for various land use projects. Her noteworthy experiences include delineation of large-scale sites and associated mitigation work including wetland creation and stream

relocation, and delineation of highly complex, disturbed, and problematic sites requiring extensive background research and understanding of soils and hydrology. Additionally, she also has extensive knowledge of bats and their associated habitats and white nose syndrome (*Pseudogymnoascus destructans*), a fungal disease affecting bats which was recently documented in Washington.

Education: Bachelor of Science degree in Ecology and Evolutionary Biology from University of Connecticut. *Professional Trainings:* 40-hour wetland delineation training for Western Mountains, Valleys, & Coast and Arid West Regional Supplement through Terrascience and Northcentral and Northeast supplement through Institute for Wetland and Environmental Education and Research; Using the Revised 2014 Wetland Rating System for Western Washington, How to Determine the Ordinary High Water Mark, Navigating SEPA, Selecting Wetland Mitigation Sites Using a Watershed Approach, Wetland Classification, and Using the Credit-Debit Method for Estimating Mitigation Needs from Washington State Department of Ecology; Biological Assessment for Transportation Projects from Washington State Department of Transportation *Qualified Author and Scientist Lists:* Washington State Department of Transportation Biological Assessment Junior Author; Pierce County Qualified Wetland and Wildlife Specialist; Kitsap County Qualified Wetland, Habitat, and Shoreline Consultant.

3 ENGINEER'S DECLARATION

I, Neil A. Latta, a Professional Engineer registered in the State of Washington as a Civil Engineer, do hereby declare that this preliminary stormwater site plan report titled *Stevens Planned Residential Development / Binding Site Plan, Marysville WA* dated August 1, 2024 was prepared by, or under my personal supervision, that said report was prepared in accordance with generally accepted engineering practices. I hereby affirm that, to the best of my knowledge, information and belief, subject report was prepared in compliance with the City of Marysville Development Standards and the Washington State Department of Ecology (WSDOE) 2019 Stormwater Management Manual for Western Washington (2019 SWMM).

08-01-2024

…… ……..

Neil Latta, PE Date

Latta Engineering, PLLC

4 INTRODUCTION

4.1 PROJECT BACKGROUND

The Stevens Planned Residential Development (Stevens PRD) is a proposed single family residential subdivision development located in the City of Marysville within the NW¼ SW ¼ of Section 6, Township 30 North, Range 5 East, WM, City of Marysville, WA. The 13.676 acre subject property area is comprised of seven separate parcels (addressed 9815, 9907, 9909, 9921 35th Avenue NE and 3609, 3625, 3705 98th Street NE). The subject properties are characterized as residential acreage properties with a mix of maintained lawns, landscaping and woodland areas. A site vicinity map of the project location and surrounding area is shown in Figure 1.

The applicant proposes to subdivide the property to create 59 single family building lots on the site with access to 98th Street NE. The project will be built-out in a single phase. The proposed site work will generally involve site clearing, grading, on-site roadways and single family home building construction, with associated civil utilities including water, sewer, storm drainage and franchise utilities. The project size and land disturbance will be greater than 1.0 acre and therefore is subject to the National Pollution Discharge Elimination System (NPDES) permit process regulated by the WA State Department of Ecology. Upon completion of development there will be an estimated total impervious surface area (on-site) of approximately 8.86 acres (65% of total subject property) with the remaining area to be pervious landscaping.

Additional project information for this project is as follows:

Subject Property Tax Numbers:	**30051600301400, 30051600301500, 30051600301600, 30051600304500, 30051600304501, 30051600305800, 30051600306500, 30051600306600**
Zoning:	**Medium Density Single Family Residential (R-4.5)**
Applicant:	**KB Home - Seattle** **320 120 Avenue NE, Suite 200** **Bellevue, WA 98005**
Engineer / Authorized Agent:	**Neil A. Latta, PE** **Latta Engineering, PLLC** **5970 Birch Point Road** **Blaine, WA 98230**

4.2 SCOPE OF STUDY

The purpose of this preliminary report is to evaluate the effects and consequences of stormwater surface runoff resulting from the proposed development of the subject property and to detail the methods and assumptions used for this evaluation. This report will also provide preliminary mitigation design recommendations that will assure that the post-development stormwater release rates from the site do not exceed the pre-development flows for the design frequency storm events and that the quality of stormwater runoff is not degraded in accordance with City of Marysville Development Guidelines and the WSDOE 2019 Stormwater Management Manual.

4.3 METHOD OF APPROACH

All nine storm water management minimum requirements apply to the proposed development in accordance with the 2019 SWMM (SWMM, Volume 1, page 89).

The Western Washington Hydrology Model (WWHM 2012) was used to size proposed storm water facilities to satisfy the 2019 SWMM requirements.

WWHM's Hydrological Simulation Program FORTRAN parameters are based on calibrated watersheds located in Western Washington. For Snohomish County, the program uses precipitation data from a gauge located in Everett and then scales the precipitation to a specific project site using published National Oceanic and Atmospheric Administration rainfall map data. Site rainfall data for this site is scaled to 100% (precipitation scale).

The model generates 40+ years of hourly runoff data for both predevelopment and post-development land use conditions. Flow duration analysis is conducted for 100 flow levels between the lower erosive zone limit (50% of the pre-development two-year flow frequency) and the upper limit (predevelopment 50-year flow frequency value). There are three criteria by which flow duration values are compared (SWMM, Vol. 3, page 2-9):

- If the post-development flow duration values exceed any of the predevelopment flow levels between 50% and 100% of the two-year predevelopment peak flow values (100% threshold) then the flow duration requirement has not been met.
- If the post-development flow duration values exceed any of the predevelopment flow values between 100% of the two-year and 100% of the 50-year predevelopment peak flow values more than 10% of the time (110% threshold) then the flow duration requirement has not been met.
- If more than 50% of the flow duration levels exceed the 100% threshold then the flow duration requirement has not been met.

Existing conditions and the pre-development basin characteristics were defined using topographic survey data, aerial photography, and aerial topographic information obtained from Snohomish County. The hydrologic soil types were determined from the US Department of Agriculture's, Natural Resources Conservation Service (NRCS) and from a project specific geotechnical investigation. Soil infiltration rate feasibility was based on a site specific geotechnical engineering investigation report prepared by Earth Solutions NW, LLC dated June 24, 2024.

The post-development basin characteristics were estimated by quantifying land disturbance associated with the proposed development site plan. The quantities of impervious and pervious cover were overlaid with soil types and land uses and then tabulated for flow analyses. The total impervious area in the developed condition includes proposed building roofs, roads, driveways and sidewalks. The remaining developed area was modeled as landscaped lawn area.

Runoff from pollutant generating impervious and pervious areas (all hardscape and lawns) will be routed to underground stormwater infiltration chamber facilities for flow control and water quality treatment to fully mitigate storm water runoff in accordance with the 2019 SWMM to satisfy the flow duration standards.

4.4 DESIGN REFERENCES

The following references were applied for the storm water site planning and design:

- City of Marysville County Development Standards,
- WSDOE 2019 Stormwater Management Manual for Western Washington (2019 SWMM),
- Clear Creek Solutions, Inc. WWHM 2012 Project Book.

5 EXISTING CONDITIONS

5.1 LAND USE

The proposed development is located within limits of the City of Marysville and is zoned Medium Density Single Family Residential (R-4.5). The 13.676 acre subject property area is comprised of 7 separate parcels that are characterized as residential acreage properties with a mix of maintained lawns, landscaping and woodland areas. The site is bound by Interstate-5 to the west, 98th Street NE to the south and existing single family residential plats to the north and east. A site vicinity map of the project is included in Appendix 1 for reference (Figure 1).

5.2 VEGETATION & CRITICAL AREAS

The vegetation across the subject property area consists of a mix of maintained lawns, landscaping and some woodland areas.

The forested areas onsite are predominantly Douglas fir with an understory of salal, western bracken fern, and non-native invasive Himalayan blackberry. The areas surrounding the existing residences consist of maintained lawn and ornamental non-native species such as Kentucky bluegrass and common dandelion.

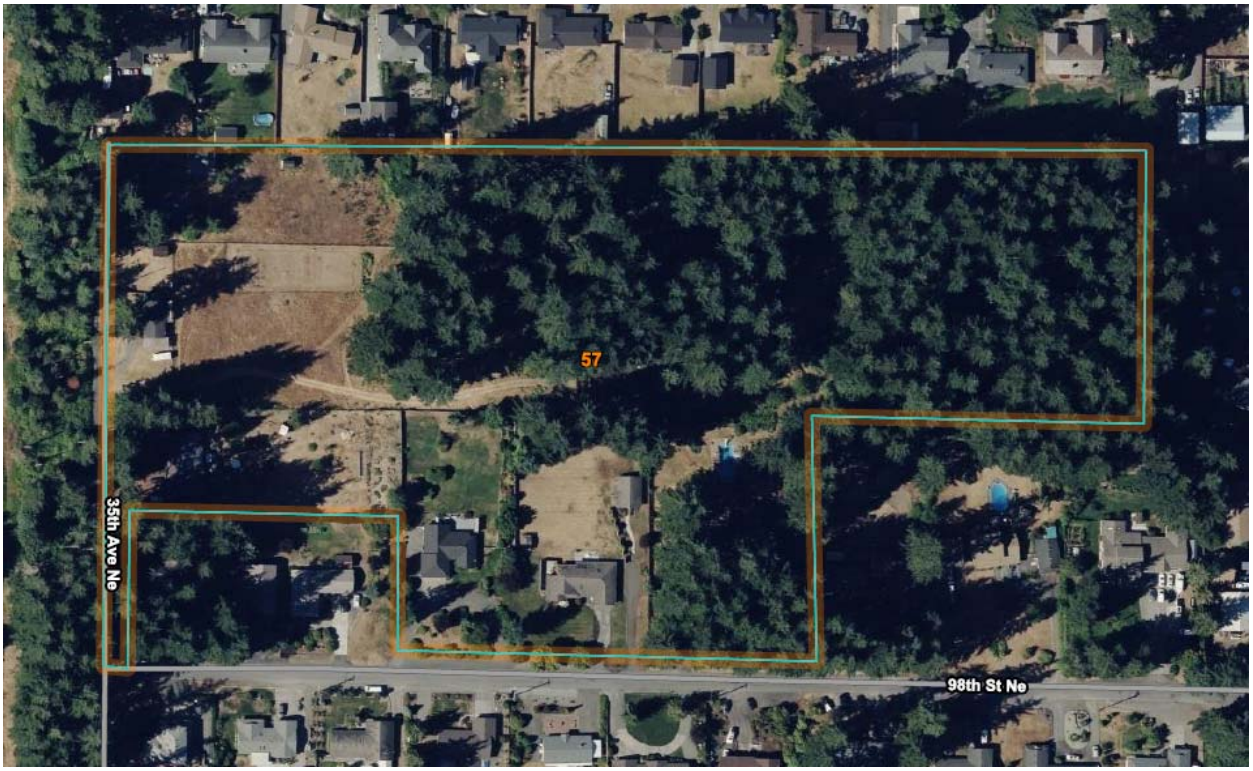
A wetland assessment report prepared by Soundview Consultants LLC confirmed the absence of wetlands on the subject properties. No indication of hydrology, hydric soils or hydrophytic vegetation was observed. No other potentially regulated wetlands, aquatic areas, and/or fish and wildlife habitat conservation areas were observed on or within 300 feet of the subject properties.

The Wetland and Fish and Wildlife Habitat Assessment report prepared by Soundview Consultants LLC dated June 20, 2024 in included in Appendix 2 for reference.

5.3 TOPOGRAPHY AND DRAINAGE

Topography across the site is generally flat with elevations ranging between approximately 58 feet to 60 feet above mean sea level (msl). The subject property is located in the Quilceda Creek basin within the Snohomish watershed (Water Resource Inventory Area 7).

Figure 2 (Pre-Developed Condition) in Appendix 1 illustrates the existing elevation contours and drainage characteristics within the subject property site and the 98th Street NE frontage right of way.



5.4 SOILS

The figure below illustrates the USDA Natural Resource Conservation Service (NRCS) soil classification of the subject property area. The soil survey identifies one soil type on the subject property: Ragnar fine sandy loam, 0 to 8 percent slopes (map unit # 57). According to the NRCS survey, Ragnar fine sandy loam is a well drained soil formed in glacial outwash plains and is listed as a hydrologic group “A” soil.

A site specific geotechnical engineering investigation report was completed for the project by Earth Solutions NW, LLC dated June 24, 2024 which is included in Appendix 2 for reference. This report concluded that the site was typically underlain by loose surficial soils interpreted as topsoil with forest duff and medium dense poorly graded sand (Unified Soil Classification System type SP).

Based on the geotechnical test pit findings, Earth Solutions NW, LLC (ESNW) opined that the native subsurface soils are feasible for stormwater infiltration. Based on the results of in-situ infiltration testing, ESNW recommended a long-term design infiltration rate of 20 inches per hour to be assigned to the subject site. This infiltration rate takes into account the potential for variability of the site soils within specific infiltration areas of the site.

Figure 5-1: Soils Map (NRCS Web Soil Survey)

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
57	Ragnar fine sandy loam, 0 to 8 percent slopes	13.3	100.0%
Totals for Area of Interest		**13.3**	**100.0%**

6 STORMWATER SYSTEM EVALUATION

6.1 PRE-DEVELOPMENT CONDITION BASIN ANALYSIS

The pre-development condition hydrology was modeled on the basis of site topographic survey data and field reconnaissance observations of the site drainage conditions. The pre-development vegetation condition was modelled as forested land in accordance with the 2019 SWMM.

The subject property is defined by three drainage basin areas for the purpose of stormwater mitigation. Basin 1 (13.460 acres) represents the majority of subject property area. This basin area is generally flat with the analysis point of concentration (POC-1) located at the southwestern limit of the site. Basin 2 (0.159 acre) represents the 98th Street NE right-of-way frontage to the west of the proposed Road A intersection. This small basin area is also relatively flat with the analysis point of concentration (POC-2) located at the west limit of the site 98th Street NE frontage. Basin 3 (0.397 acre) represents the 98th Street NE right-of-way frontage to the east of the proposed Road A intersection. This basin area is again relatively flat with the analysis point of concentration (POC-3) located at the central portion of the 98th Street NE frontage.

WWHM hydrologic modeling analysis was performed under the pre-developed condition scenario. Storm water runoff routed to the project point of concentration in the pre-developed condition represents the "match" runoff condition permitted to be released from the developed site in accordance with flow duration analysis methodology outlined in Section 4.3 above.

Figure 2 (Pre-Developed Condition) in Appendix 1 illustrates the existing condition topography, basin delineation and general site conditions. Existing condition *Land Use Area Summaries* (summary of basin pervious and impervious surface area types) and the WWHM modeling project reports are provided in Appendix 3.

6.2 DEVELOPED CONDITION BASIN ANALYSIS

Developed basin conditions were quantified based on the proposed site plan configuration and boundaries shown on Figure 3 (Developed Condition) in Appendix 1. The developed condition basin areas match the pre-developed condition basin areas. The developed basin areas include all site improvements proposed for the entire project build out.

Impervious surface area within the developed condition basins includes the proposed roadway pavements, driveways, sidewalks, future home roof tops and all miscellaneous hardscape areas. The developed basin condition is proposed to have approximately 65% impervious surface area coverage (i.e. overall developed subject property impervious area coverage).

Pervious surface area within the developed condition basins includes all landscape area within the public right-of-ways and building lots. The proposed impervious and pervious areas are summarized in the *Land Use Area Summaries* provided in Appendix 3. Stormtech underground stormwater infiltration chamber facilities are proposed for each basin to fully mitigate project runoff (full infiltration for flow control and water quality treatment).

The estimated impervious and pervious surface areas were incorporated with the types of ground cover, land usage, and soils to model runoff for the three proposed developed condition basins. These characteristics were input into the computer hydrologic simulation model to estimate the development runoff rates and used to determine required flow control and underground stormwater infiltration facility sizing associated with the design storm events as outlined in Section 4.3 (Method of Approach).

Figure 3 (Developed Condition) in Appendix 1 illustrates the existing and proposed condition topography, basin delineations and general site conditions. The detailed developed condition *Land Use Area Summaries* and the WWHM modeling project reports are provided in Appendix 3.

6.3 FLOW CONTROL

Flow control (Minimum Requirement #7) is required for the project in accordance with 2019 SMWW best management practices. The proposed flow control design approach for each basin is to collect and convey stormwater to underground stormwater infiltration chamber facilities to be located within open space tracts to retain and attenuate storm water runoff rates via full infiltration in accordance with the 2019 SWMM to satisfy all flow duration standards. Emergency overflow shall be achieved via roadway and landform grading to convey any potential overflows to the 35th Ave NE and 98th Street NE frontage right of way areas.

The WWHM screenshot figures below illustrate the proposed 1.284 ac-ft, 0.016 ac-ft and 0.031 ac-ft stormwater infiltration chamber facilities serving Basins 1, 2 and 3 respectively. Each infiltration facility was designed using Stormtech MC-3500 chamber units to provide the required storage volume to fully infiltrate all basin runoff using a conservative long-term design infiltration rate of 2 inches per hour. The complete WWHM preliminary design modelling reports and Stormtech system details for each basin is provided in Appendix 3.

Figure 6-1: WWHM Infiltration Facility Model Element serving Basin 1

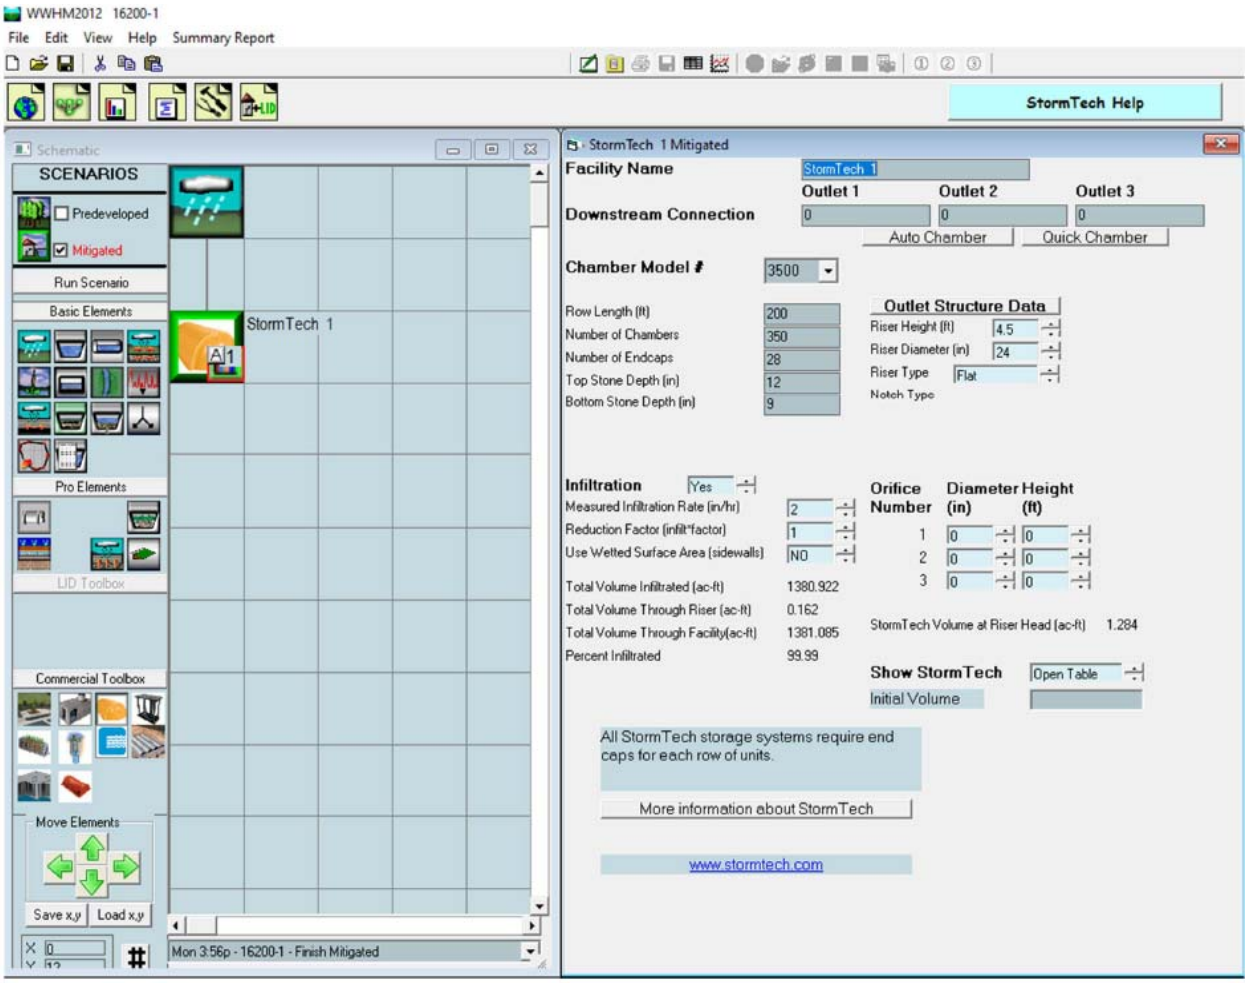


Figure 6-2: WWHM Infiltration Facility Model Element serving Basin 2

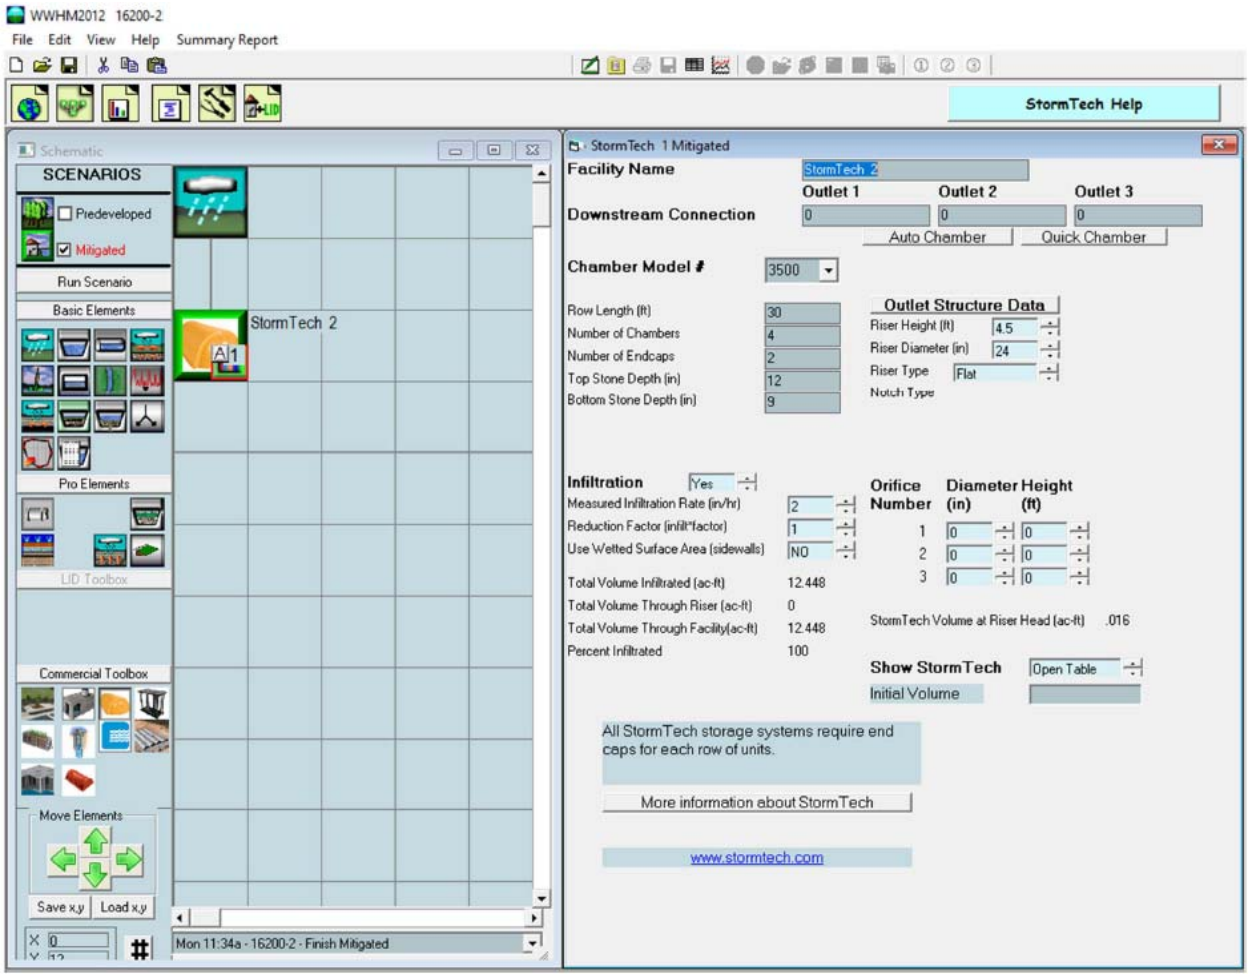

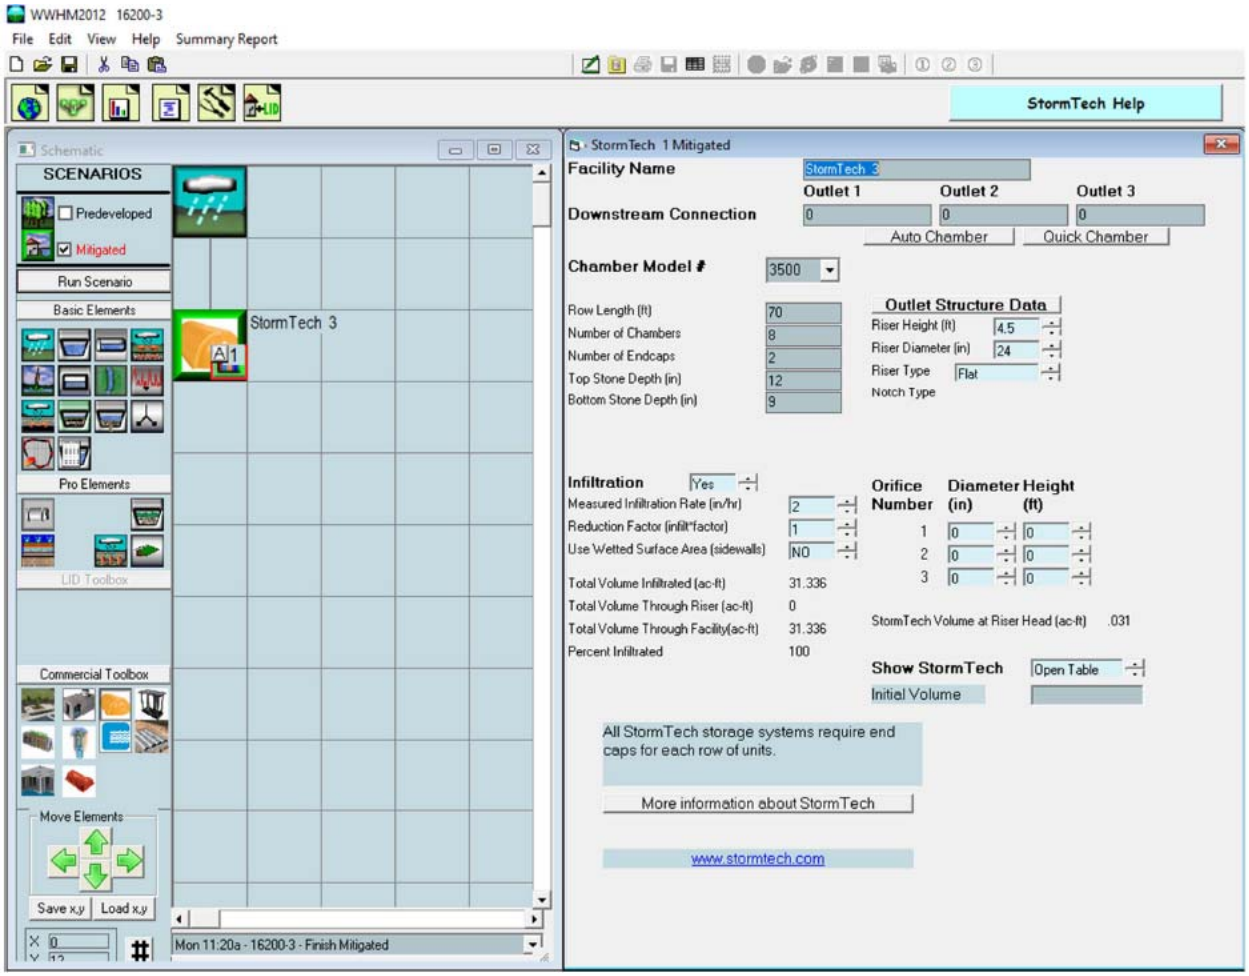

Figure 6-3: WWHM Infiltration Facility Model Element serving Basin 3

6.4 WATER QUALITY

Basic water quality treatment (Minimum Requirement #6) is required for the project's pollutant generating impervious surface areas (asphalt pavement, driveway and parking areas) and pervious surface areas (lawns) in accordance with 2019 SMWW best management practices.

Water quality treatment for all basin runoff will be provided by proposing an 18 inch layer of engineered soil below each infiltration facility in accordance with Volume 5, Chapter 5, 2019 SWMM. Each infiltration facility is sized to fully infiltrate all basin runoff therefore this water quality design approach exceeds Minimum Requirement #6 to treat at least 91% of basin runoff (i.e. volume equal to the simulated daily volume that represents the upper limit of the range of daily volumes that accounts for 91% of the entire runoff volume over a multi-decade period of record).

The engineered soil mix shall meet site suitability criteria for soil physical and chemical suitability for treatment (per SSC-6, page 744, 2019 SWMM). Cation exchange capacity (CEC) of the treatment soil must be ≥ 5 milliequivalents CEC/100 g dry soil and the soil mix shall have a minimum of 1.0 percent organic content.

6.5 CONVEYANCE

The storm drainage for the project will be designed to ensure conveyance for the peak runoff flow per City of Marysville Development Standards. All stormwater piping will adequately convey the peak flow from the 25-year storm event. The project site and roadway system grading design also ensures that the 100 year design storm event can be safely conveyed via overland flow to the down gradient basin points of concentration.

6.6 DOWNSTREAM CONVEYANCE

No stormwater runoff will be released from the site (i.e. full stormwater infiltration design is proposed). As noted above, the project site and roadway grading design will ensures that the 100 year design storm event can be safely conveyed via overland flow to the down gradient basin points of concentration (98th Street NE right of way) as shown on Figure 3 (Developed Condition). From this point, potential overland drainage flows would route west to 35th Ave NE and then south via existing storm drainage ditches within the public right of way conveyance system.

A detailed offsite downstream conveyance summary will be provided in the project's Full Storm Water Site Plan Report to document the offsite drainage path for approximately 1 mile downstream of the subject property and also to verify the ultimate downstream receiving water body.

6.7 TEMPORARY EROSION AND SEDIMENTATION CONTROL

A detailed temporary erosion and sedimentation control (TESC) plan will be prepared to define control measures to minimize site erosion and sedimentation during construction. Quarry spall construction entrance road, silt fencing, interceptor drainage swales, sedimentation ponds and related Best Management Practices (BMPs) will be proposed to ensure protection of neighboring properties and downstream drainage systems. A detailed Storm Water Pollution Prevention Plan (SWPPP) will also be prepared for the project.

7 MINIMUM STORMWATER REQUIREMENTS

This project must comply with the nine minimum requirements outlined in the 2019 WSDOE *Storm Water Management Manual*. The nine minimum requirements will be addressed as follows:

7.1 REQUIREMENT NO. 1 – PREPARE STORMWATER SITE PLANS

A storm water site plan is required in accordance with the steps outlined below per SMWW Volume 1, Chapter 3.

7.1.1 STEP 1: COLLECT AND ANALYZE EXISTING CONDITIONS INFORMATION

A site visit was performed to determine the existing drainage conditions. A storm water hydrologic model was developed to estimate the pre-development runoff conditions based on a topographic survey of the site. The downstream conveyance will be investigated by performing a field investigation of the downstream conveyance system, and utilizing regional topographic map information.

7.1.2 STEP 2: PREPARE PRELIMINARY DEVELOPMENT LAYOUT

A site development plan has been prepared. The storm water analysis has been prepared in accordance with the proposed plans.

7.1.3 STEP 3: PERFORM OFF-SITE ANALYSIS

An off-site drainage investigation will be completed for the downstream conveyance to 1 mile offsite with narrative and general mapping. The release point for the development remains the same as the pre-developed drainage POCs. The release rates from the final development will be attenuated and not exceed those generated in the existing condition per the modeling parameters defined in this report. The downstream system will not suffer any long term impacts from the proposed development.

7.1.4 STEP 4: DETERMINE APPLICABLE MINIMUM REQUIREMENTS

All nine minimum requirements apply to the project as outlined in the 2019 SWMM in accordance with the Flow Chart for Determining Requirements for New Development (SWMM Volume I).

7.1.5 STEP 5: PREPARE A PERMANENT STORMWATER CONTROL PLAN

The permanent storm water control plan proposed for this project includes engineered water quality treatment and flow control facilities. BMP and Facility Selection Process for Permanent Storm Water Control Plans were derived per Chapter 4, Volume I of the 2019 SWMM.

Step 1: Determine and Read the Applicable Minimum Requirements

Minimum requirements were reviewed to establish the project size thresholds for the application of the SWMM minimum requirements. In accordance with the 2019 SWMM Flow Chart for Determining Requirements for New Development, all 9 Minimum Requirements apply to the new and related hard surfaces and converted vegetation areas.

Step 2: Select Source Control BMPs

Suitable temporary source control BMPs will be selected based on the nature of the proposed project. Storm water runoff from the developed site area site shall be conveyed to the storm water management facilities. Detailed design plans will be prepared based on the analysis and findings outlined in this report.

Step 3: Determine Threshold Discharge Areas and Applicable Requirements for Treatment, Flow Control, and Wetlands Protection

The project threshold discharge area proposes new impervious surface area that triggers the requirement for both water quality treatment and flow control facilities to satisfy minimum requirement #6 (runoff treatment) and #7 (flow control). Appendix 3 includes the project Land Use Area Summary tables that quantify the amount of effective pollution-generating impervious surfaces and pollution–generating pervious surfaces in the threshold discharge area. There are no critical area wetlands on the site.

Step 4: Select Flow Control BMPs and Facilities

Flow control facilities were designed for the project using WWHM to size a preliminary stormwater infiltration facilities to serve all project basin runoff. Based on the geotechnical test pit findings, the native subsurface soils are feasible for stormwater infiltration.

Step 5: Select Treatment Facilities

Infiltration with engineered soil mixture is proposed to provide treatment for all project basin runoff.

Step 6: Review Selection of BMPs and Facilities

The list of on-site treatment and flow control facilities, and the list of source control BMPs were reviewed. The site layout will be revaluated to review the need for construction of facilities, the size of the facilities, the amount of impervious surfaces created and areas to be left undisturbed.

Step 7: Complete Development of Permanent Storm Water Control Plan

The final design and location of the BMPs and facilities on the site will be determined using the detailed guidance in SWMM Volumes 3, 4, and 5. An operation and maintenance manual will be prepared for the treatment and flow control facilities proposed.

7.1.6 STEP 6: PREPARE A CONSTRUCTION STORMWATER POLLUTION PREVENTION PLAN (SWPPP)

A complete SWPPP will be prepared for the project addressing all 13 elements in accordance with the 2019 SWMM (see below).

7.1.7 STEP 7: COMPLETE THE STORMWATER SITE PLAN

This preliminary storm water site plan design has been completed to encompass the entire project submittal to the City of Marysville (local government agency with drainage review authority).

7.1.8 STEP 8: CHECK COMPLIANCE WITH ALL APPLICABLE MINIMUM REQUIREMENTS

The preliminary storm water site plan design complies with applicable City requirements.

7.2 REQUIREMENT NO. 2 – CONSTRUCTION STORMWATER POLLUTION PREVENTION (SWPPP)

7.2.1 ELEMENT 1: PRESERVE VEGETATION / MARK CLEARING LIMITS

The project will require land clearing to remove trees and brush vegetation. A qualified land surveyor will physically mark the property clearing limits on the site. Temporary buffer zones (BMP C102) of natural

vegetation beyond the proposed clearing limit will provide a living filter to reduce soil erosion and runoff velocities during construction.

7.2.2 ELEMENT 2: ESTABLISH CONSTRUCTION ACCESS

Stabilized construction entrances will be proposed to 98th Street NE in general accordance with BMP C105. Public roads shall at a minimum be cleaned thoroughly at the end of each day. Sediment shall be removed from roads by shoveling or pickup sweeping and shall be transported to a controlled sediment disposal area. Street washing will be allowed only after sediment is removed in this manner.

7.2.3 ELEMENT 3: CONTROL FLOW RATES

Temporary sediment ponds will be proposed per BMP C241 to protect properties downstream of the development site from erosion and the potential discharge of turbid stormwater runoff from the project site. The 2 yr WWHM flow frequency for the project will be used to determine the required minimum surface area at the top of the riser pipe. The equation and design criterion for the sediment pond are as follows:

Surface Area: SA = Q2 x 2080

The temporary ponds will fully infiltrate stormwater runoff during construction.

7.2.4 ELEMENT 4: INSTALL SEDIMENT CONTROLS

Runoff from disturbed areas will be collected by temporary interceptor swales (BMP C200) and directed to temporary sediment ponds (BMP C241) as required. Perimeter silt fencing (BMP C233) will be installed at down gradient clearing limits. Earthen structures shall be seeded according to timing indicated in Element 5 below.

7.2.5 ELEMENT 5: STABILIZE SOILS

All exposed and unworked soils shall be stabilized by application of effective BMPs that protect the soil from the erosive forces of raindrop impact and flowing water, and wind erosion. From Oct 1 to April 30th, no soils shall remain exposed and unworked for more than 2 days. May 1 to September 30 of each year, no soils shall remain exposed and unworked for more than 7 days. Applicable practices include, but are not limited to, temporary and permanent seeding (BMP C120), mulching (BMP C121), early application of gravel base on driveway and parking areas, and dust control. Soil stabilization measures selected should be appropriate for the time of year, site conditions, estimated duration of use, and potential water quality impacts that stabilization agents may have on downstream waters or ground water. Soil stockpiles must be stabilized and protected with sediment trapping measures. Work on construction sites shall not exceed the capability of the individual contractor to re-stabilize the disturbed soils, meeting the timing conditions listed above.

7.2.6 ELEMENT 6: PROTECT SLOPES

Temporary slopes shall be protected with temporary seeding (BMP C120) and mulching (BMP C121). Excavated material shall be placed on the uphill side of trenches, consistent with safety and space considerations. Check dams shall be placed at regular intervals within trenches that are cut down a slope. Stabilize soils on slopes, as specified in Element #5.

7.2.7 ELEMENT 7: PROTECT DRAIN INLETS

Protect all storm drain inlets made operable during construction so that stormwater runoff shall not enter the conveyance system without first being filtered or treated to remove sediment. Clean or remove and

replace inlet protection devices when sediment has filled one-third of the available storage (unless a different standard is specified by the product manufacturer).

7.2.8 ELEMENT 8: STABILIZE CHANNELS AND OUTLETS

Interceptor swales will be positively graded and seeded (BMP C120). Temporary interceptor swales shall be stabilized with grass vegetation and triangular silt dike check dams (BMP C208) at min. 50 lf on-center if required. Stabilization, including armoring material, adequate to prevent erosion of outlets and adjacent to slopes shall be provided at the outlets of all conveyance systems.

7.2.9 ELEMENT 9: CONTROL POLLUTANTS

All pollutants including waste materials and construction debris, that occur on-site shall be handled and disposed of in a manner that does not cause contamination of storm water. BMPs shall be utilized to control and protect the site for vehicle maintenance and repair, use of chemicals, pH modifying substances etc. (BMP C151 Concrete Handling, BMP C153 Material Delivery, Storage and Containment).

7.2.10 ELEMENT 10: CONTROL DE-WATERING

De-watering shall be routed to the on-site temporary sediment pond (BMP C241) however this is not anticipated. Any potential foundation and trench de-watering water, which has similar characteristics to storm water runoff at the site, shall be discharged into a controlled conveyance system, prior to discharge to a sediment trap or sediment pond. Channels must be stabilized, as specified in Element #8.

7.2.11 ELEMENT 11: MAINTAIN BMPS

All temporary and permanent erosion and sediment control BMPs shall be maintained and repaired as needed to assure continued performance of their intended function. Sediment control BMPs shall be inspected weekly or after a runoff-producing storm event during the dry season (daily if construction takes place during the wet season). Following project completion and full final site stabilization, temporary TESC elements shall be removed from the site within 30 days.

7.2.12 ELEMENT 12: MANAGE THE PROJECT

All BMPs shall be inspected and maintained by the Contractor's Certified Erosion and Sediment Control Lead.

Phasing of Construction - The project site work will be constructed over a single phase.

Permitted clearing and grading shall be limited to delineated areas on site per the approved plans.

Inspection and Monitoring - All BMPs shall be inspected, maintained, and repaired as needed to assure continued performance of their intended function. Whenever inspection and/or monitoring reveals that the BMPs identified in the Construction SWPPP are inadequate, due to the actual discharge of or potential to discharge a significant amount of any pollutant, the SWPPP shall be modified, as appropriate, in a timely manner.

Maintenance of the Construction SWPPP - The Construction SWPPP shall be retained on-site. The Construction SWPPP shall be modified whenever there is a significant change in the design, construction, operation, or maintenance of any BMP. From Oct 1 to April 30th, no soils shall remain exposed and unworked for more than 2 days. May 1 to September 30 of each year, no soils shall remain exposed and unworked for more than 7 days.

Civil plan sheets (Existing Conditions and TESC Plan) will be prepared to illustrate all proposed controls.

7.2.13 ELEMENT #13: PROTECT LOW IMPACT DEVELOPMENT BMPS

Protect any and all low impact development (LID) system BMPs from sedimentation through installation and maintenance of erosion and sediment control BMPs on portions of the site that drain into infiltration BMPs. Restore the BMPs to their fully functioning condition if they accumulate sediment during construction. Restoring the BMPs must include removal of sediment and any sediment-laden soils, and replacing the removed soils with soils meeting the design specification. Prevent compacting soils within infiltration BMPs by excluding construction equipment and foot traffic. Keep all heavy equipment off existing soils under LID facilities that have been excavated to final grade to retain the infiltration rate of the soils.

7.3 REQUIREMENT NO. 3 – SOURCE CONTROL OF POLLUTION

The following source control and conveyance Best Management Practices (BMP's) have been preliminarily selected for implementation on this project:

- BMP C102 Buffer Zones
- BMP C105 Stabilized Construction Entrance / Exit
- BMP C120 Temporary and Permanent Seeding
- BMP C121 Mulching
- BMP C123 Plastic Covering
- BMP C160: Certified Erosion and Sediment Control Lead
- BMP C200 Interceptor Dike and Swales
- BMP C208 Triangular Silt Dike
- BMP C220 Storm Drain Inlet Protection
- BMP C233 Silt Fence
- BMP C241 Temporary Sediment Pond

7.4 REQUIREMENT NO.4 – PRESERVATION OF NATURAL DRAINAGE SYSTEMS AND OUTFALLS

The natural drainage pattern will be maintained, and discharges from the project site shall occur at the natural location. The developed site will mitigate storm water runoff to maintain the "targeted" pre-development flows to the downstream system. The manner by which runoff is discharged from the project site must not cause a significant adverse impact to downstream receiving waters and down gradient properties. The developed project site design will attenuated storm water flows (full infiltration of all runoff) to not exceed the target peak flow duration standard in accordance with flow duration analysis methodology outlined in Section 4.3 to preserve and protect the natural drainage system.

7.5 REQUIREMENT NO. 5 – ON-SITE STORMWATER MANAGEMENT

The project employs on-site storm water management BMPs to infiltrate, disperse, and retain stormwater runoff on-site to the extent feasible without causing flooding or erosion impacts.

On-site stormwater management BMPs were selected in accordance with List #2 (On-site Stormwater Management BMPs for Projects Triggering Minimum Requirements #1 through #9) per the SWMM (Volume I, page 120). Feasibility was determined by evaluation against the design criteria, limitations, and infeasibility criteria identified for each BMP in the SWMM.

Lawn and Landscape Areas:

BMP T5.13 (Post-Construction Soil Quality and Depth) is proposed for all new lawn and landscaped areas, as well as any areas disturbed by landscape grading activities.

Roofs:

BMP T5.10A (Downspout Full Infiltration) is proposed to fully infiltrate runoff from roof downspout drains. Roof runoff is proposed to be routed to the project stormwater infiltration chamber facilities located in the open space tracts for full mitigation.

Other Hard Surfaces:

Runoff from other hard surfaces on the project (paved driveway, sidewalks, and roadway areas) will be mitigated by appropriate and feasible water quality treatment and flow control BMPs.

Permeable pavement in accordance with BMP T5.15 was reviewed and concluded to be infeasible (based on the need for City of Marysville ongoing maintenance requirements).

BMP T7.10 (Infiltration Basins) are proposed (stormwater infiltration chamber facilities located in the open space tracts) to fully infiltrate all hard surface area runoff from the project for full mitigation.

7.6 REQUIREMENT NO. 6 – RUNOFF TREATMENT

The project threshold discharge area proposes new pollutant generation impervious surface areas that triggers the requirement for water quality treatment to satisfy minimum requirement #6. Water quality assurance for this project will be provided via infiltration though an 18 inch layer of engineered soil below each infiltration facility in accordance with Volume 5, Chapter 5, 2019 SWMM requirements.

7.7 REQUIREMENT NO. 7 – FLOW CONTROL

The project threshold discharge area proposes new impervious surface area that triggers the requirement for flow control to satisfy minimum requirement #7. Flow control, achieved by temporarily storing the runoff volumes resulting from attenuating runoff peak flows, has been designed to ensure post-development runoff release rates do not exceed that resulting from the pre-development basin condition at the project point of concentration in accordance with the target peak flow standard outlined this report (see detailed description in Section 4.3).

The proposed flow control design approach for each basin is to collect and convey stormwater to underground stormwater infiltration chamber facilities to be located within open space tracts to retain and attenuate storm water runoff rates via full infiltration in accordance with the 2019 SWMM to satisfy all flow duration standards..

7.8 REQUIREMENT NO. 8 – WETLANDS PROTECTION

There are no critical area wetlands located on or within 300 ft of the subject properties. Nevertheless, all earthwork grading activities will be performed in a manner to ensure protection of adjacent properties surrounding the project site.

7.9 REQUIREMENT NO. 9 – OPERATION AND MAINTENANCE

Future ongoing operation and maintenance of the proposed storm water management facilities shall be performed based on maintenance standards and procedures outlined in the 2019 WSDOE storm water manual.

Important Information about This

Geotechnical-Engineering Report

Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.

While you cannot eliminate all such risks, you can manage them. The following information is provided to help.

The Geoprofessional Business Association (GBA) has prepared this advisory to help you – assumedly a client representative – interpret and apply this geotechnical-engineering report as effectively as possible. In that way, you can benefit from a lowered exposure to problems associated with subsurface conditions at project sites and development of them that, for decades, have been a principal cause of construction delays, cost overruns, claims, and disputes. If you have questions or want more information about any of the issues discussed herein, contact your GBA-member geotechnical engineer. Active engagement in GBA exposes geotechnical engineers to a wide array of risk-confrontation techniques that can be of genuine benefit for everyone involved with a construction project.

Understand the Geotechnical-Engineering Services Provided for this Report

Geotechnical-engineering services typically include the planning, collection, interpretation, and analysis of exploratory data from widely spaced borings and/or test pits. Field data are combined with results from laboratory tests of soil and rock samples obtained from field exploration (if applicable), observations made during site reconnaissance, and historical information to form one or more models of the expected subsurface conditions beneath the site. Local geology and alterations of the site surface and subsurface by previous and proposed construction are also important considerations. Geotechnical engineers apply their engineering training, experience, and judgment to adapt the requirements of the prospective project to the subsurface model(s). Estimates are made of the subsurface conditions that will likely be exposed during construction as well as the expected performance of foundations and other structures being planned and/or affected by construction activities.

The culmination of these geotechnical-engineering services is typically a geotechnical-engineering report providing the data obtained, a discussion of the subsurface model(s), the engineering and geologic engineering assessments and analyses made, and the recommendations developed to satisfy the given requirements of the project. These reports may be titled investigations, explorations, studies, assessments, or evaluations. Regardless of the title used, the geotechnical-engineering report is an engineering interpretation of the subsurface conditions within the context of the project and does not represent a close examination, systematic inquiry, or thorough investigation of all site and subsurface conditions.

Geotechnical-Engineering Services are Performed for Specific Purposes, Persons, and Projects, and At Specific Times

Geotechnical engineers structure their services to meet the specific needs, goals, and risk management preferences of their clients. A geotechnical-engineering study conducted for a given civil engineer will not likely meet the needs of a civil-works constructor or even a different civil engineer. Because each geotechnical-engineering study is unique, each geotechnical-engineering report is unique, prepared *solely* for the client.

Likewise, geotechnical-engineering services are performed for a specific project and purpose. For example, it is unlikely that a geotechnical-engineering study for a refrigerated warehouse will be the same as one prepared for a parking garage; and a few borings drilled during a preliminary study to evaluate site feasibility will not be adequate to develop geotechnical design recommendations for the project.

Do not rely on this report if your geotechnical engineer prepared it:

- for a different client;
- for a different project or purpose;
- for a different site (that may or may not include all or a portion of the original site); or
- before important events occurred at the site or adjacent to it; e.g., man-made events like construction or environmental remediation, or natural events like floods, droughts, earthquakes, or groundwater fluctuations.

Note, too, the reliability of a geotechnical-engineering report can be affected by the passage of time, because of factors like changed subsurface conditions; new or modified codes, standards, or regulations; or new techniques or tools. *If you are the least bit uncertain* about the continued reliability of this report, contact your geotechnical engineer before applying the recommendations in it. A minor amount of additional testing or analysis after the passage of time – if any is required at all – could prevent major problems.

Read this Report in Full

Costly problems have occurred because those relying on a geotechnical-engineering report did not read the report in its entirety. Do not rely on an executive summary. Do not read selective elements only. *Read and refer to the report in full.*

You Need to Inform Your Geotechnical Engineer About Change

Your geotechnical engineer considered unique, project-specific factors when developing the scope of study behind this report and developing the confirmation-dependent recommendations the report conveys. Typical changes that could erode the reliability of this report include those that affect:

- the site's size or shape;
- the elevation, configuration, location, orientation, function or weight of the proposed structure and the desired performance criteria;
- the composition of the design team; or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project or site changes – even minor ones – and request an assessment of their impact. *The geotechnical engineer who prepared this report cannot accept*

responsibility or liability for problems that arise because the geotechnical engineer was not informed about developments the engineer otherwise would have considered.

Most of the "Findings" Related in This Report Are Professional Opinions

Before construction begins, geotechnical engineers explore a site's subsurface using various sampling and testing procedures. *Geotechnical engineers can observe actual subsurface conditions only at those specific locations where sampling and testing is performed.* The data derived from that sampling and testing were reviewed by your geotechnical engineer, who then applied professional judgement to form opinions about subsurface conditions throughout the site. Actual sitewide-subsurface conditions may differ – maybe significantly – from those indicated in this report. Confront that risk by retaining your geotechnical engineer to serve on the design team through project completion to obtain informed guidance quickly, whenever needed.

This Report's Recommendations Are Confirmation-Dependent

The recommendations included in this report – including any options or alternatives – are confirmation-dependent. In other words, they are not final, because the geotechnical engineer who developed them relied heavily on judgement and opinion to do so. Your geotechnical engineer can finalize the recommendations *only after observing actual subsurface conditions* exposed during construction. If through observation your geotechnical engineer confirms that the conditions assumed to exist actually do exist, the recommendations can be relied upon, assuming no other changes have occurred. *The geotechnical engineer who prepared this report cannot assume responsibility or liability for confirmation-dependent recommendations if you fail to retain that engineer to perform construction observation.*

This Report Could Be Misinterpreted

Other design professionals' misinterpretation of geotechnical-engineering reports has resulted in costly problems. Confront that risk by having your geotechnical engineer serve as a continuing member of the design team, to:

- confer with other design-team members;
- help develop specifications;
- review pertinent elements of other design professionals' plans and specifications; and
- be available whenever geotechnical-engineering guidance is needed.

You should also confront the risk of constructors misinterpreting this report. Do so by retaining your geotechnical engineer to participate in prebid and preconstruction conferences and to perform construction-phase observations.

Give Constructors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can shift unanticipated-subsurface-conditions liability to constructors by limiting the information they provide for bid preparation. To help prevent the costly, contentious problems this practice has caused, include the complete geotechnical-engineering report, along with any attachments or appendices, with your contract documents, *but be certain to note conspicuously that you've included the material for information purposes only.* To avoid misunderstanding, you may also want to note that "informational purposes" means constructors have no right to rely on the interpretations, opinions, conclusions, or recommendations in the report. Be certain that constructors know they may learn about specific project requirements, including options selected from the report, *only* from the design drawings and specifications. Remind constructors that they may perform their own studies if they want to, and *be sure to allow enough time* to permit them to do so. Only then might you be in a position to give constructors the information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions. Conducting prebid and preconstruction conferences can also be valuable in this respect.

Read Responsibility Provisions Closely

Some client representatives, design professionals, and constructors do not realize that geotechnical engineering is far less exact than other engineering disciplines. This happens in part because soil and rock on project sites are typically heterogeneous and not manufactured materials with well-defined engineering properties like steel and concrete. That lack of understanding has nurtured unrealistic expectations that have resulted in disappointments, delays, cost overruns, claims, and disputes. To confront that risk, geotechnical engineers commonly include explanatory provisions in their reports. Sometimes labeled "limitations," many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

Geoenvironmental Concerns Are Not Covered

The personnel, equipment, and techniques used to perform an environmental study – e.g., a "phase-one" or "phase-two" environmental site assessment – differ significantly from those used to perform a geotechnical-engineering study. For that reason, a geotechnical-engineering report does not usually provide environmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated subsurface environmental problems have led to project failures.* If you have not obtained your own environmental information about the project site, ask your geotechnical consultant for a recommendation on how to find environmental risk-management guidance.

Obtain Professional Assistance to Deal with Moisture Infiltration and Mold

While your geotechnical engineer may have addressed groundwater, water infiltration, or similar issues in this report, the engineer's services were not designed, conducted, or intended to prevent migration of moisture – including water vapor – from the soil through building slabs and walls and into the building interior, where it can cause mold growth and material-performance deficiencies. Accordingly, ***proper implementation of the geotechnical engineer's recommendations will not of itself be sufficient to prevent moisture infiltration. Confront the risk of moisture infiltration*** by including building-envelope or mold specialists on the design team. ***Geotechnical engineers are not building-envelope or mold specialists.***

Bellevue, Washington 98005

Attention: Aron Golden

Greetings:

Earth Solutions NW, LLC (ESNW), is pleased to present this geotechnical engineering study (study) to support the proposed residential development. Based on the results of our investigation, the proposed project is feasible from a geotechnical standpoint. Our study indicates the site is underlain by relatively clean outwash sand. This study was updated to include additional land parcels.

The site will be mass graded to create access drives and building pads. After completing earthwork activities in accordance with recommendations in this report, the proposed structures can be supported on conventional spread and continuous foundations bearing on undisturbed, competent native soil, compacted native soil, or new structural fill. If structural building pads are disturbed during wet weather, remediation measures such as cement treatment or overexcavation and replacement with rock may be necessary in some areas.

Following the results of our infiltration testing, a long-term design infiltration rate of 20 inches per hour is applicable for the subject site.

Pertinent geotechnical recommendations are provided in this study. We appreciate the opportunity to be of service to you on this project. If you have any questions regarding the content of this geotechnical engineering study, please call.

Sincerely,

EARTH SOLUTIONS NW, LLC

Samuel E. Suruda, L.G.
Senior Staff Geologist

GEOTECHNICAL ENGINEERING STUDY
PROPOSED RESIDENTIAL DEVELOPMENT
9907 – 35TH AVENUE NORTHEAST
MARYSVILLE, WASHINGTON

ES-9772

INTRODUCTION

General

This geotechnical engineering study (study) was prepared for the proposed residential development to be constructed at 9907 – 35th Avenue Northeast, in Marysville, Washington. The purpose of this study was to develop geotechnical recommendations for the project. The following tasks were completed as part of our scope of services for this project:

- Excavation, logging and sampling of test pits to characterize soil and groundwater conditions.
- Infiltration testing within the proposed stormwater detention area.
- Laboratory testing of soil samples collected at the test locations.
- Engineering analyses and recommendations for the proposed development.
- Preparation of this report.

Project Description

The proposed project consists of redevelopment of the existing parcels for the construction of a new residential plat. The seven existing single-family residences and associated improvements will be removed, and the parcels will be redeveloped into a residential plat, including access roads, stormwater infiltration systems, and associated improvements. Infiltration is being investigated to aid in stormwater mitigation of new impervious surfaces.

Based on our experience with similar projects, we anticipate cuts and fills of less than five feet will be necessary to achieve the proposed finish grade elevations. Cuts of up to about 15 feet are anticipated for utility installation.

Based on our experience with similar projects, the proposed residential structures are anticipated to be two to three stories in height and constructed utilizing relatively lightly loaded wood framing supported on conventional foundations. Perimeter footing loads are anticipated be 1 to 2 kips per linear foot, isolated footing loads will be less than 20 kips, and we anticipate slab-on-grade loading of 150 pounds per square foot (psf).

If the above design assumptions either change or are incorrect, ESNW should be contacted to review the recommendations provided in this report. ESNW should review final designs to confirm that our geotechnical recommendations have been incorporated into the plans.

SITE CONDITIONS

Surface

The subject site is directly east of the terminus of 35th Avenue Northeast, approximately 375 feet north of the intersection between 35th Avenue Northeast and 98th Street Northeast, in Marysville, Washington. The approximate site location is illustrated on Plate 1 (Vicinity Map). The subject site is comprised of seven tax parcels (Snohomish County Parcel Numbers 300516003-01400, -01500, -01600, -04500, -04501, -05800 & -06500), totaling roughly 13.6 acres. Topography across the subject site is relatively flat, with less than five feet of elevation change across the entirety of the subject site. The subject site is bordered by 35th Avenue Northeast to the west, 98th Street Northeast to the south, and surrounded by single-family residences. Vegetation within the subject site primarily consists of mature trees and sparse undergrowth, with landscaped field grass areas to the west and adjacent to the residences.

Subsurface

An ESNW representative observed, logged, and sampled nine test pits on March 13, 2024. The test pits were excavated at accessible site locations, using a mini trackhoe retained by ESNW. An additional six test pits were excavated on May 15, 2024. The subsurface exploration was completed to evaluate soil conditions, classify site soils, and characterize groundwater conditions within the proposed development area. The maximum exploration depth was approximately 13 feet below the existing ground surface (bgs). The approximate locations of the explorations are depicted on Plate 2 (Test Pit Location Plan). Please refer to the logs provided in Appendix A for a more detailed description of subsurface conditions. Representative soil samples collected at the exploration locations were analyzed in general accordance with both Unified Soil Classification System (USCS) and United States Department of Agriculture (USDA) methods and procedures.

Topsoil

Topsoil was observed in thicknesses of about two to three inches across a majority of the subject site. The topsoil was characterized by its dark brown color, the presence of fine organic material, and small root intrusions. We anticipate that the topsoil may be encountered in greater thicknesses directly adjacent to the existing mature trees on the subject site.

Fill

Fill was not encountered during our subsurface exploration. Based on the existing topography, we do not anticipate significant amounts of fill to be encountered during mass grading. If significant amounts of fill are encountered during the stripping process, ESNW should be contacted to evaluate the materials for potential applications on site.

Native Soil

Underlying the topsoil, native soils encountered at the test pit locations were observed primarily as medium dense poorly graded sand (USCS: SP). A localized area of silty sand (USCS: SM) was observed within a shallow weathered zone at test pit location TP-8, extending to a depth roughly three and one-half feet bgs. Density was observed to remain relatively consistent to the maximum exploration depth of 13 feet bgs. The sands were generally observed in a damp condition, while the weathered soil at TP-8 was observed to be moist.

Geologic Setting

Geologic mapping identifies the Marysville Sand Member (Qvrm) across the site and the nearby area. The Marysville sand member consists of a broad, flat deposition of relatively clean sands across the valley. The deposit consists of mostly well-drained and stratified to massive outwash sand, and areas of fine gravel and silts and clays.

The referenced Web Soil Survey (WSS) identifies Ragnar fine sandy loam as the primary unit underlying the subject site. The Ragnar series formed in glacial outwash plains. Based on our field observations, on-site native soils are representative primarily of glacial outwash sands and are consistent with the geologic map and soil mapping resources outlined in this section.

Groundwater

Groundwater seepage was not observed during our test pit explorations on March 13, 2024, and May 15, 2024. Additionally, we did not observe any indications of seasonal groundwater within the test pits (e.g., iron oxide staining). Groundwater seepage rates and elevations fluctuate depending on many factors, including precipitation duration and intensity, the time of year, and soil conditions. Groundwater seepage flow rates are typically higher during the winter, spring, and early summer months. Therefore, perched groundwater seepage may be encountered in site excavations, particularly if excavations are made in winter, spring, and early summer months.

GEOLOGIC HAZARD AREAS EVALUATION

A review of Marysville Municipal Code (MMC) Chapter 22E.10 Article IV – Geologic Hazard Areas, was completed to evaluate whether geologically hazardous areas as defined by the City of Marysville (including steep slopes, landslides, and liquefaction) exist on or near the subject site. Based on a review of Snohomish County PDS, the referenced geologic hazards map, and the referenced code section, the subject site is not mapped within any of the relevant geologic hazard areas. An area of high liquefaction susceptibility is present to the north and east of the subject site and continues trending away to the south. Based on our site-specific field observations, it is our opinion the site does not contain geologically hazardous areas as defined by the City of Marysville, nor will the proposed construction adversely impact the mapped hazards nearby.

DISCUSSION AND RECOMMENDATIONS

General

Based on the results of our investigation, construction of the proposed residential development is feasible from a geotechnical standpoint. The primary geotechnical considerations associated with the proposed development include the suitability of using on-site soils as structural fill and infiltration potential.

The proposed residential structures may be supported on conventional continuous and spread footing foundations bearing on competent native soil, recompacted native soil, or new structural fill. In general, we expect competent native soil suitable for support of the foundation will likely be encountered within one to two feet of existing grades. Where loose or unsuitable soil conditions are exposed at foundation subgrade elevations, compaction of the soil to the specifications of structural fill or overexcavation and replacement with suitable structural fill will likely be necessary.

Based on our infiltration evaluation for the subject site, in our opinion, a long-term infiltration rate of 20 inches per hour is applicable for the subject site. ESNW did not observe potential impediments to infiltration systems within our subsurface explorations to the maximum explored depth of about 13 feet bgs.

Site Preparation and Earthwork

Initial site preparation activities will consist of installing temporary erosion control measures, establishing grading limits, and site clearing and stripping activities. Subsequent earthwork activities will involve mass site grading and installation of infrastructure and stormwater management improvements.

Temporary Erosion Control

The following temporary erosion and sediment control (TESC) BMPs are offered:

- Temporary construction entrances and drive lanes, consisting of at least six inches of quarry spalls, should be considered to both minimize off-site soil tracking and provide a stable access entrance surface. Placing geotextile fabric underneath the quarry spalls will provide greater stability, if needed.

- Silt fencing should be placed around the construction site perimeter.

- When not in use, soil stockpiles should be covered or otherwise protected.

- Temporary measures for controlling surface water runoff, such as interceptor trenches, sumps, or swales, should be installed prior to beginning earthwork activities.

- Dry soils disturbed during construction should be wetted to minimize dust and airborne soil erosion.

- When appropriate, permanent planting or hydroseeding will help to stabilize on-site soil.

Additional TESC BMPs, as specified by the project civil engineer and indicated on the plans, should be incorporated into construction activities. TESC BMPs may be modified during construction as site conditions require and as approved by the site erosion control lead.

Stripping

Topsoil was encountered within the upper three inches, and root intrusions generally extended below the topsoil into the upper weathered soil. The topsoil layer may be more than three inches thick in some areas, particularly in the wooded areas of the site. The organic-rich topsoil should be stripped and segregated into a stockpile for later use on site or to haul off site. The material remaining immediately below the topsoil may have some root zones and will likely be variable in composition, density, and/or moisture content. The material exposed after initial topsoil stripping may not be suitable for direct structural support as is and may need to either be compacted in place or stripped and stockpiled for reuse as fill; depending on the time of year stripping occurs, the soil exposed below the topsoil may be too wet to compact and may need to be aerated or treated. ESNW should observe initial stripping activities to provide recommendations regarding stripping depths and material suitability.

Excavations and Slopes

Excavation activities on site are likely to expose medium dense native soil within the upper one to two feet of existing grades. Based on the soil conditions observed at the test locations, the following maximum allowable temporary slope inclinations may be used. The applicable Federal Occupation Safety and Health Administration and Washington Industrial Safety and Health Act soil classifications are also provided:

- Areas exposing groundwater seepage or fill 1.5H:1V (Type C)
- Loose soil 1.5H:1V (Type C)
- Medium dense soil 1H:1V (Type B)

Permanent slopes should be planted with vegetation to both enhance stability and minimize erosion and should maintain a gradient of 2H:1V or flatter. The presence of perched groundwater may cause localized sloughing of temporary slopes. An ESNW representative should observe temporary and permanent slopes to confirm the slope inclinations are suitable for the exposed soil conditions and to provide additional excavation and slope recommendations, as necessary. If the recommended temporary slope inclinations cannot be achieved, temporary shoring may be necessary to support excavations.

In-situ and Imported Soil

The native soil encountered at the test pit explorations consists predominantly of poorly graded sand with less than 5 percent fines. The poorly graded sands are generally not sensitive to moisture, however zones of the sand with fines contents slightly below 5 percent may be slightly sensitive to moisture, particularly if grading occurs during periods of heavy precipitation. The silty sand encountered at test pit TP-8 and the poorly graded sand with silt encountered at test pit TP-2 are sensitive to moisture and will be difficult to utilize as structural fill during wet weather.

Successful use of the moisture sensitive on-site soil as structural fill will largely be dictated by the moisture content at the time of placement and compaction. Where moisture sensitive soils are used as structural fill, remedial measures may be necessary as part of site grading and earthwork activities. Remedial measures would include aeration or cement modification of the site soils in order to moisture-condition the targeted soils for use as structural fill.

Imported soil intended for use as structural fill should consist of a well-graded, granular soil with a moisture content that is at (or slightly above) the optimum level. During wet weather conditions, imported soil intended for use as structural fill should consist of a well-graded, granular soil with a fines content of 5 percent or less (where the fines content is defined as the percent passing the Number 200 sieve, based on the minus three-quarter-inch fraction).

Structural Fill

Structural fill is defined as compacted soil placed in foundation, slab-on-grade, roadway, permanent slope, retaining wall, and utility trench backfill areas. Structural fill placed and compacted during site grading activities should meet the following specifications and guidelines:

- Structural fill material — Granular soil*
- Moisture content — At or slightly above optimum**
- Relative compaction*** — 95 percent (Modified Proctor)
- Loose lift thickness (maximum) — 12 inches

* *Native soil may not be suitable for use as structural fill unless at (or slightly above) the optimum moisture content at the time of placement and compaction.*
** *Soil shall not be placed dry of optimum and should be evaluated by ESNW during construction.*
*** *Relative compaction of 90 percent can be considered for mass grading activities and should be evaluated by ESNW during construction.*

With respect to underground utility installations and backfill, local jurisdictions may dictate the soil type(s) and compaction requirements. Areas of otherwise unsuitable material and debris should be removed from structural areas and replaced with structural fill.

Foundations

After completing earthwork activities in accordance with recommendations in this report, the proposed structures can be supported on conventional spread and continuous foundations bearing on undisturbed, competent native soil, compacted native soil, or new structural fill. If structural building pads are prepared during wet weather, remediation measures such as cement treatment or overexcavation and replacement with rock may be necessary in some areas. If proposed structures will incorporate heavier loads than those stated in the *Project Description* section of this report, revised foundation support recommendations may be necessary.

Provided the structures will be supported as described above, the following parameters may be used for design of the new foundations:

- Allowable soil bearing capacity — 2,500 psf
- Passive earth pressure — 300 pcf
- Coefficient of friction — 0.40

A one-third increase in the allowable soil bearing capacity may be assumed for short-term wind and seismic loading conditions. The passive earth pressure and coefficient of friction values include a safety factor of 1.5. With structural loading as expected, total settlement in the range of one inch is anticipated, with differential settlement of about one-half inch. Most of the anticipated settlement should occur during construction as dead loads are applied.

Seismic Design

The 2018 International Building Code (2018 IBC) recognizes the most recent edition of the Minimum Design Loads for Buildings and Other Structures manual (ASCE 7-16) for seismic design, specifically with respect to earthquake loads. Based on the soil conditions encountered at the boring locations, the parameters and values provided below are recommended for seismic design per the 2018 IBC.

Parameter	**Value**
Site Class	D*
Mapped short period spectral response acceleration, S_S (*g*)	1.104
Mapped 1-second period spectral response acceleration, S_1 (*g*)	0.394
Short period site coefficient, F_a	1.058
Long period site coefficient, F_v	1.906**
Adjusted short period spectral response acceleration, S_{MS} (*g*)	1.168
Adjusted 1-second period spectral response acceleration, S_{M1} (*g*)	0.751**
Design short period spectral response acceleration, S_{DS} (*g*)	0.779
Design 1-second period spectral response acceleration, S_{D1} (*g*)	0.501**

* *Assumes medium dense native soil conditions, encountered to a maximum depth of 13 feet bgs during the March 2024 field exploration, remain medium dense or better to at least 100 feet bgs.*

** *Values assume F_v may be determined using linear interpolation per Table 11.4-2 in ASCE 7-16.*

As indicated in the table footnote, several of the seismic design values provided above are dependent on the assumption that site-specific ground motion analysis (per Section 11.4.8 of ASCE 7-16) will not be required for the subject project. Further discussion between the project structural engineer, the project owner, and ESNW may be prudent to determine the possible impacts to the structural design due to increased earthquake load requirements under the 2018 IBC. ESNW can provide additional consulting services to aid with design efforts, including supplementary geotechnical and geophysical investigation, upon request.

Liquefaction is a phenomenon where saturated or loose soil suddenly loses internal strength and behaves as a fluid. This behavior is in response to increased pore water pressures resulting from an earthquake or another intense ground shaking. Based on the findings of the subsurface investigation and the referenced Marysville critical areas map, site susceptibility to liquefaction is characterized as low. The relative density of the native soil and the lack of a shallow established groundwater table is the primary bases for this opinion.

Slab-on-Grade Floors

Slab-on-grade floors for the proposed structures should be supported on firm and unyielding subgrades. Unstable or yielding subgrade areas should be recompacted or overexcavated and replaced with suitable structural fill prior to slab construction.

A capillary break consisting of a minimum of four inches of free-draining crushed rock or gravel should be placed below each slab. The free-draining material should have a fines content of 5 percent or less (percent passing the Number 200 sieve, based on the minus three-quarter-inch fraction). In areas where slab moisture is undesirable, installation of a vapor barrier below the slab should be considered. If a vapor barrier is to be utilized, it should be a material specifically designed for use as a vapor barrier and should be installed per manufacturer specifications.

Retaining Walls

Retaining walls must be designed to resist earth pressures and applicable surcharge loads. Retaining wall subgrade must be prepared in the same fashion as is recommended within the “Foundations” section of this report. The following parameters may be used for design:

- Active earth pressure (unrestrained condition) — 35 pcf (equivalent fluid)
- At-rest earth pressure (restrained condition) — 55 pcf
- Traffic surcharge* (passenger vehicles) — 70 psf (rectangular distribution)
- Passive earth pressure — 300 pcf (equivalent fluid)
- Coefficient of friction — 0.40
- Seismic surcharge — 8H psf**
- Allowable soil bearing capacity — 2,500 psf

* *Where applicable.*
** *Where H equals the retained height (in feet).*

The above passive earth pressure and coefficient of friction values include a safety factor of 1.5 and are based on a level backfill condition and level grade at the wall toe. Revised design values will be necessary if sloping grades are to be used above or below retaining walls. Additional surcharge loading from adjacent foundations, sloped backfill, or other relevant loads should be included in the retaining wall design.

Retaining walls should be backfilled with free-draining material that extends along with the height of the wall and a distance of at least 18 inches behind the wall. The upper 12 inches of the wall backfill may consist of less permeable soil if desired. A sheet drain may be considered instead of free-draining backfill. A perforated drainpipe should be placed along the base of the wall and connected to an approved discharge location. A typical retaining wall drainage detail is provided on Plate 3. If drainage is not provided, hydrostatic pressures should be included in the wall design.

Drainage

Groundwater seepage may be encountered within site excavations, particularly utility excavations. Temporary measures to control surface water runoff and groundwater seepage during construction will be critical to minimizing the potential for on-site soils to degrade. ESNW should be consulted during preliminary grading to identify areas of seepage and provide recommendations to reduce the potential for seepage-related instability.

Finish grades must be designed to direct surface drain water away from structures and slopes. Water must not be allowed to pond adjacent to structures or slopes. Grades adjacent to buildings should be sloped away from the buildings at a gradient of either at least 2 percent for a horizontal distance of 10 feet or the maximum allowed by adjacent structures. In our opinion, foundation drains should be installed along building perimeter footings. A typical foundation drain detail is provided on Plate 4. Foundation drains may be omitted on a lot-by-lot basis if native, clean sands are exposed at the foundation subgrade elevations. ESNW should be contacted to confirm the presence of acceptable soil conditions before footing drains for a specific lot are omitted.

Infiltration Evaluation

ESNW completed two small-scale Pilot Infiltration Tests (PITs) in a landscaped area within the proposed stormwater management location to evaluate the feasibility of on-site infiltration BMPs from a geotechnical standpoint. The small-scale PITs were completed in general accordance with the Department of Ecology Stormwater Management Manual for Western Washington, as adopted by the City of Marysville in Chapter 14.15.015 of the MMC. The PITs were completed at depths of roughly three feet and five feet bgs within test pits TP-10 and TP-14, respectively. The measured infiltration rates at the test locations and the corresponding correction factors can be found below:

Test Pit ID	Test Depth	K_{sat} initial	CF_V	CF_T	CF_M	K_{sat} design
TP-10	3.0 ft	73 in/hr	0.9	0.5	0.9	29.57 in/hr
TP-14	5.0 ft	100 in/hr	0.9	0.5	0.9	40.5 in/hr

In our opinion, based on the results of in-situ infiltration testing, a long-term design infiltration rate of **20 inches per hour** can be assigned to the subject site. This infiltration rate takes into account the potential for variability of the site soils within specific infiltration areas of the site. It should be noted that our subsurface investigation was completed to a maximum depth of 13 feet bgs. ESNW should be notified if any stormwater management systems are proposed to be installed deeper than 10 feet bgs, as additional subsurface information may be necessary to ensure that a minimum vertical separation from any potential impervious surfaces.

Preliminary Pavement Sections

The performance of site pavements is largely related to the condition of the underlying subgrade. To ensure adequate pavement performance, the subgrade should be in a firm and unyielding condition when subjected to proofrolling with a loaded dump truck. Structural fill in pavement areas should be compacted to the specifications previously detailed in this report. Soft, wet, or otherwise unsuitable subgrade areas may still exist after base grading activities. Areas containing unsuitable or yielding subgrade conditions will require remedial measures, such as overexcavation and/or placement of thicker crushed rock or structural fill sections, prior to pavement.

We anticipate new pavement sections will be subjected primarily to passenger vehicle traffic. For lightly loaded pavement areas subjected primarily to passenger vehicles, the following preliminary pavement sections may be considered:

- A minimum of two inches of hot-mix asphalt (HMA) placed over four inches of crushed rock base (CRB).

- A minimum of two inches of HMA placed over three inches of asphalt-treated base (ATB).

Heavier traffic areas generally require thicker pavement sections depending on site usage, pavement life expectancy, and site traffic. For preliminary design purposes, the following pavement sections for pavement areas subjected to occasional truck traffic may be considered:

- Three inches of HMA placed over six inches of CRB, or;

- Three inches of HMA placed over four and one-half inches of ATB.

The HMA, ATB, and CRB materials should conform to WSDOT and/or the City of Marysville specifications. All soil base material should be compacted to a relative compaction of 95 percent, based on the laboratory maximum dry density as determined by ASTM D1557. Final pavement design recommendations, including recommendations for heavy traffic areas, access roads, and frontage improvement areas, can be provided once final traffic loading has been determined. Road standards utilized by the City of Marysville may supersede the recommendations provided in this report.

If an inverted crown will be used for roadway surfaces, drainage measures should be included in the design to prevent accumulation of water in the subgrade adjacent to catch basins. Such measures can consist of finger drains extending from the catch basins.

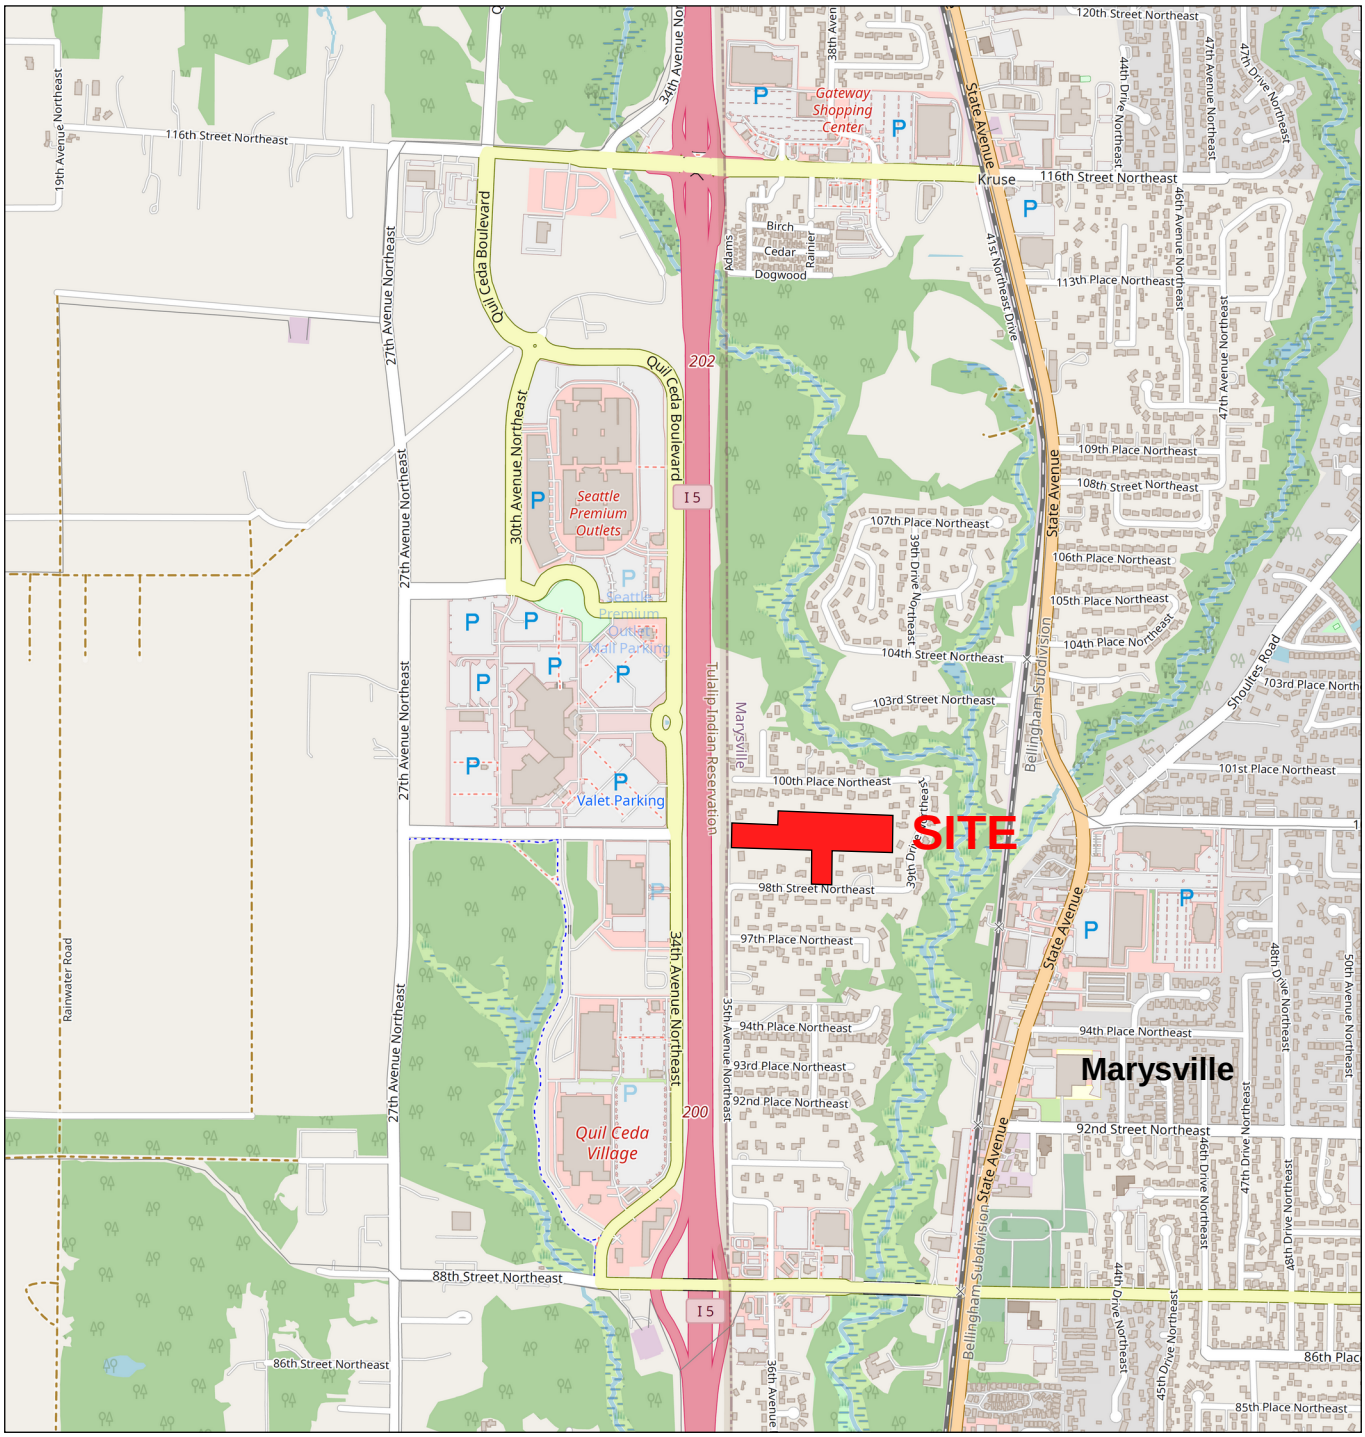
Utility Support and Trench Backfill

In our opinion, the on-site soil will generally be suitable for support of utilities, however, some areas of existing fill may be unsuitable in the current condition. Remedial measures may be necessary in some areas to provide support for utilities, such as overexcavation and replacement with structural fill or placement of geotextile fabric. Groundwater seepage may be encountered within utility excavations, and caving of trench walls may occur where groundwater or unsuitable fill are encountered.

The native soil may not be suitable for use as structural backfill throughout utility trench excavations unless the soil is at (or slightly above) the optimum moisture content at the time of placement and compaction. Moisture conditioning of the soil may be necessary at some locations prior to use as structural fill. Each section of the utility lines must be adequately supported in the bedding material. Utility trench backfill should be placed and compacted to the structural fill specifications previously detailed in this report or to the applicable specifications of the presiding jurisdiction.

LIMITATIONS

This study has been prepared for the exclusive use of KB Home, LLC, and its representatives. The recommendations and conclusions provided in this study are professional opinions consistent with the level of care and skill that is typical of other members in the profession currently practicing under similar conditions in this area. No warranty, express or implied, is made. Variations in the subsurface conditions observed at the test locations may exist and may not become evident until construction. ESNW should reevaluate the conclusions provided in this study if variations are encountered.



Additional Services

ESNW should have an opportunity to review the final design with respect to the geotechnical recommendations provided in this report. ESNW should also be retained to provide testing and consultation services during construction.

Subsurface Exploration Logs

ES-9772

Subsurface conditions at the subject site were explored on March 13, 2024, and May 15, 2024. A total of 15 test pits were excavated using equipment and operators retained by ESNW. The approximate locations of the explorations are illustrated on Plate 2 of this study. The test pit logs are provided in this Appendix. The maximum exploration depth was approximately 13 feet bgs.

The final logs represent the interpretations of the field logs and the results of laboratory analyses. The stratification lines on the logs represent the approximate boundaries between soil types. In actuality, the transitions may be more gradual.

Coarse-Grained Soils - More Than 50% Retained on No. 200 Sieve	Gravels - More Than 50% of Coarse Fraction Retained on No. 4 Sieve	< 5% Fines	GW	Well-graded gravel with or without sand, little to no fines
			GP	Poorly graded gravel with or without sand, little to no fines
		> 12% Fines	GM	Silty gravel with or without sand
			GC	Clayey gravel with or without sand

Terms Describing Relative Density and Consistency

Coarse-Grained Soils:

Density	SPT blows/foot
Very Loose	< 4
Loose	4 to 9
Medium Dense	10 to 29
Dense	30 to 49
Very Dense	≥ 50

Fine-Grained Soils:

Consistency	SPT blows/foot
Very Soft	< 2
Soft	2 to 3
Medium Stiff	4 to 7
Stiff	8 to 14
Very Stiff	15 to 29
Hard	≥ 30

Test Symbols & Units

Fines = Fines Content (%)

MC = Moisture Content (%)

DD = Dry Density (pcf)

Str = Shear Strength (tsf)

PID = Photoionization Detector (ppm)

OC = Organic Content (%)

CEC = Cation Exchange Capacity (meq/100 g)

LL = Liquid Limit (%)

PL = Plastic Limit (%)

PI = Plasticity Index (%)

Component Definitions

Descriptive Term	Size Range and Sieve Number
Boulders	Larger than 12"
Cobbles	3" to 12"
Gravel	3" to No. 4 (4.75 mm)
Coarse Gravel	3" to 3/4"
Fine Gravel	3/4" to No. 4 (4.75 mm)
Sand	No. 4 (4.75 mm) to No. 200 (0.075 mm)
Coarse Sand	No. 4 (4.75 mm) to No. 10 (2.00 mm)
Medium Sand	No. 10 (2.00 mm) to No. 40 (0.425 mm)
Fine Sand	No. 40 (0.425 mm) to No. 200 (0.075 mm)
Silt and Clay	Smaller than No. 200 (0.075 mm)

Modifier Definitions

Percentage by Weight (Approx.)	Modifier
< 5	Trace (sand, silt, clay, gravel)
5 to 14	Slightly (sandy, silty, clayey, gravelly)
15 to 29	Sandy, silty, clayey, gravelly
≥ 30	Very (sandy, silty, clayey, gravelly)

Classifications of soils in this geotechnical report and as shown on the exploration logs are based on visual field and/or laboratory observations, which include density/consistency, moisture condition, grain size, and plasticity estimates, and should not be construed to imply field or laboratory testing unless presented herein. Visual-manual and/or laboratory classification methods of ASTM D2487 and D2488 were used as an identification guide for the Unified Soil Classification System.

Technical Memorandum

To: **Aaron Golden – KB Home** **File Number: 2072.0015**

From: **Elisabeth Gonzalez, Soundview Consultants LLC** **Date: June 20, 2024**

Re: **Wetland and Fish and Wildlife Habitat Assessment**
9907/9909 35th Avenue Northeast and 3705 98th Street Northeast Marysville, Washington 98271

Dear Aaron,

Soundview Consultants LLC (SVC) conducted a wetland and fish and wildlife habitat assessment on an approximately 14.08-acre site located at 9907/9909 35th Avenue Northeast and 3705 98th Street Northeast within the City of Marysville, Washington (Figure 1). The subject property consists of seven tax parcels situated in the Southwest ¼ of Section 16, Township 30 North, Range 5 East, W.M. (Snohomish County Tax Parcels 30051600301400, 30051600301500, 30051600301600, 30051600304501, 30051600305800, 30051600306500, 30051600306600). SVC investigated the subject property for potentially regulated wetlands, waterbodies, or other fish and wildlife habitat conservation areas within 300 feet. An Existing Conditions Exhibit is provided in Attachment A.

Figure 1. Subject Property Location.

Background Data

Prior to the site investigation, SVC staff conducted background research using the Snohomish County Geographic Information Systems (GIS) data, Washington Department of Fish and Wildlife (WDFW) Priority Habitat and Species (PHS) mapping tools, WDFW and Northwest Indian Fisheries Commission (NWIFC) Statewide Integrated Fish Distribution (SWIFD) mapping tools, U.S. Fish and Wildlife Service (USFWS) National Wetland Inventory (NWI), Washington Department of Natural Resources (DNR) water typing map, and Natural Resource Conservation Service (NRCS) Soil Survey. Onsite determinations were made using observable vegetation, hydrology, and soils in conjunction with the sources listed above, local precipitation data, and various orthophotographic resources. Background maps are provided in Attachment B.

The USFWS NWI map (Attachment B1), WDFW PHS (Attachment B2), WDFW and NWIFC SWIFD (Attachment B3), DNR water typing map (Attachment B4), nor Snohomish County GIS data (Appendix B5) identify critical areas on or within 300 feet of the subject property.

Soils Onsite

The NRCS Soil Survey Map (Attachment B6) identifies one soil type within the study area: Ragnar fine sandy loam, 0 to 8 percent slopes.

Ragnar fine sandy loam, 0 - 8 percent slopes is listed as non-hydric on the NRCS State Hydric Soils List (NRCS, n.d.).

Precipitation

Precipitation data was obtained from the National Oceanic and Atmospheric Administration (NOAA) weather station at the Seattle - Tacoma International Airport to obtain percent of normal precipitation for the general Snohomish County region during the investigation. A summary of data collected is provided in Table 1.

Table 1. Precipitation Summary[1].

Date	Day Of	Day Before	1 Week Prior	2 Weeks Prior	30 Days Prior (Observed/Normal)	Year to Date (Observed/Normal)[2]	Percent of Normal (Month/Year)[3]
3/13/2024	0.00	0.15	0.00	0.95	4.12/3.96	28.65/27.29	104/105
5/21/2024	0.66	0.00	0.00	0.01	1.69/2.22	31.30/34.04	76/92

1. Precipitation volume provided in inches. Data obtained from NOAA (http://w2.weather.gov/climate/xmacis.php?wfo=sew) for Seattle - Tacoma International Airport
2. Year-to-date precipitation is for the water year from October 1st to the onsite date for the March and May site visits.
3. Percent of normal is shown for the prior 30 days and 2023/2024 water year from October 1st to the March and May site visit dates.

Precipitation for the site investigations on March 13, 2024 and May 21, 2024 were within the statistical normal range (70 to 130 percent of normal) for the last 30 days and the 2023/2024 water year (approximately 104 and 105 percent of normal, respectively and approximately 76 and 92 percent of normal, respectively). This precipitation data suggests that hydrologic conditions were relatively normal at the time of the site investigations. Such conditions were considered in making professional wetland determinations.

Methods

A formal site investigation was performed by qualified SVC staff in March and May of 2024. The investigation consisted of a formal walk-through survey for wetlands, waterbodies, and other fish and wildlife habitat conservation areas on the subject property and on publicly accessible areas with 300 feet of the subject property.

Wetlands, streams and select fish and wildlife habitat conservation areas are regulated features under Marysville Municipal Code (MMC) Chapter 22E.010 – Critical Areas Management and subject to restricted uses/activities under the same title.

Wetland presence/absence was determined using the routine approach outlined in the U.S. Army Corps of Engineers (USACE) *Wetlands Delineation Manual* (Environmental Laboratory, 1987) and modified according to the guidelines established in the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Western Mountains, Valleys, and Coast Region, Version 2.0* (USACE, 2010) and *Field Indicators of Hydric Soils in the United States* (NRCS, n.d.). Pink surveyor's flagging was labeled alpha-numerically and tied to 3-foot lath or vegetation at formal sampling locations to mark the points where detailed data was collected (DP-1 to DP-7) (Attachment D). Additional test pits were excavated at regular intervals throughout the study area to further confirm or exclude wetland absence.

The fish and wildlife habitat assessment was conducted during the same site visit by qualified fish and wildlife biologists. The experienced biologists made visual and auditory observations using stationery and walking survey methods for both upland and aquatic habitats noting any special habitat features and direct and indirect signs of fish and wildlife activity (e.g. nesting, foraging, and migration/movement). Special attention was given to assessing the presence of fish and wildlife habitat as defined under MMC 22E.010.170.

Results

The 14.08-acre subject property is located in a residential setting in the City of Marysville and is partially developed with six single-family residences and associated infrastructure. The residences are located on six parcels along the south and east perimeter of the subject site. The remainder of the site consists of undeveloped forested areas. The subject site abuts single-family residences to the north and east, single-family residences and 98th Street Northeast to the south, and 35th Avenue Northeast to the west. Topography onsite is generally flat with elevations at approximately 62 feet above mean sea level (amsl) (See the USGS contours map; Attachment B7). The subject site is located within the Snohomish watershed (Water Resource Inventory Area (WRIA 7).

Vegetation throughout the majority of the subject property is largely forested dominated by Douglas fir (*Pseudotsuga menziesii*) with an understory of salal (*Gaultheria shallon*), western bracken fern (*Pteridium aquilinum*), and non-native invasive Himalayan blackberry (*Rubus armeniacus*). The areas surrounding the residences consist of maintained lawn and ornamental nonnative species such as Kentucky bluegrass (*Poa pratensis*) and common dandelion (*Taraxacum officinale*).

The site investigation confirmed the absence of wetlands on the subject property. Three parcels along the south the of the subject property were not accessible, however they were visually assessed for the presence of hydrology and facultative species. No presence of hydrology was observed and vegetation within these areas consists of maintained lawn and ornamental nonnative species. Data was collected directly adjacent of these parcels and no indication of hydrology, hydric soils or hydrophytic vegetation

was observed. No other potentially regulated wetlands, aquatic areas, and/or fish and wildlife habitat conservation areas were observed on or within 300 feet of the subject property.

Onsite Wetland Absence

Seven data plots (DP-1 – DP-7) were collected on the subject property during the site investigation to confirm onsite wetland absence. Data was collected in different topographic low points throughout the study area most likely to show wetland indicators.

DP-1 is located in the western portion of the subject site within a maintain lawn as a general representative point of upland conditions. DP-1 did not meet hydrophytic vegetation criteria due to the dominance of mostly FACU species and presence of only two species. DP-1 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-1 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches. As the area around DP-1 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-2 is located in the northeastern portion of the forested area. DP-2 did not meet hydrophytic vegetation criteria due to the dominance of mostly FACU species. DP-2 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-2 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-2 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-3 is located in the central portion of the subject site within in what appears to have been a cleared and graded area in the past. DP-3 met hydrophytic vegetation criteria through the dominance test, however this was due to the presence of only two FAC species. DP-3 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-3 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-3 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-4 is located in the northeastern portion of the subject site within the forested area. DP-4 did not meet hydrophytic vegetation criteria due to the dominance of mostly FACU species. DP-4 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-4 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-4 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-5 is located in the south-central portion of the subject site, directly adjacent to the north of one of the single-family residence yards. DP-5 met hydrophytic vegetation criteria through the dominance test, however this was due to the dominance of only one FAC species. DP-5 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-5 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-5 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-6 is located in the northwest portion of the subject site in a previously cleared area adjacent tot to large cement pad. DP-6 met hydrophytic vegetation criteria through the dominance test, however this was due to the dominance of only one FAC species. DP-6 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-6 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-6 did not meet for any wetland criteria, this area was determined to be non-wetland.

DP-7 is located in the southwestern portion of the subject site in a maintained lawn area. DP-7 met hydrophytic vegetation criteria through the dominance test, however this was due to the presence of mostly FAC species. DP-7 did not meet hydric soil criteria as no redoximorphic concentrations were present to 16 inches. DP-7 did not meet wetland hydrology criteria, as no hydrology was observed to 16-inches As the area around DP-7 did not meet for any wetland criteria, this area was determined to be non-wetland.

Fish and Wildlife Habitat Conservation Areas

Per MMC 22E.010.170, habitat conservation areas (HCAs) consist of the following:

(1) Primary fish and wildlife habitat conservation areas shall include the following:

(a) Habitats with federally designated endangered, threatened, and candidate species and state designated endangered, threatened, and sensitive species which have a primary association as defined in Chapter 22A.020 MMC. Federally designated endangered, threatened and candidate species are those fish and wildlife species identified by the U.S. Fish and Wildlife Service and the National Marine Fisheries Service that are in danger of extinction or threatened to become endangered. The U.S. Fish and Wildlife Service and the National Marine Fisheries Service should be consulted for current listing status. State designated endangered, threatened, and sensitive species are those fish and wildlife species native to the state of Washington identified by the Washington State Department of Fish and Wildlife, that are in danger of extinction, threatened to become endangered, vulnerable, or declining and are likely to become endangered or threatened in a significant portion of their range within the state without cooperative management or removal of threats. State designated endangered, threatened, and sensitive species are periodically recorded in WAC 232-12-014 (State Endangered Species) and 232-12-011 (State Threatened and Sensitive Species). The State Department of Fish and Wildlife maintains the most current listing and should be consulted for current listing status.

According to the USFWS IPaC mapping database, North American wolverine (*Gulo gulo luscus*), marbled murrelet (*Brachyramphus marmoratus*), yellow-billed cuckoo (*Coccyzus americanus*), and bull trout (*Salvelinus confluentus*) have the potential to occur within 300 feet of the subject property.

North American Wolverines commonly occur in boreal forests and tundra ecosystems and in Washington they occupy alpine and subalpine forests within the North Cascades National Park and the wilderness areas of the Okanogan-Wenatchee National Forest where heavy snowpack persists well into the spring months (WDFW, n.d.). As the subject property does not contain any alpine or subalpine forests where wolverines commonly occur, North American wolverines are not likely present on or within 300 feet of the subject property.

Marbled murrelet that occur in the state of Washington are year-round residents on coastal waters and primarily feed in waters within 500 feet of the shore out to 1.2 miles from shore at depths of less than 100 feet; preferred pray is includes small fish and crustaceans although nestlings may feed on larger fish (WDFW, 1991). Nests and roosts are found in mature and old growth forests of western Washington. Nest trees are typically greater than thirty-two inches diameter at breast height, with nesting preferences on large flat conifer branches, often covered in moss (WDFW, 1991). Marbled murrelets have been observed in the largest numbers near the coastal waters surrounding the Olympic Peninsula and are more sparsely distributed elsewhere in this region. The subject property mainly contains sparse forested patches that are not considered mature or

old-growth and are fragmented by surrounding residential land uses and previously cleared areas, therefore marbled murrelet are not likely present on or within 300 feet of the subject property.

Yellow-billed cuckoo habitat consists of low to mid-level riparian forests dominated by cottonwoods and willows. Additional riparian species may include ash, walnut, mesquite, and tamarisk. Breeding cuckoos prefer larger and wider patches of riparian habitat. Habitat assessments of yellow-billed cuckoo from California indicate that suitable habitat is approximately 100 to 198 acres and wider than 200 meters; marginal habitat is approximately 20 to 100 acres and 100 to 200 meters wide; and unsuitable habitat is smaller than approximately 37 acres and less than 100 meters wide (Wiles & Kalasz, 2017). Twenty sightings have been confirmed in Washington between the 1950s and 2017; none of these sightings were breeding birds. Further, sixteen of these twenty sightings were east of the Cascades, and the sighted birds were likely vagrants or migrants (Wiles & Kalasz, 2017). The subject property is dominated by a homogeneous canopy of Douglas fir and lacks sufficient riparian habitat, providing unsuitable habitat for yellow-billed cuckoo. In addition, yellow-billed cuckoo is unlikely to be present on or near the subject property due to limited sightings in Washington.

Bull trout have the most specific habitat requirements of salmonids. They require cold water temperatures, clean stream substrates for spawning and rearing, complex habitats including streams with riffles and deep pools, undercut banks and large logs, and they also rely on river, lake, and ocean habitats that connect to headwater streams for annual spawning and feeding migrations (Shellberg, 2002). In Washington, bull trout are typically found in major tributaries from the Cascades that flow into the Puget Sound as well as major tributaries for the Olympic Mountains that flow into the Hood Canal, Strait of Juan de Fuca, and the Pacific Ocean (USFWS, 2015). The subject property does not contain streams on site, therefor the site does not provide suitable habitat for bull trout.

WDFW PHS does not identify any priority species on or near the site.

(b) State designated priority habitats and areas that are associated with state designated endangered, threatened, and sensitive species in subsection (1)(a) of this section. Priority habitats and species are considered to be priorities for conservation and management. Priority species require protective measures for their perpetuation due to their population status, sensitivity to habitat alteration, and/or recreational, commercial, or tribal importance. Priority habitats are those habitat types or elements with unique or significant value to a diverse assemblage of species. A priority habitat may consist of a unique vegetation type or dominant plant species, a described successional state, or a specific structural element. Priority habitats and species are identified by the Department of Fish and Wildlife.

WDFW PHS does not identify any priority habitats on or near the site.

(c) Naturally occurring ponds under 20 acres or not less than 0.50 acres (lakes greater than 20 acres are covered under shoreline regulations).

No naturally occurs ponds are located on or within vicinity of the site.

(d) Lakes, ponds, streams and rivers planted with game fish by a governmental or tribal entity.

No lakes, ponds or streams have been identified on or within vicinity of the subject site.

(e) State natural area preserves and natural resource conservation areas.

No natural area preserves, aquatic reserves, or natural resource conservation areas are present on or near the site.

(f) Areas of rare plant species and high quality ecosystems as documented by the State Department of Natural Resources Heritage Program.

No rare plants are identified on or near the site by DNR.

(g) Land that provides essential connections between habitat blocks and open space and that is designated by the State Department of Fish and Wildlife as a priority habitat in association with state endangered, threatened, or sensitive species in subsection (1)(a) of this section.

The surrounding area does not provide essential connections between habitats due to the extent of residential development and existing paved roads.

(h) Streams as defined and classified in Chapter 22A.020 MMC.

No streams are located on or within 300 feet of the subject site.

(2) Habitats and species of local importance are those identified by the city, including but not limited to those habitats and species that, due to their population status or sensitivity to habitat manipulation, warrant protection. Habitats may include a seasonal range or habitat element with which a species has a primary association, and which, if altered, may reduce the likelihood that the species will maintain and reproduce over the long term.

There are currently no species of local importance listed by the City. Habitats of local importance include Type S, F, Np, and Ns streams and bald eagle habitat.

Regulatory Considerations

Local Requirements

The City of Marysville regulated wetland and streams under its Critical Areas Management chapter (MMC 22E.010)

No critical areas are located on or within 300 feet of the subject site. No impacts are proposed to critical areas or associated buffers.

Abbreviated State and Federal Considerations

On January 18, 2023, USACE and EPA published a revised definition of "Waters of the United States" (USACE and EPA, 2023a). The revised rule became effective on March 20, 2023. On May 25, 2023, the U.S. Supreme Court issued a decision affecting the definition of Waters of the United States, or "WOTUS", in *Sackett Et Ux. V Environmental Protection Agency Et Al.* On August 29, 2023, the US EPA and USACE issued a final rule to amend the final "Revised Definition of 'Waters of the United States'" rule. The amendment conforms the definition of "Waters of the United States" to the U.S. Supreme Court's decision in the Sackett Et Ux. V Environmental Protection Agency Et Al case. The revised and amended definition of "Waters of the United States" is as follows:

(a) Waters of the United States means:

(1) Waters which are: (i) Currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide; (ii) The territorial seas; or (iii) Interstate waters;

(2) Impoundments of waters otherwise defined as waters of the United States under this definition, other than impoundments of waters identified under paragraph (a)(5) of this section;

(3) Tributaries of waters identified in paragraph (a)(1) or (2) of this section that are relatively permanent, standing or continuously flowing bodies of water;

(4) Wetlands adjacent to the following waters: (i) Waters identified in paragraph (a)(1) of this section; or (ii) Relatively permanent, standing or continuously flowing bodies of water identified in paragraph (a)(2) or (a)(3) of this section and with a continuous surface connection to those waters;

(5) Intrastate lakes and ponds not identified in paragraphs (a)(1) through (4) of this section that are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (a)(1) or (a)(3) of this section;

(b) The following are not "waters of the United States" even where they otherwise meet the terms of paragraphs (a)(2) through (5) of this section:

(1) Waste treatment systems, including treatment ponds or lagoons, designed to meet the requirements of the Clean Water Act;

(2) Prior converted cropland designated by the Secretary of Agriculture. The exclusion would cease upon a change of use, which means that the area is no longer available for the production of agricultural commodities. Notwithstanding the determination of an area's status as prior converted cropland by any other Federal agency, for the purposes of the Clean Water Act, the final authority regarding Clean Water Act jurisdiction remains with EPA;

(3) Ditches (including roadside ditches) excavated wholly in and draining only dry land and that do not carry a relatively permanent flow of water;

(4) Artificially irrigated areas that would revert to dry land if the irrigation ceased;

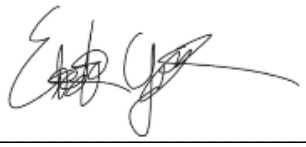
(5) Artificial lakes or ponds created by excavating or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing;

(6) Artificial reflecting or swimming pools or other small ornamental bodies of water created by excavating or diking dry land to retain water for primarily aesthetic reasons;

(7) Waterfilled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States; and

(8) Swales and erosional features (e.g., gullies, small washes) characterized by low volume, infrequent, or short duration flow.

The 2023 revised and amended definition of Waters of the United States defines "adjacent" as "having a continuous surface connection."



No potentially regulated wetland or stream are located on or within 300 feet of the subject site. As no features or located on site, there's no surface water connection to a federally regulated water.

Conclusions

The site investigation did not identify potentially regulated wetlands, aquatic areas, and/or fish and wildlife habitat conservation areas were observed on or within 300 feet of the subject property.

If you have any further questions, please contact us at your earliest convenience.

Sincerely,

Elisabeth Gonzalez

Attachment E – Qualifications

All field inspections, jurisdictional wetland absence determinations, habitat assessments, and supporting documentation, including this ***Wetland and Fish and Wildlife Habitat Assessment Technical Memorandum*** prepared for the ***Stevens*** project, were prepared by, or under the direction of, Elisabeth Gonzalez of SVC. In addition, the site investigations were performed Elisabeth Gonzalez, William Bethel, and Shaun Sweeney and report preparation was completed by Shaun Sweeney and additional project oversight and final report review was completed by Elisabeth Gonzalez.

Elisabeth Gonzalez is an Environmental Project Manager and Scientist with 3 years of professional experience. Elizabeth has a background in project management, shoreline permitting, forest and marine ecology, and wetland delineations. Elisabeth brings experience in managing bulkhead repair and replacement projects, single-family residence planning and wetland delineations, and extensive permitting projects for marina renovations. Previously, she has managed multiple shoreline projects in assisting clients with permitting processes while implementing regulations within engineering designs. She completed her training in wetland delineations with the Wetland Training Institute in October of 2021 and has since been involved in wetland delineations all across western Washington. Elisabeth has also completed two internships with the US Forest Service and Maui Ocean Center, where she performed a variety of research-based field work and worked as a research assistant with Saving the Blue collecting data on shark species and environmental impacts on the ocean.

Education: Bachelor of Science in Environmental Science with a concentration in Forest and Marine Ecology and Oceanography from the University of Colorado, Boulder.

William Bethel is a Staff Scientist with 4 years of professional experience. William has a background in environmental science in Washington State. At Simon Fraser University, he worked in a research lab, studying the distribution and prediction of forest soils. Previously William has managed wetland site assessments and mitigation projects for Hamer Environmental and Aqua Terr Systems Inc., managed environmental compliance at the Phillips 66 refinery in Ferndale, WA, and organized environmental education programs for the Chief Seattle Council. His education and experience have provided him with extensive knowledge on forests ecology, remote sensing, GIS, soil science, hazardous waste management and wetland monitoring. Currently, William assists in wetland, stream and shoreline delineations and fish and wildlife habitat assessments; conducts environmental code analysis; and prepares environmental assessment and mitigation reports, biological evaluations, and permit applications.

Education: Master of Science degree in Soil Science from Simon Fraser University, Burnaby British Columbia. Bachelor of Science degree in Environmental Science with a GIS minor from Western Washington University. *Professional Trainings:* 40-hour USACE wetland delineation training with Richard Chinn. Using the Revised Washington State Wetland Rating System (2014) in Western Washington from the Washington State Department of Ecology. Ordinary High Water Mark in Washington From the Washington State Department of Ecology.

Shaun Sweeney is an Environmental Scientist with 4 years of professional experience. Shaun has a background in wetland delineations, project management, vegetation monitoring, shoreline and stream assessments, and permitting processes. She currently performs wetland and ordinary highwater delineations, conducts environmental code analysis and prepares environmental assessments. Previously Shaun has managed multiple single family and residential development projects in assisting clients with permitting processes, mitigation planning and implementing regulations within engineering designs. She completed her training in wetland delineations with the Wetland Training Institute in August of 2021 and has since been involved in wetland delineations across western Washington. Her noteworthy experiences include supporting clients with navigating environmental regulations related to land use and development, managing mitigation and restoration projects, leading wetland and ordinary high-water delineations throughout the Puget Sound region, and experience in conducted various ecological surveys while studying abroad courses in South Africa.

Education: Bachelor of Arts in Environmental Studies with a minor in Geography from Western Washington University. *Professional Trainings:* Basic Wetland Delineator Training with the Wetland Training Institute 40-hour USACE wetland delineation training. Shaun has been formally trained through the Washington State Department of Ecology, Coastal Training Program, How to Determine the Ordinary High Water Mark, Using the Washington State Wetland Rating System (2014), and forage fish survey.

The development has an increase in flow durations from 1/2 Predeveloped 2 year flow to the 2 year flow or more than a 10% increase from the 2 year to the 50 year flow.
The development has an increase in flow durations for more than 50% of the flows for the range of the duration analysis.

STEVENS PLANNED RESIDENTIAL DEVELOPMENT

MARYSVILLE, WA, USA

MC-3500 STORMTECH CHAMBER SPECIFICATIONS

1. CHAMBERS SHALL BE STORMTECH MC-3500.
2. CHAMBERS SHALL BE ARCH-SHAPED AND SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
3. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
4. CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NO INTERNAL SUPPORTS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION.
5. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) SHORT-DURATION LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.
6. CHAMBERS SHALL BE DESIGNED, TESTED AND ALLOWABLE LOAD CONFIGURATIONS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS". LOAD CONFIGURATIONS SHALL INCLUDE: 1) INSTANTANEOUS (<1 MIN) AASHTO DESIGN TRUCK LIVE LOAD ON MINIMUM COVER 2) MAXIMUM PERMANENT (75-YR) COVER LOAD AND 3) ALLOWABLE COVER WITH PARKED (1-WEEK) AASHTO DESIGN TRUCK.
7. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.
8. ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. UPON REQUEST BY THE SITE DESIGN ENGINEER OR OWNER, THE CHAMBER MANUFACTURER SHALL SUBMIT A STRUCTURAL EVALUATION FOR APPROVAL BEFORE DELIVERING CHAMBERS TO THE PROJECT SITE AS FOLLOWS:
   - THE STRUCTURAL EVALUATION SHALL BE SEALED BY A REGISTERED PROFESSIONAL ENGINEER.
   - THE STRUCTURAL EVALUATION SHALL DEMONSTRATE THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD, THE MINIMUM REQUIRED BY ASTM F2787 AND BY SECTIONS 3 AND 12.12 OF THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS FOR THERMOPLASTIC PIPE.
   - THE TEST DERIVED CREEP MODULUS AS SPECIFIED IN ASTM F2418 SHALL BE USED FOR PERMANENT DEAD LOAD DESIGN EXCEPT THAT IT SHALL BE THE 75-YEAR MODULUS USED FOR DESIGN.
9. CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY.

IMPORTANT - NOTES FOR THE BIDDING AND INSTALLATION OF MC-3500 CHAMBER SYSTEM

1. STORMTECH MC-3500 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTATIVE HAS COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS.
2. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR AN EXCAVATOR SITUATED OVER THE CHAMBERS. STORMTECH RECOMMENDS 3 BACKFILL METHODS:
   - STONESHOOTER LOCATED OFF THE CHAMBER BED.
   - BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE.
   - BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
4. THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS.
5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.
6. MAINTAIN MINIMUM - 6" (150 mm) SPACING BETWEEN THE CHAMBER ROWS.
7. INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS.
8. EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE MEETING THE AASHTO M43 DESIGNATION OF #3 OR #4.
9. STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND PRESERVE ROW SPACING.
10. THE CONTRACTOR MUST REPORT ANY DISCREPANCIES WITH CHAMBER FOUNDATION MATERIALS BEARING CAPACITIES TO THE SITE DESIGN ENGINEER.
11. ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

NOTES FOR CONSTRUCTION EQUIPMENT

1. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
2. THE USE OF EQUIPMENT OVER MC-3500 CHAMBERS IS LIMITED:
   - NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
   - NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
   - WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK TRAVEL OR DUMPING.

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY.

CONTACT STORMTECH AT 1-888-892-2694 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

NOTES

- MANIFOLD SIZE TO BE DETERMINED BY SITE DESIGN ENGINEER. SEE TECH NOTE #6.32 FOR MANIFOLD SIZING GUIDANCE.
- DUE TO THE ADAPTATION OF THIS CHAMBER SYSTEM TO SPECIFIC SITE AND DESIGN CONSTRAINTS, IT MAY BE NECESSARY TO CUT AND COUPLE ADDITIONAL PIPE TO STANDARD MANIFOLD COMPONENTS IN THE FIELD.
- THE SITE DESIGN ENGINEER MUST REVIEW ELEVATIONS AND IF NECESSARY ADJUST GRADING TO ENSURE THE CHAMBER COVER REQUIREMENTS ARE MET.
- THIS CHAMBER SYSTEM WAS DESIGNED WITHOUT SITE-SPECIFIC INFORMATION ON SOIL CONDITIONS OR BEARING CAPACITY. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR DETERMINING THE SUITABILITY OF THE SOIL AND PROVIDING THE BEARING CAPACITY OF THE INSITU SOILS. THE BASE STONE DEPTH MAY BE INCREASED OR DECREASED ONCE THIS INFORMATION IS PROVIDED.
- **NOT FOR CONSTRUCTION:** THIS LAYOUT IS FOR DIMENSIONAL PURPOSES ONLY TO PROVE CONCEPT & THE REQUIRED STORAGE VOLUME CAN BE ACHIEVED ON SITE.

THIS DRAWING HAS BEEN PREPARED BASED ON INFORMATION PROVIDED TO ADS UNDER THE DIRECTION OF THE SITE DESIGN ENGINEER OR OTHER PROJECT REPRESENTATIVE. THE SITE DESIGN ENGINEER SHALL REVIEW THIS DRAWING PRIOR TO CONSTRUCTION. IT IS THE ULTIMATE RESPONSIBILITY OF THE SITE DESIGN ENGINEER TO ENSURE THAT THE PRODUCT(S) DEPICTED AND ALL ASSOCIATED DETAILS MEET ALL APPLICABLE LAWS, REGULATIONS, AND PROJECT REQUIREMENTS.

ACCEPTABLE FILL MATERIALS: STORMTECH MC-3500 CHAMBER SYSTEMS

MATERIAL LOCATION		DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION / DENSITY REQUIREMENT
D	**FINAL FILL:** FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C	**INITIAL FILL:** FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 24" (600 mm) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	AASHTO M145[1] A-1, A-2-4, A-3 OR AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTIONS AFTER 24" (600 mm) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 12" (300 mm) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS.
B	**EMBEDMENT STONE:** FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED.
A	**FOUNDATION STONE:** FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE.[2,3]

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" (230 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.
3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.
4. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.
5. WHERE RECYCLED CONCRETE AGGREGATE IS USED IN LAYERS 'A' OR 'B' THE MATERIAL SHOULD ALSO MEET THE ACCEPTABILITY CRITERIA OUTLINED IN TECHNICAL NOTE 6.20 "RECYCLED CONCRETE STRUCTURAL BACKFILL".

NOTES:

1. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
2. MC-3500 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
3. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
4. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
5. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.

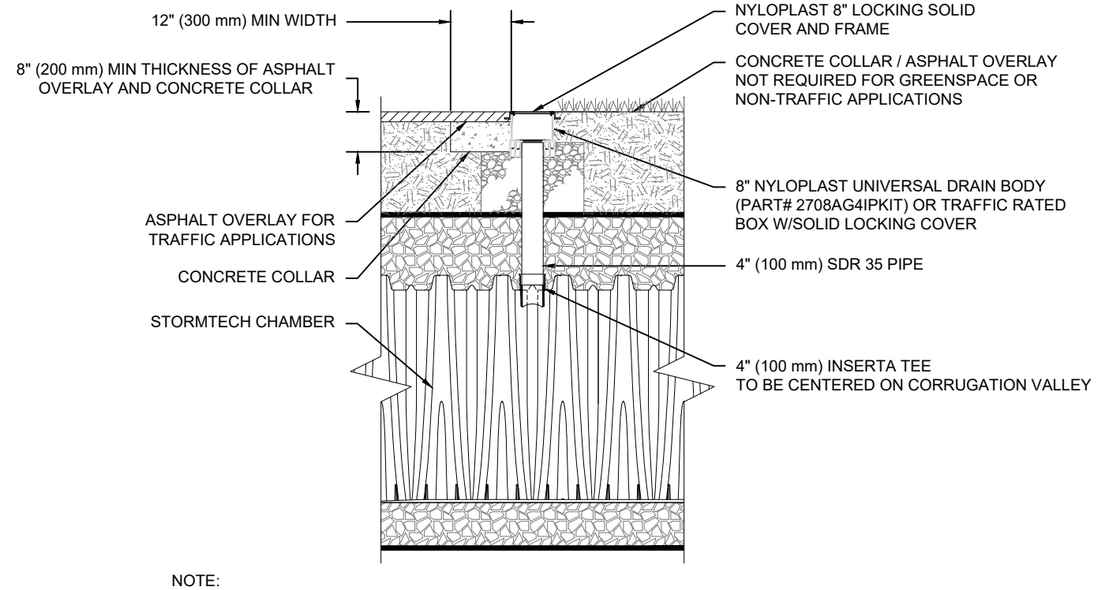
MC-3500 ISOLATOR ROW PLUS DETAIL
NTS

INSPECTION & MAINTENANCE

STEP 1) INSPECT ISOLATOR ROW PLUS FOR SEDIMENT
- A. INSPECTION PORTS (IF PRESENT)
  - A.1. REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN
  - A.2. REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED
  - A.3. USING A FLASHLIGHT AND STADIA ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG
  - A.4. LOWER A CAMERA INTO ISOLATOR ROW PLUS FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL)
  - A.5. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.
- B. ALL ISOLATOR PLUS ROWS
  - B.1. REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW PLUS
  - B.2. USING A FLASHLIGHT, INSPECT DOWN THE ISOLATOR ROW PLUS THROUGH OUTLET PIPE
    - i) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY
    - ii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE
  - B.3. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

STEP 2) CLEAN OUT ISOLATOR ROW PLUS USING THE JETVAC PROCESS
- A. A FIXED CULVERT CLEANING NOZZLE WITH REAR FACING SPREAD OF 45" (1.1 m) OR MORE IS PREFERRED
- B. APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN
- C. VACUUM STRUCTURE SUMP AS REQUIRED



STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

STEP 4) INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM.

NOTES

1. INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.

2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY.

NOTE:
INSPECTION PORTS MAY BE CONNECTED THROUGH ANY CHAMBER CORRUGATION VALLEY.

STEVENS PRD - BASIN 2

MARYSVILLE, WA, USA

MC-3500 STORMTECH CHAMBER SPECIFICATIONS

1. CHAMBERS SHALL BE STORMTECH MC-3500.
2. CHAMBERS SHALL BE ARCH-SHAPED AND SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
3. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
4. CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NO INTERNAL SUPPORTS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION.
5. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) SHORT-DURATION LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.
6. CHAMBERS SHALL BE DESIGNED, TESTED AND ALLOWABLE LOAD CONFIGURATIONS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS". LOAD CONFIGURATIONS SHALL INCLUDE: 1) INSTANTANEOUS (<1 MIN) AASHTO DESIGN TRUCK LIVE LOAD ON MINIMUM COVER 2) MAXIMUM PERMANENT (75-YR) COVER LOAD AND 3) ALLOWABLE COVER WITH PARKED (1-WEEK) AASHTO DESIGN TRUCK.
7. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.
8. ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. UPON REQUEST BY THE SITE DESIGN ENGINEER OR OWNER, THE CHAMBER MANUFACTURER SHALL SUBMIT A STRUCTURAL EVALUATION FOR APPROVAL BEFORE DELIVERING CHAMBERS TO THE PROJECT SITE AS FOLLOWS:
   - THE STRUCTURAL EVALUATION SHALL BE SEALED BY A REGISTERED PROFESSIONAL ENGINEER.
   - THE STRUCTURAL EVALUATION SHALL DEMONSTRATE THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD, THE MINIMUM REQUIRED BY ASTM F2787 AND BY SECTIONS 3 AND 12.12 OF THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS FOR THERMOPLASTIC PIPE.
   - THE TEST DERIVED CREEP MODULUS AS SPECIFIED IN ASTM F2418 SHALL BE USED FOR PERMANENT DEAD LOAD DESIGN EXCEPT THAT IT SHALL BE THE 75-YEAR MODULUS USED FOR DESIGN.
9. CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY.

IMPORTANT - NOTES FOR THE BIDDING AND INSTALLATION OF MC-3500 CHAMBER SYSTEM

1. STORMTECH MC-3500 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTATIVE HAS COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS.
2. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR AN EXCAVATOR SITUATED OVER THE CHAMBERS. STORMTECH RECOMMENDS 3 BACKFILL METHODS:
   - STONESHOOTER LOCATED OFF THE CHAMBER BED.
   - BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE.
   - BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
4. THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS.
5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.
6. MAINTAIN MINIMUM - 6" (150 mm) SPACING BETWEEN THE CHAMBER ROWS.
7. INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS.
8. EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE MEETING THE AASHTO M43 DESIGNATION OF #3 OR #4.
9. STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND PRESERVE ROW SPACING.
10. THE CONTRACTOR MUST REPORT ANY DISCREPANCIES WITH CHAMBER FOUNDATION MATERIALS BEARING CAPACITIES TO THE SITE DESIGN ENGINEER.
11. ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

NOTES FOR CONSTRUCTION EQUIPMENT

1. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
2. THE USE OF EQUIPMENT OVER MC-3500 CHAMBERS IS LIMITED:
   - NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
   - NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
   - WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK TRAVEL OR DUMPING.

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY.

CONTACT STORMTECH AT 1-888-892-2694 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

NOTES

- MANIFOLD SIZE TO BE DETERMINED BY SITE DESIGN ENGINEER. SEE TECH NOTE #6.32 FOR MANIFOLD SIZING GUIDANCE.
- DUE TO THE ADAPTATION OF THIS CHAMBER SYSTEM TO SPECIFIC SITE AND DESIGN CONSTRAINTS, IT MAY BE NECESSARY TO CUT AND COUPLE ADDITIONAL PIPE TO STANDARD MANIFOLD COMPONENTS IN THE FIELD.
- THE SITE DESIGN ENGINEER MUST REVIEW ELEVATIONS AND IF NECESSARY ADJUST GRADING TO ENSURE THE CHAMBER COVER REQUIREMENTS ARE MET.
- THIS CHAMBER SYSTEM WAS DESIGNED WITHOUT SITE-SPECIFIC INFORMATION ON SOIL CONDITIONS OR BEARING CAPACITY. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR DETERMINING THE SUITABILITY OF THE SOIL AND PROVIDING THE BEARING CAPACITY OF THE INSITU SOILS. THE BASE STONE DEPTH MAY BE INCREASED OR DECREASED ONCE THIS INFORMATION IS PROVIDED.
- **NOT FOR CONSTRUCTION:** THIS LAYOUT IS FOR DIMENSIONAL PURPOSES ONLY TO PROVE CONCEPT & THE REQUIRED STORAGE VOLUME CAN BE ACHIEVED ON SITE.

ACCEPTABLE FILL MATERIALS: STORMTECH MC-3500 CHAMBER SYSTEMS

MATERIAL LOCATION		DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION / DENSITY REQUIREMENT
D	**FINAL FILL:** FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C	**INITIAL FILL:** FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 24" (600 mm) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	AASHTO M145[1] A-1, A-2-4, A-3 OR AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTIONS AFTER 24" (600 mm) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 12" (300 mm) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS.
B	**EMBEDMENT STONE:** FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED.
A	**FOUNDATION STONE:** FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE.[2,3]

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" (230 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.
3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.
4. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.
5. WHERE RECYCLED CONCRETE AGGREGATE IS USED IN LAYERS 'A' OR 'B' THE MATERIAL SHOULD ALSO MEET THE ACCEPTABILITY CRITERIA OUTLINED IN TECHNICAL NOTE 6.20 "RECYCLED CONCRETE STRUCTURAL BACKFILL".

NOTES:

1. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
2. MC-3500 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
3. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
4. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
5. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.

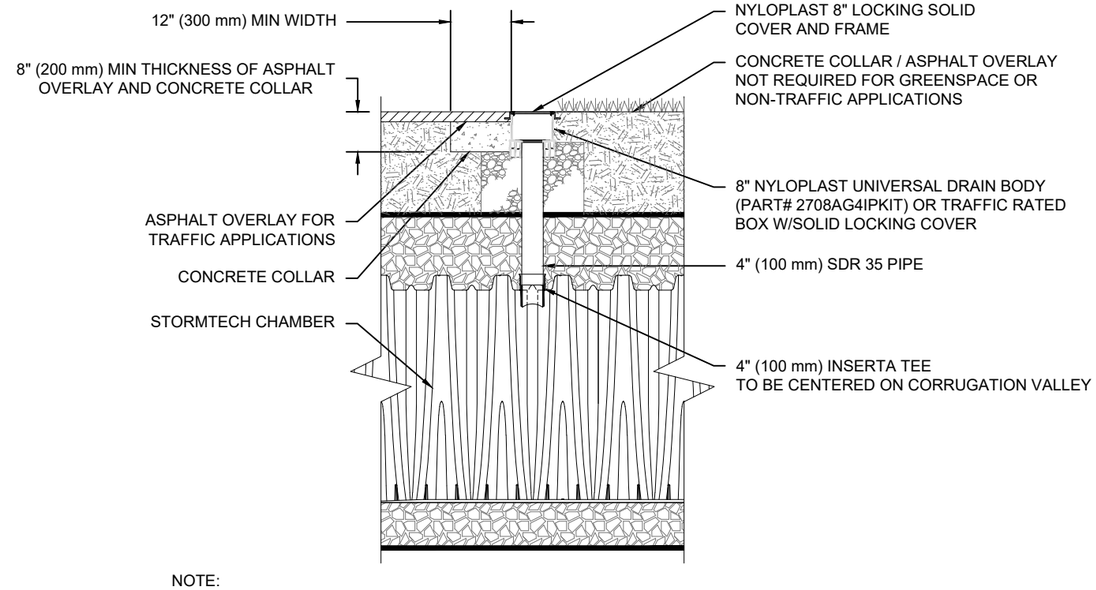
MC-3500 ISOLATOR ROW PLUS DETAIL
NTS

INSPECTION & MAINTENANCE

STEP 1) INSPECT ISOLATOR ROW PLUS FOR SEDIMENT
- A. INSPECTION PORTS (IF PRESENT)
  - A.1. REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN
  - A.2. REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED
  - A.3. USING A FLASHLIGHT AND STADIA ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG
  - A.4. LOWER A CAMERA INTO ISOLATOR ROW PLUS FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL)
  - A.5. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.
- B. ALL ISOLATOR PLUS ROWS
  - B.1. REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW PLUS
  - B.2. USING A FLASHLIGHT, INSPECT DOWN THE ISOLATOR ROW PLUS THROUGH OUTLET PIPE
    - i) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY
    - ii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE
  - B.3. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

STEP 2) CLEAN OUT ISOLATOR ROW PLUS USING THE JETVAC PROCESS
- A. A FIXED CULVERT CLEANING NOZZLE WITH REAR FACING SPREAD OF 45" (1.1 m) OR MORE IS PREFERRED
- B. APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN
- C. VACUUM STRUCTURE SUMP AS REQUIRED



STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

STEP 4) INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM.

NOTES

1. INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.

2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY.

NOTE:
INSPECTION PORTS MAY BE CONNECTED THROUGH ANY CHAMBER CORRUGATION VALLEY.

PROJECT REPORT

Project Name: 16200-3 (Basin 3 – Full Infiltration)
Site Name: Stevens PRD
Site Address: 98 Ave NE
City : Marysville
Report Date: 8/1/2024
Gage : Everett
Data Start : 1948/10/01
Data End : 2009/09/30
Precip Scale: 1.00
Version Date: 2023/01/27
Version : 4.2.19

Low Flow Threshold for POC 1 : 50 Percent of the 2 Year

High Flow Threshold for POC 1: 50 year

PREDEVELOPED LAND USE

Name : Basin 3
Bypass: No

GroundWater: No

Pervious Land Use	acre
A B, Forest, Flat	0.397
Pervious Total	0.397

Impervious Land Use	acre
Impervious Total	0.000
Basin Total	0.397

Element Flows To:

Surface	Interflow	Groundwater

MITIGATED LAND USE

Name : Basin 3
Bypass: No

GroundWater: No

Pervious Land Use	acre
A B, Lawn, Flat	0.197
Pervious Total	0.197

Impervious Land Use	acre
ROADS FLAT	0.139
DRIVEWAYS FLAT	0.019
SIDEWALKS FLAT	0.043
Impervious Total	0.201
Basin Total	0.398

Element Flows To:

Surface	Interflow	Groundwater
StormTech 3	StormTech 3	

Name : StormTech 3
Facility Name: StormTech 3

Chamber Model: 3500
Dimensions
Max Row Length : 70
Number of Chambers: 8
Number of Endcaps : 2
Top Stone Depth : 12
Bottom Stone Depth: 9
Infiltration On
Infiltration rate: 2
Infiltration safety factor: 1
Total Volume Infiltrated (ac-ft.): 31.336
Total Volume Through Riser (ac-ft.): 0
Total Volume Through Facility (ac-ft.): 31.336
Percent Infiltrated: 100
Total Precip Applied to Facility: 0
Total Evap From Facility: 0
Discharge Structure
Riser Height: 4.5 ft.
Riser Diameter: 24 in.

Element Flows To:

Outlet 1	Outlet 2

STEVENS PRD - BASIN 3

MARYSVILLE, WA, USA

MC-3500 STORMTECH CHAMBER SPECIFICATIONS

1. CHAMBERS SHALL BE STORMTECH MC-3500.
2. CHAMBERS SHALL BE ARCH-SHAPED AND SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
3. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
4. CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NO INTERNAL SUPPORTS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION.
5. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) SHORT-DURATION LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.
6. CHAMBERS SHALL BE DESIGNED, TESTED AND ALLOWABLE LOAD CONFIGURATIONS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS". LOAD CONFIGURATIONS SHALL INCLUDE: 1) INSTANTANEOUS (<1 MIN) AASHTO DESIGN TRUCK LIVE LOAD ON MINIMUM COVER 2) MAXIMUM PERMANENT (75-YR) COVER LOAD AND 3) ALLOWABLE COVER WITH PARKED (1-WEEK) AASHTO DESIGN TRUCK.
7. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.
8. ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. UPON REQUEST BY THE SITE DESIGN ENGINEER OR OWNER, THE CHAMBER MANUFACTURER SHALL SUBMIT A STRUCTURAL EVALUATION FOR APPROVAL BEFORE DELIVERING CHAMBERS TO THE PROJECT SITE AS FOLLOWS:
   - THE STRUCTURAL EVALUATION SHALL BE SEALED BY A REGISTERED PROFESSIONAL ENGINEER.
   - THE STRUCTURAL EVALUATION SHALL DEMONSTRATE THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD, THE MINIMUM REQUIRED BY ASTM F2787 AND BY SECTIONS 3 AND 12.12 OF THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS FOR THERMOPLASTIC PIPE.
   - THE TEST DERIVED CREEP MODULUS AS SPECIFIED IN ASTM F2418 SHALL BE USED FOR PERMANENT DEAD LOAD DESIGN EXCEPT THAT IT SHALL BE THE 75-YEAR MODULUS USED FOR DESIGN.
9. CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY.

IMPORTANT - NOTES FOR THE BIDDING AND INSTALLATION OF MC-3500 CHAMBER SYSTEM

1. STORMTECH MC-3500 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTATIVE HAS COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS.
2. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR AN EXCAVATOR SITUATED OVER THE CHAMBERS. STORMTECH RECOMMENDS 3 BACKFILL METHODS:
   - STONESHOOTER LOCATED OFF THE CHAMBER BED.
   - BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE.
   - BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
4. THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS.
5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.
6. MAINTAIN MINIMUM - 6" (150 mm) SPACING BETWEEN THE CHAMBER ROWS.
7. INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS.
8. EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE MEETING THE AASHTO M43 DESIGNATION OF #3 OR #4.
9. STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND PRESERVE ROW SPACING.
10. THE CONTRACTOR MUST REPORT ANY DISCREPANCIES WITH CHAMBER FOUNDATION MATERIALS BEARING CAPACITIES TO THE SITE DESIGN ENGINEER.
11. ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

NOTES FOR CONSTRUCTION EQUIPMENT

1. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
2. THE USE OF EQUIPMENT OVER MC-3500 CHAMBERS IS LIMITED:
   - NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
   - NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
   - WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK TRAVEL OR DUMPING.

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY.

CONTACT STORMTECH AT 1-888-892-2694 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

NOTES

- MANIFOLD SIZE TO BE DETERMINED BY SITE DESIGN ENGINEER. SEE TECH NOTE #6.32 FOR MANIFOLD SIZING GUIDANCE.
- DUE TO THE ADAPTATION OF THIS CHAMBER SYSTEM TO SPECIFIC SITE AND DESIGN CONSTRAINTS, IT MAY BE NECESSARY TO CUT AND COUPLE ADDITIONAL PIPE TO STANDARD MANIFOLD COMPONENTS IN THE FIELD.
- THE SITE DESIGN ENGINEER MUST REVIEW ELEVATIONS AND IF NECESSARY ADJUST GRADING TO ENSURE THE CHAMBER COVER REQUIREMENTS ARE MET.
- THIS CHAMBER SYSTEM WAS DESIGNED WITHOUT SITE-SPECIFIC INFORMATION ON SOIL CONDITIONS OR BEARING CAPACITY. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR DETERMINING THE SUITABILITY OF THE SOIL AND PROVIDING THE BEARING CAPACITY OF THE INSITU SOILS. THE BASE STONE DEPTH MAY BE INCREASED OR DECREASED ONCE THIS INFORMATION IS PROVIDED.
- **NOT FOR CONSTRUCTION:** THIS LAYOUT IS FOR DIMENSIONAL PURPOSES ONLY TO PROVE CONCEPT & THE REQUIRED STORAGE VOLUME CAN BE ACHIEVED ON SITE.

ACCEPTABLE FILL MATERIALS: STORMTECH MC-3500 CHAMBER SYSTEMS

	MATERIAL LOCATION	DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION / DENSITY REQUIREMENT
D	**FINAL FILL:** FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C	**INITIAL FILL:** FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 24" (600 mm) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	AASHTO M145[1] A-1, A-2-4, A-3 OR AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTIONS AFTER 24" (600 mm) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 12" (300 mm) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS.
B	**EMBEDMENT STONE:** FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED.
A	**FOUNDATION STONE:** FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE.[2,3]

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" (230 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.
3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.
4. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.
5. WHERE RECYCLED CONCRETE AGGREGATE IS USED IN LAYERS 'A' OR 'B' THE MATERIAL SHOULD ALSO MEET THE ACCEPTABILITY CRITERIA OUTLINED IN TECHNICAL NOTE 6.20 "RECYCLED CONCRETE STRUCTURAL BACKFILL".

NOTES:

1. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
2. MC-3500 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
3. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
4. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
5. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.

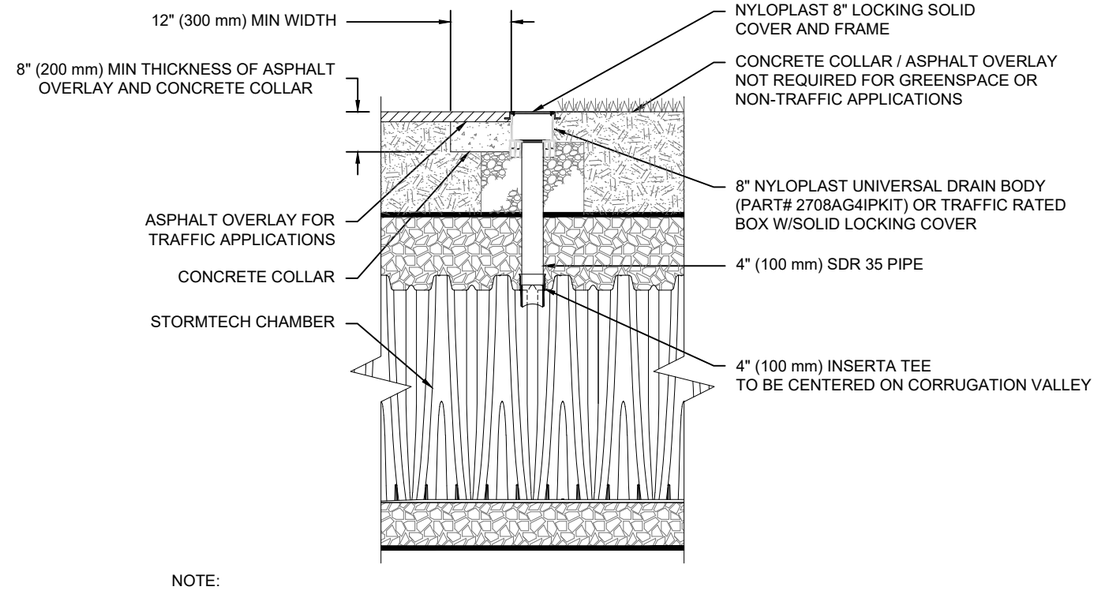
MC-3500 ISOLATOR ROW PLUS DETAIL
NTS

INSPECTION & MAINTENANCE

STEP 1) INSPECT ISOLATOR ROW PLUS FOR SEDIMENT
- A. INSPECTION PORTS (IF PRESENT)
  - A.1. REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN
  - A.2. REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED
  - A.3. USING A FLASHLIGHT AND STADIA ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG
  - A.4. LOWER A CAMERA INTO ISOLATOR ROW PLUS FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL)
  - A.5. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.
- B. ALL ISOLATOR PLUS ROWS
  - B.1. REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW PLUS
  - B.2. USING A FLASHLIGHT, INSPECT DOWN THE ISOLATOR ROW PLUS THROUGH OUTLET PIPE
    - i) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY
    - ii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE
  - B.3. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

STEP 2) CLEAN OUT ISOLATOR ROW PLUS USING THE JETVAC PROCESS
- A. A FIXED CULVERT CLEANING NOZZLE WITH REAR FACING SPREAD OF 45" (1.1 m) OR MORE IS PREFERRED
- B. APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN
- C. VACUUM STRUCTURE SUMP AS REQUIRED



STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

STEP 4) INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM.

NOTES

1. INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.

2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY.

NOTE:
INSPECTION PORTS MAY BE CONNECTED THROUGH ANY CHAMBER CORRUGATION VALLEY.

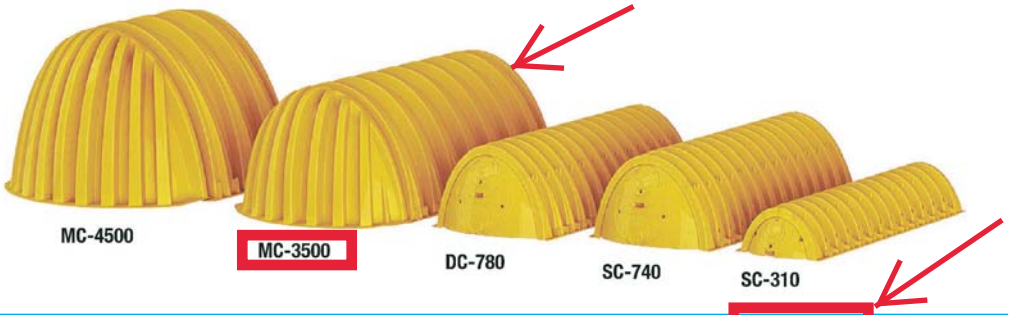
StormTech has thousands of chamber systems in service throughout the world. All StormTech chambers are designed to meet the most stringent industry performance standards for superior structural integrity. The StormTech system is designed primarily to be used under parking lots, roadways and heavy earth loads saving valuable land and protecting water resources for commercial and municipal applications. In our continuing desire to answer designers' challenges, StormTech has expanded the family of products providing engineers, developers, regulators and contractors with additional site specific flexibility.

Advanced Structural Performance for Greater Long-Term Reliability

StormTech developed a state of the art chamber design through:



- Collaboration with world-renowned experts of buried drainage structures to develop and evaluate the structural testing program and product design
- Designing chambers to exceed American Association of State Highway and Transportation Officials (AASHTO) LRFD design specifications for HS-20 live loads and deep burial earth loads
- Subjecting the chambers to rigorous full scale testing, under severe loading conditions to verify the AASHTO safety factors for live load and deep burial applications
- Designing chambers to conform to the product requirements of ASTM F2418 (polypropylene chambers) and ASTM F2922 (polyethylene chambers) and design requirements of ASTM F2787 ensuring both the assurance of product quality and safe structural design

Our Chambers Provide...

- Large capacity that *fits very tight footprints* providing developers with more useable land for development.
- *A proven attenuation alternative* to cumbersome large diameter metal pipe or snap together plastic crates and unreliable multi-layer systems.
- Provides the *strength* of concrete vaults at a very competitive price.
- The robust *continuous true elliptical arch design* which effectively transfers loads to the surrounding backfill providing the long-term safety factor required by AASHTO. Offers developers a cost-effective underground system that will perform as designed for decades.
- *Designed in accordance with the AASHTO LRFD Bridge Design Specifications* providing engineers with a structural performance standard for live and long-term dead loads.
- *Polypropylene and polyethylene* resins tested using ASTM standards to ensure long and short-term structural properties.
- *Injection molded* for uniform wall thickness and repeatable quality.
- Third party *tested and patented Isolator Row* for less frequent maintenance, water quality and long-term performance.
- Incorporates *traditional manifold/header designs* using conventional hydraulic equations that can easily verify flow equalization and scour velocity.
- *Open chamber design* requiring only one chamber model to construct each row assuring ease of construction and no repeating end walls to obstruct access or flow.

StormTech offers a variety of chamber sizes (SC-310, SC-740, DC-780, MC-3500 and MC-4500) so the consulting design engineer can choose the chamber that is best suited for the site conditions and regulatory requirements. StormTech has thousands of chamber systems in service worldwide. We provide plan layout and cost estimate services at no charge for consulting engineers and developers.

StormTech and LEED

List of LEED Credits that StormTech may contribute towards:

SUSTAINABLE SITES

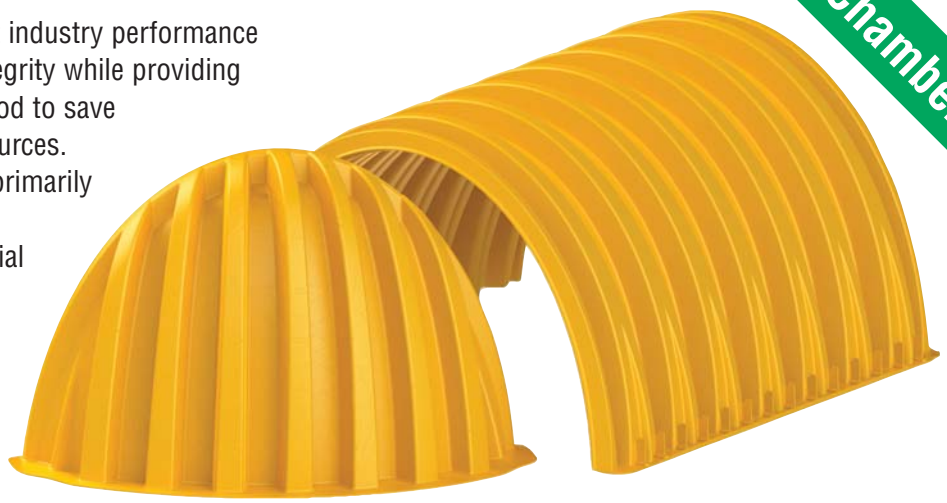
- **SS Credit 5.1 - Site Development: Protect or Restore Habitat**
  Utilizing StormTech System beneath roadways, surface parking, walkways, etc. may reduce overall site disturbance
- **SS Credit 5.2 - Site Development: Maximize Open Space**
  Utilizing StormTech System can increase overall open space and may reduce overall site disturbance
- **SS Credit 6.1 - Stormwater Design: Quantity Control**
  Design StormTech System per local or LEED stormwater quantity requirements, whichever is more stringent
- **SS Credit 6.2 - Stormwater Design: Quality Control**
  Use of Isolator Row provides sediment removal, and can also promote infiltration and groundwater recharge
- **SS Credit 7.1 - Heat Island Effect: Non-Roof**
  Use of StormTech System may eliminate need for above ground detention ponds, thus reducing thermal impacts of stormwater runoff

Water Efficiency

- **WE Credit 1 - Water Efficient Landscaping**
  Utilize StormTech System to store captured rainwater for landscape irrigation
- **WE Credit 2 - Innovative Wastewater Technologies**
  Utilize StormTech System to store captured rainwater to reduce potable water demand.
- **WE Credit 3 - Water Use Reduction**
  Utilize StormTech System to store captured rainwater and allow reuse for non-potable applications

Materials and Resources

- **MR Credit 4 – Recycled Content**
  Utilize recycled concrete as the backfill material for the StormTech System.
- **MR Credit 5 – Regional Materials**
  Stone backfill material for the StormTech System will apply if extracted within 500 miles of project site.



Innovation & Design

- **ID Credit 1 – Innovation in Design**
  Utilize StormTech System to substantially exceed a performance credit

StormTech MC-3500 Chamber

MC-3500 Chamber

Designed to meet the most stringent industry performance standards for superior structural integrity while providing designers with a cost-effective method to save valuable land and protect water resources. The StormTech system is designed primarily to be used under parking lots thus maximizing land usage for commercial and municipal applications.

StormTech MC-3500 Chamber (not to scale)

Nominal Chamber Specifications

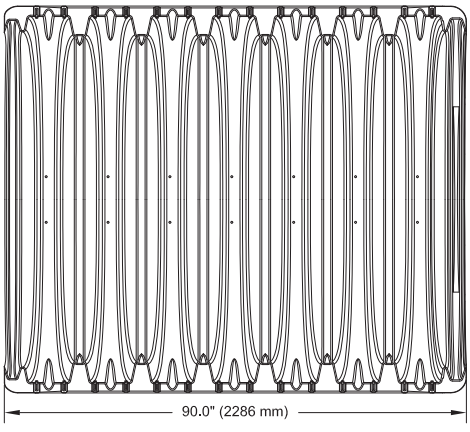
Size (L x W x H)	90" (2286 mm) x 77" (1956 mm) x 45" (1143 mm)
Chamber Storage	109.9 ft³ (3.11 m³)
Min. Installed Storage*	178.9 ft³ (5.06 m³)
Weight	134 lbs (60.8 kg)

* This assumes a minimum of 12" (300 mm) of stone above, 9" (230 mm) of stone below chambers, 9" (230 mm) of stone between chambers/end caps and 40% stone porosity.

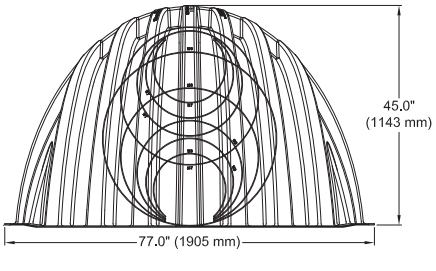
StormTech MC-3500 End Cap (not to scale)

Nominal End Cap Specifications

Size (L x W x H)	26.5" (673 mm) x 71" (1803 mm) x 45.1" (1145 mm)
End Cap Storage	14.9 ft³ (0.42 m³)
Min. Installed Storage*	46.0 ft³ (1.30 m³)
Weight	49 lbs (22.2 kg)



*This assumes a minimum of 12" (300 mm) of stone above, 9" (230 mm) of stone below, 6" (150 mm) of stone perimeter, 9" (230 mm) of stone between chambers/end caps and 40% stone porosity.



Shipping

	9" (230 mm)	12" (300 mm)	15" (375 mm)	18" (450 mm)
MC-3500	12.4 (9.5)	12.8 (9.8)	13.3 (10.2)	13.8 (10.5)
End Cap	4.1 (3.1)	4.2 (3.2)	4.4 (3.3)	4.5 (3.5)

NOTE: Assumes 9" (230 mm) of separation between chamber rows and 24" (600 mm) of cover. The volume of excavation will vary as the depth of cover increases.

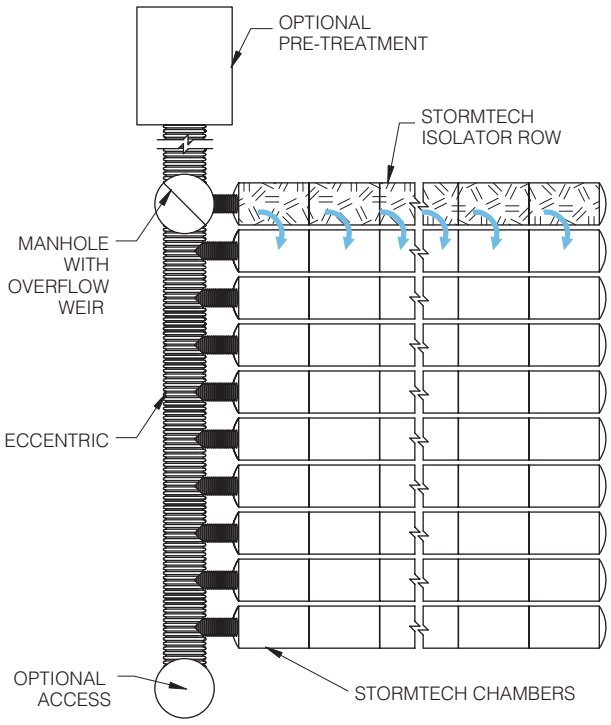
General Cross Section

THE INSTALLED CHAMBER SYSTEM SHALL PROVIDE THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS SECTION 12.12 FOR EARTH AND LIVE LOADS, WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.

StormTech Isolator™ Row

An important component of any Stormwater Pollution Prevention Plan is inspection and maintenance. The StormTech Isolator Row is a patent pending technique to inexpensively enhance Total Suspended Solids (TSS) removal and provide easy access for inspection and maintenance.

The Isolator Row is a row of StormTech chambers that is surrounded with filter fabric and connected to a closely located manhole for easy access. The fabric-wrapped chambers provide for settling and filtration of sediment as stormwater rises in the Isolator Row and ultimately passes through the filter fabric. The open bottom chambers and perforated sidewalls (SC-310, SC-310-3, and SC-740 models) allow stormwater to flow both vertically and horizontally out of the chambers. Sediments are captured in the Isolator Row, protecting the storage areas of the adjacent stone and chambers from sediment accumulation.



Two different fabrics are used for the Isolator Row. A woven geotextile fabric is placed between the stone and the Isolator Row chambers. The tough geotextile provides a media for stormwater filtration and provides a durable surface for maintenance operations. It is also designed to prevent scour of the underlying stone and remain intact during high pressure jetting. A non-woven fabric is placed over the chambers to provide a filter media for flows passing through the perforations in the sidewall of the chamber. The non-woven fabric is not required over the DC-780, MC-3500 or MC-4500 models as these chambers do not have perforated side walls.

The Isolator Row is typically designed to capture the "first flush" and offers the versatility to be sized on a volume basis or flow rate basis. An upstream manhole not only provides access to the Isolator Row, but typically includes a high flow weir such that stormwater flow rates or volumes that exceed the capacity of the Isolator Row crest the weir and discharge through a manifold to the other chambers.

The Isolator Row may also be part of a treatment train. By treating stormwater prior to entry into the chamber system, the service life can be extended and pollutants such as hydrocarbons can be captured. Pre-treatment best management practices can be as simple as deep sump catch basins and oil-water separators or can be innovative storm water treatment devices. The design of the treatment train and selection of pretreatment devices by the design engineer is often driven by regulatory requirements. Whether pretreatment is used or not, the Isolator Row is recommended by StormTech as an effective means to minimize maintenance requirements and maintenance costs.

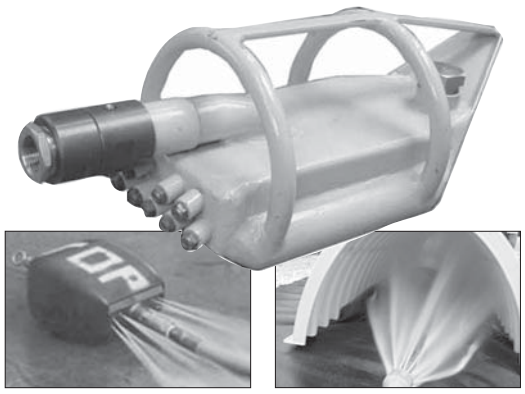
Note: See the StormTech Design Manual for detailed information on designing inlets for a StormTech system, including the Isolator Row.

StormTech Isolator Row with Overflow Spillway
(not to scale)

StormTech Isolator Row

INSPECTION

The frequency of Inspection and Maintenance varies by location. A routine inspection schedule needs to be established for each individual location based upon site specific variables. The type of land use (i.e. industrial, commercial, residential), anticipated pollutant load, percent imperviousness, climate, etc. all play a critical role in determining the actual frequency of inspection and maintenance practices.

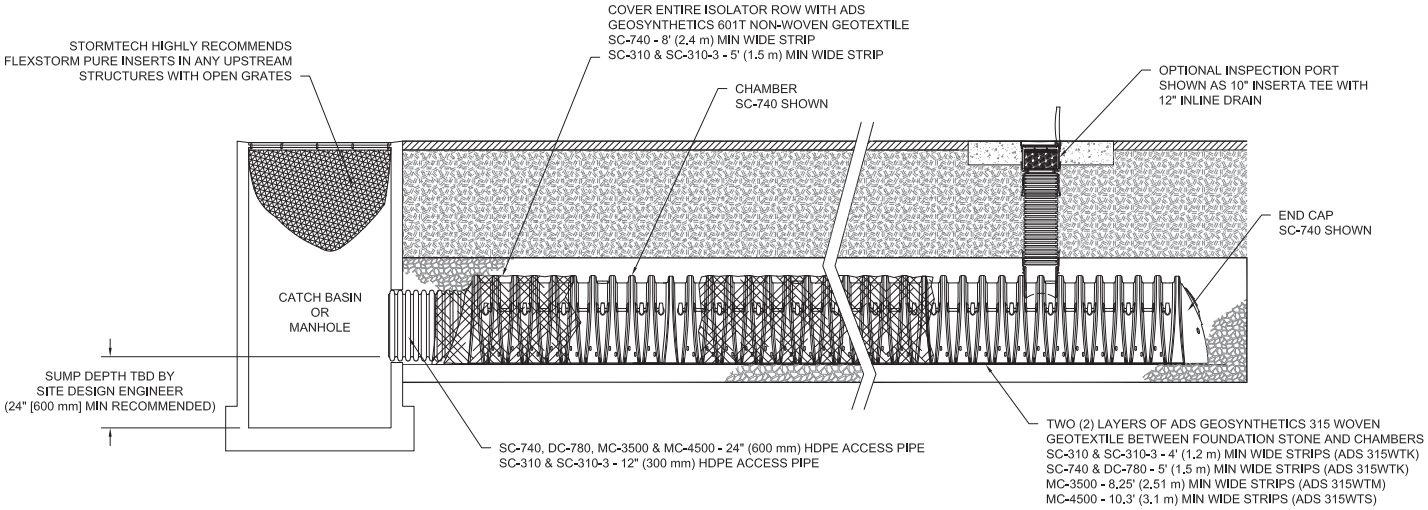


At a minimum, StormTech recommends annual inspections. Initially, the Isolator Row should be inspected every 6 months for the first year of operation. For subsequent years, the inspection should be adjusted based upon previous observation of sediment deposition.

The Isolator Row incorporates a combination of standard manhole(s) and strategically located inspection ports (as needed). The inspection ports allow for easy access to the system from the surface, eliminating the need to perform a confined space entry for inspection purposes.

If, upon visual inspection it is found that sediment has accumulated, a stadia rod should be inserted to determine the depth of sediment. When the average depth of sediment exceeds 3 inches throughout the length of the Isolator Row, clean-out should be performed.

MAINTENANCE

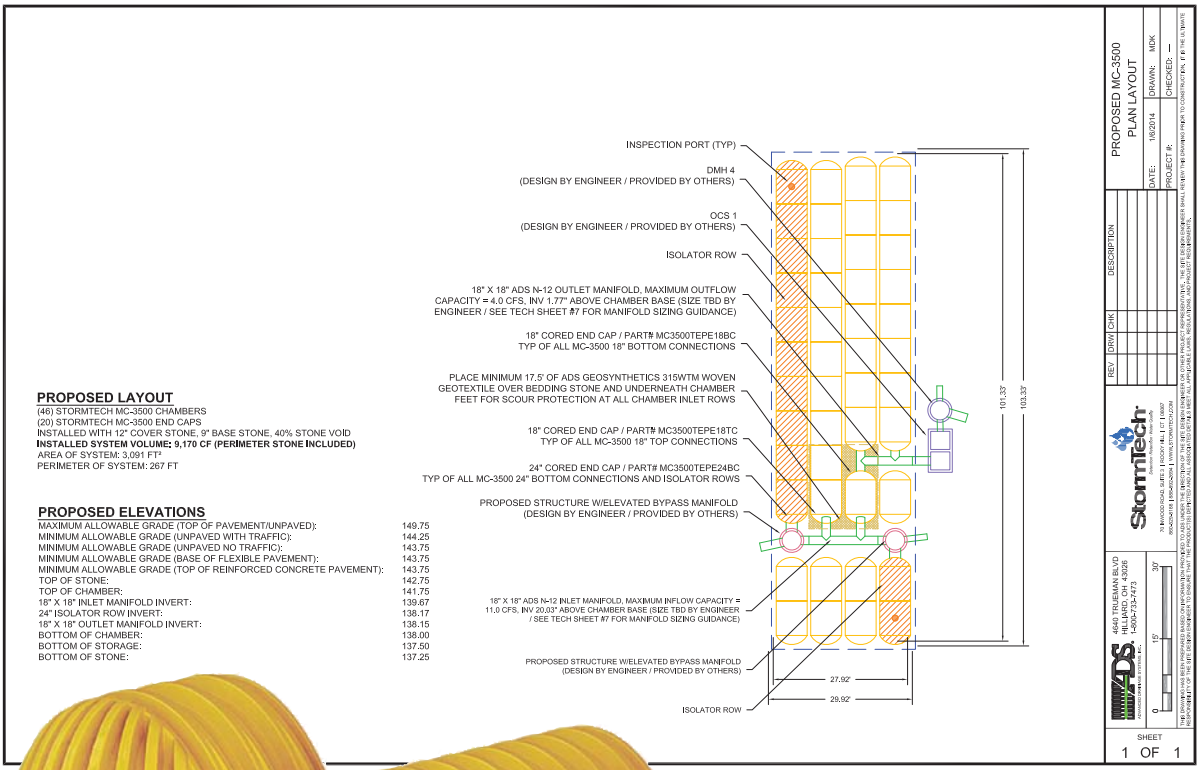


The Isolator Row was designed to reduce the cost of periodic maintenance. By "isolating" sediments to just one row, costs are dramatically reduced by eliminating the need to clean out each row of the entire storage bed. If inspection indicates the potential need for maintenance, access is provided via a manhole(s) located on the end(s) of the row for cleanout. If entry into the manhole is required, please follow local and OSHA rules for a confined space entries.

Examples of culvert cleaning nozzles appropriate for Isolator Row maintenance. (These are not StormTech products.)

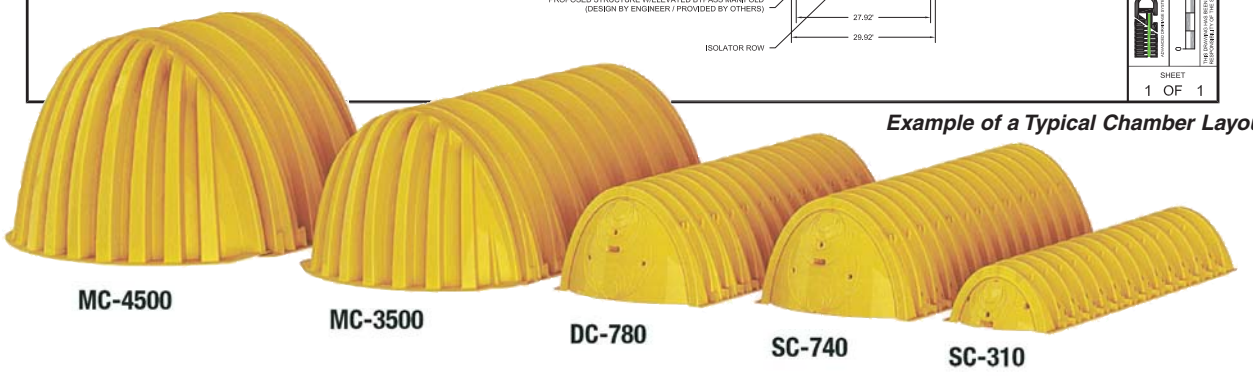
Maintenance is accomplished with the jetvac process. The jetvac process utilizes a high pressure water nozzle to propel itself down the Isolator Row while scouring and suspending sediments. As the nozzle is retrieved, the captured pollutants are flushed back into the manhole for vacuuming. Most sewer and pipe maintenance companies have vacuum/jetvac combination vehicles. Selection of an appropriate jetvac nozzle will improve maintenance efficiency. Fixed nozzles designed for culverts or large diameter pipe cleaning are preferable. Rear facing jets with an effective spread of at least 45" are best. Most jetvac reels have 400 feet of hose allowing maintenance of an Isolator Row up to 50 chambers long. **The jetvac process shall only be performed on StormTech Isolator Rows that have AASHTO class 1 woven geotextile (as specified by StormTech) over their angular base stone.**

StormTech Isolator Row (not to scale)



*NOTE: NON-WOVEN FABRIC IS ONLY REQUIRED OVER THE INLET PIPE CONNECTION INTO THE END CAP FOR DC-780, MC-3500 & MC-4500 CHAMBER MODELS AND IS NOT REQUIRED OVER THE ENTIRE ISOLATOR ROW.

A Family of Products and Services



- MC-4500 Chambers and End Caps
- MC-3500 Chambers and End Caps
- SC-310 Chambers and End Caps
- SC-310-3 Chambers and End Caps
- DC-780 Chambers and End Caps
- SC-740 Chambers and End Caps
- SC, DC and MC Fabricated End Caps
- Fabricated Manifold Fittings
- Patented Isolator™ Row for Maintenance and Water Quality
- Inserta Tee Connections
- Nyloplast Basins and Inline Drains
- Flexstorm Inserts
- In-House System Layout Assistance
- On-Site Educational Seminars
- Worldwide Technical Sales Group
- Centralized Product Applications Department
- Research and Development Team
- Technical Literature, O&M Manuals and Detailed CAD drawings all downloadable via our Web Site

StormTech provides state of the art products and services that meet or exceed industry performance standards and expectations. We offer designers, regulators, owners and contractors the highest quality products and services for stormwater management that "Saves Valuable Land and Protects Water Resources."

Please contact one of our inside Technical Service professionals or Engineered Product Managers (EPMs) to discuss your particular application. A wide variety of technical support material is available from our website at **www.stormtech.com.** For any questions, please call StormTech at **888-892-2694**.

Important Information about This

Geotechnical-Engineering Report

Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.

While you cannot eliminate all such risks, you can manage them. The following information is provided to help.

The Geoprofessional Business Association (GBA) has prepared this advisory to help you – assumedly a client representative – interpret and apply this geotechnical-engineering report as effectively as possible. In that way, you can benefit from a lowered exposure to problems associated with subsurface conditions at project sites and development of them that, for decades, have been a principal cause of construction delays, cost overruns, claims, and disputes. If you have questions or want more information about any of the issues discussed herein, contact your GBA-member geotechnical engineer. Active engagement in GBA exposes geotechnical engineers to a wide array of risk-confrontation techniques that can be of genuine benefit for everyone involved with a construction project.

Understand the Geotechnical-Engineering Services Provided for this Report

Geotechnical-engineering services typically include the planning, collection, interpretation, and analysis of exploratory data from widely spaced borings and/or test pits. Field data are combined with results from laboratory tests of soil and rock samples obtained from field exploration (if applicable), observations made during site reconnaissance, and historical information to form one or more models of the expected subsurface conditions beneath the site. Local geology and alterations of the site surface and subsurface by previous and proposed construction are also important considerations. Geotechnical engineers apply their engineering training, experience, and judgment to adapt the requirements of the prospective project to the subsurface model(s). Estimates are made of the subsurface conditions that will likely be exposed during construction as well as the expected performance of foundations and other structures being planned and/or affected by construction activities.

The culmination of these geotechnical-engineering services is typically a geotechnical-engineering report providing the data obtained, a discussion of the subsurface model(s), the engineering and geologic engineering assessments and analyses made, and the recommendations developed to satisfy the given requirements of the project. These reports may be titled investigations, explorations, studies, assessments, or evaluations. Regardless of the title used, the geotechnical-engineering report is an engineering interpretation of the subsurface conditions within the context of the project and does not represent a close examination, systematic inquiry, or thorough investigation of all site and subsurface conditions.

Geotechnical-Engineering Services are Performed for Specific Purposes, Persons, and Projects, and At Specific Times

Geotechnical engineers structure their services to meet the specific needs, goals, and risk management preferences of their clients. A geotechnical-engineering study conducted for a given civil engineer will not likely meet the needs of a civil-works constructor or even a different civil engineer. Because each geotechnical-engineering study is unique, each geotechnical-engineering report is unique, prepared *solely* for the client.

Likewise, geotechnical-engineering services are performed for a specific project and purpose. For example, it is unlikely that a geotechnical-engineering study for a refrigerated warehouse will be the same as one prepared for a parking garage; and a few borings drilled during a preliminary study to evaluate site feasibility will not be adequate to develop geotechnical design recommendations for the project.

Do not rely on this report if your geotechnical engineer prepared it:

- for a different client;
- for a different project or purpose;
- for a different site (that may or may not include all or a portion of the original site); or
- before important events occurred at the site or adjacent to it; e.g., man-made events like construction or environmental remediation, or natural events like floods, droughts, earthquakes, or groundwater fluctuations.

Note, too, the reliability of a geotechnical-engineering report can be affected by the passage of time, because of factors like changed subsurface conditions; new or modified codes, standards, or regulations; or new techniques or tools. *If you are the least bit uncertain* about the continued reliability of this report, contact your geotechnical engineer before applying the recommendations in it. A minor amount of additional testing or analysis after the passage of time – if any is required at all – could prevent major problems.

Read this Report in Full

Costly problems have occurred because those relying on a geotechnical-engineering report did not read the report in its entirety. Do not rely on an executive summary. Do not read selective elements only. *Read and refer to the report in full.*

You Need to Inform Your Geotechnical Engineer About Change

Your geotechnical engineer considered unique, project-specific factors when developing the scope of study behind this report and developing the confirmation-dependent recommendations the report conveys. Typical changes that could erode the reliability of this report include those that affect:

- the site's size or shape;
- the elevation, configuration, location, orientation, function or weight of the proposed structure and the desired performance criteria;
- the composition of the design team; or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project or site changes – even minor ones – and request an assessment of their impact. *The geotechnical engineer who prepared this report cannot accept*

responsibility or liability for problems that arise because the geotechnical engineer was not informed about developments the engineer otherwise would have considered.

Most of the "Findings" Related in This Report Are Professional Opinions

Before construction begins, geotechnical engineers explore a site's subsurface using various sampling and testing procedures. *Geotechnical engineers can observe actual subsurface conditions only at those specific locations where sampling and testing is performed.* The data derived from that sampling and testing were reviewed by your geotechnical engineer, who then applied professional judgement to form opinions about subsurface conditions throughout the site. Actual sitewide-subsurface conditions may differ – maybe significantly – from those indicated in this report. Confront that risk by retaining your geotechnical engineer to serve on the design team through project completion to obtain informed guidance quickly, whenever needed.

This Report's Recommendations Are Confirmation-Dependent

The recommendations included in this report – including any options or alternatives – are confirmation-dependent. In other words, they are not final, because the geotechnical engineer who developed them relied heavily on judgement and opinion to do so. Your geotechnical engineer can finalize the recommendations *only after observing actual subsurface conditions* exposed during construction. If through observation your geotechnical engineer confirms that the conditions assumed to exist actually do exist, the recommendations can be relied upon, assuming no other changes have occurred. *The geotechnical engineer who prepared this report cannot assume responsibility or liability for confirmation-dependent recommendations if you fail to retain that engineer to perform construction observation.*

This Report Could Be Misinterpreted

Other design professionals' misinterpretation of geotechnical-engineering reports has resulted in costly problems. Confront that risk by having your geotechnical engineer serve as a continuing member of the design team, to:

- confer with other design-team members;
- help develop specifications;
- review pertinent elements of other design professionals' plans and specifications; and
- be available whenever geotechnical-engineering guidance is needed.

You should also confront the risk of constructors misinterpreting this report. Do so by retaining your geotechnical engineer to participate in prebid and preconstruction conferences and to perform construction-phase observations.

Give Constructors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can shift unanticipated-subsurface-conditions liability to constructors by limiting the information they provide for bid preparation. To help prevent the costly, contentious problems this practice has caused, include the complete geotechnical-engineering report, along with any attachments or appendices, with your contract documents, *but be certain to note conspicuously that you've included the material for information purposes only.* To avoid misunderstanding, you may also want to note that "informational purposes" means constructors have no right to rely on the interpretations, opinions, conclusions, or recommendations in the report. Be certain that constructors know they may learn about specific project requirements, including options selected from the report, *only* from the design drawings and specifications. Remind constructors that they may perform their own studies if they want to, and *be sure to allow enough time* to permit them to do so. Only then might you be in a position to give constructors the information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions. Conducting prebid and preconstruction conferences can also be valuable in this respect.

Read Responsibility Provisions Closely

Some client representatives, design professionals, and constructors do not realize that geotechnical engineering is far less exact than other engineering disciplines. This happens in part because soil and rock on project sites are typically heterogeneous and not manufactured materials with well-defined engineering properties like steel and concrete. That lack of understanding has nurtured unrealistic expectations that have resulted in disappointments, delays, cost overruns, claims, and disputes. To confront that risk, geotechnical engineers commonly include explanatory provisions in their reports. Sometimes labeled "limitations," many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

Geoenvironmental Concerns Are Not Covered

The personnel, equipment, and techniques used to perform an environmental study – e.g., a "phase-one" or "phase-two" environmental site assessment – differ significantly from those used to perform a geotechnical-engineering study. For that reason, a geotechnical-engineering report does not usually provide environmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated subsurface environmental problems have led to project failures.* If you have not obtained your own environmental information about the project site, ask your geotechnical consultant for a recommendation on how to find environmental risk-management guidance.

Obtain Professional Assistance to Deal with Moisture Infiltration and Mold

While your geotechnical engineer may have addressed groundwater, water infiltration, or similar issues in this report, the engineer's services were not designed, conducted, or intended to prevent migration of moisture – including water vapor – from the soil through building slabs and walls and into the building interior, where it can cause mold growth and material-performance deficiencies. Accordingly, ***proper implementation of the geotechnical engineer's recommendations will not of itself be sufficient to prevent moisture infiltration. Confront the risk of moisture infiltration*** by including building-envelope or mold specialists on the design team. ***Geotechnical engineers are not building-envelope or mold specialists.***

Bellevue, Washington 98005

Attention: Aron Golden

Greetings:

Earth Solutions NW, LLC (ESNW), is pleased to present this geotechnical engineering study (study) to support the proposed residential development. Based on the results of our investigation, the proposed project is feasible from a geotechnical standpoint. Our study indicates the site is underlain by relatively clean outwash sand. This study was updated to include additional land parcels.

The site will be mass graded to create access drives and building pads. After completing earthwork activities in accordance with recommendations in this report, the proposed structures can be supported on conventional spread and continuous foundations bearing on undisturbed, competent native soil, compacted native soil, or new structural fill. If structural building pads are disturbed during wet weather, remediation measures such as cement treatment or overexcavation and replacement with rock may be necessary in some areas.

Following the results of our infiltration testing, a long-term design infiltration rate of 20 inches per hour is applicable for the subject site.

Pertinent geotechnical recommendations are provided in this study. We appreciate the opportunity to be of service to you on this project. If you have any questions regarding the content of this geotechnical engineering study, please call.

Sincerely,

EARTH SOLUTIONS NW, LLC

Samuel E. Suruda, L.G.

GEOTECHNICAL ENGINEERING STUDY
PROPOSED RESIDENTIAL DEVELOPMENT
9907 – 35TH AVENUE NORTHEAST
MARYSVILLE, WASHINGTON

ES-9772

INTRODUCTION

General

This geotechnical engineering study (study) was prepared for the proposed residential development to be constructed at 9907 – 35th Avenue Northeast, in Marysville, Washington. The purpose of this study was to develop geotechnical recommendations for the project. The following tasks were completed as part of our scope of services for this project:

- Excavation, logging and sampling of test pits to characterize soil and groundwater conditions.
- Infiltration testing within the proposed stormwater detention area.
- Laboratory testing of soil samples collected at the test locations.
- Engineering analyses and recommendations for the proposed development.
- Preparation of this report.

Project Description

The proposed project consists of redevelopment of the existing parcels for the construction of a new residential plat. The seven existing single-family residences and associated improvements will be removed, and the parcels will be redeveloped into a residential plat, including access roads, stormwater infiltration systems, and associated improvements. Infiltration is being investigated to aid in stormwater mitigation of new impervious surfaces.

Based on our experience with similar projects, we anticipate cuts and fills of less than five feet will be necessary to achieve the proposed finish grade elevations. Cuts of up to about 15 feet are anticipated for utility installation.

Based on our experience with similar projects, the proposed residential structures are anticipated to be two to three stories in height and constructed utilizing relatively lightly loaded wood framing supported on conventional foundations. Perimeter footing loads are anticipated be 1 to 2 kips per linear foot, isolated footing loads will be less than 20 kips, and we anticipate slab-on-grade loading of 150 pounds per square foot (psf).

If the above design assumptions either change or are incorrect, ESNW should be contacted to review the recommendations provided in this report. ESNW should review final designs to confirm that our geotechnical recommendations have been incorporated into the plans.

SITE CONDITIONS

Surface

The subject site is directly east of the terminus of 35th Avenue Northeast, approximately 375 feet north of the intersection between 35th Avenue Northeast and 98th Street Northeast, in Marysville, Washington. The approximate site location is illustrated on Plate 1 (Vicinity Map). The subject site is comprised of seven tax parcels (Snohomish County Parcel Numbers 300516003-01400, -01500, -01600, -04500, -04501, -05800 & -06500), totaling roughly 13.6 acres. Topography across the subject site is relatively flat, with less than five feet of elevation change across the entirety of the subject site. The subject site is bordered by 35th Avenue Northeast to the west, 98th Street Northeast to the south, and surrounded by single-family residences. Vegetation within the subject site primarily consists of mature trees and sparse undergrowth, with landscaped field grass areas to the west and adjacent to the residences.

Subsurface

An ESNW representative observed, logged, and sampled nine test pits on March 13, 2024. The test pits were excavated at accessible site locations, using a mini trackhoe retained by ESNW. An additional six test pits were excavated on May 15, 2024. The subsurface exploration was completed to evaluate soil conditions, classify site soils, and characterize groundwater conditions within the proposed development area. The maximum exploration depth was approximately 13 feet below the existing ground surface (bgs). The approximate locations of the explorations are depicted on Plate 2 (Test Pit Location Plan). Please refer to the logs provided in Appendix A for a more detailed description of subsurface conditions. Representative soil samples collected at the exploration locations were analyzed in general accordance with both Unified Soil Classification System (USCS) and United States Department of Agriculture (USDA) methods and procedures.

Topsoil

Topsoil was observed in thicknesses of about two to three inches across a majority of the subject site. The topsoil was characterized by its dark brown color, the presence of fine organic material, and small root intrusions. We anticipate that the topsoil may be encountered in greater thicknesses directly adjacent to the existing mature trees on the subject site.

Fill

Fill was not encountered during our subsurface exploration. Based on the existing topography, we do not anticipate significant amounts of fill to be encountered during mass grading. If significant amounts of fill are encountered during the stripping process, ESNW should be contacted to evaluate the materials for potential applications on site.

Native Soil

Underlying the topsoil, native soils encountered at the test pit locations were observed primarily as medium dense poorly graded sand (USCS: SP). A localized area of silty sand (USCS: SM) was observed within a shallow weathered zone at test pit location TP-8, extending to a depth roughly three and one-half feet bgs. Density was observed to remain relatively consistent to the maximum exploration depth of 13 feet bgs. The sands were generally observed in a damp condition, while the weathered soil at TP-8 was observed to be moist.

Geologic Setting

Geologic mapping identifies the Marysville Sand Member (Qvrm) across the site and the nearby area. The Marysville sand member consists of a broad, flat deposition of relatively clean sands across the valley. The deposit consists of mostly well-drained and stratified to massive outwash sand, and areas of fine gravel and silts and clays.

The referenced Web Soil Survey (WSS) identifies Ragnar fine sandy loam as the primary unit underlying the subject site. The Ragnar series formed in glacial outwash plains. Based on our field observations, on-site native soils are representative primarily of glacial outwash sands and are consistent with the geologic map and soil mapping resources outlined in this section.

Groundwater

Groundwater seepage was not observed during our test pit explorations on March 13, 2024, and May 15, 2024. Additionally, we did not observe any indications of seasonal groundwater within the test pits (e.g., iron oxide staining). Groundwater seepage rates and elevations fluctuate depending on many factors, including precipitation duration and intensity, the time of year, and soil conditions. Groundwater seepage flow rates are typically higher during the winter, spring, and early summer months. Therefore, perched groundwater seepage may be encountered in site excavations, particularly if excavations are made in winter, spring, and early summer months.

GEOLOGIC HAZARD AREAS EVALUATION

A review of Marysville Municipal Code (MMC) Chapter 22E.10 Article IV – Geologic Hazard Areas, was completed to evaluate whether geologically hazardous areas as defined by the City of Marysville (including steep slopes, landslides, and liquefaction) exist on or near the subject site. Based on a review of Snohomish County PDS, the referenced geologic hazards map, and the referenced code section, the subject site is not mapped within any of the relevant geologic hazard areas. An area of high liquefaction susceptibility is present to the north and east of the subject site and continues trending away to the south. Based on our site-specific field observations, it is our opinion the site does not contain geologically hazardous areas as defined by the City of Marysville, nor will the proposed construction adversely impact the mapped hazards nearby.

DISCUSSION AND RECOMMENDATIONS

General

Based on the results of our investigation, construction of the proposed residential development is feasible from a geotechnical standpoint. The primary geotechnical considerations associated with the proposed development include the suitability of using on-site soils as structural fill and infiltration potential.

The proposed residential structures may be supported on conventional continuous and spread footing foundations bearing on competent native soil, recompacted native soil, or new structural fill. In general, we expect competent native soil suitable for support of the foundation will likely be encountered within one to two feet of existing grades. Where loose or unsuitable soil conditions are exposed at foundation subgrade elevations, compaction of the soil to the specifications of structural fill or overexcavation and replacement with suitable structural fill will likely be necessary.

Based on our infiltration evaluation for the subject site, in our opinion, a long-term infiltration rate of 20 inches per hour is applicable for the subject site. ESNW did not observe potential impediments to infiltration systems within our subsurface explorations to the maximum explored depth of about 13 feet bgs.

Site Preparation and Earthwork

Initial site preparation activities will consist of installing temporary erosion control measures, establishing grading limits, and site clearing and stripping activities. Subsequent earthwork activities will involve mass site grading and installation of infrastructure and stormwater management improvements.

Temporary Erosion Control

The following temporary erosion and sediment control (TESC) BMPs are offered:

- Temporary construction entrances and drive lanes, consisting of at least six inches of quarry spalls, should be considered to both minimize off-site soil tracking and provide a stable access entrance surface. Placing geotextile fabric underneath the quarry spalls will provide greater stability, if needed.

- Silt fencing should be placed around the construction site perimeter.

- When not in use, soil stockpiles should be covered or otherwise protected.

- Temporary measures for controlling surface water runoff, such as interceptor trenches, sumps, or swales, should be installed prior to beginning earthwork activities.

- Dry soils disturbed during construction should be wetted to minimize dust and airborne soil erosion.

- When appropriate, permanent planting or hydroseeding will help to stabilize on-site soil.

Additional TESC BMPs, as specified by the project civil engineer and indicated on the plans, should be incorporated into construction activities. TESC BMPs may be modified during construction as site conditions require and as approved by the site erosion control lead.

Stripping

Topsoil was encountered within the upper three inches, and root intrusions generally extended below the topsoil into the upper weathered soil. The topsoil layer may be more than three inches thick in some areas, particularly in the wooded areas of the site. The organic-rich topsoil should be stripped and segregated into a stockpile for later use on site or to haul off site. The material remaining immediately below the topsoil may have some root zones and will likely be variable in composition, density, and/or moisture content. The material exposed after initial topsoil stripping may not be suitable for direct structural support as is and may need to either be compacted in place or stripped and stockpiled for reuse as fill; depending on the time of year stripping occurs, the soil exposed below the topsoil may be too wet to compact and may need to be aerated or treated. ESNW should observe initial stripping activities to provide recommendations regarding stripping depths and material suitability.

Excavations and Slopes

Excavation activities on site are likely to expose medium dense native soil within the upper one to two feet of existing grades. Based on the soil conditions observed at the test locations, the following maximum allowable temporary slope inclinations may be used. The applicable Federal Occupation Safety and Health Administration and Washington Industrial Safety and Health Act soil classifications are also provided:

- Areas exposing groundwater seepage or fill 1.5H:1V (Type C)
- Loose soil 1.5H:1V (Type C)
- Medium dense soil 1H:1V (Type B)

Permanent slopes should be planted with vegetation to both enhance stability and minimize erosion and should maintain a gradient of 2H:1V or flatter. The presence of perched groundwater may cause localized sloughing of temporary slopes. An ESNW representative should observe temporary and permanent slopes to confirm the slope inclinations are suitable for the exposed soil conditions and to provide additional excavation and slope recommendations, as necessary. If the recommended temporary slope inclinations cannot be achieved, temporary shoring may be necessary to support excavations.

In-situ and Imported Soil

The native soil encountered at the test pit explorations consists predominantly of poorly graded sand with less than 5 percent fines. The poorly graded sands are generally not sensitive to moisture, however zones of the sand with fines contents slightly below 5 percent may be slightly sensitive to moisture, particularly if grading occurs during periods of heavy precipitation. The silty sand encountered at test pit TP-8 and the poorly graded sand with silt encountered at test pit TP-2 are sensitive to moisture and will be difficult to utilize as structural fill during wet weather.

Successful use of the moisture sensitive on-site soil as structural fill will largely be dictated by the moisture content at the time of placement and compaction. Where moisture sensitive soils are used as structural fill, remedial measures may be necessary as part of site grading and earthwork activities. Remedial measures would include aeration or cement modification of the site soils in order to moisture-condition the targeted soils for use as structural fill.

Imported soil intended for use as structural fill should consist of a well-graded, granular soil with a moisture content that is at (or slightly above) the optimum level. During wet weather conditions, imported soil intended for use as structural fill should consist of a well-graded, granular soil with a fines content of 5 percent or less (where the fines content is defined as the percent passing the Number 200 sieve, based on the minus three-quarter-inch fraction).

Structural Fill

Structural fill is defined as compacted soil placed in foundation, slab-on-grade, roadway, permanent slope, retaining wall, and utility trench backfill areas. Structural fill placed and compacted during site grading activities should meet the following specifications and guidelines:

- Structural fill material — Granular soil*
- Moisture content — At or slightly above optimum**
- Relative compaction*** — 95 percent (Modified Proctor)
- Loose lift thickness (maximum) — 12 inches

* *Native soil may not be suitable for use as structural fill unless at (or slightly above) the optimum moisture content at the time of placement and compaction.*
** *Soil shall not be placed dry of optimum and should be evaluated by ESNW during construction.*
*** *Relative compaction of 90 percent can be considered for mass grading activities and should be evaluated by ESNW during construction.*

With respect to underground utility installations and backfill, local jurisdictions may dictate the soil type(s) and compaction requirements. Areas of otherwise unsuitable material and debris should be removed from structural areas and replaced with structural fill.

Foundations

After completing earthwork activities in accordance with recommendations in this report, the proposed structures can be supported on conventional spread and continuous foundations bearing on undisturbed, competent native soil, compacted native soil, or new structural fill. If structural building pads are prepared during wet weather, remediation measures such as cement treatment or overexcavation and replacement with rock may be necessary in some areas. If proposed structures will incorporate heavier loads than those stated in the *Project Description* section of this report, revised foundation support recommendations may be necessary.

Provided the structures will be supported as described above, the following parameters may be used for design of the new foundations:

- Allowable soil bearing capacity — 2,500 psf
- Passive earth pressure — 300 pcf
- Coefficient of friction — 0.40

A one-third increase in the allowable soil bearing capacity may be assumed for short-term wind and seismic loading conditions. The passive earth pressure and coefficient of friction values include a safety factor of 1.5. With structural loading as expected, total settlement in the range of one inch is anticipated, with differential settlement of about one-half inch. Most of the anticipated settlement should occur during construction as dead loads are applied.

Seismic Design

The 2018 International Building Code (2018 IBC) recognizes the most recent edition of the Minimum Design Loads for Buildings and Other Structures manual (ASCE 7-16) for seismic design, specifically with respect to earthquake loads. Based on the soil conditions encountered at the boring locations, the parameters and values provided below are recommended for seismic design per the 2018 IBC.

Parameter	**Value**
Site Class	D*
Mapped short period spectral response acceleration, S_S (*g*)	1.104
Mapped 1-second period spectral response acceleration, S_1 (*g*)	0.394
Short period site coefficient, F_a	1.058
Long period site coefficient, F_v	1.906**
Adjusted short period spectral response acceleration, S_{MS} (*g*)	1.168
Adjusted 1-second period spectral response acceleration, S_{M1} (*g*)	0.751**
Design short period spectral response acceleration, S_{DS} (*g*)	0.779
Design 1-second period spectral response acceleration, S_{D1} (*g*)	0.501**

* *Assumes medium dense native soil conditions, encountered to a maximum depth of 13 feet bgs during the March 2024 field exploration, remain medium dense or better to at least 100 feet bgs.*

** *Values assume F_v may be determined using linear interpolation per Table 11.4-2 in ASCE 7-16.*

As indicated in the table footnote, several of the seismic design values provided above are dependent on the assumption that site-specific ground motion analysis (per Section 11.4.8 of ASCE 7-16) will not be required for the subject project. Further discussion between the project structural engineer, the project owner, and ESNW may be prudent to determine the possible impacts to the structural design due to increased earthquake load requirements under the 2018 IBC. ESNW can provide additional consulting services to aid with design efforts, including supplementary geotechnical and geophysical investigation, upon request.

Liquefaction is a phenomenon where saturated or loose soil suddenly loses internal strength and behaves as a fluid. This behavior is in response to increased pore water pressures resulting from an earthquake or another intense ground shaking. Based on the findings of the subsurface investigation and the referenced Marysville critical areas map, site susceptibility to liquefaction is characterized as low. The relative density of the native soil and the lack of a shallow established groundwater table is the primary bases for this opinion.

Slab-on-Grade Floors

Slab-on-grade floors for the proposed structures should be supported on firm and unyielding subgrades. Unstable or yielding subgrade areas should be recompacted or overexcavated and replaced with suitable structural fill prior to slab construction.

A capillary break consisting of a minimum of four inches of free-draining crushed rock or gravel should be placed below each slab. The free-draining material should have a fines content of 5 percent or less (percent passing the Number 200 sieve, based on the minus three-quarter-inch fraction). In areas where slab moisture is undesirable, installation of a vapor barrier below the slab should be considered. If a vapor barrier is to be utilized, it should be a material specifically designed for use as a vapor barrier and should be installed per manufacturer specifications.

Retaining Walls

Retaining walls must be designed to resist earth pressures and applicable surcharge loads. Retaining wall subgrade must be prepared in the same fashion as is recommended within the “Foundations” section of this report. The following parameters may be used for design:

- Active earth pressure (unrestrained condition) — 35 pcf (equivalent fluid)
- At-rest earth pressure (restrained condition) — 55 pcf
- Traffic surcharge* (passenger vehicles) — 70 psf (rectangular distribution)
- Passive earth pressure — 300 pcf (equivalent fluid)
- Coefficient of friction — 0.40
- Seismic surcharge — 8H psf**
- Allowable soil bearing capacity — 2,500 psf

* *Where applicable.*
** *Where H equals the retained height (in feet).*

The above passive earth pressure and coefficient of friction values include a safety factor of 1.5 and are based on a level backfill condition and level grade at the wall toe. Revised design values will be necessary if sloping grades are to be used above or below retaining walls. Additional surcharge loading from adjacent foundations, sloped backfill, or other relevant loads should be included in the retaining wall design.

Retaining walls should be backfilled with free-draining material that extends along with the height of the wall and a distance of at least 18 inches behind the wall. The upper 12 inches of the wall backfill may consist of less permeable soil if desired. A sheet drain may be considered instead of free-draining backfill. A perforated drainpipe should be placed along the base of the wall and connected to an approved discharge location. A typical retaining wall drainage detail is provided on Plate 3. If drainage is not provided, hydrostatic pressures should be included in the wall design.

Drainage

Groundwater seepage may be encountered within site excavations, particularly utility excavations. Temporary measures to control surface water runoff and groundwater seepage during construction will be critical to minimizing the potential for on-site soils to degrade. ESNW should be consulted during preliminary grading to identify areas of seepage and provide recommendations to reduce the potential for seepage-related instability.

Finish grades must be designed to direct surface drain water away from structures and slopes. Water must not be allowed to pond adjacent to structures or slopes. Grades adjacent to buildings should be sloped away from the buildings at a gradient of either at least 2 percent for a horizontal distance of 10 feet or the maximum allowed by adjacent structures. In our opinion, foundation drains should be installed along building perimeter footings. A typical foundation drain detail is provided on Plate 4. Foundation drains may be omitted on a lot-by-lot basis if native, clean sands are exposed at the foundation subgrade elevations. ESNW should be contacted to confirm the presence of acceptable soil conditions before footing drains for a specific lot are omitted.

Infiltration Evaluation

ESNW completed two small-scale Pilot Infiltration Tests (PITs) in a landscaped area within the proposed stormwater management location to evaluate the feasibility of on-site infiltration BMPs from a geotechnical standpoint. The small-scale PITs were completed in general accordance with the Department of Ecology Stormwater Management Manual for Western Washington, as adopted by the City of Marysville in Chapter 14.15.015 of the MMC. The PITs were completed at depths of roughly three feet and five feet bgs within test pits TP-10 and TP-14, respectively. The measured infiltration rates at the test locations and the corresponding correction factors can be found below:

Test Pit ID	Test Depth	K_{sat} initial	CF_V	CF_T	CF_M	K_{sat} design
TP-10	3.0 ft	73 in/hr	0.9	0.5	0.9	29.57 in/hr
TP-14	5.0 ft	100 in/hr	0.9	0.5	0.9	40.5 in/hr

In our opinion, based on the results of in-situ infiltration testing, a long-term design infiltration rate of **20 inches per hour** can be assigned to the subject site. This infiltration rate takes into account the potential for variability of the site soils within specific infiltration areas of the site. It should be noted that our subsurface investigation was completed to a maximum depth of 13 feet bgs. ESNW should be notified if any stormwater management systems are proposed to be installed deeper than 10 feet bgs, as additional subsurface information may be necessary to ensure that a minimum vertical separation from any potential impervious surfaces.

Preliminary Pavement Sections

The performance of site pavements is largely related to the condition of the underlying subgrade. To ensure adequate pavement performance, the subgrade should be in a firm and unyielding condition when subjected to proofrolling with a loaded dump truck. Structural fill in pavement areas should be compacted to the specifications previously detailed in this report. Soft, wet, or otherwise unsuitable subgrade areas may still exist after base grading activities. Areas containing unsuitable or yielding subgrade conditions will require remedial measures, such as overexcavation and/or placement of thicker crushed rock or structural fill sections, prior to pavement.

We anticipate new pavement sections will be subjected primarily to passenger vehicle traffic. For lightly loaded pavement areas subjected primarily to passenger vehicles, the following preliminary pavement sections may be considered:

- A minimum of two inches of hot-mix asphalt (HMA) placed over four inches of crushed rock base (CRB).

- A minimum of two inches of HMA placed over three inches of asphalt-treated base (ATB).

Heavier traffic areas generally require thicker pavement sections depending on site usage, pavement life expectancy, and site traffic. For preliminary design purposes, the following pavement sections for pavement areas subjected to occasional truck traffic may be considered:

- Three inches of HMA placed over six inches of CRB, or;

- Three inches of HMA placed over four and one-half inches of ATB.

The HMA, ATB, and CRB materials should conform to WSDOT and/or the City of Marysville specifications. All soil base material should be compacted to a relative compaction of 95 percent, based on the laboratory maximum dry density as determined by ASTM D1557. Final pavement design recommendations, including recommendations for heavy traffic areas, access roads, and frontage improvement areas, can be provided once final traffic loading has been determined. Road standards utilized by the City of Marysville may supersede the recommendations provided in this report.

If an inverted crown will be used for roadway surfaces, drainage measures should be included in the design to prevent accumulation of water in the subgrade adjacent to catch basins. Such measures can consist of finger drains extending from the catch basins.

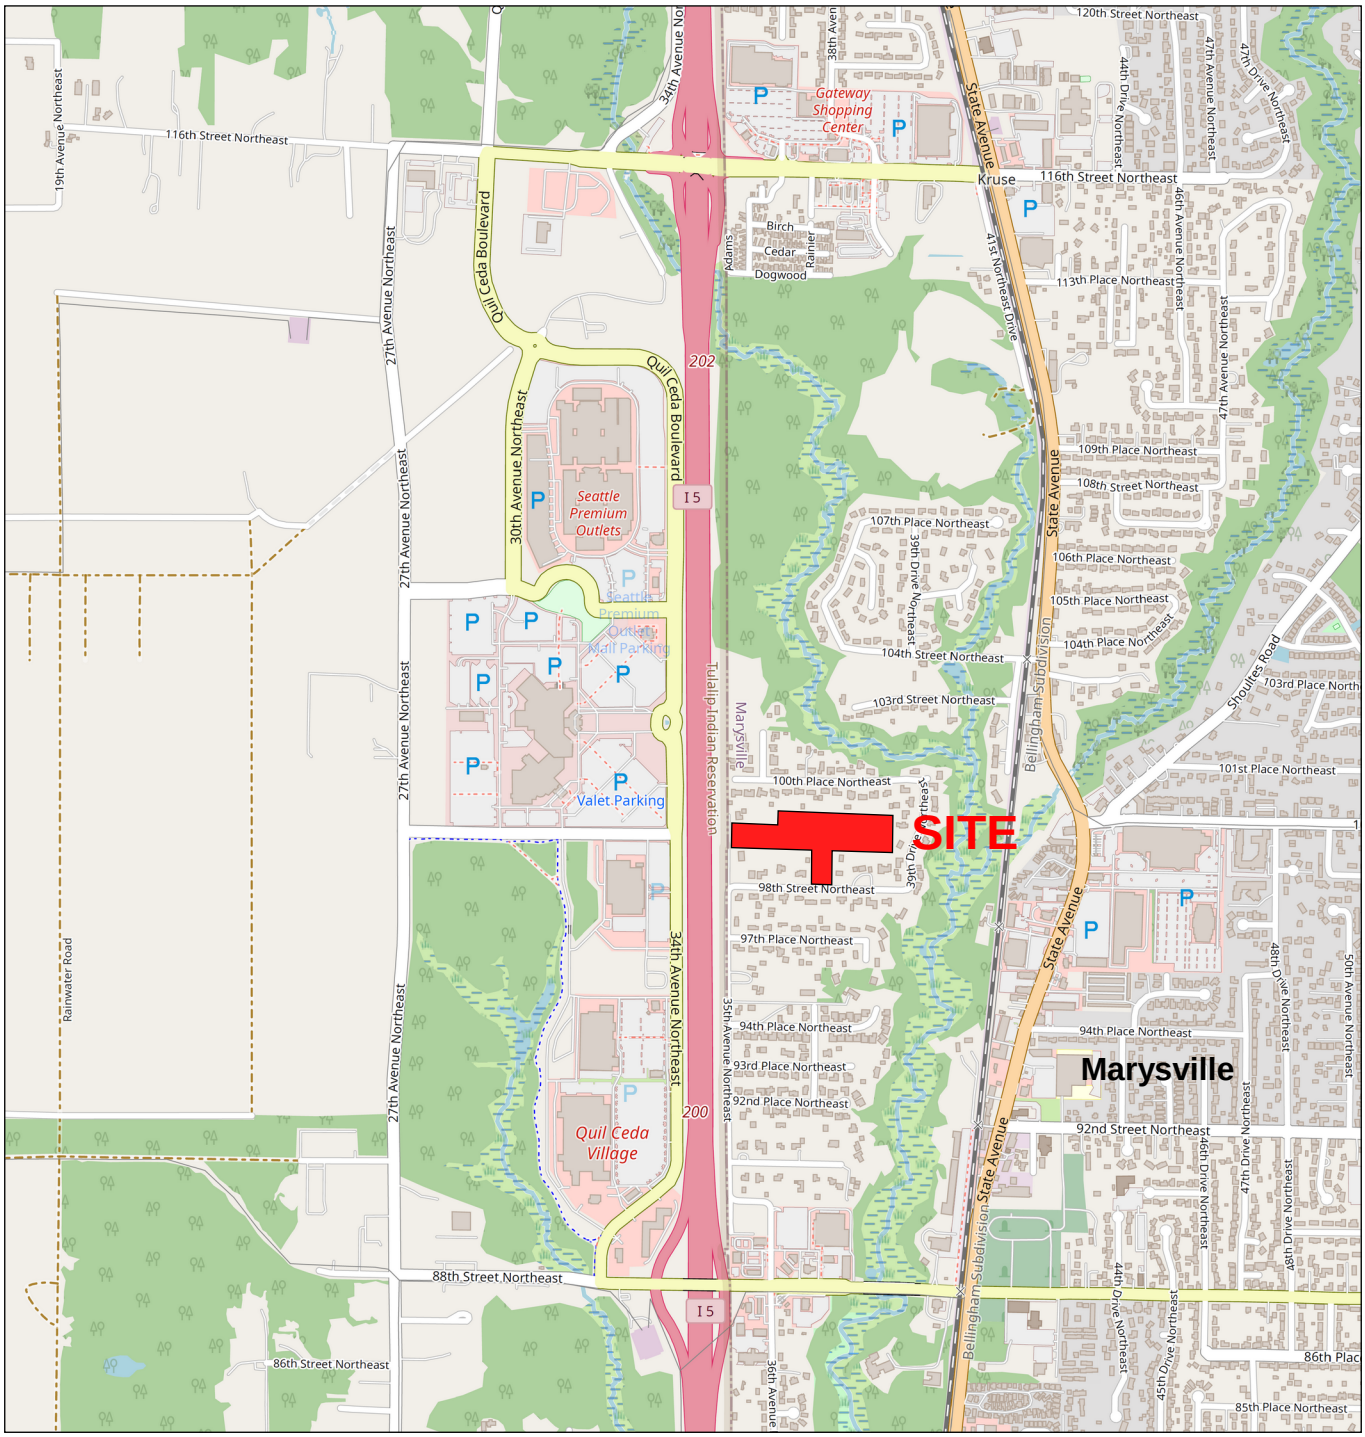
Utility Support and Trench Backfill

In our opinion, the on-site soil will generally be suitable for support of utilities, however, some areas of existing fill may be unsuitable in the current condition. Remedial measures may be necessary in some areas to provide support for utilities, such as overexcavation and replacement with structural fill or placement of geotextile fabric. Groundwater seepage may be encountered within utility excavations, and caving of trench walls may occur where groundwater or unsuitable fill are encountered.

The native soil may not be suitable for use as structural backfill throughout utility trench excavations unless the soil is at (or slightly above) the optimum moisture content at the time of placement and compaction. Moisture conditioning of the soil may be necessary at some locations prior to use as structural fill. Each section of the utility lines must be adequately supported in the bedding material. Utility trench backfill should be placed and compacted to the structural fill specifications previously detailed in this report or to the applicable specifications of the presiding jurisdiction.

LIMITATIONS

This study has been prepared for the exclusive use of KB Home, LLC, and its representatives. The recommendations and conclusions provided in this study are professional opinions consistent with the level of care and skill that is typical of other members in the profession currently practicing under similar conditions in this area. No warranty, express or implied, is made. Variations in the subsurface conditions observed at the test locations may exist and may not become evident until construction. ESNW should reevaluate the conclusions provided in this study if variations are encountered.



Additional Services

ESNW should have an opportunity to review the final design with respect to the geotechnical recommendations provided in this report. ESNW should also be retained to provide testing and consultation services during construction.

Subsurface Exploration Logs

ES-9772

Subsurface conditions at the subject site were explored on March 13, 2024, and May 15, 2024. A total of 15 test pits were excavated using equipment and operators retained by ESNW. The approximate locations of the explorations are illustrated on Plate 2 of this study. The test pit logs are provided in this Appendix. The maximum exploration depth was approximately 13 feet bgs.

The final logs represent the interpretations of the field logs and the results of laboratory analyses. The stratification lines on the logs represent the approximate boundaries between soil types. In actuality, the transitions may be more gradual.

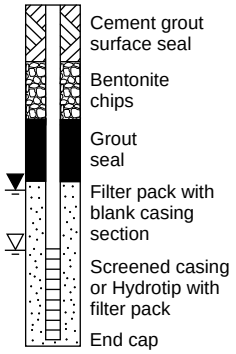
Coarse-Grained Soils - More Than 50% Retained on No. 200 Sieve	Gravels - More Than 50% of Coarse Fraction Retained on No. 4 Sieve	< 5% Fines	GW	Well-graded gravel with or without sand, little to no fines
			GP	Poorly graded gravel with or without sand, little to no fines
		> 12% Fines	GM	Silty gravel with or without sand
			GC	Clayey gravel with or without sand
	Sands - 50% or More of Coarse Fraction Passes No. 4 Sieve	< 5% Fines	SW	Well-graded sand with or without gravel, little to no fines
			SP	Poorly graded sand with or without gravel, little to no fines
		> 12% Fines	SM	Silty sand with or without gravel
			SC	Clayey sand with or without gravel
Fine-Grained Soils - 50% or More Passes No. 200 Sieve	Silts and Clays Liquid Limit Less Than 50		ML	Silt with or without sand or gravel; sandy or gravelly silt
			CL	Clay of low to medium plasticity; lean clay with or without sand or gravel; sandy or gravelly lean clay
			OL	Organic clay or silt of low plasticity
	Silts and Clays Liquid Limit 50 or More		MH	Elastic silt with or without sand or gravel; sandy or gravelly elastic silt
			CH	Clay of high plasticity; fat clay with or without sand or gravel; sandy or gravelly fat clay
			OH	Organic clay or silt of medium to high plasticity
Highly Organic Soils			PT	Peat, muck, and other highly organic soils
Fill			FILL	Made Ground

Moisture Content

Dry - Absence of moisture, dusty, dry to the touch

Damp - Perceptible moisture, likely below optimum MC

Moist - Damp but no visible water, likely at/near optimum MC



Wet - Water visible but not free draining, likely above optimum MC

Saturated/Water Bearing - Visible free water, typically below groundwater table

Terms Describing Relative Density and Consistency

Coarse-Grained Soils:

Density	SPT blows/foot
Very Loose	< 4
Loose	4 to 9
Medium Dense	10 to 29
Dense	30 to 49
Very Dense	≥ 50

Fine-Grained Soils:

Consistency	SPT blows/foot
Very Soft	< 2
Soft	2 to 3
Medium Stiff	4 to 7
Stiff	8 to 14
Very Stiff	15 to 29
Hard	≥ 30

Test Symbols & Units

Fines = Fines Content (%)

MC = Moisture Content (%)

DD = Dry Density (pcf)

Str = Shear Strength (tsf)

PID = Photoionization Detector (ppm)

OC = Organic Content (%)

CEC = Cation Exchange Capacity (meq/100 g)

LL = Liquid Limit (%)

PL = Plastic Limit (%)

PI = Plasticity Index (%)

Component Definitions

Descriptive Term	Size Range and Sieve Number
Boulders	Larger than 12"
Cobbles	3" to 12"
Gravel	3" to No. 4 (4.75 mm)
Coarse Gravel	3" to 3/4"
Fine Gravel	3/4" to No. 4 (4.75 mm)
Sand	No. 4 (4.75 mm) to No. 200 (0.075 mm)
Coarse Sand	No. 4 (4.75 mm) to No. 10 (2.00 mm)
Medium Sand	No. 10 (2.00 mm) to No. 40 (0.425 mm)
Fine Sand	No. 40 (0.425 mm) to No. 200 (0.075 mm)
Silt and Clay	Smaller than No. 200 (0.075 mm)

Modifier Definitions

Percentage by Weight (Approx.)	Modifier
< 5	Trace (sand, silt, clay, gravel)
5 to 14	Slightly (sandy, silty, clayey, gravelly)
15 to 29	Sandy, silty, clayey, gravelly
≥ 30	Very (sandy, silty, clayey, gravelly)

Classifications of soils in this geotechnical report and as shown on the exploration logs are based on visual field and/or laboratory observations, which include density/consistency, moisture condition, grain size, and plasticity estimates, and should not be construed to imply field or laboratory testing unless presented herein. Visual-manual and/or laboratory classification methods of ASTM D2487 and D2488 were used as an identification guide for the Unified Soil Classification System.

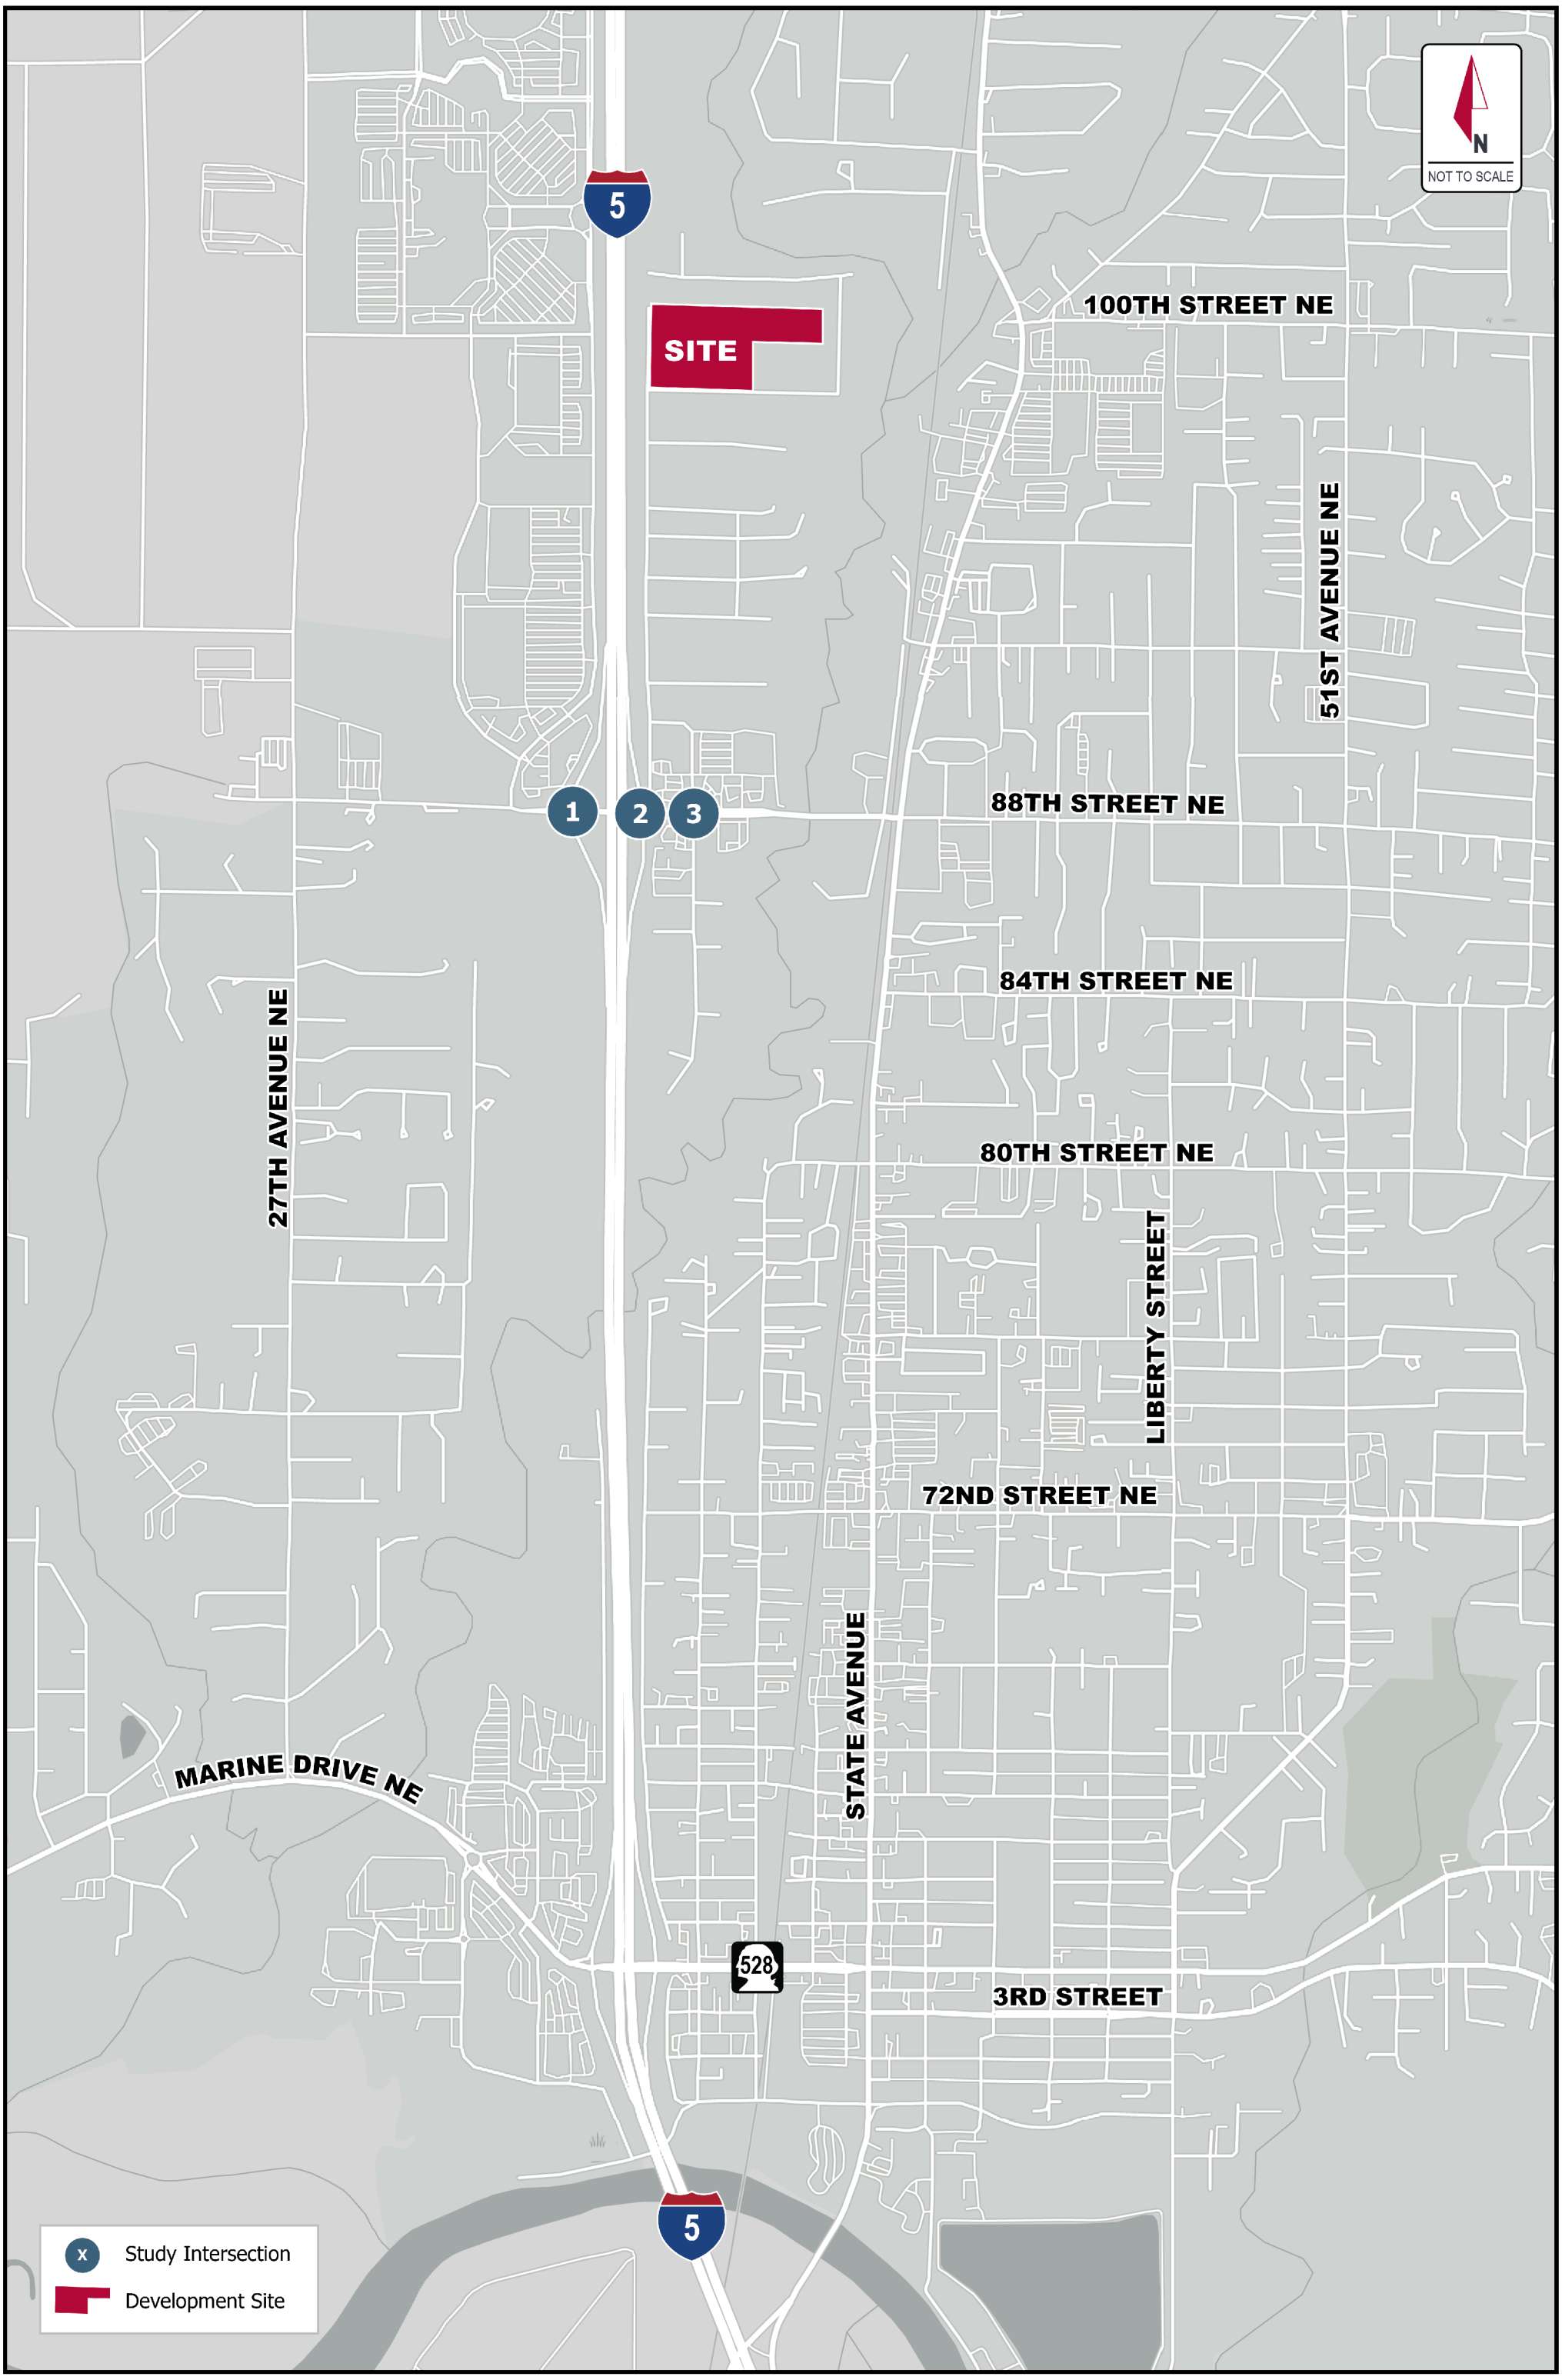
1. DEVELOPMENT IDENTIFICATION



Kimley-Horn and Associates, Inc. (Kimley-Horn) has been retained to provide a traffic impact analysis for the Stevens Assemblage Development (Development). This report is intended to provide the City of Marysville (City) and Snohomish County (County) with the necessary traffic generation, trip distribution, and mitigation fee determination to facilitate their reviews of the Development. The Development is located along 98th Street NE and 35th Avenue NE, on parcels 30051600305800, 30051600301400, 30051600304500, 30051600301500, 30051600301600, 30051600306500, and 30051600306600. A site vicinity map is included in **Figure 1**. The Development is proposed to consist of 59 single-family detached residential units. Five of the seven parcels are currently listed as occupied with single-family detached residential units per the *Snohomish County Online Property Information (SCOPI)* web map. The site will primarily access the City street network via 98th Street NE and the extension of 35th Avenue NE.

Brad Lincoln, responsible for this report and traffic analysis, is a licensed professional engineer (Civil) in the State of Washington and member of the Washington State section of the Institute of Transportation Engineers (ITE).

2. METHODOLOGY

2.1. General

Trip generation calculations for the Development have been performed using data contained in the ITE's *Trip Generation Manual, 11th Edition (2021)*. The distribution of trips generated by the site is based on discussions with City staff and adjustments to nearest City trip distribution. The City has an interlocal agreement with Snohomish County (County) that provides for reciprocal mitigation fees. County mitigation fees can be calculated based on the default percentage in the interlocal agreement, which is 70%, or based on actual impacts. The City also has an interlocal agreement with the Washington State Department of Transportation (WSDOT) that provides for mitigation fees to WSDOT for impacts to WSDOT improvement projects. WSDOT improvement projects and their associated fees are based on the most recent Exhibit C list. City developments are required to pay for any WSDOT improvement project on the Exhibit C list impacted with three or more directional PM peak-hour trips or based on the area wide mitigation fee.

Kimley»Horn

FIGURE 1: SITE VICINITY MAP

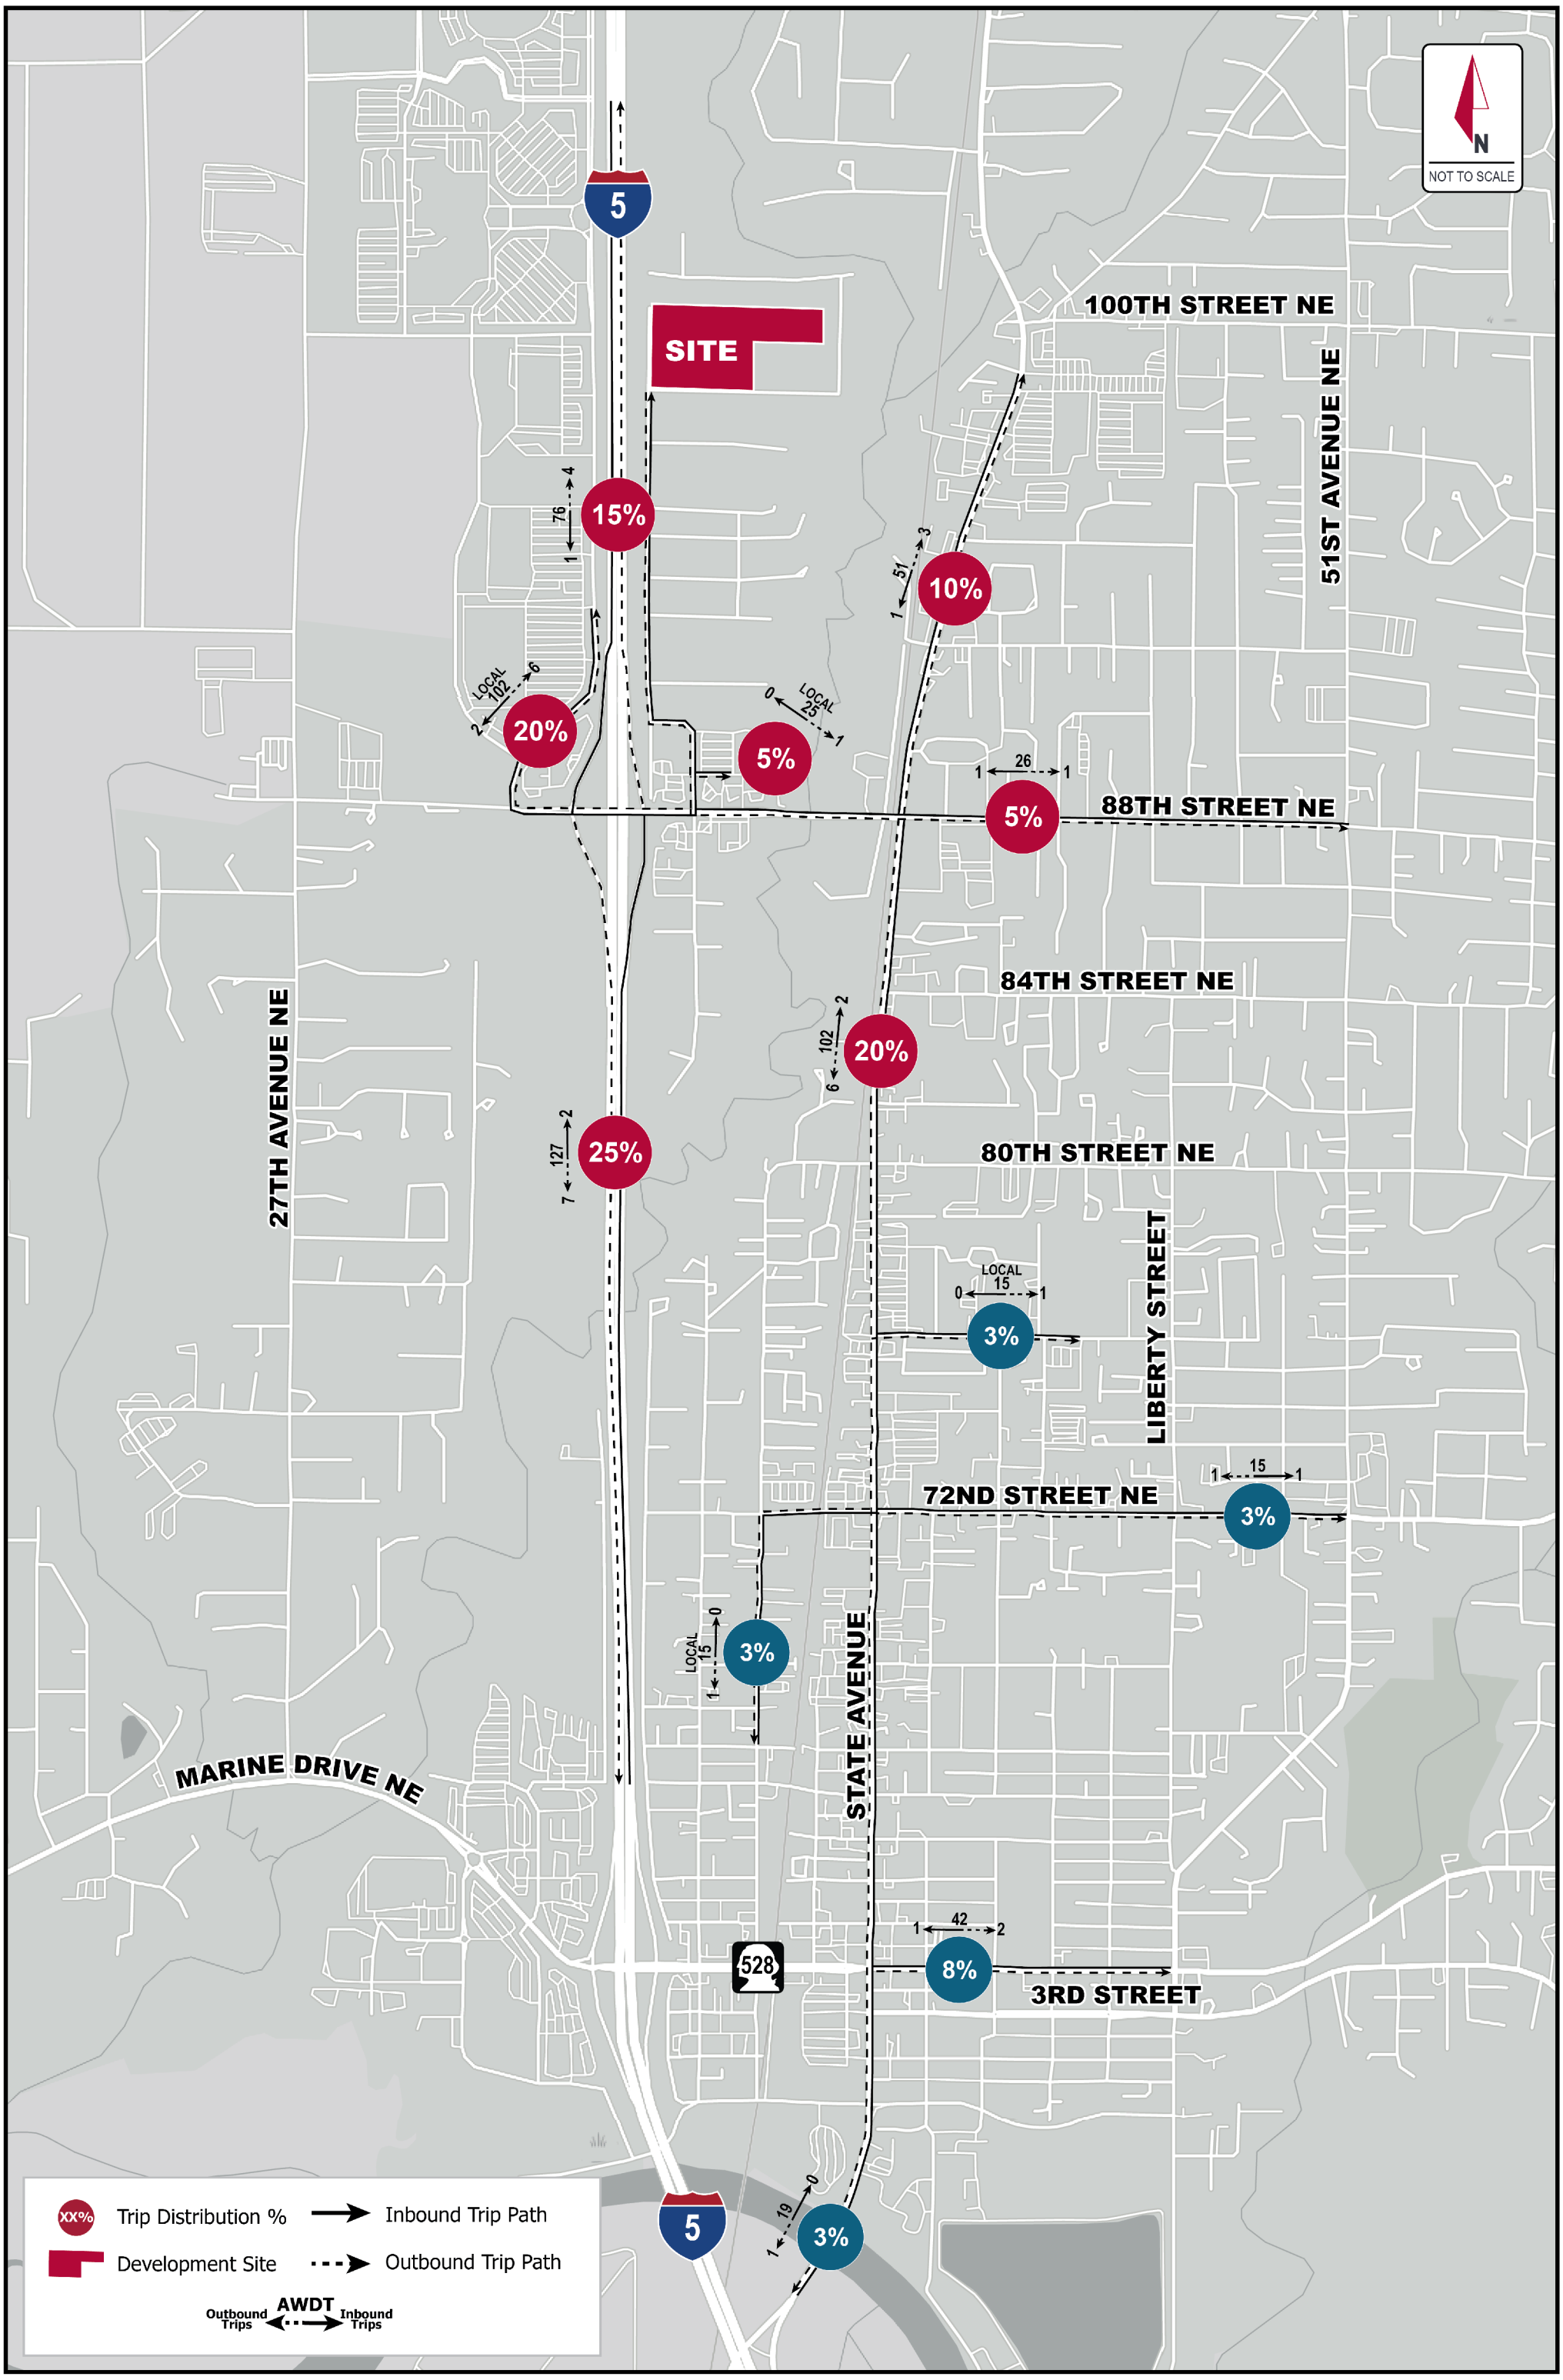
STEVENS ASSEMBLAGE - CITY OF MARYSVILLE, WA (KH 090224004)

3. TRIP GENERATION

The Development is proposed to consist of 59 single-family detached units. The site is currently developed with five single-family detached residential units that will be removed during construction. The trip generation calculations have been performed using data published by the ITE *Trip Generation Manual, 11st Edition* (*2021*) and the City rate of 1.0 PM peak-hour trips per single-family residential unit. The average trip generation rates for ITE Land Use Codes (LUC) 210, Single-Family Detached Housing, have been used for the daily and AM peak-hour trip generation calculations. The trip generation calculations for the Development are summarized in **Table 1**.

Table 1: Trip Generation Summary

Land Use	Size	Average Daily Trips (ADTs)	AM Peak-Hour Trips			PM Peak-Hour Trips		
			In	Out	Total	In	Out	Total
Single-Family Detached Housing ITE LUC 210	59 Units	556	10	31	41	37	22	59
Single-Family Detached Housing ITE LUC 210 (Removed)	-5 Units	-47	-1	-3	-4	-3	-2	-5
TOTAL		**509**	**9**	**28**	**37**	**34**	**20**	**54**

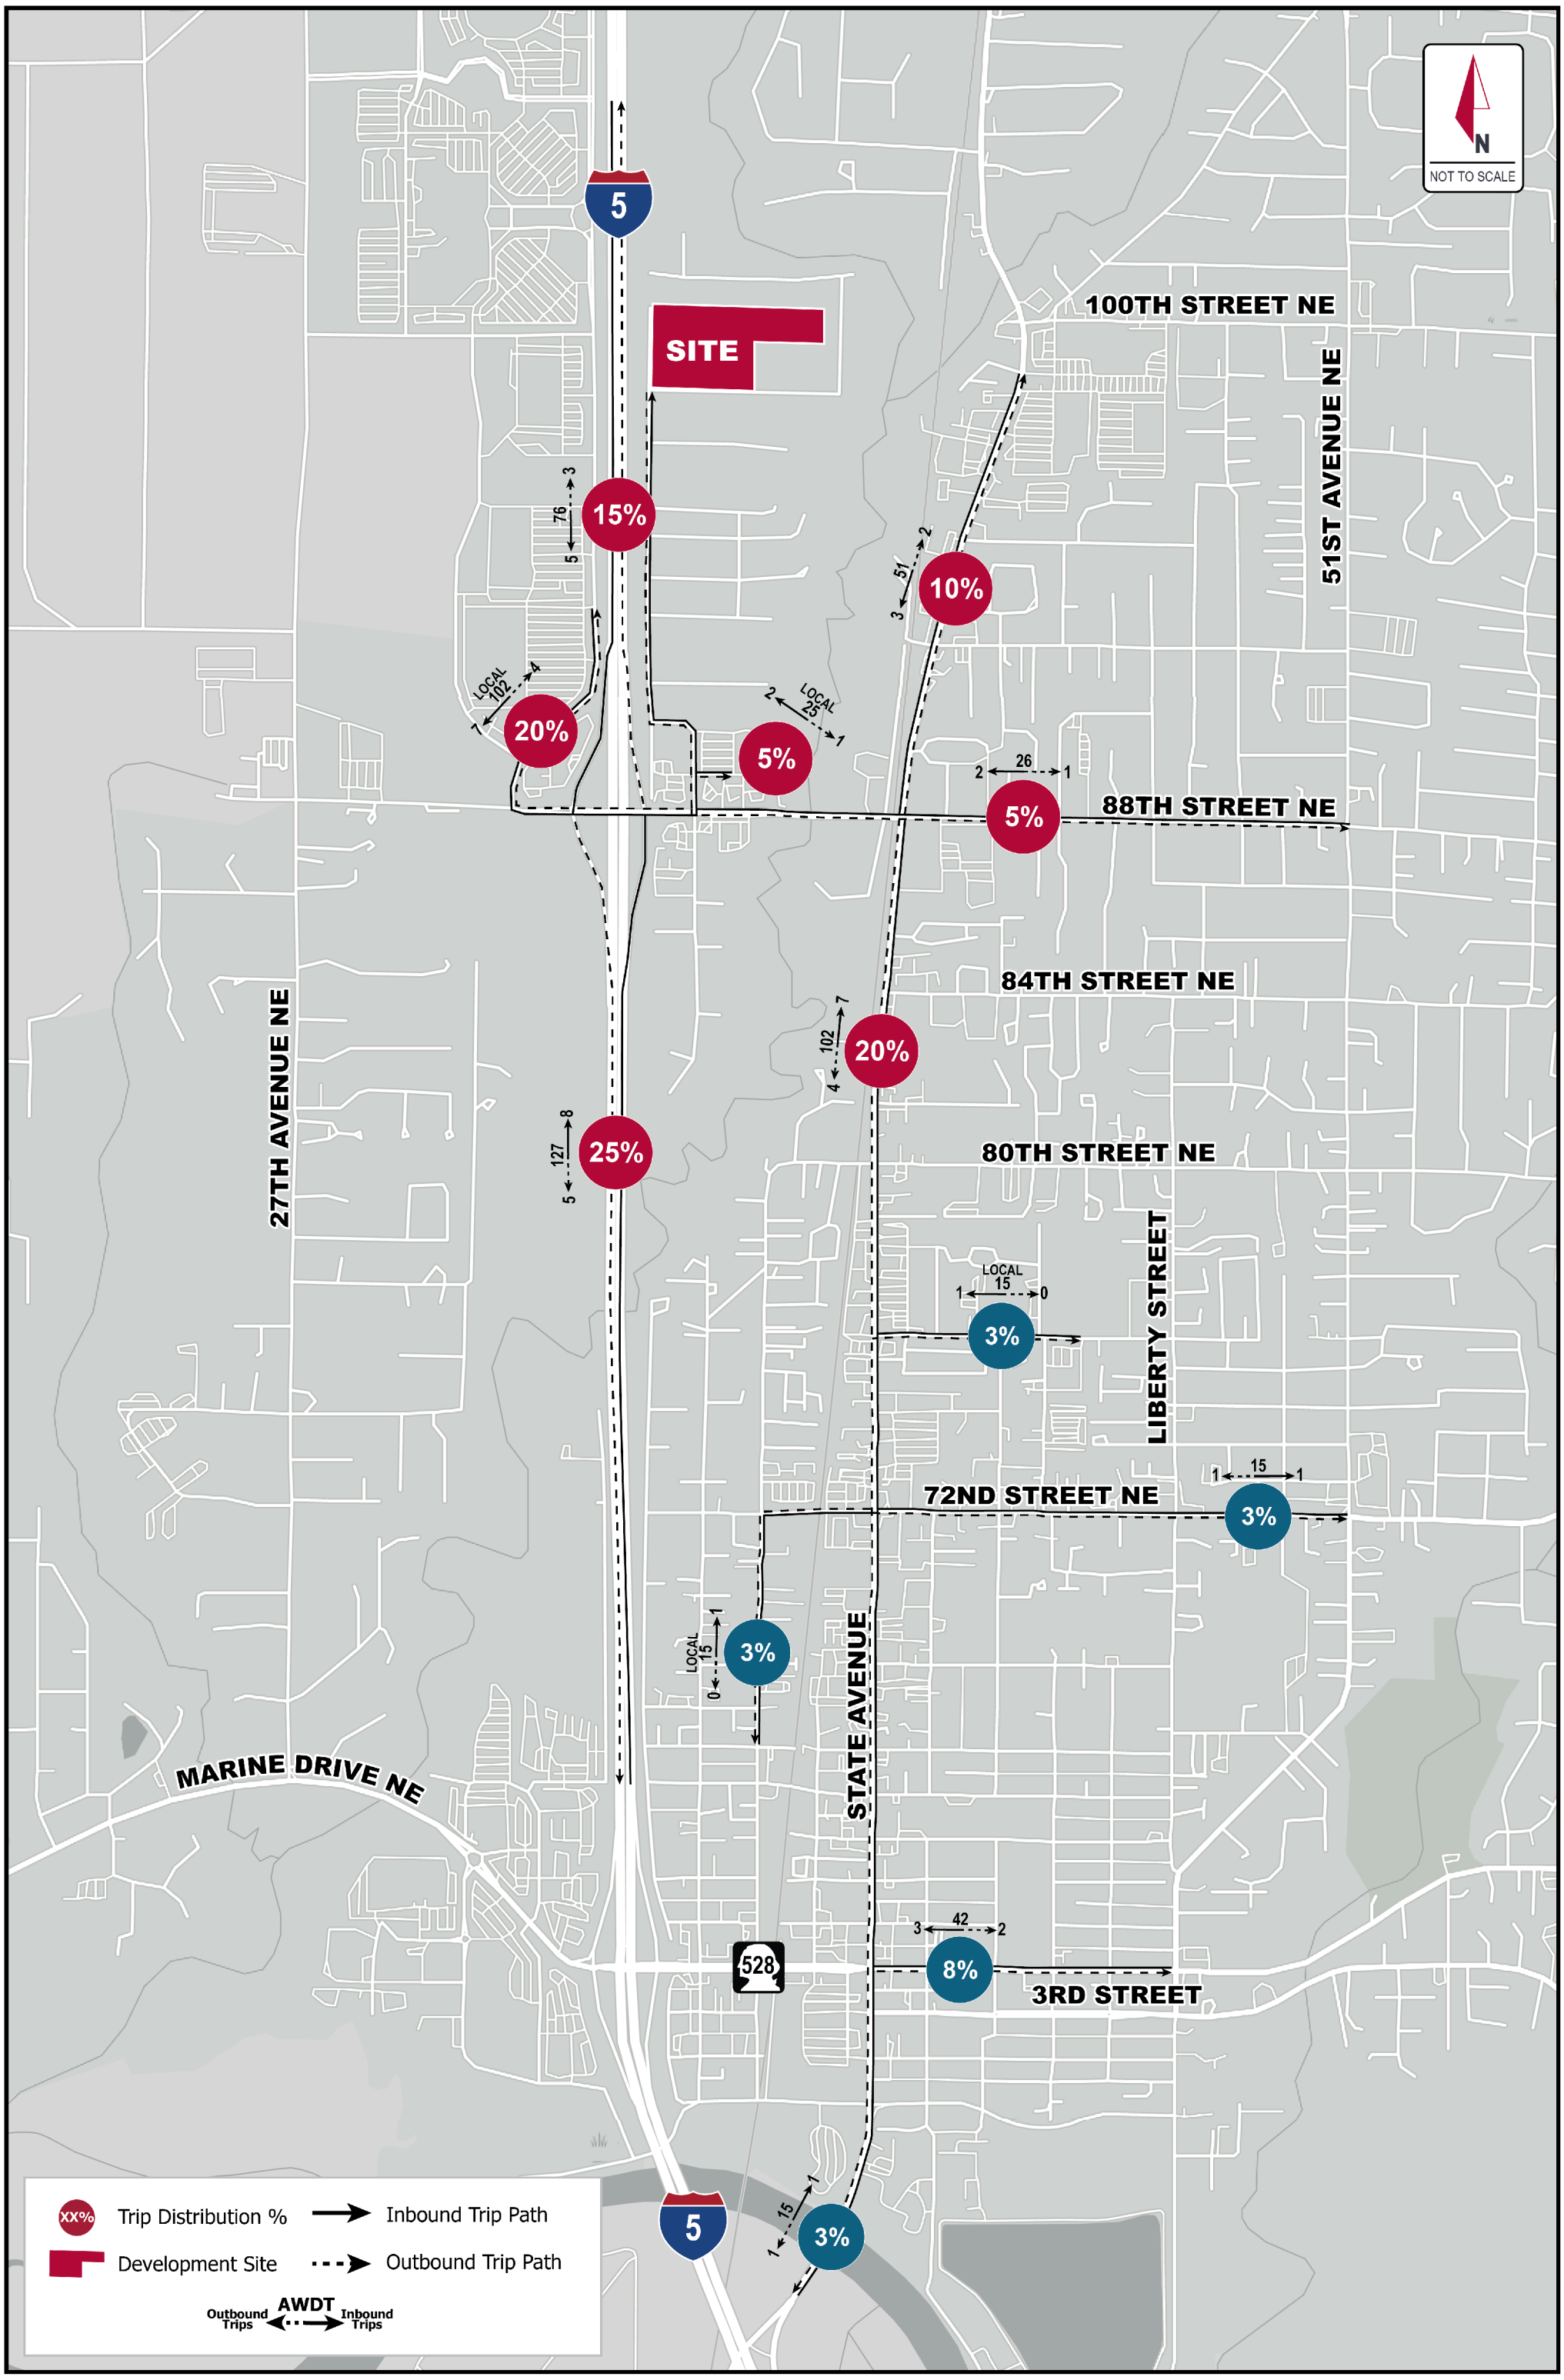


The Development is anticipated to generate approximately 509 new ADTs with approximately 37 new AM peak-hour trips and 54 new PM peak-hour trips. The trip generation calculations are provided in **Appendix A**.

4. TRIP DISTRIBUTION

The trip distribution for the Development has been modified from the 88th Street NE City distribution maps based on the location and type of the development, surrounding land uses, and the surrounding street network. A preliminary review of the trip distribution was discussed and confirmed by City staff. The trip distribution for the 2024 existing, 2027 opening year, and 2033 horizon year will remain the same. The trip distribution for the Development is:

- 25% to and from the south along I-5
- 20% to and from the south along State Avenue
- 20% to and from the west along 34th Avenue NE
- 15% to and from the north along Interstate-5
- 10% to and from the north along State Avenue
- 5% to and from the east along 88th Street NE
- 5% to and from local commercial uses south of the site



Detailed trip distributions for the AM and PM peak-hours during opening and horizon year conditions are shown in **Figure 2** and **Figure 3**, respectively. The established distributions are provided in **Appendix B**.

Kimley»Horn

FIGURE 2: DEVELOPMENT YEAR TRIP DISTRIBUTION - AM PEAK HOUR

Kimley»Horn

FIGURE 3: DEVELOPMENT TRIP DISTRIBUTION - PM PEAK HOUR

STEVENS ASSEMBLAGE - CITY OF MARYSVILLE, WA (KH 090224004)

5. INTERSECTION LEVEL OF SERVICE ANALYSIS

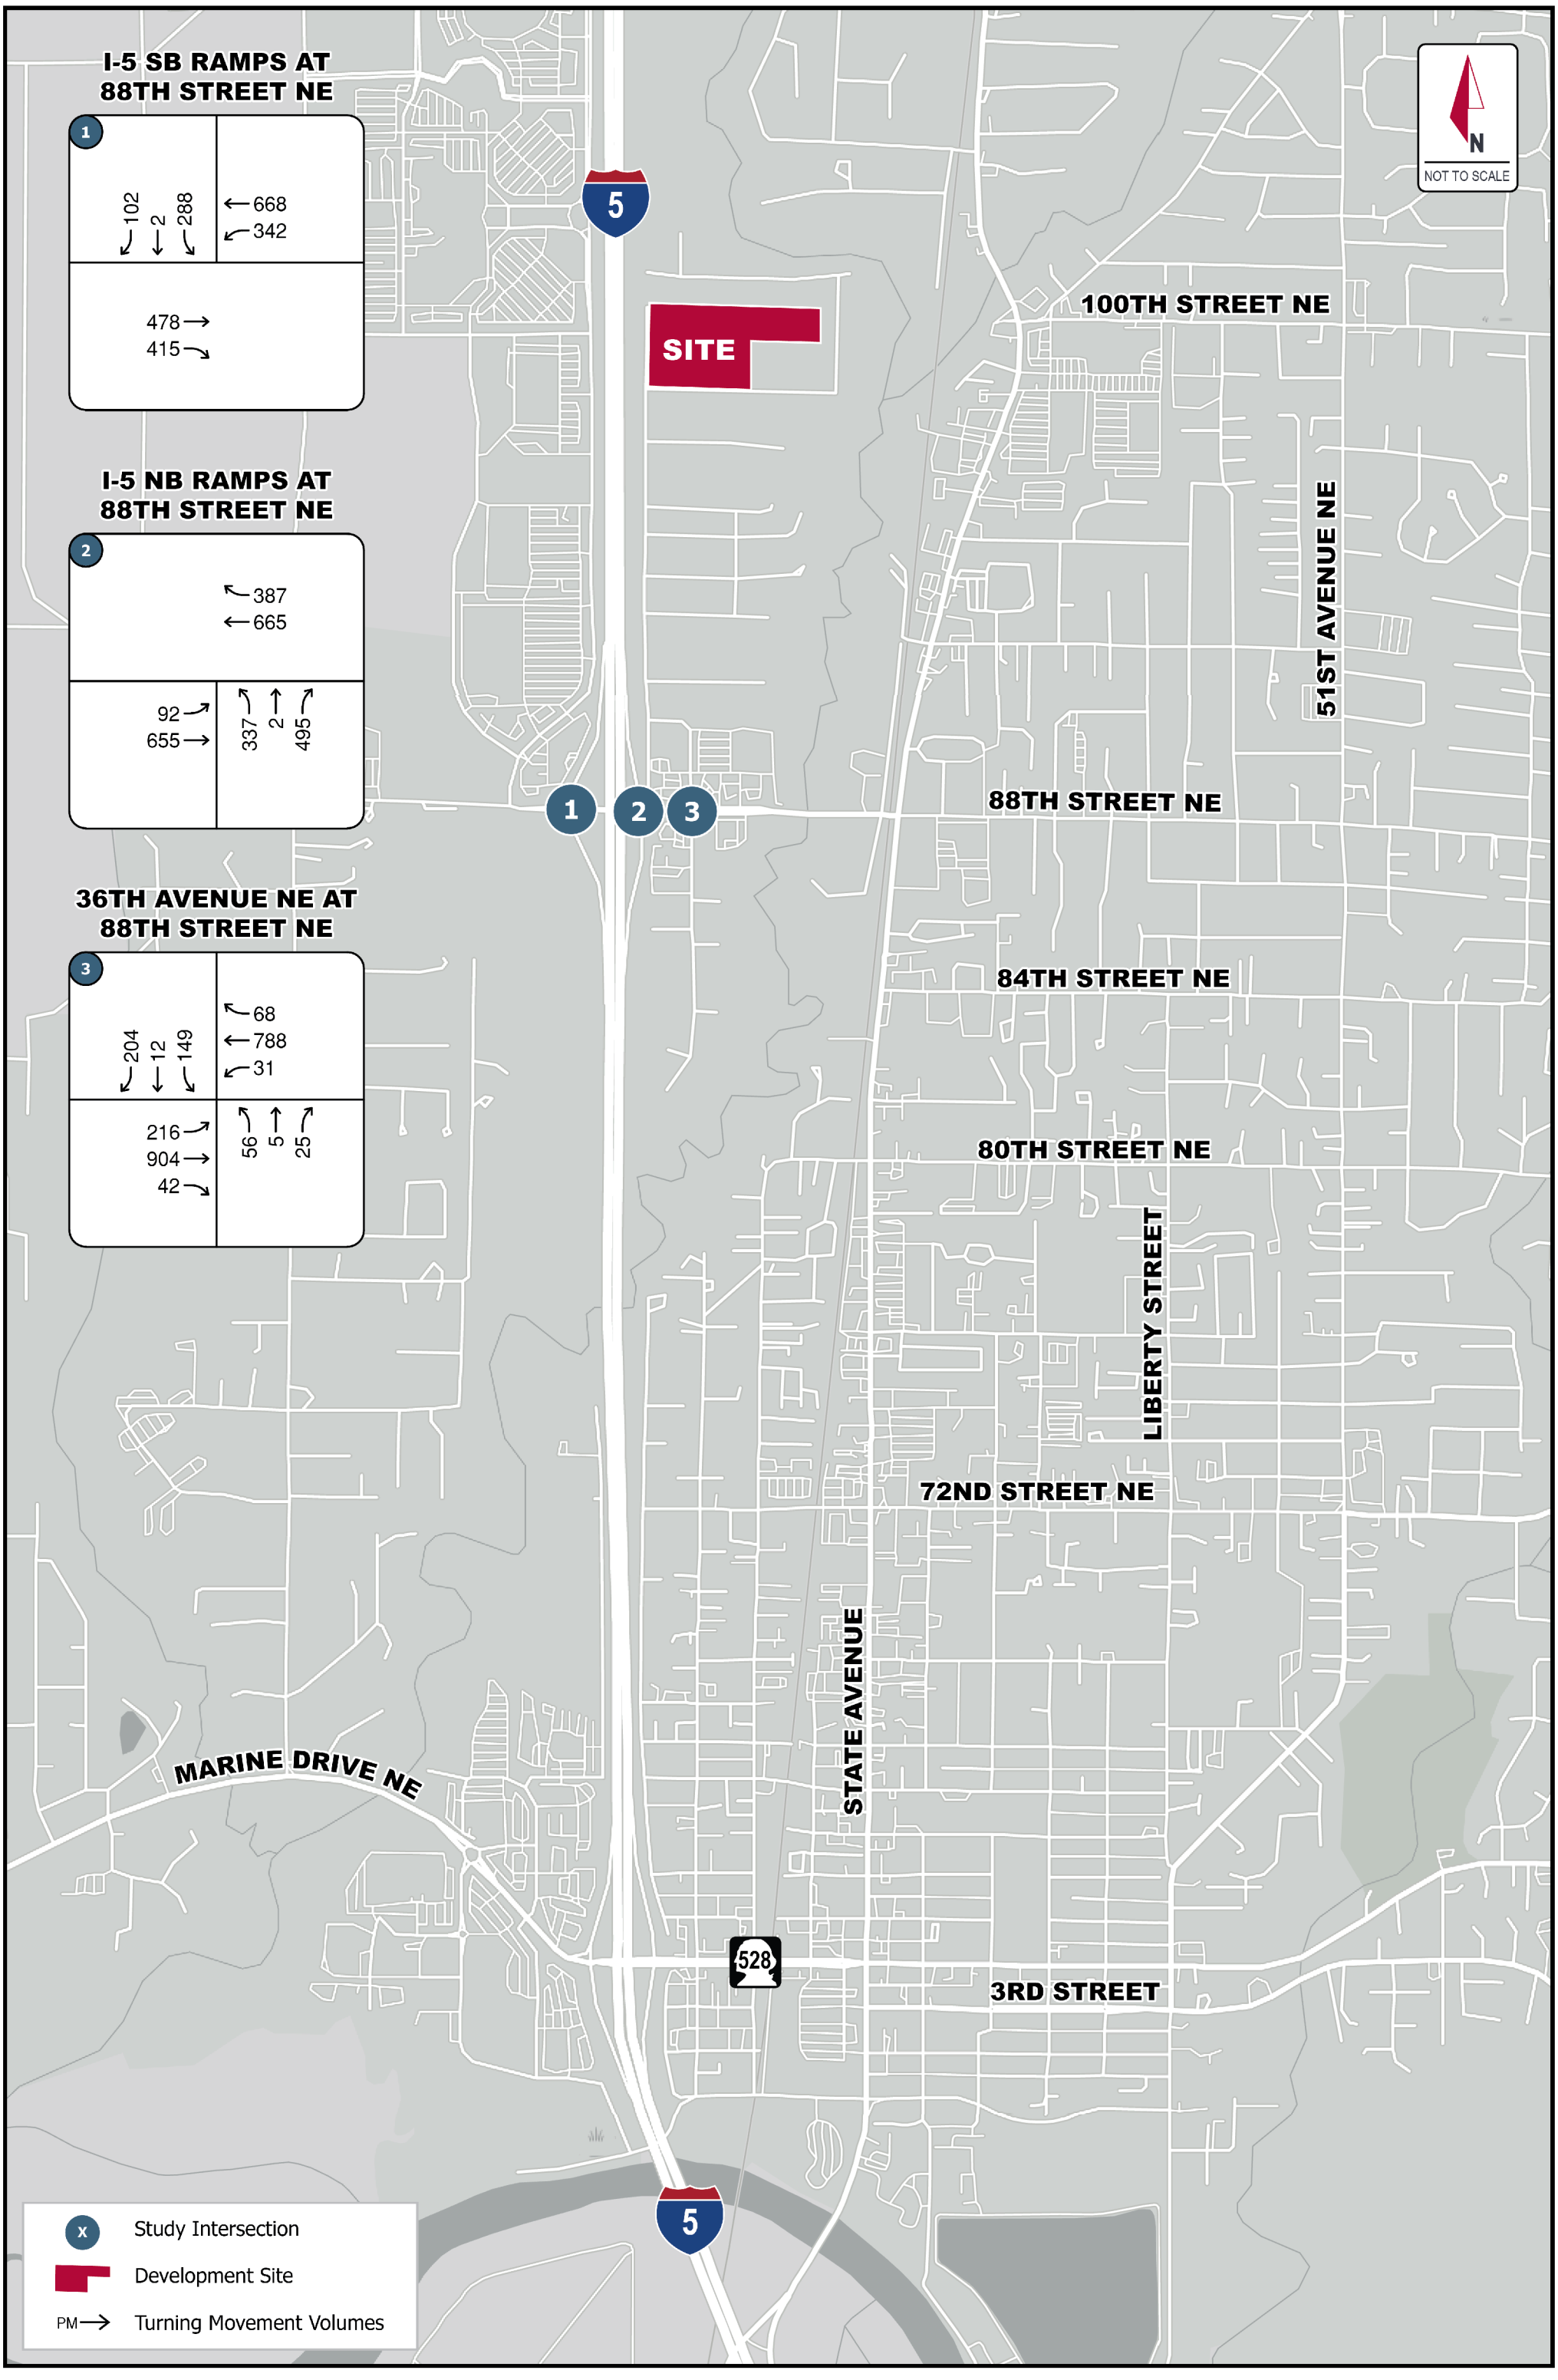
The following intersections have been analyzed based on an impact of 25 trips generated by the Development:

1. I-5 southbound on/off ramps at 88th Street NE
2. I-5 northbound on/off ramps at 88th Street NE
3. 36th Avenue NE at 88th Street NE

Study intersections have been coordinated and confirmed with City staff. The study intersections have been analyzed during the weekday PM peak-hour.

The County requires detailed development trip turning movement data at County key intersections impacted with three or more directional trips on an approach or departure. There are no County key intersections that are anticipated to be impacted by three directional peak-hour trips from the Development. Detailed key intersection impacts have therefore not been shown.

5.1. Turning Movement Calculations

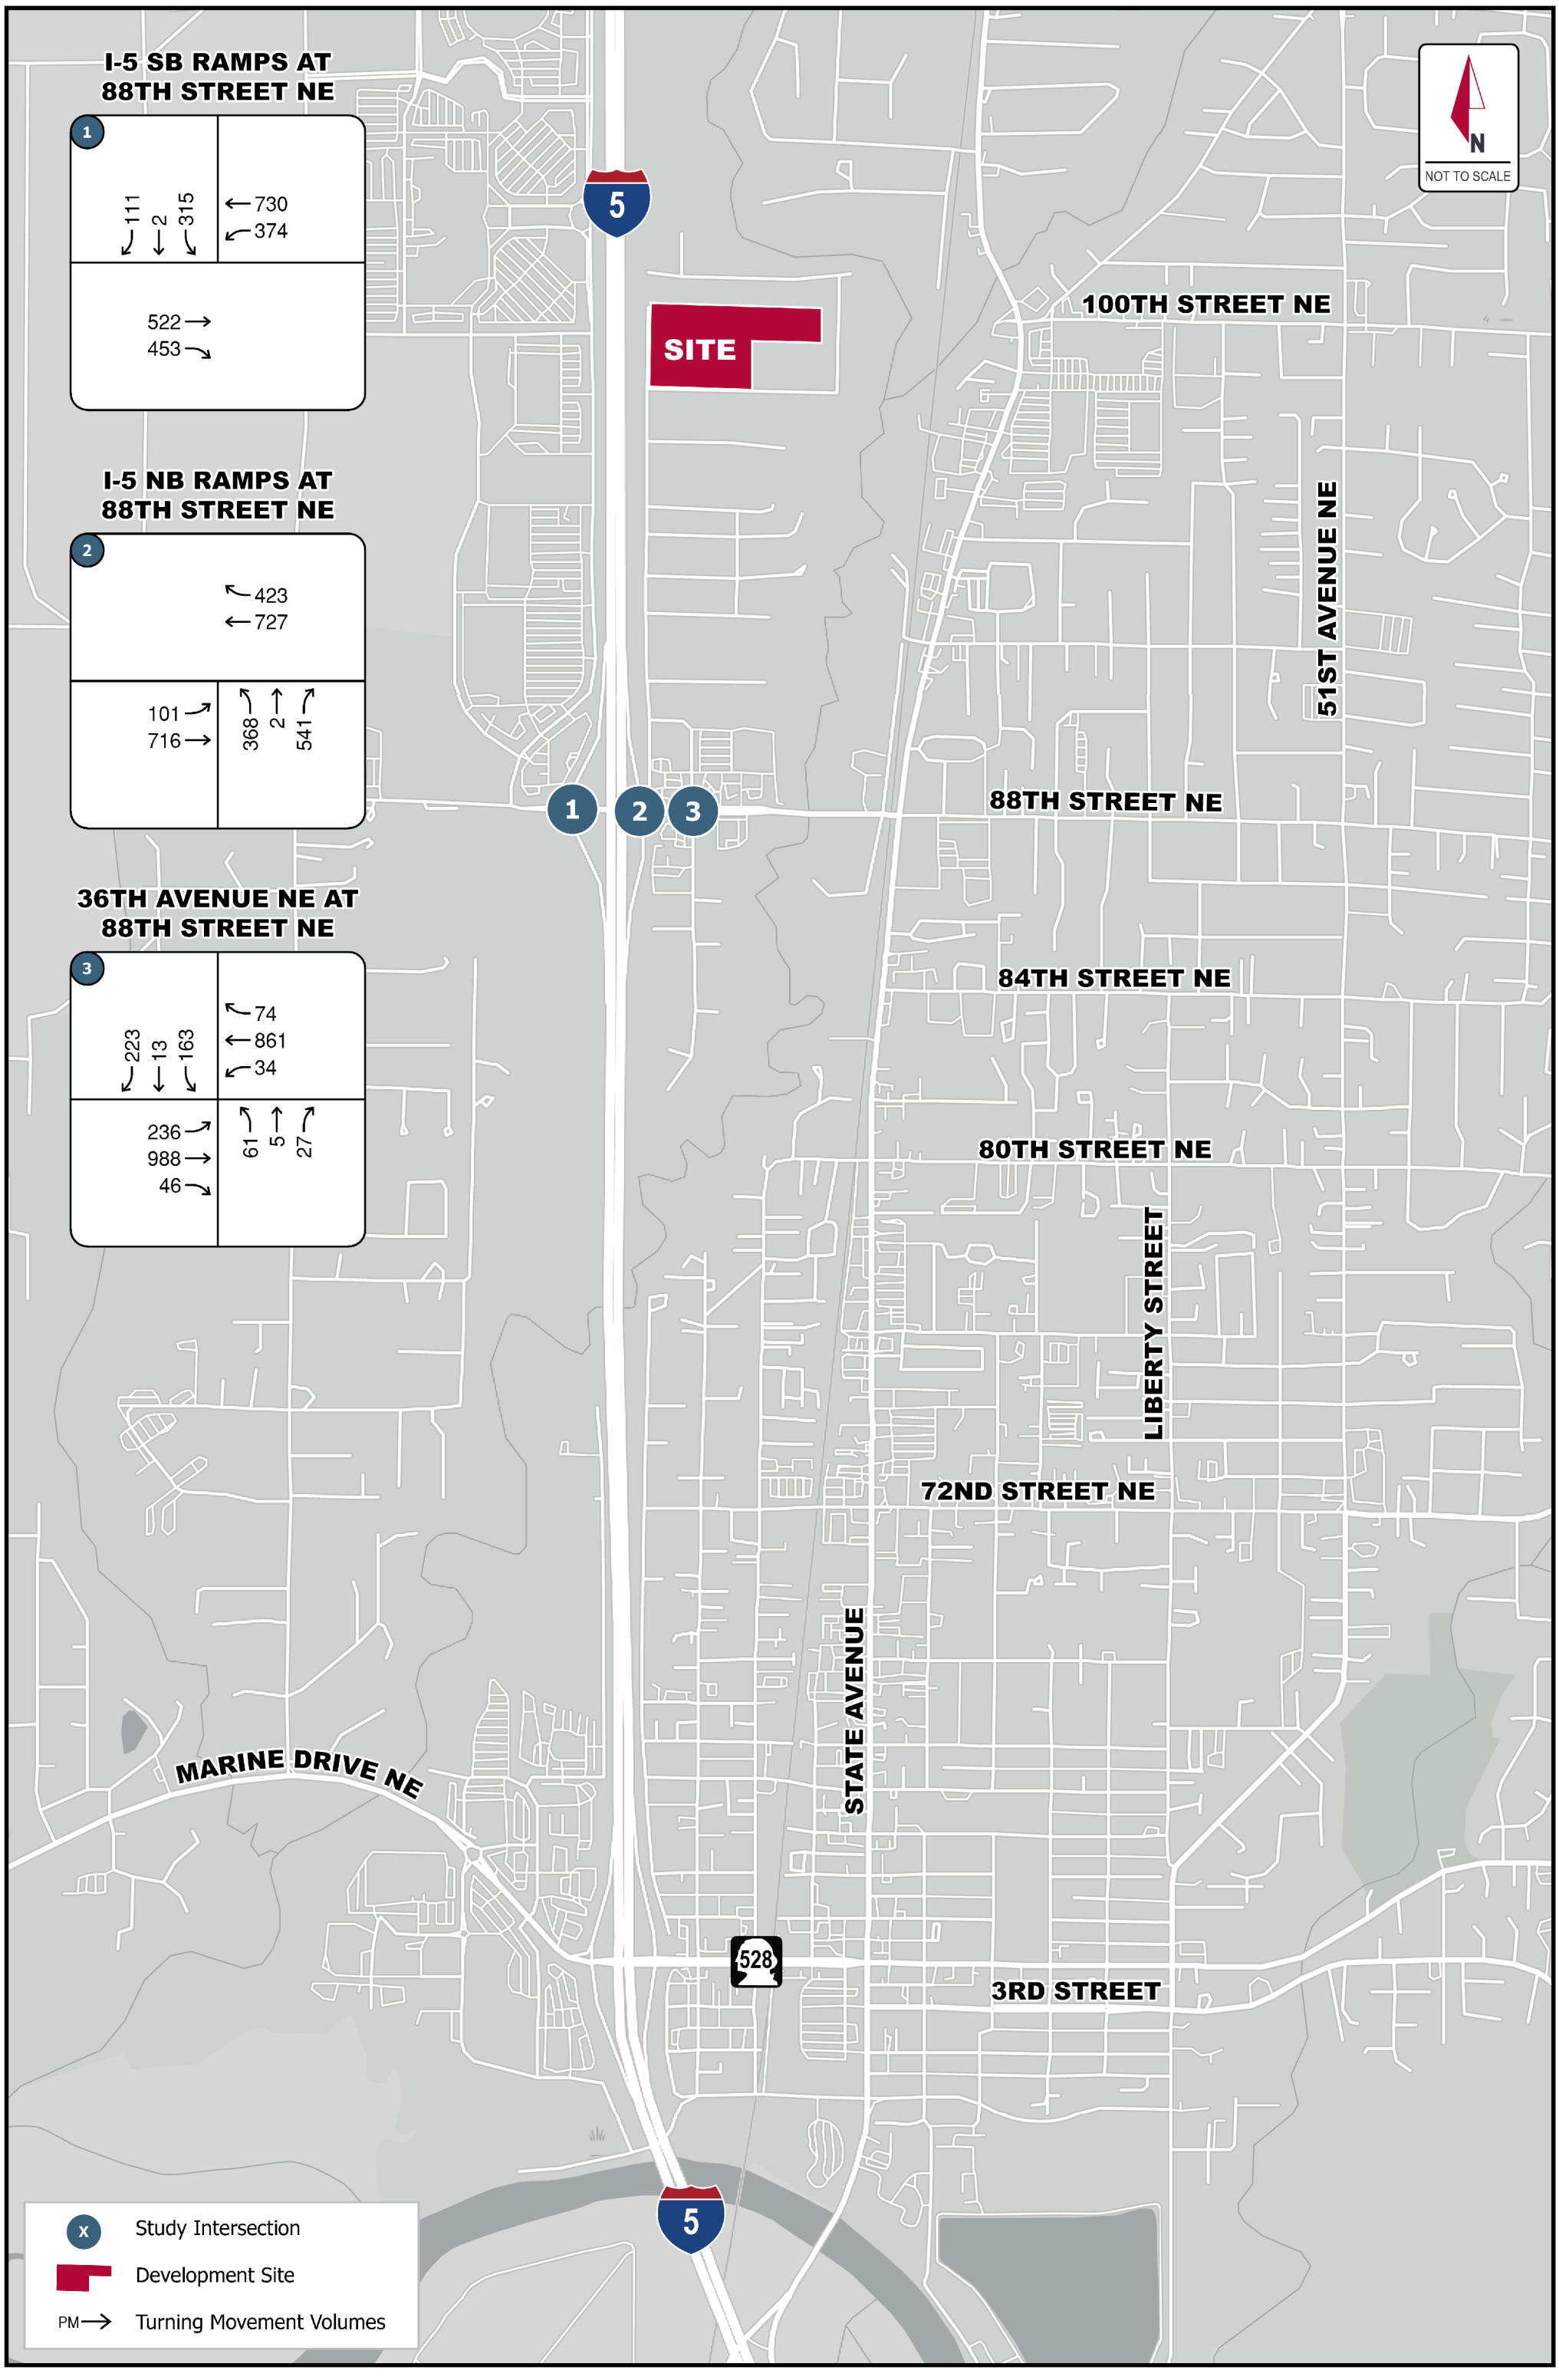


The existing PM peak-hour turning movements at the study intersections were collected by the independent count firm Traffic Data Gathering (TDG) in May 2024. The 2024 existing turning movements at the study intersections are shown in **Figure 4**. The count data is included in **Appendix B**.

The future analysis has been performed for an opening year of 2027, which represents when the Development is expected to be constructed and occupied. The 2027 opening year no-build turning movements have been calculated by applying a 3% annually compounding growth rate applied to the 2024 existing turning movements. The 2027 opening year no-build turning movements at the study intersections are shown in **Figure 5**.

The 2027 opening year build turning movements at the study intersections have been calculated by adding the trips generated by the Development to the 2027 opening year no-build turning movements. The 2027 opening year build turning movements are shown in **Figure 6**.

The study intersections have also been analyzed for the 2033 horizon year conditions (no-build and build). The horizon year analysis accounts for the typical six-year concurrency period after the expected opening year. The 2033 horizon year no-build turning movements have been calculated using the same 3% annually compounding growth rate. The 2033 horizon year no-build turning movements at the study intersections are shown in **Figure 7**.



The 2033 horizon year build turning movements at the study intersections have been calculated by adding the trips generated by the Development to the 2033 horizon year no-build turning movements. The 2033 horizon year build turning movements are shown in **Figure 8**. The turning movement calculations are included in **Appendix C**.

5.2. Level of Service Calculations

Congestion at intersections and along arterials is generally measured in terms of level of service (LOS). In accordance with *Highway Capacity Manual (HCM), 7th Edition* by the Transportation Research Board, road facilities and intersections are rated between LOS A and LOS F, with LOS A being free flow and LOS F being forced flow or over-capacity conditions. The LOS at signalized and all-way stop-controlled intersections is based on the average delay of all approaches. The LOS for two-way stop-controlled intersections is based on average delays for the critical stopped approach. Geometric characteristics and conflicting traffic movements are taken into consideration when determining LOS values. A summary of the intersection LOS criteria is included in **Table 2**.

Table 2: Level of Service Criteria

Level of Service[1]	Expected Delay	Intersection Control Delay (Seconds per Vehicle)	
		Unsignalized Intersections	Signalized Intersections
A	Little/No Delay	≤10	≤10
B	Short Delays	>10 and ≤15	>10 and ≤20
C	Average Delays	>15 and ≤25	>20 and ≤35
D	Long Delays	>25 and ≤35	>35 and ≤55
E	Very Long Delays	>35 and ≤50	>55 and ≤80
F	Extreme Delays[2]	>50	>80

The LOS analysis for unsignalized and signalized intersections has been performed utilizing the *Synchro 12* software. The City and WSDOT identify acceptable level of service for intersections as LOS D for all intersections in the vicinity of the Development except for the State Avenue corridor, which is to operate at a minimum LOS E "mitigated" per the latest City of Marysville – Traffic Impact Analysis Guidelines.

The opening year has been estimated for the year 2027, which accounts for a three-year construction window. The six-year horizon period has therefore been evaluated for the year 2033.

[1] **Source:** *Highway Capacity Manual, 7th Edition.*

LOS A: Free-flow traffic conditions, with minimal delay to stopped vehicles (no vehicle is delayed longer than one cycle at signalized intersection).
LOS B: Generally stable traffic flow conditions.
LOS C: Occasional back-ups may develop but delay to vehicles is short term and still tolerable.
LOS D: During short periods of the peak hour, delays to approaching vehicles may be substantial but are tolerable during times of less demand (i.e., vehicles delayed one cycle or less at signal).
LOS E: Intersections operate at or near capacity, with long queues developing on all approaches and long delays.
LOS F: Jammed conditions on all approaches with excessively long delays and vehicles unable to move at times.

[2] When demand volume exceeds the capacity of the lane, extreme delays will be encountered with queuing which may cause severe congestion affecting other traffic movements in the intersection.

5.3. Level of Service Calculations

The level of service calculations have been performed utilizing the existing channelization, existing intersection control, peak-hour factors, and heavy vehicle factors from the 2024 turning movement counts. The level of service summary for the opening year is included in **Table 3** and the level of service summary for the horizon year is included in **Table 4** for the PM peak-hour.

Table 3: Level of Service Summary – Opening Year

Intersections	2024 Existing Conditions		2027 Conditions			
			No-Build		Build	
	LOS	Delay	LOS	Delay	LOS	Delay
1. I-5 southbound on/off ramps at 88th Street NE	D	43.7 sec	D	52.5 sec	D	53.9 sec
2. I-5 northbound on/off ramps at 88th Street NE	C	27.7 sec	C	31.3 sec	C	32.0 sec
3. 36th Avenue NE at 88th Street NE	C	28.9 sec	C	31.1 sec	C	32.0 sec

The analysis shows that the study intersections currently operate at LOS D or better during the PM peak-hour. In the 2027 opening year no-build and build conditions, all study intersections are anticipated to continue operating at LOS D or better with the Development.

Table 4: Level of Service Summary – Horizon Year

Intersections	2024 Existing Conditions		2033 Conditions			
			No-Build		Build	
	LOS	Delay	LOS	Delay	LOS	Delay
1. I-5 southbound on/off ramps at 88th Street NE	D	43.7 sec	**E**	**78.2 sec**	**E**	**79.7 sec**
2. I-5 northbound on/off ramps at 88th Street NE	C	27.7 sec	D	51.9 sec	D	54.3 sec
3. 36th Avenue NE at 88th Street NE	C	28.9 sec	D	40.9 sec	D	44.5 sec

In the 2033 horizon year no-build and build conditions the southbound ramp intersection is anticipated to operate at LOS E and the other study intersections are anticipated to operate at LOS D. There are planned improvements for the ramp intersections to convert them to roundabouts. The improvements are funded under the Connecting Washington legislation and additional grant funding. The improvements are planned to include roundabouts and are currently in the design phase. It is anticipated that the operations of the intersections will improve with the roundabouts. The intersection LOS calculations are provided in the **Appendix D**.

6. Site Access

The Development is proposing to include an extension of 35th Avenue NE improvements and frontage improvements along 98th Street NE. There are planned to be public streets internal to the site. The posted speed limit along 35th Avenue NE is 25 miles per hour (mph). The City of Marysville – Traffic Impact Analysis Guidelines, Mitigation Measure Evaluation (1)(f)(i) states sight distance analysis per City Engineering Design & Development Standards (EDDS) shall be performed. Section 3-08 Sight Distance of the EDDS states to reference Table 3-9 for intersection sight distance requirements when the ultimate traffic volume for the proposed road or access point is projects to be more than 80 ADT. The intersection sight distance

for an access point is 280 feet for a 25-mph posted speed. The Development's access is expected to have adequate intersection sight distance in each direction to satisfy the EDDS requirements.

7. COLLISION ANALYSIS

The latest five-year collision history from January 1, 2019, through December 31, 2023, was obtained from WSDOT at each of the study intersections. The five-year collision rate has been calculated using PM peak-hour volumes and a K-factor of 10 for conversion to average daily traffic. There was a total of 182 collisions reported over the 5-year period. The collision data is summarized in **Table 5**.

Table 5: Five-Year Collision Data Summary

Intersection	Collision Type							Total Collisions	Collisions Per Year
	Rear-End	Entering at Angle	Opp. Dir.	Sideswipe	Same Dir.	Ped./ Cyclist	Fixed Object/ Other		
1. I-5 southbound on/off ramps at 88th Street NE	14	9	8	2	1	0	0	34	6.8
2. I-5 northbound on/off ramps at 88th Street NE	46	13	4	6	3	4	2	78	15.6
3. 36th Avenue NE at 88th Street NE	10	6	2	4	2	0	1	25	5.0

The collisions per million entering vehicles (MEV) is the standard rate for intersections. The five-year collision rates are summarized in **Table 6**.

Table 6: Five-Year Collision Rate Calculation

Intersection	PM Peak-Hour Intersection Vol.	K-Factor	Total Collisions	Collision Rate[3]
1. I-5 southbound on/off ramps at 88th Street NE	2,295	10	34	0.81
2. I-5 northbound on/off ramps at 88th Street NE	2,633	10	78	1.62
3. 36th Avenue NE at 88th Street NE	2,500	10	25	0.55

One of the study intersections has a collision rate greater than 1.0 per MEV and more than 10 collisions per year. This intersection is noted in the City's Capital Improvement Projects for future improvements led by the Tulalip Tribes and WSDOT which is currently in the design process. There were no fatal or serious injury collisions reported during the five-year collision history collected. Further safety analysis should not be needed at the time of this report since the ramp intersections are currently planned for improvements. The collision data has been provided in the **Appendix E**.

[3] The collision rate is based on collisions per million entering vehicles (MEVs)

8. TRANSPORTATION IMPACT FEES

The City has interlocal agreements with the County and Washington State Department of Transportation (WSDOT) for transportation impact fees. These transportation impact fees are based on the area wide traffic mitigation fee or actual impacts to improvement projects.

8.1. City of Marysville

The traffic mitigation fees have been calculated using the residential rates of $6,300 per PM peak-hour trip based on the City's Park, Traffic & School Impact Fees schedule. The Development is proposed to construct 59 single-family units with credit for 5 existing single-family detached unit for a total of 54 new PM peak-hour trips. The City traffic mitigation fees for the Development should therefore be $340,200.00.

8.2. Snohomish County

The City and County have an interlocal agreement that provides for the payment of traffic mitigation for impacts to County roadways by City developments. Traffic mitigation fees are based on predetermined area impacts or impacts to actual improvement projects. The only County improvement project in the area is along 88th Street NE, between approximately 44th Drive NE and 66th Drive NE. This improvement project is not anticipated to be impacted by three directional PM peak-hour trips from the Development. County traffic mitigation fees should therefore not be required for the Development.

8.3. Washington State Department of Transportation

The WSDOT mitigation fees are based on impacts to improvement projects identified in the Exhibit C List included in the interlocal agreement between the County and WSDOT. There are not any WSDOT intersections on the Exhibit C List that will be impacted by three directional PM peak-hour trips generated by the Development. WSDOT transportation impact fees should therefore not be required for the Development.

9. CONCLUSIONS

The Development is proposed to consist of 59 single-family detached residential units. The site is currently listed as occupied with 5 single-family detached residential units that will be removed during construction. The Development is anticipated to generate approximately 509 new ADTs with approximately 37 new AM peak-hour trips and 54 new PM peak-hour trips. The analysis shows that the study intersections currently operate at LOS D or better. The study intersections are all anticipated to operate at LOS D or better under the 2033 horizon year conditions with the improvements to the ramp intersections with 88th Street NE. The Development's access is expected to have adequate intersection sight distance in each direction to satisfy the EDDS requirements. The Development is anticipated to construct 54 new single-family units. The City traffic mitigation fees of $6,300 per new single-family unit for the Development should therefore be $340,200.00. Neither County nor WSDOT traffic mitigation fees should be required for the Development.

Traffic Mitigation Offer to Snohomish County

The applicant completes part one and submits it to the city with a completed county traffic worksheet. The city completes part two and sends it to the county. The county completes part three and sends it back to the city.

Part One to be completed by Applicant

Basic Development Information

Name of City in which development is located City of Marysville

Name of Proposed Development Stevens Assemblage

City Project File Number (if known)

Name of Applicant

Address of Applicant

Proportionate Share Calculation: *Choose Option A or B*

☐ Option A: Based on a percentage of the County's adopted impact fee (Attach traffic worksheet.)

1. The applicable percentage of the County's fee: _____%
2. Net New Average Daily Traffic: _____ADT
3. The adopted County impact fee for this development: _____$/ADT
4. Total Proportionate Share Amount: $_____

☒ Option B: Based on a comprehensive traffic study (Attach traffic worksheet and traffic study)

__X__ No road improvements are impacted. Hence, proportionate share amount is zero.

_____T he following road improvements are impacted. The calculation of proportionate shares is summarized below.

List by Names/Description the Impacted County Projects (attach other pages if necessary)	County Project ID#	PHTs Impacting Project	Capacity Cost per PHT	Proportionate Share Obligation per Impacted Project
1. There are not any Snohomish County improvement projects that will be impacted by 3 directional PM peak-hour trips generated by the development. Snohomish County traffic mitigation fees should therefore not be required for the development according to the provisions of the interlocal agreement.				

4. Total Proportionate Share Amount (sum of obligations for each impacted project) $ 0.00

☐ **Trip Distribution and Assignment if Required**

If required, attach AM and PM peak-hour trip distribution and assignment. (Attach traffic worksheet showing whether or not it is required and traffic study).

☒ **Mitigation of Other Impacts if Required for Developments Generating More than 50 Peak-Hour Trips**

Mitigation of Impacts on Level of Service

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

Mitigation of Impacts on Inadequate Road Conditions

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

Mitigation for Impacts on Access or Circulation

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

☒ **Written Offer**

The Applicant hereby voluntarily agrees to pay the total proportionate share amount shown above for impacts of the proposed development on the capacity of Snohomish County roads and provide mitigation of all other impacts as indicated above and described in attached documents.

BY: _____Date_____

Signature by Authorized Official of Applicant or Authorized Representative

Print Name and Title _____

Instructions to Applicant. Submit this offer, a completed county traffic worksheet, and any other attachments to the city with your initial application or send directly to Deb Werdal, Snohomish Co. DPW Traffic, 3000 Rockefeller M/S 607, Everett WA 98201.

Part Two: To be completed by the City

Receipt of Written Offer and Attachments by City and Routing to County

Name of Proposed Development

City Project File Number

Date Received

City Staffer Assigned to Project

Address

Phone

Instructions to City. Send this offer and all attachments to Deb Werdal, Snohomish Co. DPW Traffic Operations, 3000 Rockefeller M/S 607, Everett WA 98201. Send copy to staffer shown above.

Initialed by City Staffer Print Name and Title

Part Three: To be completed by Snohomish County

Receipt of Offer and Attachments by Snohomish County and Routing Back to City

Name of Proposed Development

City Project File Number

Received by:

_____Date_____ _____

Initialed by County Staffer Print Name and Title

Snohomish County Mitigation Request to City

Snohomish County has reviewed the traffic study worksheet and mitigation offer submitted by the applicant and has determined as follows:

☐ Snohomish County requests that the City impose the mitigation offered above as a condition of approval for the Development. Snohomish County agrees to accept changes in the mitigation payment amount shown above resulting from TDM or lot-yield adjustments approved by the City.

☐ Snohomish County requests that the City require additional supplemental information to adequately evaluate the proposed development's impacts. ☐ The information requested is shown in the notes below.

FIGURE 3: DEVELOPMENT TRIP DISTRIBUTION - PM PEAK HOUR

STEVENS ASSEMBLAGE - CITY OF MARYSVILLE, WA (KH 090224004)

Snohomish County Traffic Worksheet and Traffic Study Requirements for Developments in the City of Marysville

Snohomish County government, through an interlocal agreement (ILA) with the City of Marysville, may request traffic mitigation measures from any new development in the city that impacts roads in the unincorporated county. The City will impose the requested mitigation to the extent that the City determines that the mitigation is reasonably related to the impacts of the development. To determine the impacts, and to determine reasonable mitigation measures, the City of Marysville requires a traffic study from any development in the city that may have impacts on county roads. This 'traffic study' may be as simple as completing sections one and two of the county traffic worksheet below, or having a professional traffic engineer conduct a formal traffic study consistent with the requirements in section three below.

- If a development generates less than ten peak-hour trips and the applicant chooses Option A for mitigation payment (standard payment by percent of county impact fee), then the applicant will generally only have to fill out the first two sections of this traffic worksheet and complete a mitigation offer (see section four).
- However, if a development generates more than ten peak-hour trips, or if the applicant chooses Option B for mitigation payment (comprehensive impact analysis), then the applicant will have to fill out the first section of this worksheet, complete a separate traffic study consistent with the requirements in section three, and complete a mitigation offer (see Section Four).
- Applicants should submit all documents *to the City* as part of their initial submittal.
- Traffic study requirements for impacts on county roads are based on the County's traffic mitigation ordinance (Chapter 30.66B) and the city/county ILA. At the end of this document find references to the county contacts and county web site (sources for may of the documents related to traffic mitigation).
- Following review of the documents submitted, the County may request supplemental information and analysis as necessary to determine the impacts of the development in accordance with the city/county ILA. The City will require the proposed development to submit the supplemental information and analysis to the extent that the City determines that it is necessary to determine the impacts of the development.

Section One (1) Worksheet General Information

1. Name of Proposed Development Stevens Assemblage

   City Development File Number (if known)_____

2. Name, Address and Phone Number of Applicant_____

3. Development Site Address 44th Street NE at 75th Avenue NE alignments

4. Is it a residential or commercial development? Residential

5. Description of Development (size and specific type) 59 new Single-Family Detached Units
   5 existing Single-Family Detached Units to be removed

6. How many new vehicle trips are expected to be generated by the proposed development? (For many common types of developments this information can be provided by the city or the county. For more complex developments trip generation may have to be determined under section three below)

   37 AM Peak Hour 54 PM Peak Hour 509 Average Daily Trips (ADT)

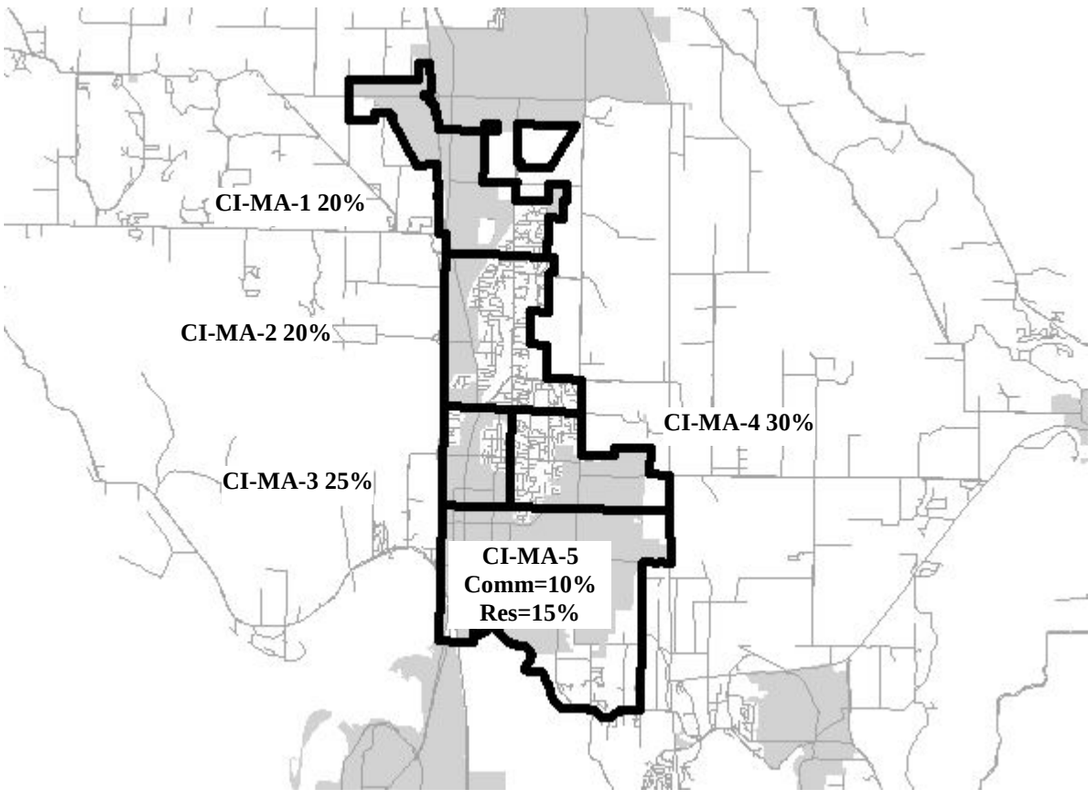
7. Proportionate Share Impact Mitigation: All applicants have two options in determining the amount of their traffic mitigation payment:

   _____ For determining the amount based on a percentage of the county fee go to section two.

   _X_ For determining the amount based on a comprehensive traffic study go to section three.

Section Two (2) Proportionate Share Determined by Percentage of County Impact Fee

2(a) Calculation of Payment Amount



1. Standard default estimated percentage of trips impacting the City streets based on subareas (See below) _____%

or

2. Other Percentage: (Note: See author's qualifications in section three below.) Estimated percentage of trips impacting county roads from attached trip distribution: _____ %

Sub-Area ID #	* City Subarea Description	Residential Developments	Commercial Developments
CI-MA-1	North of 136th ST SE.	20%	20%
CI-MA-2	North of 100th ST NE and South of 136th ST SE.	20%	20%
CI-MA-3	North of 76th ST NE, South of 100th ST SE, and West of 51st AV NE.	25%	25%
CI-MA-4	North of 76th ST NE, South of 100th ST SE, and East of 51st AV NE.	30%	30%
CI-MA-5	South of 76th ST NE.	15%	10%

* Note: Boundaries are either street centerlines or imaginary extensions of street centerlines in places where the actual streets do not exist.

3. Development New Average Daily Trip Generation (ADT)_____

4. Type of Development (Residential or Commercial)_____

5. County Commercial Fee Rate $_____ 6. County Residential Fee Rate $_____

(Note: Consistent with county code and the ILA, developments pay the rate in effect at the time of their submittal. As of 07/13/11 the rates were $39 for commercial developments and $46 for residential developments. Through ordinance, the County Council can change these rates at any time, so consult with the County or look at Snohomish County Code 30.66B.330 to find the latest fee rates.)

7. Calculation of Proportionate Share Impact Mitigation

_____	×	_____	×	_____	=	$_____
#1 or #2 above: % of trips		#3 above: ADT		#5 or #6 above: Fee Rate		proportionate share mitigating payment

2(b) Determining whether or not an additional traffic study is necessary

Will the development generate more than 10 peak-hour trips *or* are there other impacts that need to be addressed (e.g., level of service, safety, or access and circulation)

_____ No. Skip section three and go to section four.

_____ Yes. Read the introduction to section three and skip to section 3(b).

Section Three (3) Traffic Study Requirements

Introduction: This section outlines requirements for traffic studies for impacts on County roads. If an applicant chooses (or is required) to complete a traffic study, then it should be submitted along with this worksheet and a mitigation offer. (Note on Author's Qualifications: A traffic study under this section must be conducted by an engineer licensed to practice in the state of Washington with special training and experience in traffic engineering and, preferably, membership in the institute of transportation engineers. For individuals/firms not on the City's approved list, the developer will provide, with the traffic study, the credentials of the individual or firm performing the traffic study certifying compliance with these qualifications.)

3(a) Proportionate share impact mitigation based on comprehensive traffic study

1. Development's Trip Generation and Distribution. Determine the PM peak-hour trip generation and distribution for the development consistent with Section 3(b) below.
2. Impacted Improvements. Determine which of the road sections with planned improvements in the county's impact fee cost basis (Transportation Needs Report Appendix D) are impacted by three or more development-generated *directional* PM peak hour trips (PM PHT).
3. Current Counts. For each impacted improvement, provide current traffic counts to determine the PM PHT.
4. Reserve Capacity. Determine "reserve capacity" for each impacted improvement by subtracting the current PM PHT from the maximum service volume (MSV) for the existing facility. Reserve capacity is set to zero if current PM PHT exceeds the MSV. For MSVs see County DPW Rule 4224.
5. New Capacity. New capacity is the incremental increase in PHT that could be accommodated with the planned improvement. Determine the new capacity of each impacted improvement by subtracting the current MSV from the future MSV after the improvement.
6. Chargeable Capacity. For each impacted improvement, add the reserve capacity to the new capacity.
7. Final Adjusted Cost. Find the cost of each impacted improvement and make any adjustments used by the County for tax credits (see Transportation Needs Report Appendix D).
8. Capacity Cost per Peak-Hour Trip. For each impacted improvement, determine the capacity cost per PM PHT by dividing the final adjusted improvement cost by the chargeable capacity.
9. Traffic Impacts. From step one above, take the *total* number of PM PHT (in both directions) impacting each planned improvement.
10. Proportionate Share. For each impacted improvement, determine the proportionate share impact mitigation by multiplying the capacity cost per peak-hour trip by the number of PM PHT impacting the improvement.

3(b) Trip Generation and AM and PM Peak Hour Trip Distribution and Assignment

Calculate AM, PM and Daily trip generation consistent with the ITE Trip Generation Handbook and Snohomish County Public Works Rule 4220. Determine the trip distribution and assignments consistent with the County's document titled "Format for Trip Distributions"(available at County web site, see below).

- Within the developments transportation service area (TSA) the distributions will be carried out to each key intersection at which the approach or departure volumes on any leg have three (3) or more peak hour trips. Get the most current list of key intersections on the web site described below. Trips should be distributed onto the road system as it is expected to be in six years.
- The distribution should be a schematic map showing the broad distributions of trips in terms of percentages on different roads. Show all City boundaries.
- The assignment should be a schematic map with the impacted key intersections identified by ID# and turning movements for each shown in separate diagrams on the same page or on different pages. The assignment should also be presented in tabular form listing each intersection by intersection ID#, and the number of trips at each movement.

3(c) Additional Analysis for Developments Generating More Than Fifty (50) Peak Hour Trips

For large developments (i.e., those generating more than 50 peak-hour trips), the County may request mitigation for impacts on the level of service of County roads, documented safety locations (the County calls such locations "inadequate road conditions" or "IRCs"), and access or circulation. The traffic study requirements below are intended to disclose impacts. Based on this information the County may request through the City that the applicant provide additional information showing possible mitigation measures. If any off-site improvements were needed for mitigation the County would work with the applicant to determine requirements for right-of-way, construction plans, right-of-way use permits, construction/maintenance bonds, and other issues.

Impacts on Level of Service (LOS) of County Arterials

Contact Snohomish County Public Works for the most current list of arterial units in arrears and critical arterial units. Identify any arterial units in arrears or critical arterial units impacted by three or more directional peak-hour trips.

Impacts on Inadequate Road Conditions

Contact Snohomish County Public Works for a list of the current IRCs. Identify any IRCs impacted by three or more peak-hour trips. Note: Unlike LOS impacts in which at least three or more peak hour trips have to be added in one direction to require disclosure (e.g., 3 westbound), for IRCs, any three peak hour trips added to IRC locations are considered an impact for which disclosure is necessary (e.g., 2 westbound plus 1 eastbound).

Impacts on Access or Circulation

The County may request improvements to existing roads to provide safe and efficient access and/or circulation. In some instances, the County may request provisions for future County roads identified in the Comprehensive Plan or in Small Area Transportation Studies. If so, the County will request specific additional information through the City.

Section Four (4) Traffic Mitigation Offer to Snohomish County

The applicant should complete a traffic mitigation offer to Snohomish County that summarizes the mitigation identified in the county traffic worksheet and any additional traffic study. This will facilitate timely review of the development and processing of the application. The form to use for the mitigation offer is titled "Traffic Mitigation Offer to Snohomish County." This form is typically provided to all applicants along with this traffic study checklist. In addition, copies are available from the county contacts or the Snohomish County web site shown below.

Additional Information

County Web Site

Snohomish County Public Works has a web site with many documents related to traffic studies and mitigation requirements for developers. From the Snohomish County Home Page go to:

Departments/Public Works/Divisions/TES/ProgramPlanning/3066B

AT FOUND PUNCH IN 1-3/4" BRASS DISK IN CONCRETE MONUMENT IN CASE LOCATED AT THE INTERSECTION OF 35TH/ AVE NE & 94TH/ PL NE.
ELEVATION= 53.49'

PLAT RESTRICTION NOTES - PRD DEVELOPMENT STANDARDS

1. ACCESSORY DWELLING UNITS SHALL NOT BE PERMITTED FOR SINGLE-FAMILY DETACHED DWELLINGS.
2. EACH SINGLE-FAMILY DETACHED UNIT SHALL HAVE AT LEAST 200 SQUARE FEET OF PRIVATE OPEN SPACE SET ASIDE AS PRIVATE SPACE FOR THAT DWELLING UNIT. NO DIMENSION OF SUCH OPEN SPACE SHALL BE LESS THAN 10 FEET. THE OPEN SPACE DOES NOT NEED TO BE FENCED OR OTHERWISE SEGREGATED FROM OTHER DWELLINGS OR OPEN SPACE IN THE DEVELOPMENT UNLESS SO CONDITIONED THROUGH THE APPROVAL PROCESS.
3. PURSUANT TO MMC 22G.080.080, MODIFICATION OF DEVELOPMENT REGULATIONS, A MINIMUM OF THREE PARKING STALLS ARE REQUIRED TO BE PROVIDED FOR EACH DETACHED SINGLE-FAMILY DWELLING UNIT. TWO OF THE STALLS MUST BE ON THE SITE AND READILY AVAILABLE TO THE DWELLING UNIT. THE THIRD STALL MAY BE ON-STREET PARKING OR PROVIDED NEARBY TO THE DWELLING. COMPLIANCE FOR THESE PARKING REQUIREMENTS SHALL BE VERIFIED BASED ON REVIEW OF THE FINAL CIVIL CONSTRUCTION PLANS AND SUBMITTAL OF THE BUILDER'S HOUSE PLANS AT THE TIME OF BUILDING PERMIT SUBMITTAL.
4. NO DIRECT ACCESS IS PERMITTED FROM LOTS WITHIN THE SUBDIVISION ONTO 98th STREET NE.
5. PURSUANT TO MMC 22G.080.070, AT LEAST 25% OF THE DWELLING ON LOTS LESS THAN 5,000 SF MUST HAVE VEHICLE ACCESS POINTS VIA SHARED OR SINGLE-CAR-WIDTH DRIVEWAY, ALLEY, AUTO COURT, OR OTHER METHOD OF ACCESSING DWELLINGS OTHER THAN DIRECT STREET ACCESS:
   - ALL 59 PROPOSED LOTS ARE GREATER THAN 5,000 SF (NOT APPLICABLE).
6. ANY LOT UNDER 5,000 SF MUST DEMONSTRATE COMPLIANCE WITH MMC 22C.010.310, SMALL LOT SINGLE FAMILY DEVELOPMENT STANDARDS, PRIOR TO BUILDING PERMIT ISSUANCE.
7. PURSUANT TO MMC 22G.080.050(2)(C), DESIGN OF THE PROPOSED DEVELOPMENT ACHIEVES THE FOLLOWING RESULTS:
   - (iv) LANDSCAPING, BUFFERING, OR SCREENING IN OR AROUND THE PROPOSED PRD
   - (vii) INCORPORATING ENERGY-EFFICIENT SITE DESIGN OR BUILDING FEATURES
8. PER MARYSVILLE FIRE DISTRICT REVIEW, FIRE SPRINKLERS ARE REQUIRED FOR ALL HOMES DUE TO THE SINGLE ACCESS POINT VIA 35 AVE NE.

ZONING AND LAND USE SUMMARY

ZONING:	R-4.5
PROPOSED LAND USE:	MEDIUM DENSITY SINGLE FAMILY RESIDENTIAL
PROPOSED DENSITY:	59 LOTS
PHASING:	1 PHASE
HOUSING MIX RATIO WITHIN 300 FT:	100% SINGLE FAMILY DETACHED
MIN. LOT AREA ALLOWED:	3,500 SF
MIN. LOT WIDTH ALLOWED:	30 FT

   Recording No.: 7803300209
5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):
   Recording No: 8003100173
   Said short plat is a revision of short plat recorded under Recording No. 7810200401.
6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:
   Recording Date: July 26, 1999
   Recording No.: 199907260975
7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines and/or water lines
   Recording Date: February 12, 2001
   Recording No.: 200102120728
   Affects: Portion of said premises
8. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
   Year: 2024
   Tax Account No.: 300516-003-016-00
   Levy Code: 00511
   Assessed Value-Land: $272,800.00
   Assessed Value-Improvements: $219,700.00
   General and Special Taxes:
   Billed: $3,927.28
   Paid: $0.00
   Unpaid: $3,927.28
9. A deed of trust to secure an indebtedness in the amount shown below,
   Amount: $282,276.00
   Dated: December 7, 2020
   Trustor/Grantor: Isaac A. Steimle and Rebekah L. Steimle, who acquired title as Isaac Steimle and Rebekah Steimle, husband and wife
   Trustee: George C. Reinmiller Trustee Inc
   Beneficiary: Mortgage Electronic Registration Systems, Inc., solely as nominee for Boeing Employees' Credit Union
   Loan No.: 336148
   Recording Date: December 11, 2020
   Recording No.: 202012110574
10. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $100,000.00
    Dated: August 20, 2022
    Trustor/Grantor: Isaac Steimle and Rebekah Steimle, husband and wife
    Trustee: Trustee Services, Inc.
    Beneficiary: Boeing Employees' Credit Union
    Recording Date: August 30, 2022
    Recording No.: 202208300421
    The Deed of Trust set forth above is purported to be a "Credit Line" Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.

19. Mobile home improvements are expressly excluded.
20. It appears Bonnie Stevens is deceased. The Company finds no probate of the decedent's estate in Snohomish County County. This commitment is therefore subject to the rights of heirs and devisees, creditors (including liens under RCW 43.20B.080), liability for inheritance tax, or other matters that a probate of the estate might disclose.
    If we are requested to insure title passing outside of probate, the Company will require the following:
    a. Completed, signed and acknowledged Lack of Probate Affidavits (both the Company's internal underwriting version and the shorter version for recording).
    b. A certified copy of the Death Certificate.
    c. A copy of the Community Property Agreement, if any.
    d. A copy of the decedent's Will and codicils, if any.
    e. A Real Estate Excise Tax Affidavit executed by the inheriting party(ies), to file at the time of recording the Lack of Probate Affidavit, as required by WAC 458-61A-202(6).
    The Company reserves the right to make additional requirements upon review.
21. Any unrecorded leaseholds, right of vendors and holders of security interests on personal property installed upon the Land and rights of tenants to remove trade fixtures at the expiration of the terms.

Re: **Stevens PRD – *PA 24-024* – Concurrency *Recommendation***

Dear Mr. Golden,

The applicant is proposing the development of fifty-nine (59) single family detached homes upon 14.35 acres located north of 98th ST NE and east of Interstate 5 on parcel(s) with APN(s): 3005160030160, 30051600304500/30051600304501, 30051600305800, 30051600301400, 30051600306600, 30051600306500 and 30051600301500. The five (5) existing single family detach homes located on site shall be removed.

Based on the Traffic Impact Analysis (TIA) prepared by Kimley-Horn & Associates, Inc., dated July 2024, the proposed development would generate the following Average Daily Trips (ADT), AM peak hour trips (AMPHT), and PM peak hour trips (PMPHT):

USE	**Building Units** (new)	ADT	AMPHT	PMPHT
Land Use Code 210 – Single Family Detached Housing	59	509*	37*	54*
* = Five single family detached units are to be removed by the development therefore credit has been applied per ITE Trip Generation rates for ADT, AMPHT and PMPHT.				

Based on our review of existing conditions, as well as other applicable supplemental information submitted with the application, and on file with the City, the following impacts and mitigation obligations are required for the Steven's PRD development:

1. The applicant shall be required to construct frontage improvements along 98th ST NE prior to recording the final subdivision, in accordance with MMC 12.02A.090, *Frontage Improvements Required*. Roadway improvements, channelization, site access and street lighting plans shall be required to be reviewed and approved by the City Engineer, prior to construction plan approval.

   1.1. 98th ST NE shall be built as a Local Access Street compliant with EDDS SP 3-202-002.

2. The applicant shall be required to construct internal development proposed public roadways, including but not limited to 35th Ave NE, prior to recording the final subdivision. Roadway improvements, channelization, site access and lighting plans designed per City, State and/or Federal Guidelines/Standards shall be required to be reviewed and approved by the City Engineer, prior to construction plan approval.

   2.1. All internal development public roadways except extension of 35th Ave NE shall be built as a Local Access Street compliant with EDDS SP 3-202-002.

2.2. The extension of 35th Ave NE shall be built as a Local Access Street compliant with EDDS SP 3-202-002 with modifications to the standard to reduce pavement width to 20' and eliminate west roadway side landscape strip and sidewalk within a minimum of thirty (30) feet of right-of-way.

3. The applicant shall be required to dedicate public right-of-way in order to accommodate the required frontage improvements and development constructed public roadways, in accordance with MMC 12.02A.110(1)(c), *Dedication of Road right-of-way – Required setbacks*. Right-of-way widths and required dedication shall be determined by the City Engineer.

4. In order to mitigate traffic impacts upon the future capacity of the road system, the applicant shall be required to submit payment to the City of Marysville, on a proportionate share cost of the future capacity improvements as set forth in MMC 22D.030.070(3), for the development. **Traffic impact fees shall be based per PMPHT, with up to 54 new PMPHTs total for development vested at a rate of $6,300 per PMPHT.**

Marysville Municipal Code (MMC) 22D.030.070(1)(d), requires an applicant to make a written proposal for mitigation of a development's traffic impacts to the Public Works Director, prior to finalizing a concurrency determination and conditions of approval. If you have any questions, regarding the developments impacts and recommended mitigation obligations outlined above, please contact either Emily Morgan, Senior Planner, at emorgan@marysvillewa.gov or by phone at 360.363.8216 or Jesse Hannahs, P.E., Traffic Engineering Manager, at jhannahs@marysvillewa.gov or via phone at 360-363-8287.

MEMORANDUM

To: Emily Morgan, Senior Planner

From: Kacey Simon, Civil Plan Reviewer

RE: Stevens PRD, File# PA24-024
59 lot PRD
9815/9909/9907/9921 35th Ave NE & 3705/3625/3609 98th St NE & Parcel #'s 30051600301400, 30051600301500, 30051600301600, 30051600304500 30051600304501, 30051600305800, 30051600306500, 30051600306600

Date: 9/4/2024

The following comments are offered after review of the above referenced application.

1. **Existing utilities**:
    a. Sanitary sewer: The nearest sewer is a 10" PVC main located south at the intersection of 35th Ave NE and 94th PL NE which is about 1500 feet away.
    b. Water: There currently is an 18" ductile iron water main located along the west side of the property that can be found on record drawing W745.
    c. Storm: There is not any storm infrastructure in this area.

2. Per MMC 14.03.250, utilities are to be extended along the street frontages of the proposed project.
    a. Sewer, water and storm will need to be extended along all property frontage on both sides. Please note that manholes shall be provided at a maximum of 400' intervals for 8" – 15" sewer mains and the minimum slope for 8" sewer main is 0.40% and for 10" sewer main is 0.28%.

3. **Frontage Improvements:** Frontage improvements are required per MMC 12.02A.090 on all projects. Frontage improvements are described as curbs, gutters, and sidewalks; underground storm drainage facilities; patching the street from its preexisting edge to the new curb line; and overlayment of the existing public street to its centerline.
    a. 98th St NE is classified as a local access street and is to be built compliant with SP 3-202-002 of the EDDS with half street improvements along the project frontage.
    b. 35th Ave NE shall be built compliant with SP 3-218-002. We originally thought there was only 26' so we asked for two – ten foot travel lanes and a sidewalk adjacent to the north bound traffic lane. Since it appears we have 30', we would like to keep two – ten foot travel lanes with a 5' landscape strip and 5' sidewalk.

4. **Access**:
    a. The new roads shall be constructed to SP 3-218-001.
    b. Auto courts are permitted in a PRD. The auto court is to be built per the private road profile, SP3-202-004, with decorative concrete or stamped asphalt. They shall not exceed 150' in length or come off a cul-de-sac and shall serve a maximum of 6 lots.
    c. Elbow intersections per SP 3-209-002 are allowable on local access streets only and are subject to intersection spacing requirements established under section 3-209 of the EDDS.
    d. The minimum width of a residential driveway is 12', and the maximum is 26'. Curb cuts shall be limited to a 20' maximum.

5. **Drainage:** All projects in the city of Marysville must comply with requirements stipulated under the MMC 14.15.040 and 14.15.050.
    a. Stormwater drainage: The city has adopted the 2019 Ecology Manual. Projects above the 2,000 square feet and/ or 5,000 square feet threshold must comply with requirements stipulated in Volume I of the Stormwater Management Manual for Western Washington.
    b. It looks like infiltration is being proposed and there appears to be at least 5' of separation to the seasonal high-water table, a mounding analysis will be required if there is less than 5' of separation. The mounding analysis shall be performed during the wet season.
    c. The maximum allowed impervious surface coverage for the Zoning designation is 70%.

Standard Comments:

6. Survey control datum NAVD-88 and NAD-83 are required to be used. Civil construction plans will not be accepted in any other datum.

7. Fire flow will need to be completed prior to 1st civil plan review and submitted with 1st civil plan review. Contact Ryan Keefe at 360-363-8168 to schedule.

8. Trench restoration is to be completed in accordance with section 3-703 of the EDDS. A full lane or full street overlay may be required.

9. The onsite grading and placement of any retaining walls must be compliant with section 22D.050.030 of the MMC.

10. The applicant is responsible for identifying any existing well or septic systems on site or on adjacent properties. If there are any existing septic systems on site, they need to be decommissioned based on the Snohomish Health District standards. If there are any wells on site, they need to be decommissioned based on Department of Ecology standards.

11. Please refer to MMC 22G.030.020 for applicable plan review and construction inspection fees.

12. **All civil construction plan submittals are to be uploaded directly to our online portal at: https://permits.marysvillewa.gov/Search/permit.aspx**. The first *civil construction* plan submittal is to consist of a plan set, a copy of the drainage report, a copy of the geotechnical report and an approved USPS mailbox location. **Once the documents have been submitted, please email a permit tech at msvlpermits@marysvillewa.gov to let them know the documents have been uploaded.**
    a. Review timing:
        i. First review = 5 weeks
        ii. Second review = 3 weeks
        iii. Third review = 3 week
        iv. Subsequent reviews will be 3 weeks.

13. Please be advised these comments are in reference to specific items and do not imply a full review of the proposed application. Additional comments which may change the design requirements will be provided during the civil construction plan review process.

If you have additional questions regarding the above comments, please contact me at ksimon@marysvillewa.gov or at (360) 363-8280.

cc: Ken McIntyre, PE, Assistant City Engineer

MEMORANDUM

TO: Emily Morgan – Senior Planner

FROM: Danny Hagen – Associate Traffic Engineer

DATE: September 18th, 2024

SUBJECT: PA 24-024 Stevens PRD

The following comments are providing following review of the provided materials for the proposed Stevens PRD located at 35th Ave NE & 98th St NE.

1. The traffic impact analysis performed in Exhibit–011 of 54 new PM peak-hour trips is accepted with a mitigation fee of $340,200.
2. The Snohomish County Traffic Mitigation Offer document in Exhibit-012 is accepted and a filled copy is attached.
3. Driveways accessing public streets shall not be aligned with driveways on the opposite side but instead shall be staggered to enable parking and emergency vehicle access without parking restrictions.
    a. Driveway access locations should be reconsidered for lots accessing Road C, Road A west of Road B, and Road B south of Road C.
4. Although not required for land use approval, the following comments are provided to guide later civil construction plan approval. No response is required at this time.
    a. Street Lights are required along on-site roadways and any constructed frontage improvements.
        i. General PUD light locations will be provided by the City to the developer for submission to PUD and incorporation into the PUD site electrical plans.
        ii. Street Lighting along residential local streets shall be PUD installed fiberglass poles designed as collector arterial utilizing 100 watt equivalent LED fixtures. Spacing of fixtures shall be 180'-220'.
        iii. Contact Mike Fleming of Snohomish County PUD at 425-783-8276 for more information.
    b. A sight-distance analysis will be required at all new roadway intersections. See EDDS Std. Plans 3-212-001 & 002 for further guidance.
    c. A signing and marking plan shall be required as part of civil construction plans.
        i. "No Parking" with left arrow signs will be required on the outside of the 90º elbow by lot 23.
        ii. Stop signs with stop bars on all residential street approaches to an arterial.
        iii. Intersections of two residential streets shall not have intersection control (Stop or Yield) signs
        iv. Street Name signs at all intersections and where a street's name changes.

MARYSVILLE
PUBLIC WORKS

(360) 363-8100

Public Works
80 Columbia Avenue
Marysville, WA 98270

v. Only one (1) “No Parking in Cul-De-Sac” sign at all entrances to cul-de-sacs.

vi. Parking restrictions will be required along one side of a roadway when roadway width, measured from curb-face to curb-face, is less than 28’.

vii. A “Dead End” sign will be required immediately east of the intersection upon Tract I, near lot 60.

viii. A “No Outlet” sign shall be installed approximately 25’ from the single entry/exit to a closed street system (multiple road segments)

ix. Minimize signing within residential neighborhoods to reduce sign clutter and improve effectiveness of individual signs.

Traffic Mitigation Offer to Snohomish County

The applicant completes part one and submits it to the city with a completed county traffic worksheet. The city completes part two and sends it to the county. The county completes part three and sends it back to the city.

Part One to be completed by Applicant

Basic Development Information

Name of City in which development is located City of Marysville

Name of Proposed Development Stevens Assemblage

City Project File Number (if known)

Name of Applicant

Address of Applicant

Proportionate Share Calculation: *Choose Option A or B*

☐ Option A: Based on a percentage of the County's adopted impact fee (Attach traffic worksheet.)

1. The applicable percentage of the County's fee: _____%
2. Net New Average Daily Traffic: _____ADT
3. The adopted County impact fee for this development: _____$/ADT
4. Total Proportionate Share Amount: $_____

☒ Option B: Based on a comprehensive traffic study (Attach traffic worksheet and traffic study)

__X__ No road improvements are impacted. Hence, proportionate share amount is zero.

_____T he following road improvements are impacted. The calculation of proportionate shares is summarized below.

List by Names/Description the Impacted County Projects (attach other pages if necessary)	County Project ID#	PHTs Impacting Project	Capacity Cost per PHT	Proportionate Share Obligation per Impacted Project
1. There are not any Snohomish County improvement projects that will be impacted by 3 directional PM peak-hour trips generated by the development. Snohomish County traffic mitigation fees should therefore not be required for the development according to the provisions of the interlocal agreement.				

4. Total Proportionate Share Amount (sum of obligations for each impacted project) $ 0.00

☐ **Trip Distribution and Assignment if Required**

If required, attach AM and PM peak-hour trip distribution and assignment. (Attach traffic worksheet showing whether or not it is required and traffic study).

☒ **Mitigation of Other Impacts if Required for Developments Generating More than 50 Peak-Hour Trips**

Mitigation of Impacts on Level of Service

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

Mitigation of Impacts on Inadequate Road Conditions

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

Mitigation for Impacts on Access or Circulation

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

☒ **Written Offer**

The Applicant hereby voluntarily agrees to pay the total proportionate share amount shown above for impacts of the proposed development on the capacity of Snohomish County roads and provide mitigation of all other impacts as indicated above and described in attached documents.

BY: _____Date_____

Signature by Authorized Official of Applicant or Authorized Representative

Print Name and Title _____

Instructions to Applicant. Submit this offer, a completed county traffic worksheet, and any other attachments to the city with your initial application or send directly to Deb Werdal, Snohomish Co. DPW Traffic, 3000 Rockefeller M/S 607, Everett WA 98201.

Part Two: To be completed by the City

Receipt of Written Offer and Attachments by City and Routing to County

Name of Proposed Development Stevens Assemblage

City Project File Number PA 24-024

Date Received 09/03/24

City Staffer Assigned to Project Danny Hagen

Address 501 Delta Ave, Marysville, WA 98270

Phone 360-363-8272

Instructions to City. Send this offer and all attachments to Deb Werdal, Snohomish Co. DPW Traffic Operations, 3000 Rockefeller M/S 607, Everett WA 98201. Send copy to staffer shown above.

Snohomish County Mitigation Request to City

Snohomish County has reviewed the traffic study worksheet and mitigation offer submitted by the applicant and has determined as follows:

☐ Snohomish County requests that the City impose the mitigation offered above as a condition of approval for the Development. Snohomish County agrees to accept changes in the mitigation payment amount shown above resulting from TDM or lot-yield adjustments approved by the City.

☐ Snohomish County requests that the City require additional supplemental information to adequately evaluate the proposed development's impacts. ☐ The information requested is shown in the notes below.

FIGURE 3: DEVELOPMENT TRIP DISTRIBUTION - PM PEAK HOUR

STEVENS ASSEMBLAGE - CITY OF MARYSVILLE, WA (KH 090224004)

Snohomish County Traffic Worksheet and Traffic Study Requirements for Developments in the City of Marysville

Snohomish County government, through an interlocal agreement (ILA) with the City of Marysville, may request traffic mitigation measures from any new development in the city that impacts roads in the unincorporated county. The City will impose the requested mitigation to the extent that the City determines that the mitigation is reasonably related to the impacts of the development. To determine the impacts, and to determine reasonable mitigation measures, the City of Marysville requires a traffic study from any development in the city that may have impacts on county roads. This 'traffic study' may be as simple as completing sections one and two of the county traffic worksheet below, or having a professional traffic engineer conduct a formal traffic study consistent with the requirements in section three below.

- If a development generates less than ten peak-hour trips and the applicant chooses Option A for mitigation payment (standard payment by percent of county impact fee), then the applicant will generally only have to fill out the first two sections of this traffic worksheet and complete a mitigation offer (see section four).
- However, if a development generates more than ten peak-hour trips, or if the applicant chooses Option B for mitigation payment (comprehensive impact analysis), then the applicant will have to fill out the first section of this worksheet, complete a separate traffic study consistent with the requirements in section three, and complete a mitigation offer (see Section Four).
- Applicants should submit all documents *to the City* as part of their initial submittal.
- Traffic study requirements for impacts on county roads are based on the County's traffic mitigation ordinance (Chapter 30.66B) and the city/county ILA. At the end of this document find references to the county contacts and county web site (sources for may of the documents related to traffic mitigation).
- Following review of the documents submitted, the County may request supplemental information and analysis as necessary to determine the impacts of the development in accordance with the city/county ILA. The City will require the proposed development to submit the supplemental information and analysis to the extent that the City determines that it is necessary to determine the impacts of the development.

Section One (1) Worksheet General Information

1. Name of Proposed Development Stevens Assemblage

   City Development File Number (if known)_____

2. Name, Address and Phone Number of Applicant_____

3. Development Site Address 44th Street NE at 75th Avenue NE alignments

4. Is it a residential or commercial development? Residential

5. Description of Development (size and specific type) 59 new Single-Family Detached Units
   5 existing Single-Family Detached Units to be removed

6. How many new vehicle trips are expected to be generated by the proposed development? (For many common types of developments this information can be provided by the city or the county. For more complex developments trip generation may have to be determined under section three below)

   37 AM Peak Hour 54 PM Peak Hour 509 Average Daily Trips (ADT)

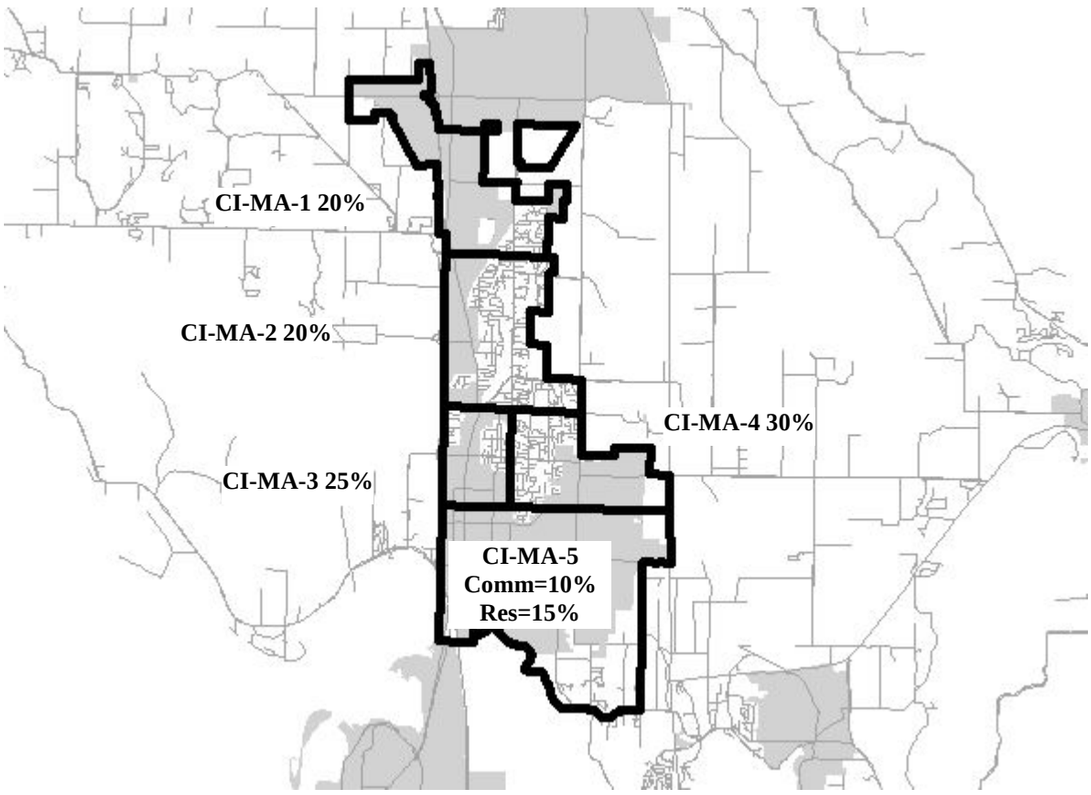
7. Proportionate Share Impact Mitigation: All applicants have two options in determining the amount of their traffic mitigation payment:

   _____ For determining the amount based on a percentage of the county fee go to section two.

   _X_ For determining the amount based on a comprehensive traffic study go to section three.

Section Two (2) Proportionate Share Determined by Percentage of County Impact Fee

2(a) Calculation of Payment Amount



1. Standard default estimated percentage of trips impacting the City streets based on subareas (See below) _____%

or

2. Other Percentage: (Note: See author's qualifications in section three below.) Estimated percentage of trips impacting county roads from attached trip distribution: _____ %

Sub-Area ID #	* City Subarea Description	Residential Developments	Commercial Developments
CI-MA-1	North of 136th ST SE.	20%	20%
CI-MA-2	North of 100th ST NE and South of 136th ST SE.	20%	20%
CI-MA-3	North of 76th ST NE, South of 100th ST SE, and West of 51st AV NE.	25%	25%
CI-MA-4	North of 76th ST NE, South of 100th ST SE, and East of 51st AV NE.	30%	30%
CI-MA-5	South of 76th ST NE.	15%	10%

* Note: Boundaries are either street centerlines or imaginary extensions of street centerlines in places where the actual streets do not exist.

3. Development New Average Daily Trip Generation (ADT)_____

4. Type of Development (Residential or Commercial)_____

5. County Commercial Fee Rate $_____ 6. County Residential Fee Rate $_____

(Note: Consistent with county code and the ILA, developments pay the rate in effect at the time of their submittal. As of 07/13/11 the rates were $39 for commercial developments and $46 for residential developments. Through ordinance, the County Council can change these rates at any time, so consult with the County or look at Snohomish County Code 30.66B.330 to find the latest fee rates.)

7. Calculation of Proportionate Share Impact Mitigation

_____	×	_____	×	_____	=	$_____
#1 or #2 above: % of trips		#3 above: ADT		#5 or #6 above: Fee Rate		proportionate share mitigating payment

2(b) Determining whether or not an additional traffic study is necessary

Will the development generate more than 10 peak-hour trips *or* are there other impacts that need to be addressed (e.g., level of service, safety, or access and circulation)

_____ No. Skip section three and go to section four.

_____ Yes. Read the introduction to section three and skip to section 3(b).

Section Three (3) Traffic Study Requirements

Introduction: This section outlines requirements for traffic studies for impacts on County roads. If an applicant chooses (or is required) to complete a traffic study, then it should be submitted along with this worksheet and a mitigation offer. (Note on Author's Qualifications: A traffic study under this section must be conducted by an engineer licensed to practice in the state of Washington with special training and experience in traffic engineering and, preferably, membership in the institute of transportation engineers. For individuals/firms not on the City's approved list, the developer will provide, with the traffic study, the credentials of the individual or firm performing the traffic study certifying compliance with these qualifications.)

3(a) Proportionate share impact mitigation based on comprehensive traffic study

1. Development's Trip Generation and Distribution. Determine the PM peak-hour trip generation and distribution for the development consistent with Section 3(b) below.
2. Impacted Improvements. Determine which of the road sections with planned improvements in the county's impact fee cost basis (Transportation Needs Report Appendix D) are impacted by three or more development-generated *directional* PM peak hour trips (PM PHT).
3. Current Counts. For each impacted improvement, provide current traffic counts to determine the PM PHT.
4. Reserve Capacity. Determine "reserve capacity" for each impacted improvement by subtracting the current PM PHT from the maximum service volume (MSV) for the existing facility. Reserve capacity is set to zero if current PM PHT exceeds the MSV. For MSVs see County DPW Rule 4224.
5. New Capacity. New capacity is the incremental increase in PHT that could be accommodated with the planned improvement. Determine the new capacity of each impacted improvement by subtracting the current MSV from the future MSV after the improvement.
6. Chargeable Capacity. For each impacted improvement, add the reserve capacity to the new capacity.
7. Final Adjusted Cost. Find the cost of each impacted improvement and make any adjustments used by the County for tax credits (see Transportation Needs Report Appendix D).
8. Capacity Cost per Peak-Hour Trip. For each impacted improvement, determine the capacity cost per PM PHT by dividing the final adjusted improvement cost by the chargeable capacity.
9. Traffic Impacts. From step one above, take the *total* number of PM PHT (in both directions) impacting each planned improvement.
10. Proportionate Share. For each impacted improvement, determine the proportionate share impact mitigation by multiplying the capacity cost per peak-hour trip by the number of PM PHT impacting the improvement.

3(b) Trip Generation and AM and PM Peak Hour Trip Distribution and Assignment

Calculate AM, PM and Daily trip generation consistent with the ITE Trip Generation Handbook and Snohomish County Public Works Rule 4220. Determine the trip distribution and assignments consistent with the County's document titled "Format for Trip Distributions"(available at County web site, see below).

- Within the developments transportation service area (TSA) the distributions will be carried out to each key intersection at which the approach or departure volumes on any leg have three (3) or more peak hour trips. Get the most current list of key intersections on the web site described below. Trips should be distributed onto the road system as it is expected to be in six years.
- The distribution should be a schematic map showing the broad distributions of trips in terms of percentages on different roads. Show all City boundaries.
- The assignment should be a schematic map with the impacted key intersections identified by ID# and turning movements for each shown in separate diagrams on the same page or on different pages. The assignment should also be presented in tabular form listing each intersection by intersection ID#, and the number of trips at each movement.

3(c) Additional Analysis for Developments Generating More Than Fifty (50) Peak Hour Trips

For large developments (i.e., those generating more than 50 peak-hour trips), the County may request mitigation for impacts on the level of service of County roads, documented safety locations (the County calls such locations "inadequate road conditions" or "IRCs"), and access or circulation. The traffic study requirements below are intended to disclose impacts. Based on this information the County may request through the City that the applicant provide additional information showing possible mitigation measures. If any off-site improvements were needed for mitigation the County would work with the applicant to determine requirements for right-of-way, construction plans, right-of-way use permits, construction/maintenance bonds, and other issues.

Impacts on Level of Service (LOS) of County Arterials

Contact Snohomish County Public Works for the most current list of arterial units in arrears and critical arterial units. Identify any arterial units in arrears or critical arterial units impacted by three or more directional peak-hour trips.

Impacts on Inadequate Road Conditions

Contact Snohomish County Public Works for a list of the current IRCs. Identify any IRCs impacted by three or more peak-hour trips. Note: Unlike LOS impacts in which at least three or more peak hour trips have to be added in one direction to require disclosure (e.g., 3 westbound), for IRCs, any three peak hour trips added to IRC locations are considered an impact for which disclosure is necessary (e.g., 2 westbound plus 1 eastbound).

Impacts on Access or Circulation

The County may request improvements to existing roads to provide safe and efficient access and/or circulation. In some instances, the County may request provisions for future County roads identified in the Comprehensive Plan or in Small Area Transportation Studies. If so, the County will request specific additional information through the City.

Section Four (4) Traffic Mitigation Offer to Snohomish County

The applicant should complete a traffic mitigation offer to Snohomish County that summarizes the mitigation identified in the county traffic worksheet and any additional traffic study. This will facilitate timely review of the development and processing of the application. The form to use for the mitigation offer is titled "Traffic Mitigation Offer to Snohomish County." This form is typically provided to all applicants along with this traffic study checklist. In addition, copies are available from the county contacts or the Snohomish County web site shown below.

Additional Information

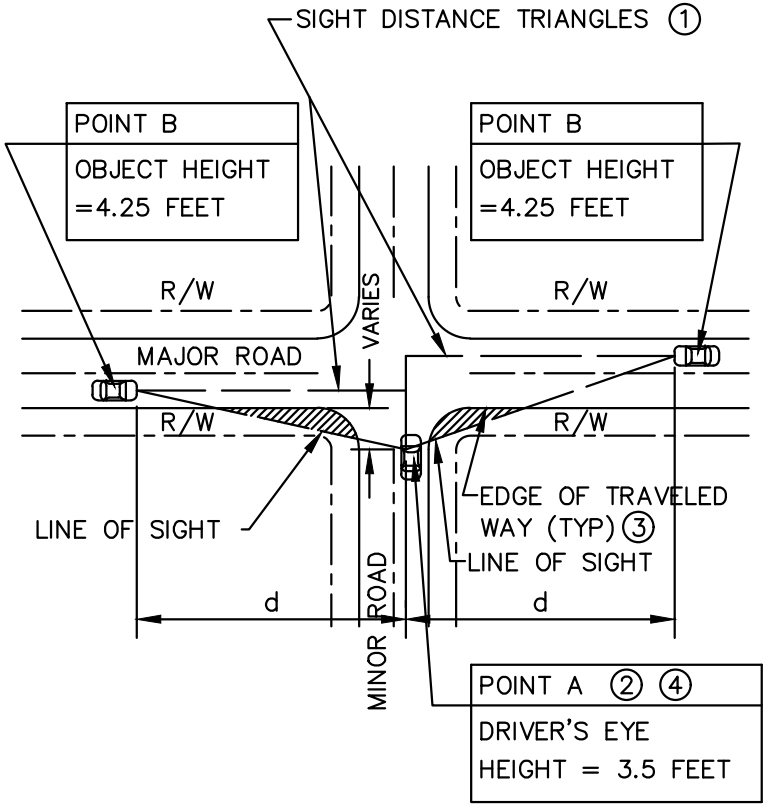
County Web Site

Snohomish County Public Works has a web site with many documents related to traffic studies and mitigation requirements for developers. From the Snohomish County Home Page go to:

Departments/Public Works/Divisions/TES/ProgramPlanning/3066B

County Contacts

- Elbert Esparza, Snohomish County DPW Traffic, 3000 Rockefeller M/S 607, Everett WA 98201, (425) 388-3184, elbert.esparza@snoco.org



NOTES:

1. AT ANY INTERSECTION OF A PRIVATE ROAD/ACCESS POINT WITH A CITY ROAD OR A CITY ROAD WITH A CITY ROAD, THERE MUST BE A SIGHT DISTANCE TRIANGLE WHICH PROVIDES AN UNOBSTRUCTED LINE OF SIGHT FROM THE INTERSECTING ROAD EDGE OF TRAVELED WAY (POINT A) TO A POINT IN THE TRAVELED WAY (POINT B) AT LEAST EQUAL TO THE REQUIRED SIGHT DISTANCE d. SEE SECTIONS 201, 202, 203, 204 AND STANDARD PLAN 3-212-002.

2. THE DRIVER'S EYE TO DETERMINE LINE OF SIGHT AT INTERSECTIONS IS 3.5 FEET ABOVE THE PAVEMENT, WITH AN OBJECT HEIGHT OF 4.25 FEET ABOVE THE PAVEMENT.

3. THE EDGE OF TRAVELED WAY IS DEFINED AS THE FACE OF CURB FOR ROADS THAT ARE OR WILL BE CONSTRUCTED TO URBAN STANDARDS AND THE EDGE OF PAVEMENT (NOT SHOULDER) FOR ROADS THAT ARE, OR WILL BE CONSTRUCTED TO RURAL STANDARDS. THE AREA WITHIN THE SIGHT DISTANCE TRIANGLE MUST BE FREE FROM ANY SIGHT OBSCURING OBJECTS WITH THE LINE OF SIGHT AT LEAST 18 INCHES ABOVE THE GROUND AND/OR THE TOP OF ANY PROPOSED VEGETATION ALONG THE LINE OF SIGHT.

4. THE DRIVER'S EYE LOCATION MAY BE REDUCED TO A MINIMUM OF 10 FEET BEHIND THE TRAVELED WAY, AT THE DISCRETION OF THE CITY ENGINEER, WHERE THE REDUCTION IN DRIVER'S EYE LOCATION WILL NOT ADVERSELY AFFECT SAFETY AND/OR OPERATION. SOME EXAMPLES OF SITUATIONS WHERE THE ENGINEER'S DISCRETION MAY BE USED ARE: AN INTERSECTION ON THE OUTSIDE OF A HORIZONTAL CURVE; AN INTERSECTION WHERE ONE APPROACH IS IN A CUT OR FILL; OR WHERE A BRIDGE RAILING OR ABUTMENT WOULD OBSCURE THE LINE OF SIGHT FROM 15 FEET BACK BUT NOT FROM 10 FEET BACK.

MARYSVILLE FIRE DISTRICT
REGIONAL FIRE AUTHORITY
Fire Marshal's Office
1635 Grove St. Marysville, WA 98270 - (360) 363-8500
MFInspectors@MFDRFA.org - www.marysvillefiredistrict.org

To: Emily Morgan, Senior Planner
From: Brian Merkley, Deputy Fire Marshal
Date: September 12, 2024
Subject: PA24-024 ~ Stevens PRD ~ 3705/3625/3609 98th St NE, 9815/9907/9909/9921 35th Ave NE

I have completed a review of the revised plans for this project proposing development of a 59 unit SFR development accessed from 98th St NE. Please see below for comments and requirements.

1. **GENERAL INFORMATION:**
   a. The project shall comply with current fire code requirements (2021 IFC) including WA State and local City of Marysville amendments to the fire code, city design standards, and all applicable NFPA standards, including IFC Chapter 33 and NFPA 241 construction codes.
   b. Fire marshal approval of fire access and fire hydrant/water supply systems is required as part of the civil construction plan review and approval process.

2. **WATER RELATED:**
   a. All homes will require fire sprinklers per MMC 9.04.503.1.5 Exception 1. *Due to single point of access at 36th Ave NE, fire sprinklers will be required, has been noted on plans.*
   b. It is the developer's responsibility to see that adequate water for fire protection is attainable. The minimum required fire flow is determined using IFC Appendix B, and depends upon building sizes, construction types, and sprinkler systems. Proof of fire flow will be required. *No fire flow information provided at this time, please provide.*
   c. The buildings will require residential fire sprinkler system installations. Be clear when plans are submitted to show if these will be IRC townhomes, or IBC apartments (sprinklers and construction differ). The buildings will require NFPA 13D fire sprinkler systems in each unit (for townhomes), or NFPA 13R fire sprinkler systems in each building (for apartments).
   d. Provide water main extensions with hydrants along the new roadways and at all road intersections in approved locations, with maximum spacing of 600' apart. *Hydrants shown appear acceptable.*
   e. Fire hydrants shall comply with city Water Design Standard 2-060 Hydrants, including 5" Storz fittings, with blue reflective hydrant markers to be provided in the roadways, located four inches off the centerline on the hydrant side of the road.
   f. Fire hydrants with approved water supply must be in service prior to building construction.

g. Where residential fire sprinklers may be required the developer should install a water service per Standard Plan 2-090-001 Full ¾" x 1" Meter Service. Under this plan a 1" tap is made at the water main and 1" piping is run to the 1" meter setter. If in the end a ¾" water meter will suffice then all that is required is to install two reducer bushings with the ¾" water meter. A single service tap should be used where sprinklers are required, not a double service installation.

3. **ACCESS RELATED**:
   a. Turnaround provision is required for dead-end access in excess of 150 feet long. Turnarounds shall comply with city standard plans. (MMC 9.04.503.2.5). *Turnaround shown on plans appear adequate, 80' cul de sac.*
   b. "Where the vertical distance between the grade plane and the highest roof surface exceeds 30 feet (9144 mm), approved aerial fire apparatus access roads shall be provided. For purposes of this section, the highest roof surface shall be determined by measurement to the eave of a pitched roof, the intersection of the roof to the exterior wall, or the top of parapet walls, whichever is greater." (2018 IFC D.105.1). *Building heights are not known at this time, disregard if under 30'.*
   c. An adequate access route for fire apparatus must be in service prior to any building construction.
   d. Access for firefighting operations along all sides of all buildings is required. A minimum 5' wide access is required for MF dwellings. All parts of building exteriors should be accessible for firefighting by an approved route around the building, and be within 150 feet of a minimum 20' wide fire apparatus access.
   e. "**NO PARKING - FIRE LANE**" signs are required on both sides of all roads that are 26 feet wide or less, and one side of roads 26 to 32 feet wide. The signage shall be identified on the approved Civil Plans. (MMC 9.04.101, 2018 IFC Appendix D103.6.1)
   f. The city address committee will determine road names and address numbers for the lots.

The City of Marysville Community Development Department is reviewing this application and encourages other affected agencies, departments, community groups and municipalities to respond. Your comments will assist the City's evaluation of this application. Furthermore, you will become a Party of Record to this case if you submit a response with your name and address. We highly recommend that you send your comments on letterhead. Without a full name and address, you will not be considered a Party of Record. You may e-mail, fax or send via regular mail your comments to this project manager listed above.

If you have no comments, please check the box below, sign and return this form to the project manager.

RE: Request for Review - Stevens PRD - PA24-024

September 9, 2024

As part of public safety access and call volume concerns raised by the public in relation to this development project, I directed my staff to prepare a short report on incidents located within the great neighbourhood accessed by 35th Ave NE. Recent years show lower call responses to this neighborhood compared to earlier years taken into account in this review.

I have forwarded this information to the file for future consideration.

Erik Scairpon
Police Chief, City of Marysville

MARYSVILLE POLICE DEPARTMENT

98th St NE Neighborhood Request

Synopsis: The following is a historical analysis of incidents in the area surrounding the location of a proposed residential development north of 98th St NE, Marysville. The area included in this analysis can be seen in Figure A. All incidents that did not have a cancelled police response and occurred between 01/01/2016 and 08/15/2024 are included in this analysis, unless noted otherwise.

*As of 8/15/24

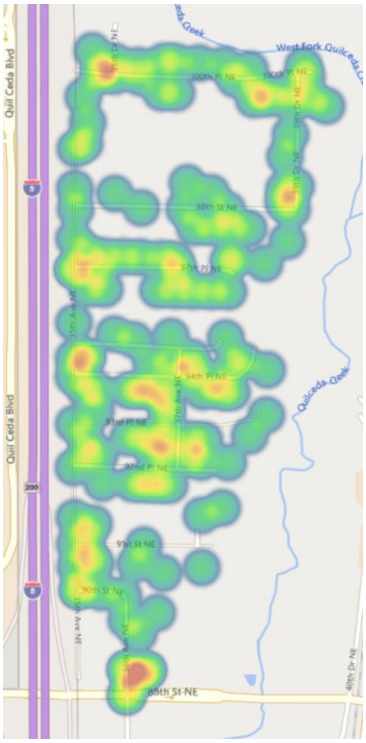
Between 01/01/2016 and 08/15/2024, officers responded to a total of 3,223 incidents in the geofenced area. The highest annual total was in 2016 with 430 incidents and the lowest annual total (excluding the current year) was in 2023. The most common type of incident is "Suspicious", which made up 22.5% of the total volume of calls. Note that 378 of the 726 Suspicious calls were associated with one location (7-Eleven, 3609 88th St NE).



MARYSVILLE POLICE DEPARTMENT

98th St NE Neighborhood Request

All Incidents, 2016 - 2024

All Incidents, 2022- 2024

A comparison of heat maps showing incidents from 2016-24 and 2022-24 show one location that continues to be a location with a significant number of incidents. Within the hot spot (circled on the map to the left), three address locations were identified:

1. **3609 88th St NE (7-Eleven)**
2. **8800 Blk 36th Ave NE (General Area)**
3. **88th St NE / 36th Ave NE Intersection**

Altogether, these locations account for 1,780 incidents over the 2016-24 period (55.2%). Of these 1780 incidents, 961 of them are associated with the 7-Eleven address (54% of vicinity; 30% of measured area).

Collisions: One major concern was collisions that would block off the entryway into the neighborhood. According to the incident data, 16 collisions have been reported to police at the 88th St NE / 36th Ave NE intersection in 2024 (as of 8/15/24). In total, there have been 131 collisions reported in the vicinity of this intersection since 2016 with an average of 15 collisions per year. Within the measured area, 83% of collisions occur at this intersection. In 2024, there appear to have been three major collisions at this intersection (24-9994, 24-15086, 24-31306).

Top Incident Types in the Vicinity of 88th St NE / 36th Ave NE by Year

MARYSVILLE POLICE DEPARTMENT

98th St NE Neighborhood Request

Incidents w/ Major Police Presence

The following is a list of major events that occurred in the neighborhood between 01/01/206 – 08/15/2024 based on the significant volume of police presence listed in the call. Though these may not include major all major incidents, these ones had the greatest number of officers and therefore would likely have been the most interruptive to the community in terms of the volume of police vehicles, closures, etc.

2022-32870: Suicide Weapon at 3515 92nd Pl NE – female shot herself in the head after laying down to sleep for the night. Husband reported that she had been drinking and was intoxicated and he had left her asleep inside the house. He went outside to water this flowerbeds when he heard "two pops" from inside and found his wife obviously deceased from being shot.

2020-03932: Attempted Suicide at 3533 97th Pl NE – report from adult son that his father had shot himself in the backyard and then buried the gun before driving away. Police found male with no gunshot wound near the end of 97th Pl NE where he had driven the truck. It was believed he may still be armed and so officers requested armored vehicle. The male returned to the truck and drove back home where he was detained and put on an involuntary hold. No evidence was found that the man had fired a weapon and there was no buried gun.

2019-15882: Warrant Arrest at Haggen – officers responded to a traffic hazard where a male was attempting to pull a female out of a vehicle in the middle of the road. Upon arrival, witnesses stated the male had broken her windshield and was running into Haggen grocery store. The male was detained outside of Haggen shortly after and stated he just ran because he was "tweaked out on meth and [had] a DOC warrant". He was correct that he had a DOC warrant, which he was subsequently arrested for.

2020-54631: Robbery at 8514 36th Ave NE – the victim reported that he was in a vehicle with the suspect who had previously robbed him. That suspect and the victim began arguing about an exchange of money. The suspect took the victim's phone, car keys, wallet, and folding knife, then threatened the victim with the knife before leaving in a separate vehicle. The suspect later returned and assaulted the victim with a metal pipe before stealing the victim's vehicle. The vehicle was later recovered unoccupied in Tulalip.

2020-26631: Special Ops at Chick-fil-a. No additional details.

2016-00591: Vehicle Recovery at 3609 88th St NE – officer identified a stolen vehicle occupied by a male and two females and conducted a high risk vehicle stop on the vehicle.

2018-27319: Assist Law at 91st St NE / 35th Ave NE – Tulalip requested assistance in containing the area where a suspect with a warrant for failure to register had fled from a stop and into Marysville.

MEMORANDUM

To: Emily Morgan, Senior Planner

From: Ryan Carney, Development Services Technician

RE: Stevens PRD, PA24-024
Address & Parcel #

Date: 9/10/2024

The following comments are offered after review of the above referenced application.

Utility Capital Improvement Fees
Capital utility fees are assessed in accordance with the attached rate sheet. The "City" rates will be applicable to this project.

All onsite private wells are required to be decommissioned by a certified well driller.

All onsite septic systems are required to be decommissioned per Snohomish Health Division requirements.

Recovery (Latecomer) Fees
No recovery fees are currently applicable to this project.

Utility Main Fees (MMC 14.07.020)
No main fees are applicable to this project.

ULID/LID Fees
No ULID or LID fees are applicable to this project.

If you have additional questions regarding the above comments, please contact me at rcarney@marysvillewa.gov or at (360) 363-8205.

cc: Ken McIntyre, PE, Assistant City Engineer

MEMORANDUM

TO: Emily Morgan, Senior Planner

FROM: Brian McDaniel, Water Utility Supervisor
Ryan Keefe, Water Operations Lead II

DATE: September 17th, 2024

SUBJECT: Stevens PRD, PA24-024

Public Works Operations has reviewed the Stevens PRD submittal and has the following comments:

1. Move water meters for lots 10 and 11 to other sides of lots. Currently service lines are shown tapped on gate valves;

2. Water main tie in to 18" water main needs to be a live tap;

3. Water details not shown

If the applicant has any questions about these comments, I can be contacted at (360) 363-8163 or bmcdaniel@marysvillewa.gov.

FROM: David Jackson, NPDES Coordinator

DATE: 9/13/2024

SUBJECT: PA24-024 Stevens PRD

1. For residential projects triggering minimum requirements #6 Runoff Treatment and #7 Flow Control, the stormwater facility lot will be dedicated to the HOA. This policy may be modified depending on facility design. The City will receive an easement to inspect the facility, and, if needed, repair and maintain the facility in an emergency.

2. The City has adopted the 2019 Stormwater Management Manual for Western Washington.

   (UIC rules apply to infiltration trenches, see Volume I chapter 4 UIC Program. Contact the Department of Ecology for permitting information.)

3. Infiltration BMPs require pre-treatment. Appropriate options for treatment can be found in the Stormwater Management Manual for Western Washington 2019.

If you have questions regarding these comments, please contact me at djackson@marysvillewa.gocv or 360.363.8288.

Instructions Page

For the Developer:

Does your Project trigger minimum requirements #6 Runoff Treatment, or #7 Flow Control AND the facility(ies) will be on private property?

If "no" then this covenant does not need to be recorded.

Otherwise, please complete the enclosed documents. The draft document should be submitted for review with the other civil plan documents. It does not need signatures at that time. Exhibit B-Facilities Maintenance Plan should include a map showing where the storm water features are located on the property and describe the maintenance requirements. Once the infrastructure is built, review the document. If construction altered the stormwater utility layout update the appropriate information. The documents must be signed by all parties with an ownership interest in the property (include additional signature blocks and notary acknowledgement forms as necessary). Have the final document signatures notarized. Record before final occupancy is issued.

Recording notes:

- Do not write within the one-inch border
- Type or print legibly and in an easily readable font
- Print documents single sided and provide original copies with original signatures

When Recorded, Return to:

Stormwater Covenant and Easement
(MMC 14.15.155)

DOCUMENT TITLE: *Project Name* Stormwater Covenant and Easement
Grantor: *Property Owner Name*
Grantee: CITY OF MARYSVILLE, a Municipal Corporation
Legal Description (abbreviated):
Assessor's Parcel(s):
Address:
Reference Number(s):
City of Marysville Project No: City of Marysville Building Permit No:
****Note**** The Auditor/Recorder will rely on the information provided on this form. City staff will not read the document to verify the accuracy or completeness of the indexing information provided herein.

Stormwater Covenant and Easement
(MMC 14.15.155)

This Stormwater Covenant and Easement (the "Agreement") is executed in favor of the City of Marysville (the "City") by the undersigned owner(s) (the "Grantor") of the following described real property situated in the City of Marysville, Snohomish County, State of Washington (the "Property") (insert complete legal description):

(attach Exhibit A if necessary to fit full legal description)

WHEREAS, pursuant to Marysville Municipal Code Chapter 14.15, as may be hereafter amended, a condition of developing the Property requires that it have adequate stormwater drainage; and

WHEREAS, the Grantor has installed a private storm drainage system for the Property; and

WHEREAS, such a private storm drainage system will require ongoing maintenance as detailed in the approved Facility Maintenance Plan to ensure it operates as designed;

WHEREAS, the private storm drainage system includes the following specified drainage control facilities, which are documented in the drainage control plan drawing(s), as amended by record drawing(s) on file with the City of Marysville. The following runoff treatment or flow control facilities are onsite:

	Detention or Infiltration Pond		BMP T8.20 Sand Filter vault
	Detention or Infiltration Vault		BMP T8.30 Linear Sand Filter
	BMP T5.15 Permeable Pavements		BMP T8.40 Media Filter Drain
	Detention Tank/Pipes		BMP T9.10 Basic Biofiltration Swale
	BMP T5.16 Tree Retention and Tree Planting		BMP T9.20 Wet Biofiltration Swale
	BMP T5.17 Vegetated Roofs		BMP T9.30 Continuous Inflow biofiltration Swale
	BMP T5.20 Rainwater Harvesting		BMP T9.40 Basic Filter Strip
	BMP T5.30 Full Dispersion area		BMP T10.10 Wetponds-Basic and Large
	BMP T6.10 Presettling Basin		BMP T10.20 Wetvaults
	BMP T7.10 Infiltration Basins		BMP T10.30 Stormwater Treatment Wetlands
	BMP T7.20 Infiltration trenches		BMP T10.40 Combined Detention and Wetpool Facilities
	BMP T7.30 Bioretention Cells, Swales and Planter Boxes		BMP T11.10 API (Baffle type) Separator bay
	BMP T7.40: Compost-amended Vegetated Filter Strips (CAVFS)		BMP T11.11 Coalescing Plate (CP) Separator Bay

	BMP T8.10 Basic Sand Filter basin		Ecology approved Emerging Technology Manufacturer: Device Name:
	BMP T8.11 Large Sand Filter basin		

Now, therefore, the Grantor, on behalf of Grantor and Grantor's heirs, successors, and assigns, agrees to the following and hereby creates a covenant running with the land that shall be binding upon all parties and their heirs, successors, and assigns forever:

(1) The Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns, agrees to and shall:

(a) inspect and maintain the above described drainage control facilities in accordance with the provisions of Marysville Municipal Code (MMC) Title 14, the approved Facility Maintenance Plan (attached hereto as Exhibit B and incorporated by this reference), and any other provisions applicable to the facilities, as now and hereafter in effect;

(b) implement the terms of the drainage control plan required for development; and

(c) inform all future purchasers, heirs, successors, and assigns of the existence of the drainage control facilities and other elements of the drainage control plan and the limitations of the drainage control facilities.

(2) The Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns, hereby grants permission for authorized representatives of the City of Marysville to enter onto the Property for inspection, monitoring, correction, or abatement of conditions related to the Property's drainage control plan, drainage control facilities, MMC Title 14, or any other MMC provision applicable to drainage control, as now and hereafter in effect.

(3) If the private storm drainage system is not maintained in accordance with the approved or record drawing design, the Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns grants the City the right to inspect and repair the system and assess reasonable costs for the work that may be charged against the Property, the Property owner, or any beneficiary.

(4) The Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns:

(a) Agrees and acknowledges that the City is not responsible for the adequacy or performance of the drainage control plan or the drainage control facilities;

(b) Agrees to accept any and all risks of harm, loss, injury, or damage related to the drainage control plan or the drainage control facilities; and

(c) Hereby waives any right to assert any and all present and future claims against the City, whether known or unknown, for any harm, loss, injury, or damage occurring either on or off the Property, related to the drainage control plan, the drainage control facilities, or drainage

or erosion on the Property, except only for such harm, loss, injury, or damage that directly results from the sole negligence of the City.

(5) This Agreement shall be recorded in the real estate records of the Auditor's Office of Snohomish County, Washington. If any provision of this Agreement is held invalid, the remainder of the Agreement is not affected.

(6) The obligations of the Grantor and each of the Grantor's heirs, successors, and assigns under this Agreement shall terminate when that person sells, devises, or transfers the Property, or his or her interest therein, unless the obligation arises out of a claim of negligence or intentional act of that person.

Now, therefore, to this end, the Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns, hereby grants a perpetual easement to the City of Marysville and its authorized representatives to enter the Property, inspect the private storm drainage system, and make necessary repairs, with any expenses incurred being chargeable against the Property, the Property owner, and any beneficiary.

Memorandum

To: Emily Morgan

From: Krista Gessner, Cross Connection Specialist

Subject: PA24-0024 Stevens PRD

Date: 9/18/2024

In response to your request for review of the above project, please note the following items.

- Plumbing system is subject to applicable requirements of MMC Chapter 14.10 "Water Supply Cross-Connections" and WAC 246-290-490.
- If any wells are on site, they must be either decommissioned by a certified well driller, or a DCVA is required to be installed behind each water meter.
- A Reduced Pressure Backflow Assembly (RPBA) is required immediately downstream of any irrigation meter and in an above ground hotbox if a chemical/fertilizer injection system is installed. If the irrigation system is not chemically injected, a DCVA is sufficient for this application. The DCVA may be installed in an in-ground meter type box or vault. In accordance with Design Standards 2-15-001
- On-site inspections are to be performed by the City of Marysville Cross Connection Control Specialist at rough-in and final. 48 hours' notice is required, prior to inspection.
- Testing of all backflow prevention assemblies, by a Washington State Certified Backflow Assembly Tester, is required prior to occupancy use per MMC 14.10.120. Test report shall be forwarded to the City of Marysville Water Quality Office, prior to occupancy.
- All backflow assemblies are required to be lead-free.

Any questions regarding these comments, and scheduling for onsite inspections should be directed to Krista Gessner 360-363-8141 crossconnection@marysvillewa.gov

MEMORANDUM

Date: **September 4, 2024** **PA24-024**

To: **Emily Morgan, Senior Planner**

From: **Michael Snook, Building Official**

Re: **Project Name:** Stevens PRD
Applicant: Neil Latta, PE – Latta Engineering / Aron Golden – KB Home
Proposal: The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.
Address: 9815/9909/9907/9921 35th Ave NE & 3705/3625/3609 98th St NE

In response to your request for review of the above project. Please see requirements below;

1. Applicant shall comply with any and or all provisions the 2021 Edition of the International Building, Residential, Mechanical, 2021 Uniform Plumbing Codes, and current Washington State Amendments.

2. All plans and permit applications will be required to be submitted electronically as part of their submittal process. One (1) complete set of building plans, structural calculations, and 2021 Washington State Energy Code work sheets.

3. Contact our office if you have questions in regards to permit applications, checklists and/or handouts that you and/or your design team will be preparing plans for on your project.

4. If any demolition of structures is proposed, and you are unsure if permit/s will be required for the removal of any existing structures. Please contact the Building Division at 360-363-8100, to ask any specific questions. An asbestos report will be required for each demo permit.

5. Separate permits will be required for any proposed rockeries or underground storm vaults. One (1) complete set of building plans, structural calculations, site plan, and Geotech Report are to be submitted for review.

6. A grading permit will be required. A Geotechnical report shall be submitted to the City for this project. This is to be an in-depth report to address the following:

    - Soil Classification
    - Required Drainage Systems
    - Soil Compaction Requirements
    - Type of Footings, Foundations, and Slabs Allowed
    - Erosion Control Requirements
    - Retaining Walls
    - Fill and Grade
    - Final Grade

Please provide the below information in regards to this overall project the 2018 International Building requirements;

1. The building structure will be required to be designed under the 2021 IBC, Chapter 16, and Structural Design Requirements. The seismic zone criteria is to be established under the guidelines of a Washington State Licensed Architect and/or Structural Engineer.

2. Please provide scaled floor plans with square footage.

3. Show on the plans the type of building materials proposed, and if required, what type of fire-resistant construction will be required.

4. Site plan is to show the distance from the proposed structure to the property lines, from all sides of the building.

5. A Fire Sprinkler system may be required. The applicant is to verify this requirement with the Fire Marshal's Office.

6. All Electrical installations are to be permitted, inspected and approved through the City. The current code is NEC 2023 with 2023 WCEC Amendments. A separate application, plans, and plan review will be required.

7. Special Inspection may be required. The list of the type of inspections shall be indicated on the plans by the Engineer of Record. The owner is to notify the City of the registered special inspection agency prior to permit issuance.

8. **Building application for plan review will be approximately 4-6 weeks for first-time plan review comments.**

We look forward to your project coming to our City!

If I may be of any further assistance, please feel free to contact me.

Michael Snook, Building Official, 360-363-8210 or msnook@marysvillewa.gov during office hours 7:30 am – 4:00 pm, Monday through Friday.

COMMUNITY DEVELOPMENT DEPARTMENT

Blaine, WA 98230

Re: Stevens PRD – PA24-024 – Technical Review 1

Dear Neil,

After preliminary review of the above referenced proposal, the following comment(s) are provided:

CITY OF MARYSVILLE COMMUNITY DEVELOPMENT – PLANNING

Emily Morgan, Senior Planner
360.363.8216 | emorgan@marysvillewa.gov

SUBDIVISION/PRD COMMENTS

1. Include File Number PA24-024 on all future correspondence, in addition to all site, civil and landscape plans.
2. Given the large public interest in the project, with one of the major concerns relating to groundwater contamination of existing on-site wells, please provide an analysis that would address how this concern would be mitigated and/or prevented.
3. On page C-1, the total number of lots proposed (see under #3 of Lot Density and Residential Density Incentives Summary) is 49; please revise accordingly.
4. To be eligible for RDI credits, the proposed benefit incentive must go above what is required per code. Per MMC 22G.080.100, 35% of required area of open space must be in active recreation. Therefore, 0.574 acres must be for active open space. Any area in excess of that total may be used towards RDI benefits.

   Active open space area to be dedicated for RDI 6(a) must not be double counted. Meaning open space area that is required per the PRD standards of MMC 22G.080.100 (in this case 0.574 acres) may not be used to achieve bonus density. Please revise the open space and RDI calculations accordingly.
5. Per the RDI benefits outlined in the preliminary civil plans, sections of perimeter fencing is proposed. Please clearly demonstrate where this fencing is proposed along with the details of the proposed fencing.

   5.1. Per MMC 22G.090.580, a 6 ft. sight obscuring fence shall be required if: during grading plan review, the existing grade will be increased by a 2 ft. or greater vertical grade change and the grade increase causes the new lots to be at a higher elevation than the abutting property.

Therefore, in areas that are required to be fenced pursuant to the above, those sections of perimeter fencing would not be eligible for RDI as previously mentioned.

CRITICAL AREA COMMENTS

6. Staff has reviewed and concurs with the findings that the site does not contain critical areas per the Wetland and Fish and Wildlife Habitat Assessment, prepared by Soundview Consultants, LLC, dated June 20, 2024.

LANDSCAPE PLAN COMMENTS

Prior to civil construction plan approval, a detailed landscape plan depicting all the applicable elements outlined in MMC 22C.120 and 22C.070.210 shall be approved. **Based on a cursory review of the proposed landscaping plan, staff has the following comments:**

7. The provided landscape plan does not include the required elements of MMC 22C.120.030(2), specifically:

    7.1. As mentioned above in #5, please depict all proposed perimeter fencing and include the fencing details/specs.

    7.2. All landscaped areas shall be provided with an irrigation system or a readily available water supply with at least one outlet located within 50 feet of all plant material. Please provide an irrigation plan.

    7.3. The common and scientific names of all plant materials used, along with their size at time of planting.

    7.4. Existing trees and other natural and unique features shall be preserved wherever possible. The location of these features must be considered when planning the open space, location of buildings, underground services, walks, paved areas, playgrounds, parking areas, and finished grade levels.

    Please incorporate and depict the trees included for retention per the Tree Conservation Plan, prepared by Soundview Consultants, dated August 28, 2024.

8. As proposed, the enhance landscaped area does not appear to be compliant with the RDI provision of 7(f). The landscaping would not be considered “exceptional, outstanding, or unique design”. Please provide more elements to better meet those standards.

    8.1. Further, a street view elevation would be helpful in determining if what is proposed is sufficient to satisfy this requirement.

9. Please include trees that provide shade in areas where pedestrians would be gathering (i.e. picnic tables, benches, etc.)

10. All open space areas that include children’s play areas need to be fenced. Please provide example/details of said fencing to the details sheet of the plans.

11. The details page on L5 appears to have some errors or are providing wrong images; see the “Active Open Space West” and the “Playground” details.

12. Location of precast vault lids need to be shown as well as proposed access to said lids.

Enclosed are copies of comments received from other City departments, reviewing agencies, as well as members of the public. Revised application materials must be accompanied with a written response detailing how each of the items outlined above and attached hereto have been addressed, and what sheet the change(s) can be found on.

After you have had an opportunity to review, please let me know what technical review comments you need clarification on. Once received I can set up a conference meeting with all of the applicable city and agency representatives, if needed. If you have any questions, please do not hesitate to contact me at 360.363.8216, or by e-mail at emorgan@marysvillewa.gov.

Sincerely,

Emily Morgan

MEMORANDUM

To: Emily Morgan, Senior Planner

From: Kacey Simon, Civil Plan Reviewer

RE: Stevens PRD, File# PA24-024
59 lot PRD
9815/9909/9907/9921 35th Ave NE & 3705/3625/3609 98th St NE & Parcel #'s 30051600301400, 30051600301500, 30051600301600, 30051600304500 30051600304501, 30051600305800, 30051600306500, 30051600306600

Date: 9/4/2024

The following comments are offered after review of the above referenced application.

1. **Existing utilities**:
    a. Sanitary sewer: The nearest sewer is a 10" PVC main located south at the intersection of 35th Ave NE and 94th PL NE which is about 1500 feet away.
    b. Water: There currently is an 18" ductile iron water main located along the west side of the property that can be found on record drawing W745.
    c. Storm: There is not any storm infrastructure in this area.

2. Per MMC 14.03.250, utilities are to be extended along the street frontages of the proposed project.
    a. Sewer, water and storm will need to be extended along all property frontage on both sides. Please note that manholes shall be provided at a maximum of 400' intervals for 8" – 15" sewer mains and the minimum slope for 8" sewer main is 0.40% and for 10" sewer main is 0.28%.

3. **Frontage Improvements:** Frontage improvements are required per MMC 12.02A.090 on all projects. Frontage improvements are described as curbs, gutters, and sidewalks; underground storm drainage facilities; patching the street from its preexisting edge to the new curb line; and overlayment of the existing public street to its centerline.
    a. 98th St NE is classified as a local access street and is to be built compliant with SP 3-202-002 of the EDDS with half street improvements along the project frontage.
    b. 35th Ave NE shall be built compliant with SP 3-218-002. We originally thought there was only 26' so we asked for two – ten foot travel lanes and a sidewalk adjacent to the north bound traffic lane. Since it appears we have 30', we would like to keep two – ten foot travel lanes with a 5' landscape strip and 5' sidewalk.

4. **Access**:
    a. The new roads shall be constructed to SP 3-218-001.
    b. Auto courts are permitted in a PRD. The auto court is to be built per the private road profile, SP3-202-004, with decorative concrete or stamped asphalt. They shall not exceed 150' in length or come off a cul-de-sac and shall serve a maximum of 6 lots.
    c. Elbow intersections per SP 3-209-002 are allowable on local access streets only and are subject to intersection spacing requirements established under section 3-209 of the EDDS.
    d. The minimum width of a residential driveway is 12', and the maximum is 26'. Curb cuts shall be limited to a 20' maximum.

5. **Drainage:** All projects in the city of Marysville must comply with requirements stipulated under the MMC 14.15.040 and 14.15.050.
    a. Stormwater drainage: The city has adopted the 2019 Ecology Manual. Projects above the 2,000 square feet and/ or 5,000 square feet threshold must comply with requirements stipulated in Volume I of the Stormwater Management Manual for Western Washington.
    b. It looks like infiltration is being proposed and there appears to be at least 5' of separation to the seasonal high-water table, a mounding analysis will be required if there is less than 5' of separation. The mounding analysis shall be performed during the wet season.
    c. The maximum allowed impervious surface coverage for the Zoning designation is 70%.

Standard Comments:

6. Survey control datum NAVD-88 and NAD-83 are required to be used. Civil construction plans will not be accepted in any other datum.

7. Fire flow will need to be completed prior to 1st civil plan review and submitted with 1st civil plan review. Contact Ryan Keefe at 360-363-8168 to schedule.

8. Trench restoration is to be completed in accordance with section 3-703 of the EDDS. A full lane or full street overlay may be required.

9. The onsite grading and placement of any retaining walls must be compliant with section 22D.050.030 of the MMC.

10. The applicant is responsible for identifying any existing well or septic systems on site or on adjacent properties. If there are any existing septic systems on site, they need to be decommissioned based on the Snohomish Health District standards. If there are any wells on site, they need to be decommissioned based on Department of Ecology standards.

11. Please refer to MMC 22G.030.020 for applicable plan review and construction inspection fees.

12. **All civil construction plan submittals are to be uploaded directly to our online portal at: https://permits.marysvillewa.gov/Search/permit.aspx**. The first *civil construction* plan submittal is to consist of a plan set, a copy of the drainage report, a copy of the geotechnical report and an approved USPS mailbox location. **Once the documents have been submitted, please email a permit tech at msvlpermits@marysvillewa.gov to let them know the documents have been uploaded.**
    a. Review timing:
        i. First review = 5 weeks
        ii. Second review = 3 weeks
        iii. Third review = 3 week
        iv. Subsequent reviews will be 3 weeks.

13. Please be advised these comments are in reference to specific items and do not imply a full review of the proposed application. Additional comments which may change the design requirements will be provided during the civil construction plan review process.

If you have additional questions regarding the above comments, please contact me at ksimon@marysvillewa.gov or at (360) 363-8280.

cc: Ken McIntyre, PE, Assistant City Engineer

MEMORANDUM

TO: Emily Morgan – Senior Planner

FROM: Danny Hagen – Associate Traffic Engineer

DATE: September 18th, 2024

SUBJECT: PA 24-024 Stevens PRD

The following comments are providing following review of the provided materials for the proposed Stevens PRD located at 35th Ave NE & 98th St NE.

1. The traffic impact analysis performed in Exhibit–011 of 54 new PM peak-hour trips is accepted with a mitigation fee of $340,200.
2. The Snohomish County Traffic Mitigation Offer document in Exhibit-012 is accepted and a filled copy is attached.
3. Driveways accessing public streets shall not be aligned with driveways on the opposite side but instead shall be staggered to enable parking and emergency vehicle access without parking restrictions.
    a. Driveway access locations should be reconsidered for lots accessing Road C, Road A west of Road B, and Road B south of Road C.
4. Although not required for land use approval, the following comments are provided to guide later civil construction plan approval. No response is required at this time.
    a. Street Lights are required along on-site roadways and any constructed frontage improvements.
        i. General PUD light locations will be provided by the City to the developer for submission to PUD and incorporation into the PUD site electrical plans.
        ii. Street Lighting along residential local streets shall be PUD installed fiberglass poles designed as collector arterial utilizing 100 watt equivalent LED fixtures. Spacing of fixtures shall be 180'-220'.
        iii. Contact Mike Fleming of Snohomish County PUD at 425-783-8276 for more information.
    b. A sight-distance analysis will be required at all new roadway intersections. See EDDS Std. Plans 3-212-001 & 002 for further guidance.
    c. A signing and marking plan shall be required as part of civil construction plans.
        i. "No Parking" with left arrow signs will be required on the outside of the 90º elbow by lot 23.
        ii. Stop signs with stop bars on all residential street approaches to an arterial.
        iii. Intersections of two residential streets shall not have intersection control (Stop or Yield) signs
        iv. Street Name signs at all intersections and where a street's name changes.

MARYSVILLE
PUBLIC WORKS

(360) 363-8100

Public Works
80 Columbia Avenue
Marysville, WA 98270

v. Only one (1) “No Parking in Cul-De-Sac” sign at all entrances to cul-de-sacs.

vi. Parking restrictions will be required along one side of a roadway when roadway width, measured from curb-face to curb-face, is less than 28’.

vii. A “Dead End” sign will be required immediately east of the intersection upon Tract I, near lot 60.

viii. A “No Outlet” sign shall be installed approximately 25’ from the single entry/exit to a closed street system (multiple road segments)

ix. Minimize signing within residential neighborhoods to reduce sign clutter and improve effectiveness of individual signs.

Traffic Mitigation Offer to Snohomish County

The applicant completes part one and submits it to the city with a completed county traffic worksheet. The city completes part two and sends it to the county. The county completes part three and sends it back to the city.

Part One to be completed by Applicant

Basic Development Information

Name of City in which development is located City of Marysville

Name of Proposed Development Stevens Assemblage

City Project File Number (if known)

Name of Applicant

Address of Applicant

Proportionate Share Calculation: *Choose Option A or B*

☐ Option A: Based on a percentage of the County's adopted impact fee (Attach traffic worksheet.)

1. The applicable percentage of the County's fee: _____%

2. Net New Average Daily Traffic: _____ADT

3. The adopted County impact fee for this development: _____$/ADT

4. Total Proportionate Share Amount: $_____

☒ Option B: Based on a comprehensive traffic study (Attach traffic worksheet and traffic study)

__X__ No road improvements are impacted. Hence, proportionate share amount is zero.

_____T he following road improvements are impacted. The calculation of proportionate shares is summarized below.

List by Names/Description the Impacted County Projects (attach other pages if necessary)	County Project ID#	PHTs Impacting Project	Capacity Cost per PHT	Proportionate Share Obligation per Impacted Project
1. There are not any Snohomish County improvement projects that will be impacted by 3 directional PM peak-hour trips generated by the development. Snohomish County traffic mitigation fees should therefore not be required for the development according to the provisions of the interlocal agreement.				

4. Total Proportionate Share Amount (sum of obligations for each impacted project) $ 0.00

☐ **Trip Distribution and Assignment if Required**

If required, attach AM and PM peak-hour trip distribution and assignment. (Attach traffic worksheet showing whether or not it is required and traffic study).

☒ **Mitigation of Other Impacts if Required for Developments Generating More than 50 Peak-Hour Trips**

Mitigation of Impacts on Level of Service

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

Mitigation of Impacts on Inadequate Road Conditions

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

Mitigation for Impacts on Access or Circulation

__X__No impact or not applicable ____ Mitigation as described in attached traffic study.

☒ **Written Offer**

The Applicant hereby voluntarily agrees to pay the total proportionate share amount shown above for impacts of the proposed development on the capacity of Snohomish County roads and provide mitigation of all other impacts as indicated above and described in attached documents.

BY: _____Date_____

Signature by Authorized Official of Applicant or Authorized Representative

Print Name and Title _____

Instructions to Applicant. Submit this offer, a completed county traffic worksheet, and any other attachments to the city with your initial application or send directly to Deb Werdal, Snohomish Co. DPW Traffic, 3000 Rockefeller M/S 607, Everett WA 98201.

Part Two: To be completed by the City

Receipt of Written Offer and Attachments by City and Routing to County

Name of Proposed Development Stevens Assemblage

City Project File Number PA 24-024

Date Received 09/03/24

City Staffer Assigned to Project Danny Hagen

Address 501 Delta Ave, Marysville, WA 98270

Phone 360-363-8272

Instructions to City. Send this offer and all attachments to Deb Werdal, Snohomish Co. DPW Traffic Operations, 3000 Rockefeller M/S 607, Everett WA 98201. Send copy to staffer shown above.

BY:

DH Date 09/17/24 Danny Hagen, Associate Traffic Engineer

FIGURE 3: DEVELOPMENT TRIP DISTRIBUTION - PM PEAK HOUR

STEVENS ASSEMBLAGE - CITY OF MARYSVILLE, WA (KH 090224004)

Snohomish County Traffic Worksheet and Traffic Study Requirements for Developments in the City of Marysville

Snohomish County government, through an interlocal agreement (ILA) with the City of Marysville, may request traffic mitigation measures from any new development in the city that impacts roads in the unincorporated county. The City will impose the requested mitigation to the extent that the City determines that the mitigation is reasonably related to the impacts of the development. To determine the impacts, and to determine reasonable mitigation measures, the City of Marysville requires a traffic study from any development in the city that may have impacts on county roads. This 'traffic study' may be as simple as completing sections one and two of the county traffic worksheet below, or having a professional traffic engineer conduct a formal traffic study consistent with the requirements in section three below.

- If a development generates less than ten peak-hour trips and the applicant chooses Option A for mitigation payment (standard payment by percent of county impact fee), then the applicant will generally only have to fill out the first two sections of this traffic worksheet and complete a mitigation offer (see section four).
- However, if a development generates more than ten peak-hour trips, or if the applicant chooses Option B for mitigation payment (comprehensive impact analysis), then the applicant will have to fill out the first section of this worksheet, complete a separate traffic study consistent with the requirements in section three, and complete a mitigation offer (see Section Four).
- Applicants should submit all documents *to the City* as part of their initial submittal.
- Traffic study requirements for impacts on county roads are based on the County's traffic mitigation ordinance (Chapter 30.66B) and the city/county ILA. At the end of this document find references to the county contacts and county web site (sources for may of the documents related to traffic mitigation).
- Following review of the documents submitted, the County may request supplemental information and analysis as necessary to determine the impacts of the development in accordance with the city/county ILA. The City will require the proposed development to submit the supplemental information and analysis to the extent that the City determines that it is necessary to determine the impacts of the development.

Section One (1) Worksheet General Information

1. Name of Proposed Development Stevens Assemblage

   City Development File Number (if known)_____

2. Name, Address and Phone Number of Applicant_____

3. Development Site Address 44th Street NE at 75th Avenue NE alignments

4. Is it a residential or commercial development? Residential

5. Description of Development (size and specific type) 59 new Single-Family Detached Units
   5 existing Single-Family Detached Units to be removed

6. How many new vehicle trips are expected to be generated by the proposed development? (For many common types of developments this information can be provided by the city or the county. For more complex developments trip generation may have to be determined under section three below)

   37 AM Peak Hour 54 PM Peak Hour 509 Average Daily Trips (ADT)

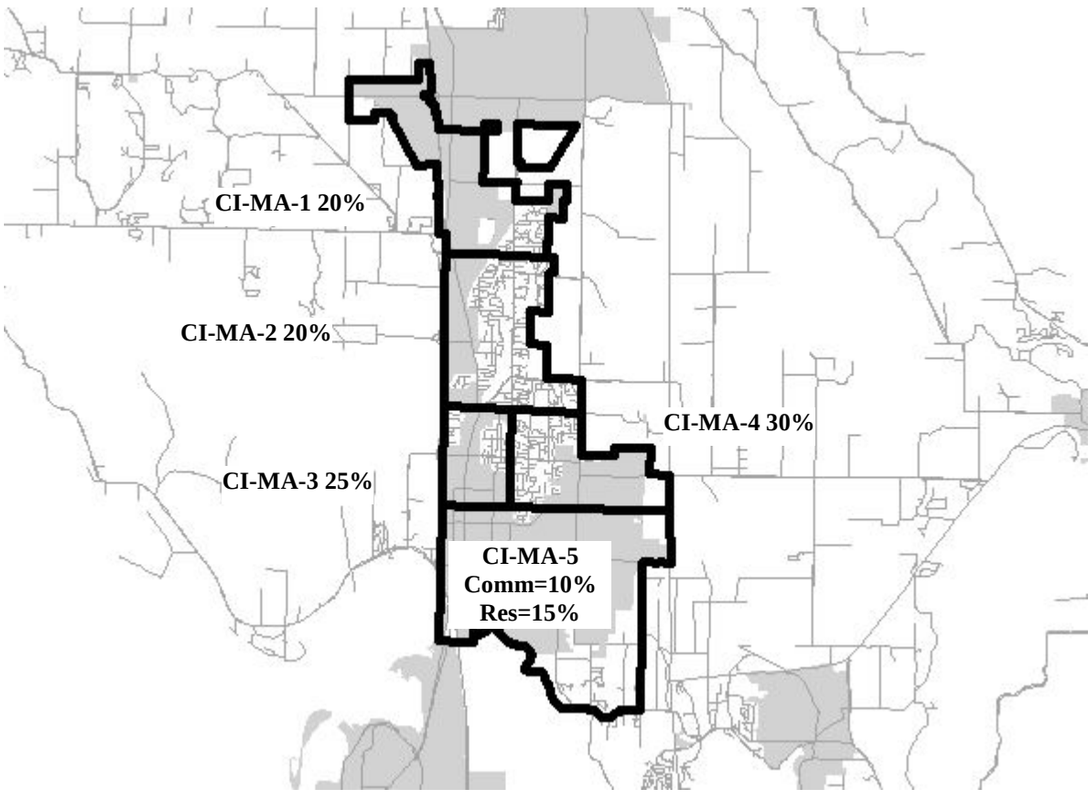
7. Proportionate Share Impact Mitigation: All applicants have two options in determining the amount of their traffic mitigation payment:

   _____ For determining the amount based on a percentage of the county fee go to section two.

   _X_ For determining the amount based on a comprehensive traffic study go to section three.

Section Two (2) Proportionate Share Determined by Percentage of County Impact Fee

2(a) Calculation of Payment Amount



1. Standard default estimated percentage of trips impacting the City streets based on subareas (See below) _____%

or

2. Other Percentage: (Note: See author's qualifications in section three below.) Estimated percentage of trips impacting county roads from attached trip distribution: _____ %

Sub-Area ID #	* City Subarea Description	Residential Developments	Commercial Developments
CI-MA-1	North of 136th ST SE.	20%	20%
CI-MA-2	North of 100th ST NE and South of 136th ST SE.	20%	20%
CI-MA-3	North of 76th ST NE, South of 100th ST SE, and West of 51st AV NE.	25%	25%
CI-MA-4	North of 76th ST NE, South of 100th ST SE, and East of 51st AV NE.	30%	30%
CI-MA-5	South of 76th ST NE.	15%	10%

* Note: Boundaries are either street centerlines or imaginary extensions of street centerlines in places where the actual streets do not exist.

3. Development New Average Daily Trip Generation (ADT)_____

4. Type of Development (Residential or Commercial)_____

5. County Commercial Fee Rate $_____ 6. County Residential Fee Rate $_____

(Note: Consistent with county code and the ILA, developments pay the rate in effect at the time of their submittal. As of 07/13/11 the rates were $39 for commercial developments and $46 for residential developments. Through ordinance, the County Council can change these rates at any time, so consult with the County or look at Snohomish County Code 30.66B.330 to find the latest fee rates.)

7. Calculation of Proportionate Share Impact Mitigation

_____	×	_____	×	_____	=	$_____
#1 or #2 above: % of trips		#3 above: ADT		#5 or #6 above: Fee Rate		proportionate share mitigating payment

2(b) Determining whether or not an additional traffic study is necessary

Will the development generate more than 10 peak-hour trips *or* are there other impacts that need to be addressed (e.g., level of service, safety, or access and circulation)

_____ No. Skip section three and go to section four.

_____ Yes. Read the introduction to section three and skip to section 3(b).

Section Three (3) Traffic Study Requirements

Introduction: This section outlines requirements for traffic studies for impacts on County roads. If an applicant chooses (or is required) to complete a traffic study, then it should be submitted along with this worksheet and a mitigation offer. (Note on Author's Qualifications: A traffic study under this section must be conducted by an engineer licensed to practice in the state of Washington with special training and experience in traffic engineering and, preferably, membership in the institute of transportation engineers. For individuals/firms not on the City's approved list, the developer will provide, with the traffic study, the credentials of the individual or firm performing the traffic study certifying compliance with these qualifications.)

3(a) Proportionate share impact mitigation based on comprehensive traffic study

1. Development's Trip Generation and Distribution. Determine the PM peak-hour trip generation and distribution for the development consistent with Section 3(b) below.
2. Impacted Improvements. Determine which of the road sections with planned improvements in the county's impact fee cost basis (Transportation Needs Report Appendix D) are impacted by three or more development-generated *directional* PM peak hour trips (PM PHT).
3. Current Counts. For each impacted improvement, provide current traffic counts to determine the PM PHT.
4. Reserve Capacity. Determine "reserve capacity" for each impacted improvement by subtracting the current PM PHT from the maximum service volume (MSV) for the existing facility. Reserve capacity is set to zero if current PM PHT exceeds the MSV. For MSVs see County DPW Rule 4224.
5. New Capacity. New capacity is the incremental increase in PHT that could be accommodated with the planned improvement. Determine the new capacity of each impacted improvement by subtracting the current MSV from the future MSV after the improvement.
6. Chargeable Capacity. For each impacted improvement, add the reserve capacity to the new capacity.
7. Final Adjusted Cost. Find the cost of each impacted improvement and make any adjustments used by the County for tax credits (see Transportation Needs Report Appendix D).
8. Capacity Cost per Peak-Hour Trip. For each impacted improvement, determine the capacity cost per PM PHT by dividing the final adjusted improvement cost by the chargeable capacity.
9. Traffic Impacts. From step one above, take the *total* number of PM PHT (in both directions) impacting each planned improvement.
10. Proportionate Share. For each impacted improvement, determine the proportionate share impact mitigation by multiplying the capacity cost per peak-hour trip by the number of PM PHT impacting the improvement.

3(b) Trip Generation and AM and PM Peak Hour Trip Distribution and Assignment

Calculate AM, PM and Daily trip generation consistent with the ITE Trip Generation Handbook and Snohomish County Public Works Rule 4220. Determine the trip distribution and assignments consistent with the County's document titled "Format for Trip Distributions"(available at County web site, see below).

- Within the developments transportation service area (TSA) the distributions will be carried out to each key intersection at which the approach or departure volumes on any leg have three (3) or more peak hour trips. Get the most current list of key intersections on the web site described below. Trips should be distributed onto the road system as it is expected to be in six years.
- The distribution should be a schematic map showing the broad distributions of trips in terms of percentages on different roads. Show all City boundaries.
- The assignment should be a schematic map with the impacted key intersections identified by ID# and turning movements for each shown in separate diagrams on the same page or on different pages. The assignment should also be presented in tabular form listing each intersection by intersection ID#, and the number of trips at each movement.

3(c) Additional Analysis for Developments Generating More Than Fifty (50) Peak Hour Trips

For large developments (i.e., those generating more than 50 peak-hour trips), the County may request mitigation for impacts on the level of service of County roads, documented safety locations (the County calls such locations "inadequate road conditions" or "IRCs"), and access or circulation. The traffic study requirements below are intended to disclose impacts. Based on this information the County may request through the City that the applicant provide additional information showing possible mitigation measures. If any off-site improvements were needed for mitigation the County would work with the applicant to determine requirements for right-of-way, construction plans, right-of-way use permits, construction/maintenance bonds, and other issues.

Impacts on Level of Service (LOS) of County Arterials

Contact Snohomish County Public Works for the most current list of arterial units in arrears and critical arterial units. Identify any arterial units in arrears or critical arterial units impacted by three or more directional peak-hour trips.

Impacts on Inadequate Road Conditions

Contact Snohomish County Public Works for a list of the current IRCs. Identify any IRCs impacted by three or more peak-hour trips. Note: Unlike LOS impacts in which at least three or more peak hour trips have to be added in one direction to require disclosure (e.g., 3 westbound), for IRCs, any three peak hour trips added to IRC locations are considered an impact for which disclosure is necessary (e.g., 2 westbound plus 1 eastbound).

Impacts on Access or Circulation

The County may request improvements to existing roads to provide safe and efficient access and/or circulation. In some instances, the County may request provisions for future County roads identified in the Comprehensive Plan or in Small Area Transportation Studies. If so, the County will request specific additional information through the City.

Section Four (4) Traffic Mitigation Offer to Snohomish County

The applicant should complete a traffic mitigation offer to Snohomish County that summarizes the mitigation identified in the county traffic worksheet and any additional traffic study. This will facilitate timely review of the development and processing of the application. The form to use for the mitigation offer is titled "Traffic Mitigation Offer to Snohomish County." This form is typically provided to all applicants along with this traffic study checklist. In addition, copies are available from the county contacts or the Snohomish County web site shown below.

Additional Information

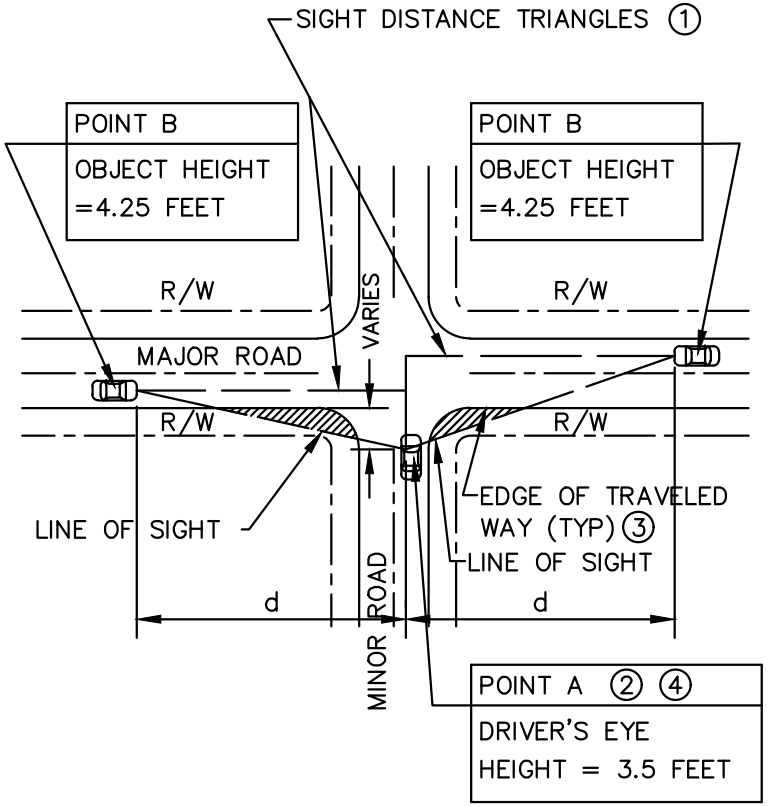
County Web Site

Snohomish County Public Works has a web site with many documents related to traffic studies and mitigation requirements for developers. From the Snohomish County Home Page go to:

Departments/Public Works/Divisions/TES/ProgramPlanning/3066B

County Contacts

- Elbert Esparza, Snohomish County DPW Traffic, 3000 Rockefeller M/S 607, Everett WA 98201, (425) 388-3184, elbert.esparza@snoco.org



NOTES:

1. AT ANY INTERSECTION OF A PRIVATE ROAD/ACCESS POINT WITH A CITY ROAD OR A CITY ROAD WITH A CITY ROAD, THERE MUST BE A SIGHT DISTANCE TRIANGLE WHICH PROVIDES AN UNOBSTRUCTED LINE OF SIGHT FROM THE INTERSECTING ROAD EDGE OF TRAVELED WAY (POINT A) TO A POINT IN THE TRAVELED WAY (POINT B) AT LEAST EQUAL TO THE REQUIRED SIGHT DISTANCE d. SEE SECTIONS 201, 202, 203, 204 AND STANDARD PLAN 3-212-002.

2. THE DRIVER'S EYE TO DETERMINE LINE OF SIGHT AT INTERSECTIONS IS 3.5 FEET ABOVE THE PAVEMENT, WITH AN OBJECT HEIGHT OF 4.25 FEET ABOVE THE PAVEMENT.

3. THE EDGE OF TRAVELED WAY IS DEFINED AS THE FACE OF CURB FOR ROADS THAT ARE OR WILL BE CONSTRUCTED TO URBAN STANDARDS AND THE EDGE OF PAVEMENT (NOT SHOULDER) FOR ROADS THAT ARE, OR WILL BE CONSTRUCTED TO RURAL STANDARDS. THE AREA WITHIN THE SIGHT DISTANCE TRIANGLE MUST BE FREE FROM ANY SIGHT OBSCURING OBJECTS WITH THE LINE OF SIGHT AT LEAST 18 INCHES ABOVE THE GROUND AND/OR THE TOP OF ANY PROPOSED VEGETATION ALONG THE LINE OF SIGHT.

4. THE DRIVER'S EYE LOCATION MAY BE REDUCED TO A MINIMUM OF 10 FEET BEHIND THE TRAVELED WAY, AT THE DISCRETION OF THE CITY ENGINEER, WHERE THE REDUCTION IN DRIVER'S EYE LOCATION WILL NOT ADVERSELY AFFECT SAFETY AND/OR OPERATION. SOME EXAMPLES OF SITUATIONS WHERE THE ENGINEER'S DISCRETION MAY BE USED ARE: AN INTERSECTION ON THE OUTSIDE OF A HORIZONTAL CURVE; AN INTERSECTION WHERE ONE APPROACH IS IN A CUT OR FILL; OR WHERE A BRIDGE RAILING OR ABUTMENT WOULD OBSCURE THE LINE OF SIGHT FROM 15 FEET BACK BUT NOT FROM 10 FEET BACK.

MFInspectors@MFDRFA.org - www.marysvillefiredistrict.org

To: Emily Morgan, Senior Planner
From: Brian Merkley, Deputy Fire Marshal
Date: September 12, 2024
Subject: PA24-024 ~ Stevens PRD ~ 3705/3625/3609 98th St NE, 9815/9907/9909/9921 35th Ave NE

I have completed a review of the revised plans for this project proposing development of a 59 unit SFR development accessed from 98th St NE. Please see below for comments and requirements.

1. **GENERAL INFORMATION:**
   a. The project shall comply with current fire code requirements (2021 IFC) including WA State and local City of Marysville amendments to the fire code, city design standards, and all applicable NFPA standards, including IFC Chapter 33 and NFPA 241 construction codes.
   b. Fire marshal approval of fire access and fire hydrant/water supply systems is required as part of the civil construction plan review and approval process.

2. **WATER RELATED:**
   a. All homes will require fire sprinklers per MMC 9.04.503.1.5 Exception 1. *Due to single point of access at 36th Ave NE, fire sprinklers will be required, has been noted on plans.*
   b. It is the developer's responsibility to see that adequate water for fire protection is attainable. The minimum required fire flow is determined using IFC Appendix B, and depends upon building sizes, construction types, and sprinkler systems. Proof of fire flow will be required. *No fire flow information provided at this time, please provide.*
   c. The buildings will require residential fire sprinkler system installations. Be clear when plans are submitted to show if these will be IRC townhomes, or IBC apartments (sprinklers and construction differ). The buildings will require NFPA 13D fire sprinkler systems in each unit (for townhomes), or NFPA 13R fire sprinkler systems in each building (for apartments).
   d. Provide water main extensions with hydrants along the new roadways and at all road intersections in approved locations, with maximum spacing of 600' apart. *Hydrants shown appear acceptable.*
   e. Fire hydrants shall comply with city Water Design Standard 2-060 Hydrants, including 5" Storz fittings, with blue reflective hydrant markers to be provided in the roadways, located four inches off the centerline on the hydrant side of the road.
   f. Fire hydrants with approved water supply must be in service prior to building construction.

g. Where residential fire sprinklers may be required the developer should install a water service per Standard Plan 2-090-001 Full ¾" x 1" Meter Service. Under this plan a 1" tap is made at the water main and 1" piping is run to the 1" meter setter. If in the end a ¾" water meter will suffice then all that is required is to install two reducer bushings with the ¾" water meter. A single service tap should be used where sprinklers are required, not a double service installation.

3. **ACCESS RELATED**:
   a. Turnaround provision is required for dead-end access in excess of 150 feet long. Turnarounds shall comply with city standard plans. (MMC 9.04.503.2.5). *Turnaround shown on plans appear adequate, 80' cul de sac.*
   b. "Where the vertical distance between the grade plane and the highest roof surface exceeds 30 feet (9144 mm), approved aerial fire apparatus access roads shall be provided. For purposes of this section, the highest roof surface shall be determined by measurement to the eave of a pitched roof, the intersection of the roof to the exterior wall, or the top of parapet walls, whichever is greater." (2018 IFC D.105.1). *Building heights are not known at this time, disregard if under 30'.*
   c. An adequate access route for fire apparatus must be in service prior to any building construction.
   d. Access for firefighting operations along all sides of all buildings is required. A minimum 5' wide access is required for MF dwellings. All parts of building exteriors should be accessible for firefighting by an approved route around the building, and be within 150 feet of a minimum 20' wide fire apparatus access.
   e. "**NO PARKING - FIRE LANE**" signs are required on both sides of all roads that are 26 feet wide or less, and one side of roads 26 to 32 feet wide. The signage shall be identified on the approved Civil Plans. (MMC 9.04.101, 2018 IFC Appendix D103.6.1)
   f. The city address committee will determine road names and address numbers for the lots.

REQUEST FOR REVIEW

RE: Request for Review - Stevens PRD - PA24-024

September 9, 2024

As part of public safety access and call volume concerns raised by the public in relation to this development project, I directed my staff to prepare a short report on incidents located within the great neighbourhood accessed by 35th Ave NE. Recent years show lower call responses to this neighborhood compared to earlier years taken into account in this review.

I have forwarded this information to the file for future consideration.

Erik Scairpon
Police Chief, City of Marysville

MARYSVILLE POLICE DEPARTMENT

98th St NE Neighborhood Request

Synopsis: The following is a historical analysis of incidents in the area surrounding the location of a proposed residential development north of 98th St NE, Marysville. The area included in this analysis can be seen in Figure A. All incidents that did not have a cancelled police response and occurred between 01/01/2016 and 08/15/2024 are included in this analysis, unless noted otherwise.

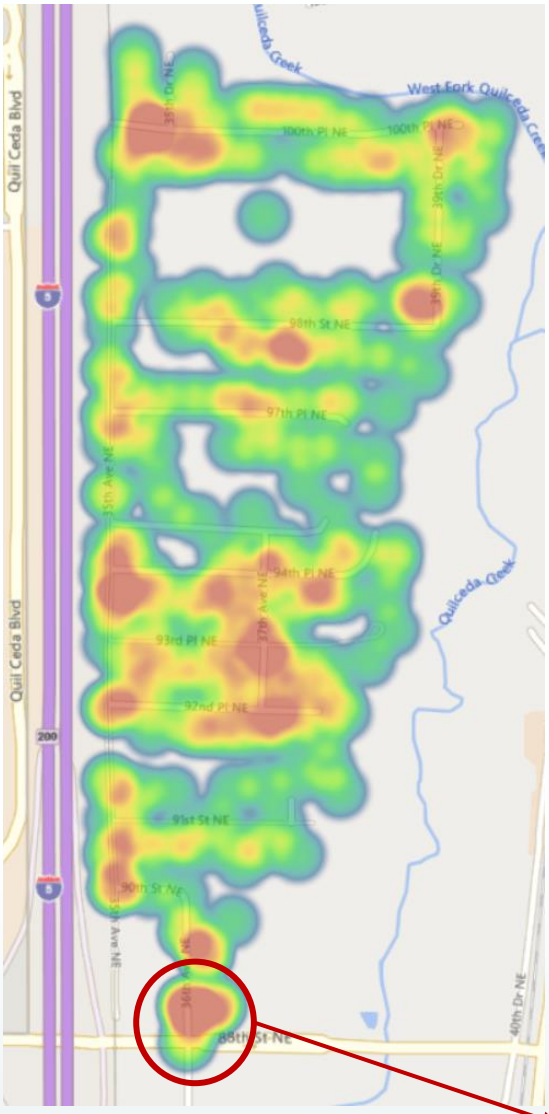
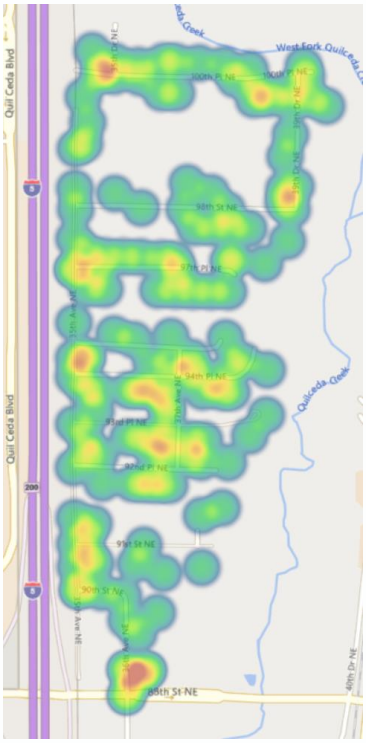
This chart captures 70.3% of incidents in this area.



*As of 8/15/24

Between 01/01/2016 and 08/15/2024, officers responded to a total of 3,223 incidents in the geofenced area. The highest annual total was in 2016 with 430 incidents and the lowest annual total (excluding the current year) was in 2023. The most common type of incident is "Suspicious", which made up 22.5% of the total volume of calls. Note that 378 of the 726 Suspicious calls were associated with one location (7-Eleven, 3609 88th St NE).



MARYSVILLE POLICE DEPARTMENT

98th St NE Neighborhood Request

All Incidents, 2016 - 2024

All Incidents, 2022- 2024

A comparison of heat maps showing incidents from 2016-24 and 2022-24 show one location that continues to be a location with a significant number of incidents. Within the hot spot (circled on the map to the left), three address locations were identified:

1. **3609 88th St NE (7-Eleven)**
2. **8800 Blk 36th Ave NE (General Area)**
3. **88th St NE / 36th Ave NE Intersection**

Altogether, these locations account for 1,780 incidents over the 2016-24 period (55.2%). Of these 1780 incidents, 961 of them are associated with the 7-Eleven address (54% of vicinity; 30% of measured area).

Collisions: One major concern was collisions that would block off the entryway into the neighborhood. According to the incident data, 16 collisions have been reported to police at the 88th St NE / 36th Ave NE intersection in 2024 (as of 8/15/24). In total, there have been 131 collisions reported in the vicinity of this intersection since 2016 with an average of 15 collisions per year. Within the measured area, 83% of collisions occur at this intersection. In 2024, there appear to have been three major collisions at this intersection (24-9994, 24-15086, 24-31306).

Top Incident Types in the Vicinity of 88th St NE / 36th Ave NE by Year

Incident Type	2016	2017	2018	2019	2020	2021	2022	2023	2024*	Total	% Total
Traffic	54	45	77	66	54	49	37	34	36	452	25.5%
Suspicious	57	49	77	50	54	64	51	36	13	451	25.4%

This chart captures 83.3% of incidents in this area.

*As of 8/15/24

98th St NE Neighborhood Request

Incidents w/ Major Police Presence

The following is a list of major events that occurred in the neighborhood between 01/01/206 – 08/15/2024 based on the significant volume of police presence listed in the call. Though these may not include major all major incidents, these ones had the greatest number of officers and therefore would likely have been the most interruptive to the community in terms of the volume of police vehicles, closures, etc.

2022-32870: Suicide Weapon at 3515 92nd Pl NE – female shot herself in the head after laying down to sleep for the night. Husband reported that she had been drinking and was intoxicated and he had left her asleep inside the house. He went outside to water this flowerbeds when he heard "two pops" from inside and found his wife obviously deceased from being shot.

2020-03932: Attempted Suicide at 3533 97th Pl NE – report from adult son that his father had shot himself in the backyard and then buried the gun before driving away. Police found male with no gunshot wound near the end of 97th Pl NE where he had driven the truck. It was believed he may still be armed and so officers requested armored vehicle. The male returned to the truck and drove back home where he was detained and put on an involuntary hold. No evidence was found that the man had fired a weapon and there was no buried gun.

2019-15882: Warrant Arrest at Haggen – officers responded to a traffic hazard where a male was attempting to pull a female out of a vehicle in the middle of the road. Upon arrival, witnesses stated the male had broken her windshield and was running into Haggen grocery store. The male was detained outside of Haggen shortly after and stated he just ran because he was "tweaked out on meth and [had] a DOC warrant". He was correct that he had a DOC warrant, which he was subsequently arrested for.

2020-54631: Robbery at 8514 36th Ave NE – the victim reported that he was in a vehicle with the suspect who had previously robbed him. That suspect and the victim began arguing about an exchange of money. The suspect took the victim's phone, car keys, wallet, and folding knife, then threatened the victim with the knife before leaving in a separate vehicle. The suspect later returned and assaulted the victim with a metal pipe before stealing the victim's vehicle. The vehicle was later recovered unoccupied in Tulalip.

2020-26631: Special Ops at Chick-fil-a. No additional details.

2016-00591: Vehicle Recovery at 3609 88th St NE – officer identified a stolen vehicle occupied by a male and two females and conducted a high risk vehicle stop on the vehicle.

2018-27319: Assist Law at 91st St NE / 35th Ave NE – Tulalip requested assistance in containing the area where a suspect with a warrant for failure to register had fled from a stop and into Marysville.

MEMORANDUM

To: Emily Morgan, Senior Planner

From: Ryan Carney, Development Services Technician

RE: Stevens PRD, PA24-024
Address & Parcel #

Date: 9/10/2024

The following comments are offered after review of the above referenced application.

Utility Capital Improvement Fees
Capital utility fees are assessed in accordance with the attached rate sheet. The "City" rates will be applicable to this project.

All onsite private wells are required to be decommissioned by a certified well driller.

All onsite septic systems are required to be decommissioned per Snohomish Health Division requirements.

Recovery (Latecomer) Fees
No recovery fees are currently applicable to this project.

Utility Main Fees (MMC 14.07.020)
No main fees are applicable to this project.

ULID/LID Fees
No ULID or LID fees are applicable to this project.

If you have additional questions regarding the above comments, please contact me at rcarney@marysvillewa.gov or at (360) 363-8205.

cc: Ken McIntyre, PE, Assistant City Engineer

MEMORANDUM

TO: Emily Morgan, Senior Planner

FROM: Brian McDaniel, Water Utility Supervisor
Ryan Keefe, Water Operations Lead II

DATE: September 17th, 2024

SUBJECT: Stevens PRD, PA24-024

Public Works Operations has reviewed the Stevens PRD submittal and has the following comments:

1. Move water meters for lots 10 and 11 to other sides of lots. Currently service lines are shown tapped on gate valves;

2. Water main tie in to 18" water main needs to be a live tap;

3. Water details not shown

If the applicant has any questions about these comments, I can be contacted at (360) 363-8163 or bmcdaniel@marysvillewa.gov.

MEMORANDUM

TO: Emily Morgan, Senior Planner

FROM: David Jackson, NPDES Coordinator

DATE: 9/13/2024

SUBJECT: PA24-024 Stevens PRD

1. For residential projects triggering minimum requirements #6 Runoff Treatment and #7 Flow Control, the stormwater facility lot will be dedicated to the HOA. This policy may be modified depending on facility design. The City will receive an easement to inspect the facility, and, if needed, repair and maintain the facility in an emergency.

2. The City has adopted the 2019 Stormwater Management Manual for Western Washington.

   (UIC rules apply to infiltration trenches, see Volume I chapter 4 UIC Program. Contact the Department of Ecology for permitting information.)

3. Infiltration BMPs require pre-treatment. Appropriate options for treatment can be found in the Stormwater Management Manual for Western Washington 2019.

If you have questions regarding these comments, please contact me at djackson@marysvillewa.gocv or 360.363.8288.

Instructions Page

For the Developer:

Does your Project trigger minimum requirements #6 Runoff Treatment, or #7 Flow Control AND the facility(ies) will be on private property?

If "no" then this covenant does not need to be recorded.

Otherwise, please complete the enclosed documents. The draft document should be submitted for review with the other civil plan documents. It does not need signatures at that time. Exhibit B-Facilities Maintenance Plan should include a map showing where the storm water features are located on the property and describe the maintenance requirements. Once the infrastructure is built, review the document. If construction altered the stormwater utility layout update the appropriate information. The documents must be signed by all parties with an ownership interest in the property (include additional signature blocks and notary acknowledgement forms as necessary). Have the final document signatures notarized. Record before final occupancy is issued.

Recording notes:

- Do not write within the one-inch border
- Type or print legibly and in an easily readable font
- Print documents single sided and provide original copies with original signatures

When Recorded, Return to:

City of Marysville
Community Development
80 Columbia Ave
Marysville, WA 98270

Stormwater Covenant and Easement
(MMC 14.15.155)

DOCUMENT TITLE: *Project Name* Stormwater Covenant and Easement
Grantor: *Property Owner Name*
Grantee: CITY OF MARYSVILLE, a Municipal Corporation
Legal Description (abbreviated):
Assessor's Parcel(s):
Address:
Reference Number(s):
City of Marysville Project No: City of Marysville Building Permit No:
****Note**** The Auditor/Recorder will rely on the information provided on this form. City staff will not read the document to verify the accuracy or completeness of the indexing information provided herein.

Stormwater Covenant and Easement
(MMC 14.15.155)

This Stormwater Covenant and Easement (the "Agreement") is executed in favor of the City of Marysville (the "City") by the undersigned owner(s) (the "Grantor") of the following described real property situated in the City of Marysville, Snohomish County, State of Washington (the "Property") (insert complete legal description):

(attach Exhibit A if necessary to fit full legal description)

WHEREAS, pursuant to Marysville Municipal Code Chapter 14.15, as may be hereafter amended, a condition of developing the Property requires that it have adequate stormwater drainage; and

WHEREAS, the Grantor has installed a private storm drainage system for the Property; and

WHEREAS, such a private storm drainage system will require ongoing maintenance as detailed in the approved Facility Maintenance Plan to ensure it operates as designed;

WHEREAS, the private storm drainage system includes the following specified drainage control facilities, which are documented in the drainage control plan drawing(s), as amended by record drawing(s) on file with the City of Marysville. The following runoff treatment or flow control facilities are onsite:

	Detention or Infiltration Pond		BMP T8.20 Sand Filter vault
	Detention or Infiltration Vault		BMP T8.30 Linear Sand Filter
	BMP T5.15 Permeable Pavements		BMP T8.40 Media Filter Drain
	Detention Tank/Pipes		BMP T9.10 Basic Biofiltration Swale
	BMP T5.16 Tree Retention and Tree Planting		BMP T9.20 Wet Biofiltration Swale
	BMP T5.17 Vegetated Roofs		BMP T9.30 Continuous Inflow biofiltration Swale
	BMP T5.20 Rainwater Harvesting		BMP T9.40 Basic Filter Strip
	BMP T5.30 Full Dispersion area		BMP T10.10 Wetponds-Basic and Large
	BMP T6.10 Presettling Basin		BMP T10.20 Wetvaults
	BMP T7.10 Infiltration Basins		BMP T10.30 Stormwater Treatment Wetlands
	BMP T7.20 Infiltration trenches		BMP T10.40 Combined Detention and Wetpool Facilities
	BMP T7.30 Bioretention Cells, Swales and Planter Boxes		BMP T11.10 API (Baffle type) Separator bay
	BMP T7.40: Compost-amended Vegetated Filter Strips (CAVFS)		BMP T11.11 Coalescing Plate (CP) Separator Bay

	BMP T8.10 Basic Sand Filter basin		Ecology approved Emerging Technology Manufacturer: Device Name:
	BMP T8.11 Large Sand Filter basin		

Now, therefore, the Grantor, on behalf of Grantor and Grantor's heirs, successors, and assigns, agrees to the following and hereby creates a covenant running with the land that shall be binding upon all parties and their heirs, successors, and assigns forever:

(1) The Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns, agrees to and shall:

(a) inspect and maintain the above described drainage control facilities in accordance with the provisions of Marysville Municipal Code (MMC) Title 14, the approved Facility Maintenance Plan (attached hereto as Exhibit B and incorporated by this reference), and any other provisions applicable to the facilities, as now and hereafter in effect;

(b) implement the terms of the drainage control plan required for development; and

(c) inform all future purchasers, heirs, successors, and assigns of the existence of the drainage control facilities and other elements of the drainage control plan and the limitations of the drainage control facilities.

(2) The Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns, hereby grants permission for authorized representatives of the City of Marysville to enter onto the Property for inspection, monitoring, correction, or abatement of conditions related to the Property's drainage control plan, drainage control facilities, MMC Title 14, or any other MMC provision applicable to drainage control, as now and hereafter in effect.

(3) If the private storm drainage system is not maintained in accordance with the approved or record drawing design, the Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns grants the City the right to inspect and repair the system and assess reasonable costs for the work that may be charged against the Property, the Property owner, or any beneficiary.

(4) The Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns:

(a) Agrees and acknowledges that the City is not responsible for the adequacy or performance of the drainage control plan or the drainage control facilities;

(b) Agrees to accept any and all risks of harm, loss, injury, or damage related to the drainage control plan or the drainage control facilities; and

(c) Hereby waives any right to assert any and all present and future claims against the City, whether known or unknown, for any harm, loss, injury, or damage occurring either on or off the Property, related to the drainage control plan, the drainage control facilities, or drainage

or erosion on the Property, except only for such harm, loss, injury, or damage that directly results from the sole negligence of the City.

(5) This Agreement shall be recorded in the real estate records of the Auditor's Office of Snohomish County, Washington. If any provision of this Agreement is held invalid, the remainder of the Agreement is not affected.

(6) The obligations of the Grantor and each of the Grantor's heirs, successors, and assigns under this Agreement shall terminate when that person sells, devises, or transfers the Property, or his or her interest therein, unless the obligation arises out of a claim of negligence or intentional act of that person.

Now, therefore, to this end, the Grantor, on behalf of the Grantor and the Grantor's heirs, successors, and assigns, hereby grants a perpetual easement to the City of Marysville and its authorized representatives to enter the Property, inspect the private storm drainage system, and make necessary repairs, with any expenses incurred being chargeable against the Property, the Property owner, and any beneficiary.

Memorandum

To: Emily Morgan

From: Krista Gessner, Cross Connection Specialist

Subject: PA24-0024 Stevens PRD

Date: 9/18/2024

In response to your request for review of the above project, please note the following items.

- Plumbing system is subject to applicable requirements of MMC Chapter 14.10 "Water Supply Cross-Connections" and WAC 246-290-490.
- If any wells are on site, they must be either decommissioned by a certified well driller, or a DCVA is required to be installed behind each water meter.
- A Reduced Pressure Backflow Assembly (RPBA) is required immediately downstream of any irrigation meter and in an above ground hotbox if a chemical/fertilizer injection system is installed. If the irrigation system is not chemically injected, a DCVA is sufficient for this application. The DCVA may be installed in an in-ground meter type box or vault. In accordance with Design Standards 2-15-001
- On-site inspections are to be performed by the City of Marysville Cross Connection Control Specialist at rough-in and final. 48 hours' notice is required, prior to inspection.
- Testing of all backflow prevention assemblies, by a Washington State Certified Backflow Assembly Tester, is required prior to occupancy use per MMC 14.10.120. Test report shall be forwarded to the City of Marysville Water Quality Office, prior to occupancy.
- All backflow assemblies are required to be lead-free.

Any questions regarding these comments, and scheduling for onsite inspections should be directed to Krista Gessner 360-363-8141 crossconnection@marysvillewa.gov

MEMORANDUM

Date: **September 4, 2024** **PA24-024**

To: **Emily Morgan, Senior Planner**

From: **Michael Snook, Building Official**

Re: **Project Name:** Stevens PRD
Applicant: Neil Latta, PE – Latta Engineering / Aron Golden – KB Home
Proposal: The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.
Address: 9815/9909/9907/9921 35th Ave NE & 3705/3625/3609 98th St NE

In response to your request for review of the above project. Please see requirements below;

1. Applicant shall comply with any and or all provisions the 2021 Edition of the International Building, Residential, Mechanical, 2021 Uniform Plumbing Codes, and current Washington State Amendments.

2. All plans and permit applications will be required to be submitted electronically as part of their submittal process. One (1) complete set of building plans, structural calculations, and 2021 Washington State Energy Code work sheets.

3. Contact our office if you have questions in regards to permit applications, checklists and/or handouts that you and/or your design team will be preparing plans for on your project.

4. If any demolition of structures is proposed, and you are unsure if permit/s will be required for the removal of any existing structures. Please contact the Building Division at 360-363-8100, to ask any specific questions. An asbestos report will be required for each demo permit.

5. Separate permits will be required for any proposed rockeries or underground storm vaults. One (1) complete set of building plans, structural calculations, site plan, and Geotech Report are to be submitted for review.

6. A grading permit will be required. A Geotechnical report shall be submitted to the City for this project. This is to be an in-depth report to address the following:

    - Soil Classification
    - Required Drainage Systems
    - Soil Compaction Requirements
    - Type of Footings, Foundations, and Slabs Allowed
    - Erosion Control Requirements
    - Retaining Walls
    - Fill and Grade
    - Final Grade

Please provide the below information in regards to this overall project the 2018 International Building requirements;

1. The building structure will be required to be designed under the 2021 IBC, Chapter 16, and Structural Design Requirements. The seismic zone criteria is to be established under the guidelines of a Washington State Licensed Architect and/or Structural Engineer.

2. Please provide scaled floor plans with square footage.

3. Show on the plans the type of building materials proposed, and if required, what type of fire-resistant construction will be required.

4. Site plan is to show the distance from the proposed structure to the property lines, from all sides of the building.

5. A Fire Sprinkler system may be required. The applicant is to verify this requirement with the Fire Marshal's Office.

6. All Electrical installations are to be permitted, inspected and approved through the City. The current code is NEC 2023 with 2023 WCEC Amendments. A separate application, plans, and plan review will be required.

7. Special Inspection may be required. The list of the type of inspections shall be indicated on the plans by the Engineer of Record. The owner is to notify the City of the registered special inspection agency prior to permit issuance.

8. **Building application for plan review will be approximately 4-6 weeks for first-time plan review comments.**

We look forward to your project coming to our City!

If I may be of any further assistance, please feel free to contact me.

Michael Snook, Building Official, 360-363-8210 or msnook@marysvillewa.gov during office hours 7:30 am – 4:00 pm, Monday through Friday.

A notice of application was posted at the end of my driveway. I live at 3625 98th ST NE #B, which is an official address with the USPS but not acknowledged in any documents associated with Notice of Pending Land Use.

It appears there is a plan to demolish my residence in the near future. This is the first time that I am learning about plans that will affect my home. I am under contract with the Gleasons and Section 8 (HUD) Housing Choice Voucher program. No notice has been given to the Everett Housing Authority, or to myself directly, that my housing is in jeopardy. I have no plans to relocate in the near future. I am disabled and on a fixed income, hence the Section 8 assistance. This home and location were chosen to accommodate my disability. I am stable here and looking forward to continued stability.

It would be appreciated if you would keep me informed regarding the proposed development that affects my home. My name is not listed on any of the plan documents even though I reside in my own home on the property in question.

Sincerely,
Ann M Beauchamp

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Ms Morgan,

I am writing in regard to the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development between 98th St. and 100th Pl. in Marysville.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and the concerns of the families residing in the neighborhood.

Amongst our concerns are:

1. The amount of traffic that would be added to our streets with only one way in and one way out.
2. The amount of time it will take for emergency vehicles to reach us.
3. How our trees will survive the storms once the protection of the Stevens property is cleared.
4. Being as our area is on wells, how will this affect our water.

There are many other concerns but this is just to name a few.

Carmen Nielsen
3814 100th Pl.

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

My concerns surrounding the proposed builds for 59 homes by KBHomes and the Burgermaster/ multipurpose residential/commercial build have not changed. The neighborhood meeting did not change what the facts show so clearly.

1. The traffic will become increasingly more dangerous as more people move here.
2. The area doesn't have the infrastructure to support the proposed builds in this area without significant impact to what is already here.
3. No other road out or in is careless and does reflect the concerns for our safety in any emergency situation that arises.

I wish I had more time to write but given a 7 day notice is not enough time in our busy lives. I wish that fact would have been considered.

Thank you,
Carol McKinney

Contact helpdesk if you have any concerns or questions.

Dear Elected Officials,

We are writing with our concerns over the excessive development north of 88th St and 36th St. Our neighborhood, as you know, has one entrance and exit. You obviously did not take that into consideration when you allowed Chic Filet, Starbucks, Dickey's, Sub shop, plus a dental office to go in. The result caused numerous traffic tie ups where police were needed to direct traffic. If that isn't bad enough, you are now allowing Burgermaster, apartments and other businesses into that space.

You have also invited into our lives, KB Construction. This is a multibillion-dollar national company that has no ties to our city or county. They are here to make money and give you more tax revenue. The Steven's development, between 98th and 100th, is to include 59 homes with 40 ft frontages. There is one way in and out of that neighborhood. You know people in this neighborhood are on wells and septic systems. It is not hard to guess the water quality will become an issue.

Adding 59 homes with 2-3 cars per home, will add to the traffic hazards already taking place. The safety of our residents is another concern. Any accident at the intersection of 88th and 36th shuts down emergency vehicles to access the neighborhood; thus, more houses, more cars, more accidents. The round abouts will make this worse and there will be times when we cannot get out of our neighborhood. The traffic lights allow for residents to come and go. Traffic circles will have a constant flow of cars and trucks. No comparison as to which is the best for Marysville residents.

KB Homes, and apparently you, don't care how these developments harm your constituent's quality of life. We understand this property will be developed but hope for less homes. We also know KB Construction is planning similar development north of 100th.

You were elected to represent your voters, so let's see you do just that.

Marysville voters,
Chuck and Kandis Goetz

City of Marysville
Emily Morgan/Senior Planner
501 Delta Ave
Marysville, WA,98270

Dear Emily Morgan,

I am writing to express my concerns regarding the new home development by KB Homes (PA24-024). As a resident of Marysville, I want to ensure that the community's needs are addressed during this project.

First, I urge the city to ensure that a sidewalk is installed along with the extension of the sewer pipe along 35th Ave NE and 98th St NE for the new development. A safe pedestrian pathway is essential for the well-being of residents and will enhance connectivity in our community.

Additionally, I request that the city implement monthly testing of our well water to monitor for any potential contamination stemming from the development. The health and safety of our community should be a top priority, and regular testing will help ensure that our water remains safe for all residents and if any irregularities occur then the developer should be held accountable to assure the surrounding neighbors continue to have safe drinking water.

Thank you for your attention to these important matters. I look forward to your response.

Sincerely,

Duane and Tina Leach

Concerns Regarding Housing Development Project (PA24-024)

Dear Emily Morgan,

I am writing to submit my comments on the proposed housing development project (PA24-024). While I understand the need for growth, I have several concerns about the potential impacts this project will have on the surrounding community and environment, particularly in terms of traffic, environmental degradation, tree retention, fire safety, and potential effects on nearby water sources. Below are my key points:

1. Traffic Impact, Emergency Access, and Roundabouts

The Traffic Impact Analysis highlights that the development will significantly increase traffic, particularly on 35th Ave., which serves as the only entry and exit point for both current and future residents. The proposed traffic improvements, including the addition of three roundabouts, are insufficient to mitigate the congestion, particularly when trains are passing through the area.

What is more troubling is that the Environmental Impact Study admits that instead of meaningfully addressing traffic issues, the developers will pay an impact fee, effectively acknowledging they are worsening the traffic situation. This gives the impression that the developers prioritize their profits over community wellbeing, as it appears they prefer to pay a fee rather than invest in improving the infrastructure for the neighborhood.

I urge the city to reconsider this approach and require the developers to implement traffic improvements beyond paying a fee, as the current plan will exacerbate traffic congestion, negatively affecting current residents.

2. Fire Safety and Increased Danger for Existing Residents

I am also deeply concerned about the increased fire safety risks this development imposes on current residents. The new homes will likely be equipped with modern fire safety measures, but existing residents will face a higher danger without the ability to afford expensive upgrades like water sprinklers.

Moreover, the current homes are not being given access to public water and sewer systems, which

places them at a further disadvantage. These homes rely on well systems, and in the event of a power outage, the well pumps will not function, leaving residents without water pressure. Even if sprinklers were added, they would not work under these circumstances. The increased fire risk, paired with the lack of support for traditional homes, puts current residents in a more precarious and dangerous situation.

The city must consider the inequitable situation this creates, where new, wealthier homes are built with modern safety features, while long-standing, traditional homes are left in an increasingly dangerous environment. This is particularly unjust given the rich historical attributes of the neighborhood, which are not being respected or preserved.

3. Environmental Impact and Unmentioned Creek Belonging to the Tulalip Tribe

Another significant concern is that the Environmental Checklist failed to mention a nearby creek that belongs to the Tulalip Tribe. This is a serious oversight, as the creek plays an important role in the Tribe's cultural and environmental heritage.

There is a real risk of pollution from construction runoff, chemicals, and sedimentation, which could harm water quality and the ecosystem. Furthermore, future residents may use yard chemicals—such as fertilizers, pesticides, and herbicides—that could seep into the groundwater, impacting both the creek and the existing wells used by current residents. It is especially concerning that future residents, whose water will come from the city, will not have the same concerns about protecting the groundwater that current residents depend on.

The city must ensure that the developers implement robust environmental protections, including restrictions on chemical use and a comprehensive plan to safeguard the creek and the water resources of the community. Furthermore, it is critical that the Tulalip Tribe is consulted and their rights and interests are respected.

4. Risk of Groundwater Contamination and Well Drying for Nearby Residents

The project raises serious concerns about both the contamination and drying up of existing wells, which many current residents rely on for their water supply. The construction process and potential changes to the groundwater table could disrupt these wells, while chemical runoff from the new development could further contaminate the water.

The city should require a thorough hydrological study to assess the potential risks to the water table and ensure the continued water security of existing residents. Moreover, given that the new development will have city water, current residents should not be disproportionately affected by risks created by the development.

5. Tree Retention and Loss of Vegetation

The Arborist Report reveals plans for significant tree removal, which will reduce the area's natural beauty, wildlife habitats, and stormwater absorption. These trees are not only essential for the local ecosystem but also contribute to the historical and aesthetic character of the neighborhood.

I recommend that the city enforce stronger measures to minimize tree removal and require the replanting of native species to replace any lost trees. This would help maintain the ecological balance and preserve the unique character of the neighborhood.

In conclusion, I have significant concerns about the negative impacts this development will have on traffic, fire safety, water resources, and the environment. The development is increasing risks for existing residents—both in terms of safety and quality of life—without providing meaningful solutions to mitigate those risks. The developers' plan to simply pay an impact fee for worsening traffic, without addressing the root issues, is particularly troubling, as it demonstrates a disregard for the long-term needs of the community.

I urge the city to prioritize the safety and well-being of the current residents, the protection of the local environment, and the preservation of the neighborhood's historical attributes. Further studies,

improved infrastructure, and greater consideration for existing residents and the Tulalip Tribe are necessary before any approval is granted for this project.

Thank you for your attention to these important matters.

Sincerely,

Brent and Jade Seman

Attn: Emily Morgan

Planning Department

Community Development

Marysville, WA

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed currently to the Marysville Planning Commission for a 59 single home development just north of 98th Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024 in the Marysville Civic Center the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families currently living in this neighborhood. Beyond the many concerns about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water and the sewer constraints, my concern is over the issue of safety for the neighborhood and the increase in bottlenecking traffic.

The developers feel they have alleviated a fire risk by installing sprinkler systems in the new homes because code states you must have two access points in and out of a neighborhood for fire safety or install sprinkler systems in all the houses. However, our neighborhood has only one in/out access to begin with, and with the addition of 59 families accessing our one way out (35th Ave NE) the added traffic will bottleneck our neighborhood access to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access, not addressing other emergency vehicles such as ambulances and police emergency access in and out.

The property has not yet been purchased so this is only a proposal, but I (and 99% of my neighbors) believe this housing project should be stopped before it is even started. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Regards

James R. Lubbehusen

Emily,

I was up until midnight reading about all the law suits KB Homes has filed against them. In addition to the 120 plus neighbors in our current development that do not want to see our trees disappear and out well water contaminated by the 59 home proposal, my concern is also with the quality and reputation on this company. Although the BBB has a high rating for the company, they note they don't even use complaints and apparently law suits in deterring their rating. I'm sure with the right amount of money and influence any company can manipulate a high BBB rating.

My concern with this project beyond the unsafe/limited access to our neighborhood (only 35th Ave NE in and out), I am concerned that with the reputation of KB, our well water will be contaminated by the removal of hundreds or century old trees and construction pollution from this project. My neighbors and I implore you to listen to our concerns and stop, or at minimum, reduce this housing project to match our neighborhood of one house per half acre, not the rroposed cramming of 5 or 6 homes per acre.

Please add this comment to the Notice of Application file PA24-024.

Regards,
Concerned Citizen of Marysville,

Good Morning,

I would like to offer my comments concerning the application submitted by KB Homes for the high density build in our neighborhood.

My family has been living in this community for 33 years and have witnessed first hand the impact of the I-5 88th street on/off ramps and various commercial projects and improvements which brought grocery, gas and restaurants to 88th. This brought services as well as much traffic stress accessing our homes. The narrow road which winds back to our community is a dead end. There is only one way in and out. At peak traffic the intersection is often blocked affording no ability access 36th. Factor in the congestion pinch of the left turn to access the strip mall dev grounded by Chik Fil A, Starbucks, Jersey Mike's and other tenants -the narrow two lane road is blocked completely. Adding 59 homes - potentially 2-3 cars per household will undoubtedly have a negative impact on travel in and out. There are concerns about Fire/ Aid access as well.

Traffic along 35th Street is treacherous now. No sidewalks. No ADA provisions? Can we get side walks and ADA?

How will the build affect on our water quality? Are there City assurances that the build will not impact our wells?

In closing I would like to invite you all to visit our neighborhood. Arrange to come at peak hours during the week. Weekends too.
Word of caution - If you stop at the Starbucks on 88th for coffee you won't be able to take a legal left out of the retail strip mall to travel north in order access our community where the 59 houses are proposed. Who thought that was a good idea?

I appreciate your time.

Here's one and the other is attached:

Dear Members of the Marysville Planning Committee:
I am writing to express my concerns regarding the KB Developers' proposal to construct 59 new houses in our neighborhood, particularly focusing on the implications of having only one access point for both entry and exit. This layout may significantly compromise our safety, as emergency vehicles would face delays reaching homes in care of a crisis, and congestion could lead to hazardous traffic patterns at peak times. Additionally, I worry about the strain this development could place on community resources and our local ecosystem, as increased population density can overwhelm existing infrastructure and lead to the degradation of nearby natural habitats. I urge the Planning Commission to consider these critical factors before moving forward with the project.
Thank you for your attention to these matters.

To Whom It May Concern,

We are writing this letter in regards to Project PA24-024 being planned for my neighborhood. As we all know there is only

one entrance in and out of this neighborhood. The intersection at 88th street and 36th Ave NE is very congested durning peak traffic times,

which already poses an unsafe situation for all drivers involved.The train is also a factor that we know is out of the city's control, however it does contribute

to the problem and it effects on the traffic issues should not be dismissed. If an emergency were to occur during peak traffic times it could be a devastating situation

for the residents of this neighborhood and or the neighborhood on the other side of 88th street, which we all know also only has one entrance in and out. The health and safety

of all the residents of Marysville should be considered when building houses and other infrastructure that will bring more traffic to an already stressed traffic intersection.

Please consider first people's safety above profit when making decisions where you will build infill housing in our city and in our neighborhood.

Thank you,
Ray and Lisa Weiss

Hi Loretta,

Thank you for your email. It looks like this was intended for Mayor Nehring, who I have cc'd on this response.

Nate

On Sep 19, 2024, at 12:00 PM, LORETTA EDSON <ledson71@yahoo.com> wrote:

Hello Mayor Nehring,

I have hesitated to send you this, but I want to make sure you are in the loop on this purposed housing development. I live on 97th Pl NE, a wonderful older established community of with homes on large lots. It was brought to our attention that a developer was making a bid to build a 59 house development in our community.

We were notified there would be a council meeting to discuss this proposal on July 31 2024 at 5pm at city hall. This notification unfortunately did not come from the city planning dept, but from home owners in the community that got wind of this development. They went door to door handing out flyers for the meeting.

We all showed up to the meeting on July 31st, (much to the dismay of the city council, city planner and the housing developer Rep.) to object this housing development . You are more than welcome to review the tapes from the hearing. You will see this community of home owners are very frustrated and upset over this proposal.

We have been impacted greatly, already on entering and leaving our housing development due to the installation of Chik-fil-a and Starbucks on our road. You see we have one way in and one way out of our development.

The intersection and the businesses at our entrance has caused multiple accidents and traffic backups.

At this meeting, it was also brought up that a apartment complex and a Burger Master are also proposed at the backside of Starbucks. This will cause even more traffic on our roads. Throw the idea of roundabouts being installed on 88th, will be most certainly lead to disastrous consequences. I have not seen any traffic impact studies, no car counting strips on 88th or our road to track the amount of traffic this area gets on a daily basis.

With a housing development coming in, that will be adding a minimum of 118 more cars on our street (35th Ave NE). They proposed no other streets to be added as an entrance or outlet. We suggested to put another bridge over Quilceda Creek, to be able to use the area at the back of the proposed housing development that would come out at State Ave. Not having a second outlet/entrance, will create a emergency hazard to and from our neighborhood.

Not to mention the enviromental impact this will have in our area. You see the majority of the houses are on Well/Septic, City Water only is available for the first couple of streets off of 35th Ave NE. This is also a heavily treed area with huge trees. They would need to clear a large amount of trees, which would impact our air quality and the wind protection.

As a community we are not against growth, but just not in our neighborhood.

We are still currently organizing, to further protest this development. We are looking at further action to prevent this development from happening.

I would love to sit down and discuss this in person with a tour of our neighborhood, to show you what exactly we are concerned about.

As stated by the whole neighborhood in the meeting on July 31st, we do not have faith in the city council or the city planner in doing what is best for the community members that are impacted but rather what economic impact it will have on them.

Thank you for your time, this is just a brief synopsis of the issue at hand.

Mr Mayor J Nehring,

My name is Loretta Garduno and I've lived in Maysville for 30 years. I am writing to you to bring attention to a vacant lot that has become a hazardous waste/dumping ground just north of 88th St NE in Marysville. Unshelted folks have camped there and there is excessive garbage there, attracting rodents and disease. A deceased person was found in the woods a year or so ago.

I attended a neighborhood meeting and heard about a proposal to build 59 homes less than 1 mile from my home. Our community opposes this and concerns were raised about many issues

concerning, water, sewer, loss of trees and traffic nightmares. There is only one road in and out of this area and it is already difficult to get through.

I have raised multiple complaints. The priority is safety. I will contact code enforcement about the building garbage problem again. I left a voice mail messages for Doug Lee and no response. Please respond and let me know you care about our community.

Sincerely, Loretta Garduno

Concerns with the proposed 59 homes on 13.5 acres off of 88th in Marysville.

There is only one way in and out of this neighborhood. Adding a potential 120+ additional cars driving in and out to an already congested roadway (88th) is beyond making sense.

The City of Marysville doesn't take care of the roads, trees, etc as of now. A tree from this corner fell during a storm and took out a power line. Took the city a couple DAYS to get to it, we were stuck. Watched medics walk a stretcher back here because they could not get their vehicle past the tree with wires tangled in it.

The frontage road (35th) suffers from at least once a year a tree falling from the west side across the power lines. Always takes days for someone from the city to take care of it. GENERATORS ARE A MUST BACK HERE. Will those families buying houses back here be advised to buy generators? So irresponsible of the City.

It is all over the news that 2 elementary schools will be closing their doors in Marysville, as well as the potential for programs such as sports, etc to be discontinued. The two schools closing are on each side of the school serving kids from this neighborhood. Where are these potential 100 kids going to school? I wouldn't buy a house in Marysville if I had school aged children.

At the Q&A meeting that was set up for this project, it was all questions, no answers. We did learn that not only is this new neighborhood going in this area, but the City has also approved another restaurant/strip mall and apts?!?! Remember one way in and one way out of here! We invite everyone that is apart of this project to drive back here, preferable in separate cars, at the same time, either at 7-8:30am, noon, or 4-6pm, when a train has passed thru and when Chic Fillet has REOPENED. There was a EMT that spoke at this meeting stating that their response time is high due to congestion on 88th, and was concerned about more traffic. Can't change the trains coming thru, but until the roads are fixed for traffic that it has now, zero additional building should be granted. An accident at the entrance to this neighborhood causes HOURS of delay in and out of here! Not OK!!

We moved back here when it was a 2 lane road over the RR tracks from State Street, and a wooden bridge over Quilceda Creek (35 years ago). We can't stop progress, but when it comes to our safety, emergency response, that we as City of Marysville taxpayers deserve, we have to speak up. Please, take a drive, and see how very irresponsible and unsafe it is to put so many additional homes in this area.

Thank you for your time,
Concerned Neighbor

Planning Department

Community Development:

Marysville, WA 98270

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development just north of 98th
Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families residing in the neighborhood. We are concerned about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water, and the sewer constraints, and my biggest concern is safety for the neighborhood with the increase in bottlenecking traffic. Most of my neighbors are elderly and have health issues.

However, our neighborhood has only one in/out access, and with the additional fifty-nine houses which increases the neighborhood by thirty-three percent. The added traffic will bottleneck our neighborhood to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access,
not addressing other emergency vehicles such as ambulances and police emergency access in and out.

To the best of my knowledge, the property has not yet been purchased. I believe this housing project should be stopped immediately. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Thank you for your time.

Mary Steiner

Traffic and Safety Concerns Regarding the Proposed Development of 59 Homes

To: City of Marysville Planning Department
Re: Proposed Development near 10011 39th Dr NE, Marysville, WA
From: Matt Johnson
Date: 09/20/24

I am writing to express serious concerns regarding the traffic and safety implications of the proposed 59-home development near **10011 39th Dr NE**. The findings from the **Traffic Impact Analysis** reveal significant issues that will exacerbate traffic congestion in an area already burdened by commercial activity from **Burgermaster** and **Chick-fil-A**. These businesses already generate substantial traffic, which will only worsen with the introduction of new homes, impacting local traffic flow, safety, and pedestrian infrastructure.

Cumulative Traffic Impact from Burgermaster, Chick-fil-A, and New Development

The traffic generated by **Burgermaster** and **Chick-fil-A** regularly causes congestion on **35th Avenue NE** and **98th Street NE**, especially during peak meal times. The proposed development of 59 homes is projected to add **509 daily trips**, with **54 new PM peak-hour trips**. This additional traffic will compound the existing congestion caused by these commercial businesses, leading to further delays, increased accident risks, and safety concerns for both drivers and pedestrians.

Without proper mitigation measures, traffic flow on these streets will deteriorate, leading to further degradation of the **Level of Service (LOS)** at critical intersections such as the **I-5 ramps at 88th Street NE**. A **Traffic Impact Analysis (TIA)** must be conducted or updated to account for the **cumulative traffic** from both the new development and the nearby commercial establishments, and the analysis should recommend necessary improvements, such as traffic signals, turn lanes, or roundabouts to alleviate these issues.

Pedestrian Safety: The Need for Sidewalks

The current infrastructure on **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** is inadequate to support safe pedestrian movement. With increased traffic from both the development and commercial activity, it is critical that the City installs **sidewalks** along these roads. Pedestrians, including families and children, are at significant risk of accidents if forced to walk on roads shared with vehicles.

Burgermaster and **Chick-fil-A** already generate considerable vehicle and foot traffic, particularly during lunch and dinner hours. The proposed development will introduce additional vehicles and pedestrians into the mix, further complicating the traffic dynamics in this area.

Sidewalks are necessary not only for pedestrian safety but to ensure that traffic flow remains smooth by keeping pedestrians off the road.

Single Access Point and Emergency Response Concerns

39th Dr NE, where I reside, is a **dead-end street** with only one entry and exit point. The increased traffic resulting from the development will exacerbate congestion along this single route, creating delays and bottlenecks, particularly during peak times. This will also pose a significant risk in emergency situations, as emergency vehicles may be delayed by traffic jams or accidents blocking the only route in and out of the neighborhood.

In addition, the **five-year collision history** at the **I-5 ramps at 88th Street NE** indicates a high risk of accidents at these intersections, which further underscores the need for mitigation. The City must ensure that emergency response times are not compromised by increased congestion, and traffic management measures such as **emergency lanes** or optimized **traffic signal prioritization** should be considered.

Conclusion

To address the serious traffic and safety concerns related to the proposed development and the cumulative impact from **Burgermaster** and **Chick-fil-A**, I urge the City of Marysville to:

1. **Conduct or update a comprehensive Traffic Impact Analysis (TIA)** to account for the **combined effects** of traffic from the new development, Burgermaster, and Chick-fil-A.
2. **Install sidewalks** along **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** to provide safe walking spaces for pedestrians.
3. Address the **single access point** issue on 39th Dr NE by considering alternative routes or traffic management solutions to prevent bottlenecks and ensure emergency response times are not compromised.
4. Implement **traffic calming measures** to mitigate the increased congestion and improve safety at key intersections, particularly at the **I-5 ramps at 88th Street NE**.

These measures are critical to ensuring that the development proceeds safely and responsibly, without exacerbating existing traffic problems caused by nearby commercial establishments. I trust that the City will take these concerns seriously and implement the necessary infrastructure improvements.

Thank you for your attention.

Sincerely,
Matt Johnson

State Environmental Policy Act (SEPA, RCW 43.21C)
https://app.leg.wa.gov/RCW/default.aspx?cite=43.21C
SEPA requires the assessment of environmental impacts, including traffic congestion and road safety, for new developments.

Washington State Growth Management Act (RCW 36.70A)
https://app.leg.wa.gov/RCW/default.aspx?cite=36.70A
This act mandates proper infrastructure planning, including traffic and transportation systems, to accommodate new developments and protect public safety.

Hirst Decision (Whatcom County v. Hirst, Futurewise, et al., 2016)
https://fortress.wa.gov/ecy/publications/parts/1611064part1.pdf
While focused on water, this case emphasizes the importance of evaluating infrastructure impacts, including traffic, before allowing development.

Snohomish County v. Pollution Control Hearings Board (2016)
https://law.justia.com/cases/washington/supreme-court/2016/91335-6.html
This case underlines the need for compliance with regulations that address environmental and infrastructure impacts, including the effects on traffic and public safety.

Washington Stormwater Management Regulations (WAC 173-201A)
https://app.leg.wa.gov/WAC/default.aspx?cite=173-201A
Stormwater runoff affects traffic safety, especially in areas where roads are impacted by excess water and insufficient drainage, increasing accident risks.

Marysville SEPA Rules (22E.030)
https://www.codepublishing.com/WA/Marysville/html/Marysville22E/Marysville22E030.html
The local SEPA rules require traffic impact analysis for developments, focusing on the safety and functionality of transportation systems.

Marysville Stormwater Code (6.20)
https://www.codepublishing.com/CA/Marysville/#!/MarysvilleCA06/MarysvilleCA0620.html
Managing stormwater runoff is essential to maintaining safe road conditions, as poorly managed runoff can lead to unsafe driving conditions.

Comments on Groundwater Contamination Risk Due to the Proposed Development of 59 Homes

To: City of Marysville Planning Department
Re: Proposed Development near 10011 39th Dr NE, Marysville, WA
From: Matt Johnson
Date: 09/22/24

I am submitting this statement in opposition to the proposed development of 59 homes near my property at 10011 39th Dr NE, Marysville, WA, as it stands, due to the serious and immediate risks posed to our drinking water and groundwater. While I am not opposed to the development itself, my opposition is contingent upon my concerns being adequately addressed and satisfactorily mitigated. As a taxpayer in the City of Marysville, Snohomish County, and the State of Washington, I expect that the City and other government agencies ensure safe living conditions for residents, with a particular focus on water safety. I understand that the city must grow, however I want to ensure that my family's best interests are protected.

I must also inform you that I have a disability protected under the **Americans with Disabilities Act (ADA)** and may require reasonable accommodations throughout this process. Any personal discussion regarding my disability should be conducted confidentially and be exempt from public records requests or fully redacted.

The Necessity of Pre-Contamination Action

The sandy soil and shallow private wells in this area make groundwater highly susceptible to contamination. Water containing pesticides, herbicides, and other residential chemicals will leach into the ground and migrate toward private wells and **Quilceda Creek**, a vital salmon-bearing waterway.

This is not speculative. My well and others nearby are shallow, approximately at the same depth as the creek. Our wells have already been affected by E. coli and coliform bacteria, likely due to groundwater movement from nearby septic systems. The same hydrological processes will carry harmful chemicals introduced by the development into our drinking water, posing immediate risks to health and safety. While filtration for bacteria like E. coli is simple and inexpensive, solutions for chemicals such as pesticides are far more complex and costly, making filtration impractical for individual homeowners.

Under the **Washington Water Pollution Control Act (RCW 90.48)** and **Antidegradation Policy (WAC 173-200-030)**, groundwater quality must be preserved to protect public health and environmental integrity (Washington State Department of Ecology)

Allowing this development without adequate preventive measures would violate these legal requirements and jeopardize residents' well water, including my own.

Ineffectiveness of Pesticide and Herbicide Bans

A ban on pesticide and herbicide use within the development would be unenforceable. My family’s health and property value cannot depend on residents adhering to such restrictions. Only preemptive action to ensure contamination does not occur can safeguard water quality.

Comprehensive Environmental Impact Study (EIS) is Essential

Before any construction, the City of Marysville must require a **comprehensive Environmental Impact Study (EIS)** that includes:

1. **Comprehensive Hydrological Study:** This study must assess how water moves through the sandy soil and how contaminants will flow from the development into the groundwater and **Quilceda Creek**. The **Washington State Growth Management Act (RCW 36.70A)** and the **State Environmental Policy Act (SEPA, RCW 43.21C)** both require such detailed environmental planning(https://ecology.wa.gov/Water-Shorelines/Water-supply/Water-rights/Case-law/Hirst-decision) (Washington State Department of Ecology).
2. **Groundwater Contamination Risk Assessment:** This assessment should model how pesticides, herbicides, and fertilizers used by the 59 homes will travel through the soil and how quickly they will reach private wells. The assessment is particularly crucial due to the existing E. coli and coliform contamination in local wells.
3. **Pre- and Post-Development Water Testing:** Baseline water quality testing must be conducted, and ongoing testing must be required throughout and after construction to ensure contamination is prevented. This is mandated under **SEPA** and the **Snohomish County Code 22E.030**, which requires thorough environmental review (Washington State Department of Ecology)Snohomish County WA). https://snohomishcountywa.gov/3804/Water---Exempt-Well-Information

Stormwater Management

The development will create significant amounts of impervious surfaces, which will increase stormwater runoff. **Washington Stormwater Management Regulations (WAC 173-201A)** require that stormwater runoff be managed to prevent contamination of water bodies like **Quilceda Creek** and nearby wells (Washington State Department of Ecology).

Despite paying stormwater fees, my neighborhood currently receives no visible stormwater management. This raises concerns about how these fees are being used and how runoff from the development will be managed. The City must ensure that proper infrastructure is in place to protect residents from increased runoff risks, and **WITH consideration of surrounding drinking water wells**, as required under the **Protection of Upper Aquifers (WAC 173-154)** (Washington State Department of Ecology).

Developer and City Responsibility for Preemptive Mitigation

Mitigation must occur **before** contamination is allowed to happen. The developer must be held fully responsible for implementing preventive measures, including:

- **Installation of Whole-Home Filtration Systems:** The developer must install comprehensive filtration systems capable of removing pesticides, herbicides, and other chemicals from well water before construction begins.
- **Connection to Municipal Water:** If filtration systems are insufficient or impractical, the City and developer must cover the full cost of connecting homes to municipal water, including infrastructure, connection fees, and ongoing water bills.

Well Construction Standards/Maintenance

The **Washington Well Construction Standards (WAC 173-160)** establish minimum requirements for constructing and maintaining wells (Washington State Department of Ecology)(Snohomish County Health Department). The EIS must evaluate whether additional protections are needed for existing wells. If the development impacts these wells, the City and developer must bear all costs related to ensuring drinking water safety.

Legal Precedents Supporting Water Protection

The **Hirst Decision (Whatcom County v. Hirst, Futurewise, et al., 2016)** mandates that counties ensure legal water availability before approving developments that rely on wells (Washington State Department of Ecology).
https://ecology.wa.gov/Water-Shorelines/Water-supply/Water-rights/Case-law/Hirst-decision

This is a crucial precedent in ensuring that developments like this one do not harm existing water supplies.

Additionally, the **Snohomish County v. Pollution Control Hearings Board (2016)** ruling underscores the importance of complying with stormwater management regulations and environmental protection laws (Justia Law https://law.justia.com/cases/washington/supreme-court/2016/92805-3.html). These legal precedents support the need for the City of Marysville to take the potential impacts on groundwater and well water seriously.

Public Health and Environmental Risks

Groundwater contamination poses severe public health risks, including gastrointestinal diseases, reproductive harm, neurological disorders, and cancer. Under the **Washington Water Pollution Control Act (RCW 90.48)**, the City has a duty to prevent contamination of water sources(Justia Law https://law.justia.com/cases/washington/supreme-court/2016/92805-3.html). Further, this development risks harming **Quilceda Creek**, a salmon-bearing waterway that must be protected under the **Clean Water Act (33 U.S.C. §1251)**.

Beyond the impact on drinking water, the proposed development risks harming **Quilceda Creek**, a critical salmon-bearing stream. Changes to groundwater flow and contamination could degrade water quality and harm salmon habitats. A thorough hydrological study must be conducted to assess and mitigate these risks.

Financial Compensation for Transition to City Water

As a homeowner who relies on a private well, I did not plan for the financial burden of switching to city water. If contamination forces this transition, I expect significant compensation to offset the additional costs, including infrastructure improvements, connection fees, and ongoing water bills.

Buyout Offer

If the City and developer cannot guarantee the safety of my well water through preemptive action and preserve and add value to our property, I would not want to live in the community, and I am willing to consider a buyout offer. This compensation must reflect not only the current appraised value 2024 of my property, which is $1,100,000.00 + but also the long-term anticipated rental income potential I would be forfeiting over my intended ownership.

Conclusion

As it stands, the proposed development poses an unacceptable risk to groundwater quality and public health. I strongly urge the City to:

- Require a comprehensive **EIS** that addresses hydrological and contamination risks.
- Hold the developer fully responsible for implementing preventive mitigation measures, including comprehensive filtration systems or connection to municipal water at no cost to homeowners.
- Provide financial compensation for any costs imposed on homeowners due to contamination risks, myself and others.

Thank you for considering these critical issues. I trust the City of Marysville, and all reviewing this, will prioritize the health, safety, and financial well-being of its residents.

Sincerely,
Matt Johnson

Date of Completeness: August 29, 2024

NOTICE IS HEREBY GIVEN THAT AN APPLICATION WAS MADE FOR THE

FOLLOWING PROPOSAL:

The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.

Existing Environmental Documents: SEPA Environmental Checklist; Traffic Impact Analysis; Geotechnical Report; Critical Area Report; Tree Retention Plan; Preliminary Drainage Report

Public Hearing: An Open Public Record Decision Hearing is required for this application; a subsequent Notice of Hearing will be published at a later date.

Public Comment Period: Written comments must be submitted to the contact person listed below by

5:00 PM on September 24, 2024.

Document Availability: http://docs.marysvillewa.gov/htcomnet/public/?folder=7607ade1

ANY PERSON HAS THE RIGHT TO RECEIVE NOTICE, PARTICIPATE IN ANY HEARINGS, REQUEST A COPY OF THE FINAL DECISION AND APPEAL THE DECISION AS PROVIDED BY LAW.

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Emily,

I am writing to formally notify you of my grave concern regarding the proposed plan to build 59 housing units in our neighborhood in Marysville.

Now, this is not a “Not in my backyard” situation. I am not against growth in areas of Marysville that can safely accommodate the growth. We do need more housing options for our growing populations.

The fact of the matter is that our neighborhood physically can not safely support the current population that exists now. We are a mostly older neighborhood. The lady that lives next door to me is in her nineties and is on a pacemaker. She needs medical help frequently.

Because there is only on road into our community, we have no options when that road becomes unpassable. We are bordered on the West by I-5, on the North and East by Quill Ceda creek and on the South by 88th street. Our only way out is to take 35th Ave NE to the 88th Street NE intersection.

On average, one or two time per year, during storms, we get trees down on 35th Ave. This makes the road unpassable for several hours or more. It also can take out our electricity when the trees fall on the powerlines. Because this is the only way out, our residents become trapped. Not only can we not get out, but emergency services can’t get in.

Earlier this year we had and accident in front of the Chic Filet, again, on the only path into our community. The accident caused the road and intersection to close. I was on my way home from work. . I was not even able to get off I-5 to reach 88th Steet. That one accident closed down all

Eastbound I-5 off ramps, 88th street NE Eastbound and Westbound, 36th Ave NE on both sides of 88th. It even stopped traffic on 27th Ave NE with cars trying to find another way to 88th Street NE. The intersection was closed for 4 hours and no one could get into or out of the neighborhood.

When you add the train to the mix it makes getting into or out of the neighborhood by emergency services or residents impossible if there is an accident or trees down on the road. Adding 59 more homes to neighborhood can only make an unsafe situation even more dangerous.

We have already had wildfires start in the trees along I-5. Because we are surrounded by the Quill Ceda creek greenbelt and the I-5 greenbelt, if there is a wildfire and a burning tree comes down on 35th Ave NE, we all will be trapped if a large wildfire breaks out.

As said before, I am not against development where it makes sense and where it can be safety implemented. Our neighborhood has unique physical limitations. We were told that a road cannot be installed over the creek or over I-5. With the stated limitations our neighborhood is just not the place for these developments.

Adding 59 new homes to an already unsafe situation is unacceptable. Then when you add the proposed BurgerMaster complex with its added 16 homes and added commercial traffic, the situation becomes reckless and irresponsible. The city of Marysville must not approve these new developments.

Sincerely,

Mike Soderstrom

RE: KB Homes development

Project Contact: Neil Latta, Latta Engineering
5970 Birch Point Rd, Blaine, WA 98230
Project Location: 9815/9909/9907/9921 35th Ave NE
3705/3625/3609 98th St NE
APN: 30051600301400, 30051600301500, 30051600301600, 30051600304500 30051600304501, 30051600305800, 30051600306500, 30051600306600

Dear Emily,

Thank you for receiving this public comment relating to the subject proposed development. We are residents of the neighborhood in which this development is being planned for construction and are submitting the following comments, concerns, and questions for your review and response.

Concerns

1) We are concerned that the overall safety of the neighborhood community is not being properly addresses or mitigated within the development proposal. We would like to have this issue properly addressed and mitigated to the neighborhood's satisfaction before any development begins.

As was indicated in the public meeting on this subject previously held at the Marysville City Hall on Wednesday, July 31, 2024, there is only one way in and one way out of the neighborhood, with no ability to establish a second entrance or exit. This is in itself a very unsafe and dangerous condition for the current residents and will only be exacerbated by the addition of 59 new homes. Emergency services already have a difficult time entering the neighborhood via 36th Avenue during peak traffic conditions, and especially if a train is crossing at the intersection of 88th Avenue and State streets which already delays responses from Fire Station 62. Station 62 and other units respond to the neighborhood several times per month as there is a hospice located on 100th Place. The fact that sprinklers are required for the planned new homes affirms and acknowledges that the City knows that access by emergency vehicles is already delayed to the neighborhood and is a therefore a serious safety concern. Unfortunately, the addition of sprinklers to the new homes does nothing to mitigate or solve the actual cause of the issue, which is that there is only one way into and out of the entire neighborhood.

Entrance to the neighborhood is also severely delayed if not made impossible during wind storms where trees are blown down across 35th Avenue and on other neighborhood streets. It generally takes two to three days before the roadway is cleared and power is restored. The trees that blow down are mainly, but not exclusively from the greenbelt along I-5. Without a second entrance or exit available this safety risk is also unable to be properly mitigated.

2) We are also concerned that the traffic impact study that was provided by Kimley Horn and funded by KB Homes does not adequately convey the current traffic conditions or the expected future traffic conditions at the intersection of 88th Street and 36th Avenue if the proposed development is built.

The following are issues and questions that we have identified and require a proper response to the neighborhood's satisfaction before any development begins.
Calculations used to determine traffic impact are based on the ITE Trip Generation Manual, 11th Edition published in 2021.
- What revisions have occurred that make this data applicable in 2024? How is this data relevant to the years 2024, 2027, and 2033 as indicated were used in the study?

A. The rate used to calculate the expected impact of the new 59 houses is one trip per household in the peak hour.
   - One trip per household severely understates the reality of trips that will occur from the new residents. One only needs to look at all of the other similar developments that have been built around the city to see that most homes have more than one car and more than one driver that take multiple trips to and from the neighborhoods during most daily hours; not just peak hours. One trip per household per peak hour is an incorrect assumption and would like to see that number verified by actual traffic study data of other similar neighborhoods with one entrance/exit with the same housing density as proposed by the developer. This severely understates the amount of traffic that is "predicted" to occur if the development is built, which then understates the potential traffic volume that is used to calculate the rating of the intersection of 88th Street and 36th Avenue.
B. The calculations were also "based on discussions with City staff" and "adjustments were made to the nearest City trip distribution".
   - What did the discussions with City staff contain?
   - What adjustments were made?
   - What was the nearest City that was used?

- The calculations only included theorized trips made by the proposed new development, and do not include the existing traffic that already uses 35th and 36th Avenues.

D. Section 3, Table 1 of the report indicates an ADT of 556 for the development and 47 for the 5 houses to be removed. How are the 556 and 47 amounts calculated?
E. The report indicates that the AM peak hours are between 7-9 am, and the PM peak hours are between 4-6 pm. Several people in the neighborhood work at Boeing or other companies and leave for work earlier than 7 am and arrive home before 4 pm, so the peak hours need to be expanded as they do not adequately represent the current traffic volume.
F. The report concludes that it is estimated that only 37 new AP peak hour trips will occur from the new development and 54 trips will occur in the PM peak hours. This calculation severely underestimates the total frequency of trips based on only one trip per household per peak period as indicated above.
G. The following calculations are based on the data provided in the report from Section 5, Table 3 of Figures 4 through 8 respectively, and *only include numbers that actually affect 36th Avenue*.
   - Are the numbers in the Figures based on actual observed data?

- Are the numbers only from peak hours or some sort of average?
- Do the 2027 and 2033 numbers include the increased traffic from the Burgermaster development?
- Once again, the small increase of 31 and 54 trips for 2027 and 2033 respectively severely underestimate the increase amount of traffic that the intersection of 88th Street and 36th Avenue will experience due to the development. Traffic circles will not mitigate the increased traffic enough to provide prompt access to the neighborhood via 36th Avenue during peak hours or if there is an accident or a train crossing.

	2024	2027	2033
Current	654 (Figure 4)		
No Build		734 (Figure 5)	854 (Figure 7)
Build		765 (Figure 6)	908 (Figure 8)
		+ 31	+ 54

H. Section 5.3 of the report indicates that the current 2024 delay at the intersection of 88th street and 36th Avenue is 28.9 seconds.
- How is this calculated?
- Is it for just the light cycle, because if it is then the light does not change every 28.9 seconds.
- Is it an average of all delays after the light turns green for 36th Avenue traffic?

I. Section 5.2 of the report lists the level of service range of controlled intersection delay for level B at 10 – 20 seconds **PER CAR**; for level C at 20 – 35 seconds; level D at 35 – 55 seconds; and level E at 55 – 80 seconds.
- Why does the increment amount jump from 15 seconds at level C to 20 seconds at level D, and then 25 seconds at level E?
- If the intersection at 88th and 36th is rated an E then by City rules the development cannot be built. If the increment amounts are kept the same for all levels then the calculated rate of 44.5 seconds in 2033 if the development is built would fall within level E and thus would not be allowed to be built.
- If the times indicated are the delays experienced PER CAR, then the 908 cars that I've calculated per day that will use 36th Avenue to enter 88th will be delayed 44.5 seconds X 908 = 40,406 seconds, or 673.43 minutes, or 11.22 hours. This is if no other factors are included such as accidents and train crossings or other lanes of the intersection that do not directly have traffic entering or exiting 36th Avenue. This level of service is unacceptable.

J. The collision analysis only provides the number of collisions; it does not include the amount of time that traffic was delayed during each accident. Accidents severely delay access to 36th Avenue and the time that access is delayed MUST be accounted for in all traffic LOS calculations, and it does not appear to be

3) I am concerned that the groundwater will be permanently polluted, damaged and be unusable due to the construction and future runoff from the development.

Many of the existing houses use well water and once a well is polluted it is extremely difficult if not impossible to restore the water to the level of purity that previously existed before construction. No effective mitigation plan has been submitted that addresses this concern. Please provide a proper

mitigation plan that not only addresses the water purity concerns and also provides an avenue of effective resolution should wells become polluted and unusable in the future.

Additionally, who is going to be responsible for the polluting of the wells and/or the potential health risks associated? Who will be responsible for addressing and mitigating the issue to the satisfaction of the homeowners impacted?

Conclusion

- Based on existing neighborhood factors and information received from the City of Marysville and KB Homes, it is unsafe to allow the addition of 59 homes to the existing neighborhood to proceed
- The neighborhood's concerns over the safety of adding an additional 59 homes to an already unsafe situation for the entire neighborhood of only one way in and one way out are not being properly acknowledged, addressed, or mitigated by the City of Marysville or KB Homes
- The neighborhood's concerns over maintaining the purity of the existing well water and water table are not being properly acknowledged, addressed, or mitigated by the City of Marysville or KB Homes
- It appears that the numbers of trips per household that are calculated for the new development are being severely underestimated, which improperly skews the numbers in to result in a lower LOS rating for the 88th and 36th Avenue intersection, and in favor of KB Homes and approval of the development
- It appears that the City of Marysville is not interested in allowing the existing residents of the neighborhood in which the development is planned to have any input to the decision of whether or not the development can proceed

Please provide sufficient answers to the above questions and provide proper and effective mitigation plans for all areas of concern before any further progress is made on this development. Thank you.

Sincerely,

John W. and Nikki V. Ray

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Thank you for this email.

I believe there are many reasons that this project needs to be on hold **until multiple Safety issues are resolved**. If the following issues cannot be resolved to protect the current residents, the development needs to be reduced or denied.

1. Fire Department and Emergency Services access -- currently problematic
2. Street Access - Dead End Road
3. City Water Capacity,
4. Well Water Quality & Contamination Risk
5. City Sewer extension and capacity

Fire Department and Emergency Services access
Multiple times each day 88th Street has all lanes full of vehicles for an extended period of time due to the Train at 88th and State, or the huge quantity of traffic that travels that road. It is impossible for emergency vehicles to gain access to this neighborhood.

The business traffic for Chick-Fil-A, Starbucks, and other businesses in the area, which was added in 2020, have added the complexity of all lanes of 36th, the single access point, being frequently blocked with that business traffic. In addition, the proposed addition of Burger Master, businesses, and 16 apartments is additional congestion added to an already over burdened street capacity.

During the July 31, 2024 meeting regarding the development, there was a reference to the addition of multi lane traffic circles but these add minimal space. I-5 Exit 200 is frequently at a stand still for a half mile of I-5. Those cars could easily pack all lanes of the circles. Any road capacity changes need to happen prior to adding additional traffic.

Street Access - Dead End Road
Replacing 5 homes, down a **one and one half mile long dead end road**,

with 59 homes is a 34% increase in the number of homes which already have safety issues. This seems unreasonable without the addition of at least one external access road. I don't believe this complies with the intent of the residential access laws mentioned during the July 31, 2024 meeting regarding the requirement for two or more exits from neighborhoods. The current long narrow access road runs parallel to the I-5 Right of way and weaves through the neighborhood.

The proposed subdivision shows two exits, however, both exits go onto the same dead end road, the roads show different street names, however, it's logically all one long road.

If you look at the street map of the area, you will see that turning from 88th onto 36th between 7-11 and Chick-Fil-A, the road becomes a long dead end road. There are multiple street names as the road weaves through the older large isolated residential area. The turns are 36th, left on 90th, right on 35th; which runs parallel to I-5; right on 98th, left on 39th, left on 100th, 100th ends in a Cul-de-sac near I-5 Right of Way. There is a side street onto 35th which also ends in a cul de sac. The number of homes that currently rely on this single access point is about 170, all relying on one way in and out, complicated by multiple businesses at the single entrance/exit point of 88th and 36th.

The permit plan says there are two exits from the proposed neighborhood, however, even though the neighborhood exits are onto two different street names they both exit to the same long dead end road.

City Water
Does the current City Water system have the capacity to provide good water pressure, since many of the current homes have wells the system may be overwhelmed. It could potentially need to serve a 100% growth in number of home served.

Well Water Quality & Contamination Risk
A majority of the homes in the area are not on City Water or Sewer. It's essential to protect the existing homes, this new subdivision will put the existing homes at risk. The average city dweller has no knowledge about protecting the ground water quality since they totally rely on the City Water system.

The addition of 59 homes and over 120 cars; based on average vehicles per household; will result in lots of contaminants, which will pollute the well water. Many of the things we see as normal daily tasks result in contaminants being introduced into the ground water; washing a car or other outside items, chemicals used for lawns and gardens, treating for pests, things that leak onto the ground from vehicles and much more.

City Sewer Capacity and Construction Plan

The plan is to extend the city sewer system which runs the length of 35th. This work will also cause traffic and safety problems since the work will need to be completed under the road that is the single access point for the neighborhood. What is the plan to be sure people can traverse the full 1.5 miles while this work is being performed? It's very likely the emergency response time will be impacted during the work. The statement was just one week to perform the work. That seems barely enough time to get the work started, much less completed.

Will this dump into the sewer collection point behind Haggen, does that collection point have the capacity to handle the increase, a majority of the 170 homes that will remain have septic tanks, it's very likely a 100% increase in sewage that will need to be handled.

Thank you very much for addressing these concerns. I look forward to your response.

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Ms Morgan,

I am writing in regard to the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development between 98th St. and 100th Pl. in Marysville.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and the concerns of the families residing in the neighborhood.

Amongst our concerns are:

1. The amount of traffic that would be added to our streets with only one way in and one way out.
2. The amount of time it will take for emergency vehicles to reach us.
3. How our trees will survive the storms once the protection of the Stevens property is cleared.
4. Being as our area is on wells, how will this affect our water.

There are many other concerns but this is just to name a few.

Carmen Nielsen
3814 100th Pl.
N.E.

(carmien@msn.com)

This is answer to question #2 about emergency response from fire. Our response times would be similar to our current response times. All responses vary based on availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.

Concerns Regarding Housing Development Project (PA24-024)

Dear Emily Morgan,

I am writing to submit my comments on the proposed housing development project (PA24-024). While I understand the need for growth, I have several concerns about the potential impacts this project will have on the surrounding community and environment, particularly in terms of traffic, environmental degradation, tree retention, fire safety, and potential effects on nearby water sources. Below are my key points:

1. Traffic Impact, Emergency Access, and Roundabouts

The Traffic Impact Analysis highlights that the development will significantly increase traffic, particularly on 35th Ave., which serves as the only entry and exit point for both current and future residents. The proposed traffic improvements, including the addition of three roundabouts, are insufficient to mitigate the congestion, particularly when trains are passing through the area.

What is more troubling is that the Environmental Impact Study admits that instead of meaningfully addressing traffic issues, the developers will pay an impact fee, effectively acknowledging they are worsening the traffic situation. This gives the impression that the developers prioritize their profits over community wellbeing, as it appears they prefer to pay a fee rather than invest in improving the infrastructure for the neighborhood.

I urge the city to reconsider this approach and require the developers to implement traffic improvements beyond paying a fee, as the current plan will exacerbate traffic congestion, negatively affecting current residents.

2. Fire Safety and Increased Danger for Existing Residents

I am also deeply concerned about the increased fire safety risks this development imposes on current residents. The new homes will likely be equipped with modern fire safety measures, but existing residents will face a higher danger without the ability to afford expensive upgrades like water sprinklers.

Moreover, the current homes are not being given access to public water and sewer systems, which

places them at a further disadvantage. These homes rely on well systems, and in the event of a power outage, the well pumps will not function, leaving residents without water pressure. Even if sprinklers were added, they would not work under these circumstances. The increased fire risk, paired with the lack of support for traditional homes, puts current residents in a more precarious and dangerous situation.

The city must consider the inequitable situation this creates, where new, wealthier homes are built with modern safety features, while long-standing, traditional homes are left in an increasingly dangerous environment. This is particularly unjust given the rich historical attributes of the neighborhood, which are not being respected or preserved.

3. Environmental Impact and Unmentioned Creek Belonging to the Tulalip Tribe

Another significant concern is that the Environmental Checklist failed to mention a nearby creek that belongs to the Tulalip Tribe. This is a serious oversight, as the creek plays an important role in the Tribe's cultural and environmental heritage.

There is a real risk of pollution from construction runoff, chemicals, and sedimentation, which could harm water quality and the ecosystem. Furthermore, future residents may use yard chemicals—such as fertilizers, pesticides, and herbicides—that could seep into the groundwater, impacting both the creek and the existing wells used by current residents. It is especially concerning that future residents, whose water will come from the city, will not have the same concerns about protecting the groundwater that current residents depend on.

The city must ensure that the developers implement robust environmental protections, including restrictions on chemical use and a comprehensive plan to safeguard the creek and the water resources of the community. Furthermore, it is critical that the Tulalip Tribe is consulted and their rights and interests are respected.

4. Risk of Groundwater Contamination and Well Drying for Nearby Residents

The project raises serious concerns about both the contamination and drying up of existing wells, which many current residents rely on for their water supply. The construction process and potential changes to the groundwater table could disrupt these wells, while chemical runoff from the new development could further contaminate the water.

The city should require a thorough hydrological study to assess the potential risks to the water table and ensure the continued water security of existing residents. Moreover, given that the new development will have city water, current residents should not be disproportionately affected by risks created by the development.

5. Tree Retention and Loss of Vegetation

The Arborist Report reveals plans for significant tree removal, which will reduce the area's natural beauty, wildlife habitats, and stormwater absorption. These trees are not only essential for the local ecosystem but also contribute to the historical and aesthetic character of the neighborhood.

I recommend that the city enforce stronger measures to minimize tree removal and require the replanting of native species to replace any lost trees. This would help maintain the ecological balance and preserve the unique character of the neighborhood.

In conclusion, I have significant concerns about the negative impacts this development will have on traffic, fire safety, water resources, and the environment. The development is increasing risks for existing residents—both in terms of safety and quality of life—without providing meaningful solutions to mitigate those risks. The developers' plan to simply pay an impact fee for worsening traffic, without addressing the root issues, is particularly troubling, as it demonstrates a disregard for the long-term needs of the community.

I urge the city to prioritize the safety and well-being of the current residents, the protection of the local environment, and the preservation of the neighborhood's historical attributes. Further studies,

improved infrastructure, and greater consideration for existing residents and the Tulalip Tribe are necessary before any approval is granted for this project.

Thank you for your attention to these important matters.

Sincerely,

Brent and Jade Seman

Answer to question #2:
All of the new buildings will be equipped with fire sprinkler systems which should operate during a power interruption as long as the pressure within the water system is unaffected. While this cannot be for certain, all fire systems within the area would be impacted as well.

The fire department is willing to provide neighborhood fire safety talks to raise the awareness of fire safety practices for all residents.

The fire district will continue to provide service at a high level to the neighborhood.

If residents would like more information on retrofitting their homes with fire sprinkler systems using a well we can provide that as well. This is an option for those who would like to add additional safety in their homes. A good website for residential fire sprinklers is www.homefiresprinkler.org or they can contact Tom Maloney 360-363-8506.

Attn: Emily Morgan

Planning Department

Community Development

Marysville, WA

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed currently to the Marysville Planning Commission for a 59 single home development just north of 98th Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024 in the Marysville Civic Center the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families currently living in this neighborhood. Beyond the many concerns about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water and the sewer constraints, my concern is over the issue of safety for the neighborhood and the increase in bottlenecking traffic.

The developers feel they have alleviated a fire risk by installing sprinkler systems in the new homes because code states you must have two access points in and out of a neighborhood for fire safety or install sprinkler systems in all the houses. However, our neighborhood has only one in/out access to begin with, and with the addition of 59 families accessing our one way out (35th Ave NE) the added traffic will bottleneck our neighborhood access to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access, not addressing other emergency vehicles such as ambulances and police emergency access in and out.

The property has not yet been purchased so this is only a proposal, but I (and 99% of my neighbors) believe this housing project should be stopped before it is even started. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Regards

James R. Lubbehusen

Subject:	[External!] Proposed KB Homes 59-lot Planned Residential Development
Date:	Thursday, September 19, 2024 11:45:00 AM

[CAUTION:] This email originated from outside the City of Marysville. Do not click links or open attachments unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Good Morning,

I would like to offer my comments concerning the application submitted by KB Homes for the high density build in our neighborhood.

My family has been living in this community for 33 years and have witnessed first hand the impact of the I-5 88th street on/off ramps and various commercial projects and improvements which brought grocery, gas and restaurants to 88th. This brought services as well as much traffic stress accessing our homes. The narrow road which winds back to our community is a dead end. There is only one way in and out. At peak traffic the intersection is often blocked affording no ability access 36th. Factor in the congestion pinch of the left turn to access the strip mall dev grounded by Chik Fil A, Starbucks, Jersey Mike's and other tenants -the narrow two lane road is blocked completely. Adding 59 homes - potentially 2-3 cars per household will undoubtedly have a negative impact on travel in and out. There are concerns about Fire/ Aid access as well.

Traffic along 35th Street is treacherous now. No sidewalks. No ADA provisions? Can we get side walks and ADA?

How will the build affect on our water quality? Are there City assurances that the build will not impact our wells?

In closing I would like to invite you all to visit our neighborhood. Arrange to come at peak hours during the week. Weekends too.
Word of caution - If you stop at the Starbucks on 88th for coffee you won't be able to take a legal left out of the retail strip mall to travel north in order access our community where the 59 houses are proposed. Who thought that was a good idea?

I appreciate your time.

Regards,

Joan Sauter

Here's one and the other is attached:

Dear Members of the Marysville Planning Committee:
I am writing to express my concerns regarding the KB Developers' proposal to construct 59 new houses in our neighborhood, particularly focusing on the implications of having only one access point for both entry and exit. This layout may significantly compromise our safety, as emergency vehicles would face delays reaching homes in care of a crisis, and congestion could lead to hazardous traffic patterns at peak times. Additionally, I worry about the strain this development could place on community resources and our local ecosystem, as increased population density can overwhelm existing infrastructure and lead to the degradation of nearby natural habitats. I urge the Planning Commission to consider these critical factors before moving forward with the project.
Thank you for your attention to these matters.

[CAUTION:] This email originated from outside the City of Marysville. Do not click links or open attachments unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Concerns with the proposed 59 homes on 13.5 acres off of 88th in Marysville.

There is only one way in and out of this neighborhood. Adding a potential 120+ additional cars driving in and out to an already congested roadway (88th) is beyond making sense.

The City of Marysville doesn't take care of the roads, trees, etc as of now. A tree from this corner fell during a storm and took out a power line. Took the city a couple DAYS to get to it, we were stuck. Watched medics walk a stretcher back here because they could not get their vehicle past the tree with wires tangled in it.

The frontage road (35th) suffers from at least once a year a tree falling from the west side across the power lines. Always takes days for someone from the city to take care of it. GENERATORS ARE A MUST BACK HERE. Will those families buying houses back here be advised to buy generators? So irresponsible of the City.

It is all over the news that 2 elementary schools will be closing their doors in Marysville, as well as the potential for programs such as sports, etc to be discontinued. The two schools closing are on each side of the school serving kids from this neighborhood. Where are these potential 100 kids going to school? I wouldn't buy a house in Marysville if I had school aged children.

At the Q&A meeting that was set up for this project, it was all questions, no answers. We did learn that not only is this new neighborhood going in this area, but the City has also approved another restaurant/strip mall and apts?!?! Remember one way in and one way out of here! We invite everyone that is apart of this project to drive back here, preferable in separate cars, at the same time, either at 7-8:30am, noon, or 4-6pm, when a train has passed thru and when Chic Fillet has REOPENED. There was a EMT that spoke at this meeting stating that their response time is high due to congestion on 88th, and was concerned about more traffic. Can't change the trains coming thru, but until the roads are fixed for traffic that it has now, zero additional building should be granted. An accident at the entrance to this neighborhood causes HOURS of delay in and out of here! Not OK!!

We moved back here when it was a 2 lane road over the RR tracks from State Street, and a wooden bridge over Quilceda Creek (35 years ago). We can't stop progress, but when it comes to our safety, emergency response, that we as City of Marysville taxpayers deserve, we have to speak up. Please, take a drive, and see how very irresponsible and unsafe it is to put so many additional homes in this area.

Thank you for your time,
Concerned Neighbor

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development just north of 98th
Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families residing in the neighborhood. We are concerned about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water, and the sewer constraints, and my biggest concern is safety for the neighborhood with the increase in bottlenecking traffic. Most of my neighbors are elderly and have health issues.

However, our neighborhood has only one in/out access, and with the additional fifty-nine houses which increases the neighborhood by thirty-three percent. The added traffic will bottleneck our neighborhood to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access,
not addressing other emergency vehicles such as ambulances and police emergency access in and out.

To the best of my knowledge, the property has not yet been purchased. I believe this housing project should be stopped immediately. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Thank you for your time.

Mary Steiner

MFD response times would be similar to our current response times (fire trucks and aid cars). The plans were reviewed based on current adopted standards. All response vary based on availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.

All of the new buildings will be equipped with fire sprinklers. The fire department is willing to provide neighborhood fire safety talks to raise the awareness of fire safety practices for all residents.

The fire district will continue to provide service at a high level to the neighborhood.

Traffic and Safety Concerns Regarding the Proposed Development of 59 Homes

To: City of Marysville Planning Department
Re: Proposed Development near 10011 39th Dr NE, Marysville, WA
From: Matt Johnson
Date: 09/20/24

I am writing to express serious concerns regarding the traffic and safety implications of the proposed 59-home development near **10011 39th Dr NE**. The findings from the **Traffic Impact Analysis** reveal significant issues that will exacerbate traffic congestion in an area already burdened by commercial activity from **Burgermaster** and **Chick-fil-A**. These businesses already generate substantial traffic, which will only worsen with the introduction of new homes, impacting local traffic flow, safety, and pedestrian infrastructure.

Cumulative Traffic Impact from Burgermaster, Chick-fil-A, and New Development

The traffic generated by **Burgermaster** and **Chick-fil-A** regularly causes congestion on **35th Avenue NE** and **98th Street NE**, especially during peak meal times. The proposed development of 59 homes is projected to add **509 daily trips**, with **54 new PM peak-hour trips**. This additional traffic will compound the existing congestion caused by these commercial businesses, leading to further delays, increased accident risks, and safety concerns for both drivers and pedestrians.

Without proper mitigation measures, traffic flow on these streets will deteriorate, leading to further degradation of the **Level of Service (LOS)** at critical intersections such as the **I-5 ramps at 88th Street NE**. A **Traffic Impact Analysis (TIA)** must be conducted or updated to account for the **cumulative traffic** from both the new development and the nearby commercial establishments, and the analysis should recommend necessary improvements, such as traffic signals, turn lanes, or roundabouts to alleviate these issues.

Pedestrian Safety: The Need for Sidewalks

The current infrastructure on **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** is inadequate to support safe pedestrian movement. With increased traffic from both the development and commercial activity, it is critical that the City installs **sidewalks** along these roads. Pedestrians, including families and children, are at significant risk of accidents if forced to walk on roads shared with vehicles.

Burgermaster and **Chick-fil-A** already generate considerable vehicle and foot traffic, particularly during lunch and dinner hours. The proposed development will introduce additional vehicles and pedestrians into the mix, further complicating the traffic dynamics in this area.

Sidewalks are necessary not only for pedestrian safety but to ensure that traffic flow remains smooth by keeping pedestrians off the road.

Single Access Point and Emergency Response Concerns

39th Dr NE, where I reside, is a **dead-end street** with only one entry and exit point. The increased traffic resulting from the development will exacerbate congestion along this single route, creating delays and bottlenecks, particularly during peak times. This will also pose a significant risk in emergency situations, as emergency vehicles may be delayed by traffic jams or accidents blocking the only route in and out of the neighborhood.

In addition, the **five-year collision history** at the **I-5 ramps at 88th Street NE** indicates a high risk of accidents at these intersections, which further underscores the need for mitigation. The City must ensure that emergency response times are not compromised by increased congestion, and traffic management measures such as **emergency lanes** or optimized **traffic signal prioritization** should be considered.

Conclusion

To address the serious traffic and safety concerns related to the proposed development and the cumulative impact from **Burgermaster** and **Chick-fil-A**, I urge the City of Marysville to:

1. **Conduct or update a comprehensive Traffic Impact Analysis (TIA)** to account for the **combined effects** of traffic from the new development, Burgermaster, and Chick-fil-A.
2. **Install sidewalks** along **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** to provide safe walking spaces for pedestrians.
3. Address the **single access point** issue on 39th Dr NE by considering alternative routes or traffic management solutions to prevent bottlenecks and ensure emergency response times are not compromised.
4. Implement **traffic calming measures** to mitigate the increased congestion and improve safety at key intersections, particularly at the **I-5 ramps at 88th Street NE**.

These measures are critical to ensuring that the development proceeds safely and responsibly, without exacerbating existing traffic problems caused by nearby commercial establishments. I trust that the City will take these concerns seriously and implement the necessary infrastructure improvements.

Thank you for your attention.

Sincerely,
Matt Johnson

State Environmental Policy Act (SEPA, RCW 43.21C)
https://app.leg.wa.gov/RCW/default.aspx?cite=43.21C
SEPA requires the assessment of environmental impacts, including traffic congestion and road safety, for new developments.

Washington State Growth Management Act (RCW 36.70A)
https://app.leg.wa.gov/RCW/default.aspx?cite=36.70A
This act mandates proper infrastructure planning, including traffic and transportation systems, to accommodate new developments and protect public safety.

Hirst Decision (Whatcom County v. Hirst, Futurewise, et al., 2016)
https://fortress.wa.gov/ecy/publications/parts/1611064part1.pdf
While focused on water, this case emphasizes the importance of evaluating infrastructure impacts, including traffic, before allowing development.

Snohomish County v. Pollution Control Hearings Board (2016)
https://law.justia.com/cases/washington/supreme-court/2016/91335-6.html
This case underlines the need for compliance with regulations that address environmental and infrastructure impacts, including the effects on traffic and public safety.

Washington Stormwater Management Regulations (WAC 173-201A)
https://app.leg.wa.gov/WAC/default.aspx?cite=173-201A
Stormwater runoff affects traffic safety, especially in areas where roads are impacted by excess water and insufficient drainage, increasing accident risks.

Marysville SEPA Rules (22E.030)
https://www.codepublishing.com/WA/Marysville/html/Marysville22E/Marysville22E030.html
The local SEPA rules require traffic impact analysis for developments, focusing on the safety and functionality of transportation systems.

Marysville Stormwater Code (6.20)
https://www.codepublishing.com/CA/Marysville/#!/MarysvilleCA06/MarysvilleCA0620.html
Managing stormwater runoff is essential to maintaining safe road conditions, as poorly managed runoff can lead to unsafe driving conditions.

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Thank you for this email.

I believe there are many reasons that this project needs to be on hold **until multiple Safety issues are resolved**. If the following issues cannot be resolved to protect the current residents, the development needs to be reduced or denied.

1. Fire Department and Emergency Services access -- currently problematic
2. Street Access - Dead End Road
3. City Water Capacity,
4. Well Water Quality & Contamination Risk
5. City Sewer extension and capacity

Fire Department and Emergency Services access
Multiple times each day 88th Street has all lanes full of vehicles for an extended period of time due to the Train at 88th and State, or the huge quantity of traffic that travels that road. It is impossible for emergency vehicles to gain access to this neighborhood.

The business traffic for Chick-Fil-A, Starbucks, and other businesses in the area, which was added in 2020, have added the complexity of all lanes of 36th, the single access point, being frequently blocked with that business traffic. In addition, the proposed addition of Burger Master, businesses, and 16 apartments is additional congestion added to an already over burdened street capacity.

During the July 31, 2024 meeting regarding the development, there was a reference to the addition of multi lane traffic circles but these add minimal space. I-5 Exit 200 is frequently at a stand still for a half mile of I-5. Those cars could easily pack all lanes of the circles. Any road capacity changes need to happen prior to adding additional traffic.

Street Access - Dead End Road
Replacing 5 homes, down a **one and one half mile long dead end road**,

with 59 homes is a 34% increase in the number of homes which already have safety issues. This seems unreasonable without the addition of at least one external access road. I don't believe this complies with the intent of the residential access laws mentioned during the July 31, 2024 meeting regarding the requirement for two or more exits from neighborhoods. The current long narrow access road runs parallel to the I-5 Right of way and weaves through the neighborhood.

The proposed subdivision shows two exits, however, both exits go onto the same dead end road, the roads show different street names, however, it's logically all one long road.

If you look at the street map of the area, you will see that turning from 88th onto 36th between 7-11 and Chick-Fil-A, the road becomes a long dead end road. There are multiple street names as the road weaves through the older large isolated residential area. The turns are 36th, left on 90th, right on 35th; which runs parallel to I-5; right on 98th, left on 39th, left on 100th, 100th ends in a Cul-de-sac near I-5 Right of Way. There is a side street onto 35th which also ends in a cul de sac. The number of homes that currently rely on this single access point is about 170, all relying on one way in and out, complicated by multiple businesses at the single entrance/exit point of 88th and 36th.

The permit plan says there are two exits from the proposed neighborhood, however, even though the neighborhood exits are onto two different street names they both exit to the same long dead end road.

City Water
Does the current City Water system have the capacity to provide good water pressure, since many of the current homes have wells the system may be overwhelmed. It could potentially need to serve a 100% growth in number of home served.

Well Water Quality & Contamination Risk
A majority of the homes in the area are not on City Water or Sewer. It's essential to protect the existing homes, this new subdivision will put the existing homes at risk. The average city dweller has no knowledge about protecting the ground water quality since they totally rely on the City Water system.

The addition of 59 homes and over 120 cars; based on average vehicles per household; will result in lots of contaminants, which will pollute the well water. Many of the things we see as normal daily tasks result in contaminants being introduced into the ground water; washing a car or other outside items, chemicals used for lawns and gardens, treating for pests, things that leak onto the ground from vehicles and much more.

City Sewer Capacity and Construction Plan

The plan is to extend the city sewer system which runs the length of 35th. This work will also cause traffic and safety problems since the work will need to be completed under the road that is the single access point for the neighborhood. What is the plan to be sure people can traverse the full 1.5 miles while this work is being performed? It's very likely the emergency response time will be impacted during the work. The statement was just one week to perform the work. That seems barely enough time to get the work started, much less completed.

Will this dump into the sewer collection point behind Haggen, does that collection point have the capacity to handle the increase, a majority of the 170 homes that will remain have septic tanks, it's very likely a 100% increase in sewage that will need to be handled.

Thank you very much for addressing these concerns. I look forward to your response.

NOTICE OF APPLICATION

File Number: PA24-024

Project Title: Stevens PRD

Applicant: KB Home

Project Contact: Neil Latta, Latta Engineering

5970 Birch Point Rd, Blaine, WA 98230

Project Location: 9815/9909/9907/9921 35th Ave NE

3705/3625/3609 98th St NE

APN: 30051600301400, 30051600301500, 30051600301600, 30051600304500

30051600304501, 30051600305800, 30051600306500, 30051600306600

Date of Completeness: August 29, 2024

NOTICE IS HEREBY GIVEN THAT AN APPLICATION WAS MADE FOR THE FOLLOWING PROPOSAL:

The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.

Existing Environmental Documents: SEPA Environmental Checklist; Traffic Impact Analysis; Geotechnical Report; Critical Area Report; Tree Retention Plan; Preliminary Drainage Report

Public Hearing: An Open Public Record Decision Hearing is required for this application; a subsequent Notice of Hearing will be published at a later date.

Public Comment Period: Written comments must be submitted to the contact person listed below by

5:00 PM on September 24, 2024.

Document Availability: **http://docs.marysvillewa.gov/htcomnet/public/?folder=7607ade1**

ANY PERSON HAS THE RIGHT TO RECEIVE NOTICE, PARTICIPATE IN ANY HEARINGS, REQUEST A COPY OF THE FINAL DECISION AND APPEAL THE DECISION AS PROVIDED BY LAW.

For project information or to become a party of record, please contact:

How are we doing? Please take our survey and let us know!

MFD response times would be similar to our current response times (fire trucks and aid cars). The plans were reviewed based on current adopted standards. All response vary based on availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.

All of the new buildings will be equipped with fire sprinklers. The fire department is willing to provide neighborhood fire safety talks to raise the awareness of fire safety practices for all residents.

The fire district will continue to provide service at a high level to the neighborhood.

If residents would like more information on retrofitting their homes with fire sprinklers using a well we can provide that as well. This is an option for those who would like to add additional safety in their homes. A good website for residential fire sprinklers is www.homefiresprinkler.org or they can contact Fire Marshal Tom Maloney 360-363-8506.

Marysville, WA 98270

Re: Technical Review #1 Comments (PA24-024)
Stevens PRD, 98th Street NE, Marysville, WA

Dear Ms. Morgan,

Latta Engineering, PLLC has prepared this letter to summarize project design revisions in accordance with your City staff technical review comments letter dated Sept 25, 2024.

Subdivision/PRD Comments (Ms. Emily Morgan - Senior Planner)

1. Include File Number PA24-024 on all future correspondence, in addition to all site, civil and landscape plans:
   - File Number PA24-024 is now included on all civil and landscape plans as noted.
2. Given the large public interest in the project, with one of the major concerns relating to groundwater contamination of existing on-site wells, please provide an analysis that would address how this concern would be mitigated and/or prevented:
   - The project design proposes to mitigate stormwater runoff utilizing standard Best Management Practices (BMPs) in accordance with the following requirements:
     - MMC 14.15 (Controlling Storm Water Runoff from New Development, Redevelopment and Construction Sites),
     - State Dept of Ecology's 2019 Stormwater Management Manual for Western Washington (2019 SWMM), and
     - City of Marysville Engineering Design and Development Standards (EDDS)
   - This project will result in greater than 5,000 sf of new impervious surface area therefore the project shall comply with all 9 Minimum Requirements outlined in the 2019 SWMM. **Minimum Requirement #2 (Construction Stormwater Pollution Prevention), Minimum Requirement #3 (Source Control of Pollution) and Minimum Requirement #6 (Runoff Treatment) are most applicable to the public's concerns pertaining to potential groundwater contamination**.
   - A full Construction Stormwater Pollution Prevention plan will be prepared for the project addressing all 13 elements to fully satisfy **Minimum Requirement #2** in accordance with the 2019 SMWW.
   - Appropriate source control BMPs shall be applied to the project to fully satisfy **Minimum Requirement #3** in accordance with the 2019 SMWW. The intent of source control BMPs is to prevent stormwater from coming in contact with pollutants. Proposed source control BMPs will include Operational BMPs and Structural Source Control BMPs. These BMPs will be detailed and shown the stormwater site plan and civil construction plans for City review and approval.

- Runoff Treatment (**Minimum Requirement #6**) is required to reduce pollutant loads and concentrations in stormwater run-off using physical, biological, and chemical removal mechanisms so that beneficial uses of receiving waters are maintained. Single family residential subdivision projects are required to meet the Basic Treatment Performance Goal per the 2019 SWMM.
- Please note that the storm water site plan design proposed for the Stevens PRD exceeds the Basic Treatment Performance Goal. When site conditions are feasible, storm water infiltration can potentially be the most effective BMP for Runoff Treatment. Moreover, due to the hydrologic benefits of infiltration, the State Dept of Ecology recommends providing runoff treatment by infiltrating into the site's native soils when site conditions are feasible to do so.
- As stated above, the storm water runoff management design proposed herein for the project exceeds the Basic Treatment Performance Goal (i.e. full infiltration design meets the Phosphorus Treatment, Enhanced Treatment, and Basic Treatment Performance Goals).
- Potential adverse impact on ground water quality was evaluated in the storm water design process (site characterization evaluation and site suitability criteria considerations). A geotechnical investigation was completed by Earth Solution NW, LLC that evaluated the suitability of the site for infiltration, established the infiltration rate for design, depth to seasonal high groundwater table and other geotechnical information needed to design and assess constructability of the infiltration BMP.
- To protect ground water quality, the final infiltration BMP design will include the following to comply with and exceed the 2019 SWMM requirements:
    - Perform geotechnical wet season groundwater monitoring program (by Earth Solution NW, LLC) to verify seasonal high water table depth and determine if ground water mounding analysis is required. Four groundwater monitoring wells have already been installed on the site for groundwater monitoring throughout the 2024–2025 wet season (October 2024 to April 2025).
    - Perform hydrogeologic site review and design memorandum by professional Hydrogeologist (The Riley Group, Inc) to supplement the stormwater design and address neighbor concerns pertaining to proposed stormwater infiltration BMPs in vicinity of existing wells surrounding our project site.
    - Design and construct stormwater management BMPs for the project that exceeds the Basic Treatment Performance Goal required for this project (design shall meet the Phosphorus Treatment and Enhanced Treatment Performance Goals)
    - Install pre-treatment BMPs (hydrodynamic separator or filter cartage vault) prior to infiltration facilities to remove oil and influent suspended solids (to reduce potential plugging of the soils).
    - Construct infiltration gallery BMPs with imported underlying amended soils to ensure soil suitability for water quality treatment (i.e. soil with sufficient organic content and sorption capacity to remove pollutants).
    - Develop an Operation and Maintenance Plan for the stormwater system that includes provisions for regular and perpetual maintenance of the infiltration BMPs, including replacement and/or reconstruction of any media relied upon for Runoff Treatment purposes.

3. On page C-1, the total number of lots proposed (see under #3 of Lot Density and Residential Density Incentives Summary) is 49; please revise accordingly.

   - Number of lots corrected as noted.

4. To be eligible for RDI credits, the proposed benefit incentive must go above what is required per code. Per MMC 22G.080.100, 35% of required area of open space must be in active recreation. Therefore, 0.574 acres must be for active open space. Any area in excess of that total may be used towards RDI benefits. Active open space area to be dedicated for RDI 6(a) must not be double counted. Meaning open space area that is required per the PRD standards of MMC 22G.080.100 (in this case 0.574 acres) may not be used to achieve bonus density. Please revise the open space and RDI calculations accordingly.

   - **RDI 6.a**: Calculations revised as noted as is summarized on Civil Sheet C-1. The minimum active open space for the project (0.574 Ac) has been subtracted from Tract 999 area (1.239 Ac) to apply the Dual Use Storm Detention RDI calculation as follows:
     - [Tract 999 Area – Min. Open Space Area] x 5 = RDI 6a Credit
       [1.239 Ac – 0.574 Ac] x 5 Bonus Units per Ac = **3.32 RDI Bonus Units**
   - **RDI 6.b**: Dual Use Storm Detention (Tract 998) provides 2 bonus units per acre of storm water facility tracts used for passive recreation as follows:
     - Tract 998 Area x 2 = RDI 6b Credit
       0.287 Ac x 2 Bonus Units per Ac = **0.57 RDI Bonus Units**
   - **RDI 7.c**: Project Design - Perimeter Fencing with landscaping provides 1 bonus unit per 500 LF of PRD perimeter fencing as follows:
     - Length of Fence / 500 = RDI 7c Credit
       2,978 LF / 500 = **5.96 RDI Bonus Units**
   - Please note that RDI 7.f credit for enhanced entry landscaping has been deleted (i.e. no longer proposing this as an RDI credit).

5. Per the RDI benefits outlined in the preliminary civil plans, sections of perimeter fencing is proposed. Please clearly demonstrate where this fencing is proposed along with the details of the proposed fencing:

   - Perimeter fencing locations and extents are shown and called on revised civil Sheet C-5.
   - Fencing details are provided on the revised landscape plans.

5.1 Per MMC 22G.090.580, a 6 ft. sight obscuring fence shall be required if: during grading plan review, the existing grade will be increased by a 2 ft. or greater vertical grade change and the grade increase causes the new lots to be at a higher elevation than the abutting property. Therefore, in areas that are required to be fenced pursuant to the above, those sections of perimeter fencing would not be eligible for RDI as previously mentioned.

   - Comment noted. Proposed site grading design shall match adjacent surrounding properties as noted.

Critical Area Comments

6. Staff has reviewed and concurs with the findings that the site does not contain critical areas per the Wetland and Fish and Wildlife Habitat Assessment, prepared by Soundview Consultants, LLC, dated June 20, 2024.

    - Comment noted.

Landscape Plan Comments

Prior to civil construction plan approval, a detailed landscape plan depicting all the applicable elements outlined in MMC 22C.120 and 22C.070.210 shall be approved. Based on a cursory review of the proposed landscaping plan, staff has the following comments:

7. The provided landscape plan does not include the required elements of MMC 22C.120.030(2), specifically:

7.1 As mentioned above in #5, please depict all proposed perimeter fencing and include the fencing details/specs.

- Perimeter fencing locations and details are provided on the revised preliminary landscape plans. Detailed landscape plans, specifications and details shall be provided with the future civil construction plan set and land disturbance permit submittals.

7.2 All landscaped areas shall be provided with an irrigation system or a readily available water supply with at least one outlet located within 50 feet of all plant material. Please provide an irrigation plan.

- Comment noted. Detailed irrigation plans, specifications and details shall be provided with the future civil construction plan set and land disturbance permit submittals.

7.3 The common and scientific names of all plant materials used, along with their size at time of planting.

- Comment noted. Plant material specifications and details shall be provided with the future civil construction plan set and land disturbance permit submittals.

7.4 Existing trees and other natural and unique features shall be preserved wherever possible. The location of these features must be considered when planning the open space, location of buildings, underground services, walks, paved areas, playgrounds, parking areas, and finished grade levels.

- Comment noted. The Tree Conservation Plan prepared by Soundview Consultants LLC dated August 28, 2024 was completed to assess the size and condition of significant trees present on the subject property. The PRD civil grading plan will not significantly alter the existing site (landform grading). Tree retention considerations shall be completed in accordance with MMC 22G.090.570. When and where it is not feasible to retain healthy significant trees, the trees shall be replaced onsite within a proposed planting plan, an alternative site plan, or by payment into the City's tree fund per MMC 22G.090.570 (2)(d).
- Per the Soundview Tree Conservation Plan, 97 of the perimeter trees have been assessed as having the highest potential for retention, with the majority situated along the northern property boundary. Soundview's Tree Retention Map and removal analysis plan has been reviewed by the project's Landscape Design Consultant (Cascade Design Group). The retention of the perimeter trees however will be determined on a case-by-case basis during construction by the project's Certified Arborist, taking into account several key factors. Future civil construction plans for site clearing and

land disturbance shall detail clearing limits to preserve these trees. All trees being retained shall have tree protection fencing installed at the extent of their driplines or their critical root zones (CRZ). Tree protection fencing shall consist of high visibility mesh fencing that will be installed prior to the commencement of site work. No traffic or materials shall enter the tree protection zone.

- Please refer to the revised preliminary civil grading plan (Sheet C-5) that incorporates and depicts the trees included for retention per the Tree Conservation Plan prepared by Soundview Consultants, dated August 28, 2024.

8. As proposed, the enhanced landscaped area does not appear to be compliant with the RDI provision of 7(f). The landscaping would not be considered "exceptional, outstanding, or unique design". Please provide more elements to better meet those standards.

   - Please note that RDI 7.f credit for enhanced entry landscaping has been deleted (i.e. no longer proposing this as an RDI credit).

9. Please include trees that provide shade in areas where pedestrians would be gathering (i.e. picnic tables, benches, etc.).

   - See attached revised preliminary landscape plans as noted. The future detailed landscape plans will ensure shade trees are proposed in areas where pedestrians will be gathering.

10. All open space areas that include children's play areas need to be fenced. Please provide example/details of said fencing to the details sheet of the plans.

    - See attached revised preliminary landscape plans as noted.

11. The details page on L5 appears to have some errors or are providing wrong images; see the "Active Open Space West" and the "Playground" details.

    - See attached revised preliminary landscape plans as noted.

12. Location of precast vault lids need to be shown as well as proposed access to said lids:

    - Future detailed civil construction plans need to be completed in order to identify all proposed vault access lid and cover location. Detailed landscape plans will show all access lid locations as noted.

Civil Review Comments (Kacey Simon, Civil Plan Reviewer)

1. Existing utilities:

   a) Sanitary sewer: The nearest sewer is a 10" PVC main located south at the intersection of 35th Ave NE and 94th PL NE which is about 1500 feet away.

      - Comment noted. This is the sewer connection point for extension to our site.

   b) Water: There currently is an 18" ductile iron water main located along the west side of the property that can be found on record drawing W745.

      - Comment noted.

   c) Storm: There is not any storm infrastructure in this area.

- Comment noted. Stormwater management will be based on infiltration BMPs in accordance with City development standards.

2. Per MMC 14.03.250, utilities are to be extended along the street frontages of the proposed project.
   a) Sewer, water and storm will need to be extended along all property frontage on both sides. Please note that manholes shall be provided at a maximum of 400' intervals for 8" – 15" sewer mains and the minimum slope for 8" sewer main is 0.40% and for 10" sewer main is 0.28.
      - Comment noted. Revised civil plans propose utilities along the project frontage as noted.
3. Frontage improvements are required per MMC 12.02A.090 on all projects. Frontage improvements are described as curbs, gutters, and sidewalks; underground storm drainage facilities; patching the street from its preexisting edge to the new curb line; and overlayment of the existing public street to its centerline.
   a) 98th St NE is classified as a local access street and is to be built compliant with SP 3-202-002 of the EDDS with half street improvements along the project frontage.
      - Comment noted.
   b) 35th Ave NE shall be built compliant with SP 3-218-002. We originally thought there was only 26' so we asked for two – ten foot travel lanes and a sidewalk adjacent to the north bound traffic lane. Since it appears we have 30', we would like to keep two – ten foot travel lanes with a 5' landscape strip and 5' sidewalk.
      - The proposed typical section on civil sheet C-6 reflects the revised road section per our recent conference call with City staff as follows:
        - Two 10 ft travel lanes
        - Sidewalk on east side only (6 ft width) located adjacent to the curb (no landscape strip)
        - Street trees to be located behind the sidewalk adjacent to the east ROW property line.
4. Access:
   a) The new roads shall be constructed to SP 3-218-001.
      - Comment noted.
   b) Auto courts are permitted in a PRD. The auto court is to be built per the private road profile, SP3-202-004, with decorative concrete or stamped asphalt. They shall not exceed 150' in length or come off a cul-de-sac and shall serve a maximum of 6 lots.
      - Comment noted.
   c) Elbow intersections per SP 3-209-002 are allowable on local access streets only and are subject to intersection spacing requirements established under section 3-209 of the EDDS.
      - Comment noted.
   d) The minimum width of a residential driveway is 12', and the maximum is 26'. Curb cuts shall be limited to a 20' maximum.
      - Comment noted.

5. Drainage: All projects in the city of Marysville must comply with requirements stipulated under the MMC 14.15.040 and 14.15.050.

   a) Stormwater drainage: The city has adopted the 2019 Ecology Manual. Projects above the 2,000 square feet and/ or 5,000 square feet threshold must comply with requirements stipulated in Volume I of the Stormwater Management Manual for Western Washington.

      - Comment noted.

   b) It looks like infiltration is being proposed and there appears to be at least 5' of separation to the seasonal high-water table, a mounding analysis will be required if there is less than 5' of separation. The mounding analysis shall be performed during the wet season.

      - Comment noted.

   c) The maximum allowed impervious surface coverage for the Zoning designation is 70%.

      - Comment noted.

6. Survey control datum NAVD-88 and NAD-83 are required to be used. Civil construction plans will not be accepted in any other datum.

   - Comment noted.

7. Fire flow will need to be completed prior to 1st civil plan review and submitted with 1st civil plan review. Contact Ryan Keefe at 360-363-8168 to schedule.

   - Fire flow test has already been completed (see attached City memo from Ryan Keefe).

8. Trench restoration is to be completed in accordance with section 3-703 of the EDDS. A full lane or full street overlay may be required.

   - Comment noted.

9. The onsite grading and placement of any retaining walls must be compliant with section 22D.050.030 of the MMC.

   - Comment noted.

10. The applicant is responsible for identifying any existing well or septic systems on site or on adjacent properties. If there are any existing septic systems on site, they need to be decommissioned based on the Snohomish Health District standards. If there are any wells on site, they need to be decommissioned based on Department of Ecology standards.

    - Comment noted.

11. Please refer to MMC 22G.030.020 for applicable plan review and construction inspection fees.

    - Comment noted.

12. All civil construction plan submittals are to be uploaded directly to our online portal...

    - Comment noted.

13. Please be advised these comments are in reference to specific items and do not imply a full review of the proposed application. Additional comments which may change the design requirements will be provided during the civil construction plan review process.

    - Comment noted.

Traffic Comments (Mr. Danny Hagen – Associate Traffic Engineer)

1. The traffic impact analysis performed in Exhibit–011 of 54 new PM peak-hour trips is accepted with a mitigation fee of $340,200.
   - Comment noted.

2. The Snohomish County Traffic Mitigation Offer document in Exhibit-012 is accepted and a filled copy is attached
   - Comment noted.

3. Driveways accessing public streets shall not be aligned with driveways on the opposite side but instead shall be staggered to enable parking and emergency vehicle access without parking restrictions. Driveway access locations should be reconsidered for lots accessing Road C, Road A west of Road B, and Road B south of Road C.
   - Comment and requirement noted. Driveways location within the PRD have been staggered to the extent feasible considering intersection setbacks, sight distance, civil utility lot services, and dry utility lot services.

4. Although not required for land use approval, the following comments are provided to guide later civil construction plan approval. No response is required at this time.
   a) Street Lights are required along on-site roadways and any constructed frontage improvements.
      - Comments and requirements noted.
   b) A sight-distance analysis will be required at all new roadway intersections. See EDDS Std. Plans 3-212-001 & 002 for further guidance improvements.
      - Comments and requirements noted.
   c) A signing and marking plan shall be required as part of civil construction plans.
      - Comments and requirements noted.

Fire District Comments (Mr. Brian Merkley, Deputy Fire Marshal)

1. General Information:
   a) The project shall comply with current fire code requirements (2021 IFC) including WA State and local City of Marysville amendments to the fire code, city design standards, and all applicable NFPA standards, including IFC Chapter 33 and NFPA 241 construction codes.
      - Requirement noted.
   b) Fire marshal approval of fire access and fire hydrant/water supply systems is required as part of the civil construction plan review and approval process.
      - Comment noted.

2. Water Related:

a) All homes will require fire sprinklers per MMC 9.04.503.1.5 Exception 1. Due to single point of access at 36th Ave NE, fire sprinklers will be required, has been noted on plans.

   - Requirement noted.

b) It is the developer's responsibility to see that adequate water for fire protection is attainable. The minimum required fire flow is determined using IFC Appendix B, and depends upon building sizes, construction types, and sprinkler systems. Proof of fire flow will be required. No fire flow information provided at this time, please provide.

   - Fire flow test has already been completed (see attached City memo from Ryan Keefe).

c) The buildings will require residential fire sprinkler system installations. Be clear when plans are submitted to show if these will be IRC townhomes, or IBC apartments (sprinklers and construction differ). The buildings will require NFPA 13D fire sprinkler systems in each unit (for townhomes), or NFPA 13R fire sprinkler systems in each building (for apartment).

   - Requirement noted.

d) Provide water main extensions with hydrants along the new roadways and at all road intersections in approved locations, with maximum spacing of 600' apart. Hydrants shown appear acceptable.

   - Requirement noted.

e) Fire hydrants shall comply with city Water Design Standard 2-060 Hydrants, including 5" Storz fittings, with blue reflective hydrant markers to be provided in the roadways, located four inches off the centerline on the hydrant side of the road.

   - Requirement noted.

f) Fire hydrants with approved water supply must be in service prior to building construction.

   - Requirement noted.

g) Where residential fire sprinklers may be required the developer should install a water service per Standard Plan 2-090-001 Full ¾" x 1" Meter Service. Under this plan a 1" tap is made at the water main and 1" piping is run to the 1" meter setter. If in the end a ¾" water meter will suffice then all that is required is to install two reducer bushings with the ¾" water meter. A single service tap should be used where sprinklers are required, not a double service installation.

   - Requirement noted.

3. Access Related:

a) Turnaround provision is required for dead-end access in excess of 150 feet long. Turnarounds shall comply with city standard plans. (MMC 9.04.503.2.5). Turnaround shown on plans appear adequate, 80' cul de sac.

   - Requirement noted.

b) "Where the vertical distance between the grade plane and the highest roof surface exceeds 30 feet (9144 mm), approved aerial fire apparatus access roads shall be provided. For purposes of this section, the highest roof surface shall be determined by measurement to the eave of a pitched roof, the intersection of the roof to the exterior wall, or the top of parapet walls, whichever is greater." (2018 IFC D.105.1). Building heights are not known at this time, disregard if under 30'.

   - Requirement noted.

c) An adequate access route for fire apparatus must be in service prior to any building construction.

- Requirement noted.

d) Access for firefighting operations along all sides of all buildings is required. A minimum 5' wide access is required for MF dwellings. All parts of building exteriors should be accessible for firefighting by an approved route around the building, and be within 150 feet of a minimum 20' wide fire apparatus access.

- Requirement noted.

e) "NO PARKING - FIRE LANE" signs are required on both sides of all roads that are 26 feet wide or less, and one side of roads 26 to 32 feet wide. The signage shall be identified on the approved Civil Plans. (MMC 9.04.101, 2018 IFC Appendix D103.6.1).

- Requirement noted.

f) The city address committee will determine road names and address numbers for the lots.

- Comment noted.

Police Dept. Comments (Mr. Erik Scairpon - Police Chief, City of Marysville)

All police dept. report on incidents located within the project neighborhood accessed by 35th Ave NE is noted.

Utility Fees Memo (Mr. Ryan Carney, Development Services Technician)

All information about Utility Capital Improvement Fees, Recovery (Latecomer) Fees, Utility Main Fees and ULID/LID Fees are noted.

Public Works Comments (Mr. Brian McDaniel, Water Utility Supervisor)

1. Move water meters for lots 10 and 11 to other sides of lots. Currently service lines are shown tapped on gate valves.
   - Water services and tap location revised and noted. Refer to civil Sheet C-5.
2. Water main tie in to 18" water main needs to be a live tap.
   - Requirement noted.
3. Water details not shown.
   - Water main detail design, specifications and details will be provided with the future civil construction drawings.

Public Works Comments (Mr. David Jackson, NPDES Coordinator)

1. For residential projects triggering minimum requirements #6 Runoff Treatment and #7 Flow Control, the stormwater facility lot will be dedicated to the HOA. This policy may be modified depending on facility design. The City will receive an easement to inspect the facility, and, if needed, repair and maintain the facility in an emergency.
   - Requirement noted.

2. The City has adopted the 2019 Stormwater Management Manual for Western Washington (UIC rules apply to infiltration trenches, see Volume I chapter 4 UIC Program. Contact the Department of Ecology for permitting information).
    - Requirement noted.

3. Infiltration BMPs require pre-treatment. Appropriate options for treatment can be found in the Stormwater Management Manual for Western Washington 2019.
    - Requirement noted.

4. Stormwater Covenant and Easement
    - Requirement noted.

Public Works Comments (Ms. Krista Gessner, Cross Connection Specialist)

1. Plumbing system is subject to applicable requirements of MMC Chapter 14.10 "Water Supply Cross-Connections" and WAC 246-290-490.
    - Requirement noted.
2. If any wells are on site, they must be either decommissioned by a certified well driller, or a DCVA is required to be installed behind each water meter.
    - Requirement noted.
3. A Reduced Pressure Backflow Assembly (RPBA) is required immediately downstream of any irrigation meter and in an above ground hotbox if a chemical/fertilizer injection system is installed. If the irrigation system is not chemically injected, a DCVA is sufficient for this application. The DCVA may be installed in an in-ground meter type box or vault. In accordance with Design Standards 2-15-001.
    - Requirement noted.
4. On-site inspections are to be performed by the City of Marysville Cross Connection Control Specialist at rough-in and final. 48 hours' notice is required, prior to inspection.
    - Requirement noted.
5. Testing of all backflow prevention assemblies, by a Washington State Certified Backflow Assembly Tester, is required prior to occupancy use per MMC 14.10.120. Test report shall be forwarded to the City of Marysville Water Quality Office, prior to occupancy.
    - Requirement noted.
6. All backflow assemblies are required to be lead-free.
    - Requirement noted.

Public Works Comment (Ms. Kimberly Bourns, PLS - Engineering Technician)

1. The East-West lot lines of lots 43-50 are missing dimensions.
    - Missing lot dimensions added to plans noted. Refer to revised prelim plat civil Sheet C-4.

Community Development Comments (Mr. Michael Snook, Building Official)

All building official comments noted (actionable for civil construction design plan submittal and building permit applications).

Public Comments

Public comments submitted to the City are noted.

If you have any questions or comments regarding this letter, please contact the undersigned at (360) 671-7002.

Sincerely,

Latta Engineering, PLLC

Neil Latta, P.E.
Principal Engineer

PLAT RESTRICTION NOTES – PRD DEVELOPMENT STANDARDS

1. ACCESSORY DWELLING UNITS SHALL NOT BE PERMITTED FOR SINGLE-FAMILY DETACHED DWELLINGS.
2. EACH SINGLE-FAMILY DETACHED UNIT SHALL HAVE AT LEAST 200 SQUARE FEET OF PRIVATE OPEN SPACE SET ASIDE AS PRIVATE SPACE FOR THAT DWELLING UNIT. NO DIMENSION OF SUCH OPEN SPACE SHALL BE LESS THAN 10 FEET. THE OPEN SPACE DOES NOT NEED TO BE FENCED OR OTHERWISE SEGREGATED FROM OTHER DWELLINGS OR OPEN SPACE IN THE DEVELOPMENT UNLESS SO CONDITIONED THROUGH THE APPROVAL PROCESS.
3. PURSUANT TO MMC 22G.080.080, MODIFICATION OF DEVELOPMENT REGULATIONS, A MINIMUM OF THREE PARKING STALLS ARE REQUIRED TO BE PROVIDED FOR EACH DETACHED SINGLE-FAMILY DWELLING UNIT. TWO OF THE STALLS MUST BE ON THE SITE AND READILY AVAILABLE TO THE DWELLING UNIT. THE THIRD STALL MAY BE ON-STREET PARKING OR PROVIDED NEARBY TO THE DWELLING. COMPLIANCE FOR THESE PARKING REQUIREMENTS SHALL BE VERIFIED BASED ON REVIEW OF THE FINAL CIVIL CONSTRUCTION PLANS AND SUBMITTAL OF THE BUILDER'S HOUSE PLANS AT THE TIME OF BUILDING PERMIT SUBMITTAL.
4. NO DIRECT ACCESS IS PERMITTED FROM LOTS WITHIN THE SUBDIVISION ONTO 98th STREET NE.
5. PURSUANT TO MMC 22G.080.070, AT LEAST 25% OF THE DWELLING ON LOTS LESS THAN 5,000 SF MUST HAVE VEHICLE ACCESS POINTS VIA SHARED OR SINGLE-CAR-WIDTH DRIVEWAY, ALLEY, AUTO COURT, OR OTHER METHOD OF ACCESSING DWELLINGS OTHER THAN DIRECT STREET ACCESS:
   – ALL 59 PROPOSED LOTS ARE GREATER THAN 5,000 SF (NOT APPLICABLE).
6. ANY LOT UNDER 5,000 SF MUST DEMONSTRATE COMPLIANCE WITH MMC 22C.010.310, SMALL LOT SINGLE FAMILY DEVELOPMENT STANDARDS, PRIOR TO BUILDING PERMIT ISSUANCE.
7. PURSUANT TO MMC 22G.080.050(2)(C), DESIGN OF THE PROPOSED DEVELOPMENT ACHIEVES THE FOLLOWING RESULTS:
   – (iv) LANDSCAPING, BUFFERING, OR SCREENING IN OR AROUND THE PROPOSED PRD
   – (vii) INCORPORATING ENERGY-EFFICIENT SITE DESIGN OR BUILDING FEATURES
8. PER MARYSVILLE FIRE DISTRICT REVIEW, FIRE SPRINKLERS ARE REQUIRED FOR ALL HOMES DUE TO THE SINGLE ACCESS POINT VIA 35 AVE NE.

ZONING AND LAND USE SUMMARY

ZONING:	R-4.5
PROPOSED LAND USE:	MEDIUM DENSITY SINGLE FAMILY RESIDENTIAL
PROPOSED DENSITY:	59 LOTS
PHASING:	1 PHASE
HOUSING MIX RATIO WITHIN 300 FT:	100% SINGLE FAMILY DETACHED
MIN. LOT AREA ALLOWED:	3,500 SF
MIN. LOT WIDTH ALLOWED:	30 FT
MAX. BUILDING HEIGHT ALLOWED:	35 FT
MAX. IMPERVIOUS AREA ALLOWED:	70%
MIN. DRIVEWAY LENGTH:	20 FT
MAX. DRIVEWAY CUT:	20 FT
MIN. PARKING:	3 STALLS PER EACH SINGLE FAMILY DWELLING

BUILDING SETBACKS

STREET:	10 FT*	*NOTE:
GARAGE:	20 FT	PORCHES MAY EXTEND AS CLOSE AS 7 FT FROM THE
SIDE:	5 FT	STREET, SIDEWALK, RIGHT-OF-WAY OR PUBLIC /
REAR:	10 FT	COMMUNITY IMPROVEMENTS.

SPECIAL DISTRICTS AND UTILITY PROVIDERS

SCHOOL:	MARYSVILLE SCHOOL DISTRICT 25
FIRE:	MARYSVILLE FIRE DISTRICT RFA
SEWER:	CITY OF MARYSVILLE
WATER:	CITY OF MARYSVILLE
POWER:	SNOHOMISH COUNTY PUD
CABLE:	VERIZON
GARBAGE:	WASTE MANAGEMENT NW

LOT DENSITY AND RESIDENTIAL DENSITY INCENTIVES SUMMARY

1. NET PROJECT AREA (PER MMC 22A.020.150)

GROSS SUBJECT PROPERTY AREA (R-4.5 ZONE):	595,713 SF	13.676 Ac
LESS FLAT 20% REDUCTON PER MMC 22A.020.150 (R-6.5 ZONE):	(119,143 SF)	(2.735 Ac)
NET PROJECT AREA (FOR DENSITY CALCULATIONS):	476,570 SF	10.941 Ac

2. LOT DENSITY CALCULATION (PER MMC 22C.010.080)

BASE DENSITY (4.5 DWELLING UNITS PER AC): (13.676 Ac – 2.735 Ac) x 4.5 DU/Ac = 49.2 (49)
MAX. BONUS DENSITY (20% PRD INCREASE): BASE DENSITY (49) x 0.20 = 9.8 (10) *
MAX. ALLOWABLE DENSITY: 49.2 + 9.8 = 59.0 (59 DU)
*BONUS DENSITY ACHIEVED VIA APPLICATION OF RESIDENTIAL DENSITY INCENTIVES (RDI'S).

PROPOSED PROJECT PRD DENSITY: BASE DENSITY (49.2) + BONUS (9.8) = 59 LOTS **

** NOTE:
REQUIRE 9.8 RDI BONUS UNITS TO ACHIEVE PROPOSED 59 LOT PRD DENSITY.
RDI UNITS PROPOSED = 9.85 (10)

3. LOT PROPOSAL SUMMARY

TOTAL NUMBER OF SINGLE FAMILY LOTS PROPOSED:	59 LOTS
AVERAGE LOT SIZE:	6,776 SF
SMALLEST LOT SIZE:	5,000 SF
LARGEST LOT SIZE:	10,314 SF

4. PROPOSED RESIDENTIAL DENSITY INCENTIVES (PER MMC 22C.090)

RDI BENEFIT DESCRIPTION	RDI BONUS UNITS
(6a) DUAL USE STORM DETENTION TRACT 5 BONUS UNITS PER ACRE OF STORM WATER FACILITY TRACT USED FOR ACTIVE RECREATION (TRACT 999 AREA LESS MIN. 35% ACTIVE OPEN SPACE) (1.239 Ac – 0.574 Ac) x 5 = 3.32 UNITS	3.32
(6b) DUAL USE STORM DETENTION TRACT 2 BONUS UNITS PER ACRE OF STORM WATER FACILITY TRACT USED FOR PASSIVE RECREATION (TRACT 998 AREA) (0.287 Ac x 2 = 0.57 UNITS)	0.57
(7c) PROJECT DESIGN – PERIMETER FENCING & LANDSCAPING 1 BONUS UNIT PER 500 LF OF PERIMETER FENCING WITH LANDSCAPING 2,978 LF / 500 = 5.96 UNITS	5.96
TOTAL RESIDENTIAL DENSITY INCENTIVE BONUS UNITS:	9.85

5. OPEN SPACE REQUIREMENT (PER MMC 22G.080.100)

OPEN SPACE REQUIRED:		
15% OF 10.941 Ac NET PROJECT AREA	71,486 SF	1.641 Ac
OPEN SPACE TRACTS PROPOSED:		
TRACT 999 – STORM WATER & ACTIVE OPEN SPACE***	53,984 SF	1.239 Ac
TRACT 998 – STORM WATER & PASSIVE OPEN SPACE	12,500 SF	0.287 Ac
TRACT 997 – STORM WATER & ENTRY OPEN SPACE	2,466 SF	0.057 Ac
TRACT 996 – STORM WATER & ENTRY OPEN SPACE	5,483 SF	0.126 Ac
TOTAL OPEN SPACE PROPOSED:	74,433 SF	1.709 Ac
ACTIVE OPEN SPACE SUMMARY:***		
MIN. 35% OF REQUIRED OPEN SPACE TO BE ACTIVE OPEN SPACE	25,020 SF	0.574 Ac
ACTIVE OPEN SPACE AREA PROPOSED	53,984 SF	1.239 Ac

TITLE REPORT ENCUMBRANCES: PARCEL A

TPN 300516-003-016-00

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry
   Grantor: State of Washington
   Recording No.: 1209090
   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.
2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress, egress and utilities
   Recording Date: August 17, 1962
   Recording No.: 1553273
3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution system
   Recording Date: December 27, 1962
   Recording No.: 1581756
   Affects: Portion of said premises
4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209
5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):
   Recording No: 8003100173
   Said short plat is a revision of short plat recorded under Recording No. 7810200401.
6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:
   Recording Date: July 26, 1999
   Recording No.: 199907260975
7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines and/or water lines
   Recording Date: February 12, 2001
   Recording No.: 200102120728
   Affects: Portion of said premises
8. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
   Year: 2024
   Tax Account No.: 300516-003-016-00
   Levy Code: 00511
   Assessed Value-Land: $272,800.00
   Assessed Value-Improvements: $219,700.00
   General and Special Taxes:
   Billed: $3,927.28
   Paid: $0.00
   Unpaid: $3,927.28
9. A deed of trust to secure an indebtedness in the amount shown below,
   Amount: $282,276.00
   Dated: December 7, 2020
   Trustor/Grantor: Isaac A. Steimle and Rebekah L. Steimle, who acquired title as Isaac Steimle and Rebekah Steimle, husband and wife
   Trustee: George C. Reinmiller Trustee Inc
   Beneficiary: Mortgage Electronic Registration Systems, Inc., solely as nominee for Boeing Employees' Credit Union
   Loan No.: 336148
   Recording Date: December 11, 2020
   Recording No.: 202012110574
10. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $100,000.00
    Dated: August 20, 2022
    Trustor/Grantor: Isaac Steimle and Rebekah Steimle, husband and wife
    Trustee: Trustee Services, Inc.
    Beneficiary: Boeing Employees' Credit Union
    Recording Date: August 30, 2022
    Recording No.: 202208300421
    The Deed of Trust set forth above is purported to be a "Credit Line" Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.

    Assessed Value-Land: $308,300.00
    Assessed Value-Improvements: $290,100.00
    General and Special Taxes:
    Billed: $4,769.56
    Paid: $0.00
    Unpaid: $4,769.56
    Affects: Lot 4
19. Mobile home improvements are expressly excluded.
20. It appears Bonnie Stevens is deceased. The Company finds no probate of the decedent's estate in Snohomish County County. This commitment is therefore subject to the rights of heirs and devisees, creditors (including liens under RCW 43.20B.080), liability for inheritance tax, or other matters that a probate of the estate might disclose.
    If we are requested to insure title passing outside of probate, the Company will require the following:
    a. Completed, signed and acknowledged Lack of Probate Affidavits (both the Company's internal underwriting version and the shorter version for recording).
    b. A certified copy of the Death Certificate.
    c. A copy of the Community Property Agreement, if any.
    d. A copy of the decedent's Will and codicils, if any.
    e. A Real Estate Excise Tax Affidavit executed by the inheriting party(ies), to file at the time of recording the Lack of Probate Affidavit, as required by WAC 458-61A-202(6).
    The Company reserves the right to make additional requirements upon review.
21. Any unrecorded leaseholds, right of vendors and holders of security interests on personal property installed upon the Land and rights of tenants to remove trade fixtures at the expiration of the terms.

As per the Arborist Perimeter Tree Retain/Remove Analysis Map dated August 27, 2024, a number of existing trees should be preserved. Prior to clearing activities the arborists should clearly mark all trees to be retained. Should critical root zones be affected by required grading, the arborist should be consulted for possible tree removal.

IRRIGATION KEY

	DRIP IRRIGATION (BEDS)	23,751 SQ. FT.
	4" IRRIGATION SLEEVE	

IRRIGATION NOTES

A fully automatic, drip irrigation system will be installed for all landscape beds indicated on this irrigation overview.

The system will include a rain gage for system shutdown during rain events and the required back flow preventer.

Sleeving locations are suggestions and may be adjusted as needed. Confirm with general contractor for point of connection (POC) and the location of the power supply for the controller.

Lawn areas will not have automatic irrigation to conserve water into the future. Manual irrigation to establish lawn areas may be needed depending on time of installation.

LANDSCAPE SPECIFICATIONS

this project complies with the department of ecology lid standards

PART 1 – GENERAL

1.1 WORK INCLUDED: Furnish all materials, equipment and labor necessary to complete all landscape work including lawns and seeding as shown on the drawings and as specified.

1.2 RELATED SECTIONS:

1.3 QUALITY ASSURANCE
- A. Only licensed, bonded Contractors carrying liability insurance in an amount to cover any incident that the Contractor might encounter while on the site or related activity may submit a construction bid.
- B. The Contractor shall become familiar with all conditions of the site as they pertained to the work to be performed and verify all dimensions and conditions throughout the progress of the work. Any discrepancies between items shown on the drawings and those existing on the site are to be brought to the attention of the Landscape Architect.

1.4 PROTECTION OF EXISTING CONDITIONS: Protect all existing utilities, structures, and plants from damage of any kind; any such damage must be repaired by the Contractor at no extra cost to the Owner.

1.5 FIELD QUALITY CONTROL AND INSPECTIONS
- A. Notification: The Contractor shall give 48 hours notice to the Architect when an inspection is desired.
- B. Upon completion of all planting and all other work required under this Contract, the Contractor shall request a provisional inspection (punch list).
- C. The Contractor shall request a final inspection upon satisfactory completion of all punch list items and any other work required under this Contract. Final inspection and acceptance of the work shall establish the beginning of the guarantee period.

1.5 GUARANTEE, REPLACEMENT
- A. The survival and health of all plants shall be guaranteed for 1 full year, starting the date of planting completion.
  - i. Any plants that need replacement shall be installed mid September following the 1 year period.
- B. The Contractor shall maintain all plants and lawn through final inspection date.
- C All site furnishings that are proven to be defective within the 1 year warranty period shall be replaced at the cost of the Contractor.

PART 2 – PRODUCTS

2.1 PLANT MATERIALS
- A. All plant material shall be ordered immediately following the award of Contract. Contractor is responsible for assuring that plant material installed is of specified size and quantity.
- B. All plants are to be healthy, vigorous and of normal habit of growth for the species and varieties named.
- C. Plant sizes shall be in accordance with "American Standard for Nursery Stock" as published by the American Association of Nurserymen, Inc.
- D. Planting Soil:
  - i. Planting soil shall be sandy loam topsoil, free from noxious weeds as approved by the Landscape Architect. If existing soil is primarily clay-like, 100% purchased topsoil should be used for all planting.
  - ii. All raised garden planters shall receive sandy loam topsoil or equal, able to percolate water throughout the year.
- E. Fertilizers and Soil Amendments:
  - i. General: Approved brands conforming to applicable State fertilizer laws. Uniform in composition, dry, free-flowing, delivered to the site in original, unopened containers, each bearing the manufacturer's guaranteed analysis.
- F. Fertilizer for trees, shrubs and groundcover:
  - i. Agriform Tablets: Planting tablets, 21-gram size, or equiv. 20-10-5 analysis. Apply at rate of:
    - 1. Trees: 4 tablets each
    - 2. Shrubs:2 tablets each
    - 3. Groundcover: 1 tablet each
- G. Stakes and Guys: Material as per detail on plan.
- H. Mulch: Medium bark mulch of fir or hemlock, uniform in color, free from weeds, seeds and shall not contain resin, tannin, wood fiber, salts, or other compounds detrimental to plant life.
- I. Herbicide: Treat all planting beds with a selective pre-emergent herbicide according to manufacturer's recommendations. Remove all foreign weeds by roots prior to acceptance.

2.2 TOP SOIL: Good quality sandy loam free from weeds with visible dark organic matter, with a minimum of 8" placed over 4" prepared subgrade (See Figure V-5.3.3) with a minimum of 5% organic matter content for lawn areas and 10% organic matter content in planting beds, and a pH from 6.0 to 8.0 or matching the pH of the undisturbed soil. Prepared soils must also be free of stones 1" inch or larger and other materials harmful to plant growth. The 8" topsoil requirement can be achieved several ways including preserving existing soil, removing, stockpiling and reapplying stored topsoil, or importing soils to achieve 8" depth. Please refer to BMP T5.13 In the Stormwater Management Manual for Western Washington for further details.

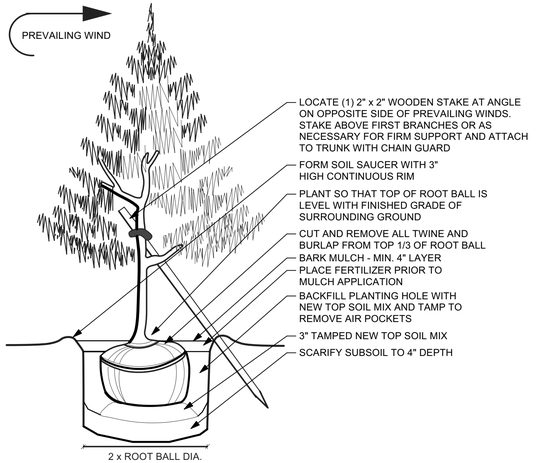
PART 3 - INSTALLATION

3.1 TREES, SHRUBS AND GROUNDCOVER PLANTING
- A. All tree holes shall be excavated to twice the diameter of the root ball, normal spread of roots, or the plant container, except that if clay or hardpan is found at the bottom of the hole, it shall be excavated an additional 18" and the bottom 12" filled with pit run gravel to provide an excess moisture sump.
- B. All shrub holes shall be excavated to twice the diameter of the root ball or plant container.
- C. Set trees, shrubs, and groundcovers in their natural growing positions and at the grade level at which they were originally grown.
- D. Backfill with planting soil mix.
- E. Plant groundcover plants at spacing indicated in straight evenly spaced rows.
- F. All planting pits shall be thoroughly soaked with water by hand while backfilling to complete fill all voids around roots.
- G. Stake all trees as shown in details on plan.
- H. Fertilizer Application:
  - i. Apply transplanter at the specified rate uniformly around the circumference of the root spread under a cover of 2" of planting mix.
  - ii. Place plant tablets on sides of planting pits prior to backfilling.
- I. Mulching:
  - i. Immediately after completion of all planting, mulch all planted areas to a minimum depth of 3" with medium bark.
  - ii. Do not allow mulch to smother trees, shrubs or groundcover trunks or stems.
- J. Clean Up: A general clean up shall be made immediately after and as part of all work done in the area.

3.2 LAWNS (HYDRO-SEEDED AND SOD)
- A. Subgrade Preparation: Rotovate all compacted subgrades as noted to promote proper drainage for plant growth. Remove debris from areas. Float or drag subgrades to produce smooth, uniform surfaces. Distribute excess soil evenly throughout areas to be seeded.
- B. Grading: Crown all planting and lawn areas at center, slope away from buildings at the rate of _" per foot. Flow grades smoothly into one another and produce positive drainage.
- C. Plant at any time when conditions are favorable for germination of seed and proper working of the soil. Calendar dates for favorable conditions are generally between April 15th and October 1st.
- D. Install 10-20-20 fertilizers at the rate of 15 lbs. per 1,000 square feet.
- E. After seeding has been completed, water all areas systematically to promote seed germination and protect new growth.
- F. Reseeding: Approximately 21 days after germination, any barren area four (4) feet in diameter or larger shall be reseeded at the specified application rate. In the event of unusual weather, overseeding may be required at a time when weather conditions are suitable for germination. Application rate for overseeding shall be determined by the Landscape Architect but shall not exceed original rate.
- G. Watering: Once germination is consistent over the field and the seedlings are averaging 1" in height, the watering schedule may be reduced to less frequent intervals. Maintain soil moisture without puddling. The soil surface can be allowed to dry between waterings at this point.
- H. Fertilizing: Fertilize all areas again six (6) weeks after seeding with Lilly Miller 18-3-6 "Royal Green Optimum Soil Supplement" at the rate of 5 lbs. per 1,000 square feet, or Par Ex 24-4-12 at the rate of 6.25 lbs. per 1,000 per square feet.
- I. Lawn Maintenance: Contractor shall be responsible for maintenance of lawn area until Final Completion. Maintenance shall begin following installation and include watering, reseeding, mowing, edging, fertilizing, repair of erosion damage and other operations necessary for proper maintenance of the Project. The Contractor shall be responsible for the first mowing of the lawn and subsequent mowings on a regular basis until Final Completion. If the Contractor fails to cut the lawn on a regular basis, the Owner will cut the lawn and backcharge the Contractor.
- J. Acceptance of Lawn: Final acceptance of hydro-seed lawn areas shall be based on a uniform stand of grass with 90% germination and 95% control of broadleaf weeds. Final acceptance of seeded lawn shall also be based on uniform, healthy, vigorous growth with no dry or dead spots in any areas. Lawn shall have been mowed a minimum of one time.
- K. Identification of Continuing Maintenance Requirements: It shall be the responsibility of the Contractor to identify any and all maturation of this project. Maintenance tasks outlined shall be submitted in writing to the Owner prior to Final Completion and shall identify special needs, time requirements, and duration of maintenance within the next one year to Owner.

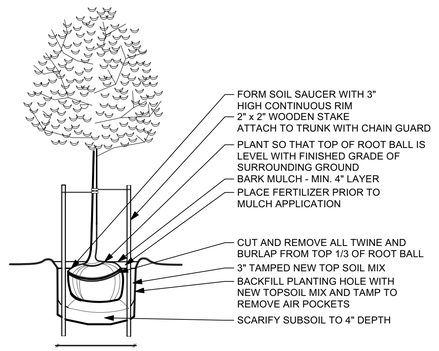
3.3 HYDROSEEDING APPLICATION: Hydraulically apply cellulose fiber mulch material with grass seed homogeneously in emulsion slurry. The equipment shall have an integral agitation system capable of mixing and maintaining materials homogeneously in solution. Hydroseed may be applied to native soil as directed.

3.4 SOD: A sun shade locally grown sod will be installed. Please contact landscape architect to approve material's source.



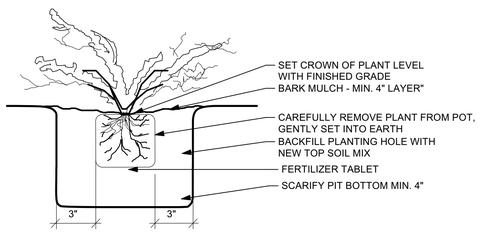
NOTES FOR CONTRACTOR

01. Cascade design group makes no verbal or implied warranties in relation to plant materials specified in these plans or on this project. The landscape installation contractor, at their discretion, will be responsible for any and all warranties regarding the specified plants.



IRRIGATION

01. If required by local code, landscape contractor to design & install fully automated irrigation system equipped with backflow regulator & rain gauge shut off that provides 100% coverage to all landscape areas.



02. The landscape irrigation contractor will provide a simple irrigation plan including location of the automatic controller, rain gauge, mainline, valves, sprinkler locations, areas that will be drip irrigated, and the specific brands of irrigation products to be installed to the landscape architect for approval. (Unless noted otherwise on plans.)

TO: Kacey Simon, Civil Plan Reviewer

FROM: Ryan Keefe, Water Operations Lead II

DATE: April 24th, 2024

SUBJECT: Stevens Marysville PRD Fire Flow Test

Water Operations has performed a fire flow test as requested for Stevens Marysville. The results were as follows:

Static:	77 psi
Residual:	75 psi
Pitot:	66 psi
GPM:	1370
GPM @ 20 psi:	8362

The test was performed using Hose Monster equipment with the GPM taken from their flow chart. The GPM @ 20 psi was determined using the hydrant flow test calculator located on the Hose Monster website.

Any questions please contact me at 360-363-8168 or rkeefe@marysvillewa.gov.

THRESHOLD DETERMINATION

Lead Agency ☒ **City of Marysville**

The lead agency has determined that this proposal does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is NOT required under RCW 43.21C.030(2)(c). This decision was made after review by the City of Marysville of a completed environmental checklist and other information on file with this agency. This information is available for public review upon request.

☐ There is no comment period for this DNS

☐ This DNS is issued after using the optional DNS process in WAC 197-11-355. There is no further comment period on this DNS.

☒ This MITIGATED DNS is issued under WAC 197-11-350; the lead agency will not act on this proposal for 14-days from the date below. Comments must be submitted by: **November 20, 2024.**

Date

ENVIRONMENTAL IMPACTS	
The proposed construction and subsequent use of the property could result in the following adverse environmental impacts:	
1.	Increase in the amount and rate of stormwater runoff and attendant pollutants from the introduction of paved and building roof surfaces.
2.	Increase in erosion, surface water pollutants, siltation and sedimentation as a result of site preparation and construction.
3.	Increase in demand for police, fire protection, parks and other public services generated as a result of the development.
4.	Increase in noise, dust, light and glare from construction activity and subsequent use of the site.
5.	Increase in vehicular traffic on 36th Ave NE, 35th Ave NE, and 98th St NE, as well as other City streets and arterials in the vicinity.
MITIGATION MEASURES	
The following mitigation measures are required to minimize the probable significant adverse environmental impacts as a result of the proposed development activity:	
1.	Prior to civil construction plan approval, the applicant shall be required to submit a FINAL Geotechnical Assessment, prepared by a Professional Engineer registered in the State of Washington. Additionally, the applicant/contractor shall be required to adhere to the recommendations of the FINAL Geotechnical Assessment. Prior to granting occupancy permits, the applicant shall provide a letter from the project engineer to verify that final project grading has been completed consistent with the approved grading plans; that all recommendations outlined in the Geotechnical Assessment and subsequent amendments have been followed; and that all fill has been properly placed.
2.	If at any time during construction archaeological resources are observed in the project area, work shall be temporarily suspended at that location and a professional archaeologist shall document and assess the discovery. The Department of Archaeology and Historic Preservation (DAHP) and all concerned tribes shall be contacted for any issues involving Native American sites. If project activities expose human remains, either in the form of burials or isolated bones or teeth, or other mortuary items, work in that area shall be stopped immediately. Local law enforcement, DAHP, and affected tribes shall be immediately contacted. No additional excavation shall be undertaken until a process has been agreed upon by these parties, and no exposed human remains should be left unattended.
3.	Prior to civil construction plan approval, all trees identified to be retained per Tree Conservation Plan, prepared by Soundview Consultants, LLC, dated August 28, 2024, shall be clearly identified on the grading plans. Prior to commencement of ground disturbing activities, all retained trees shall be protected and marked in the field.
4.	Prior to civil construction plan approval, the on-site septic systems shall be decommissioned in accordance with WAC 246-272A-0300. Documentation demonstrating that the septic systems have been decommissioned shall be submitted prior to final plat approval.
5.	Any existing on-site well(s) shall be decommissioned in accordance with WAC 173-160-381. A copy of the well(s) contractor's decommissioning report(s) shall be submitted prior to final plat approval.
6.	The applicant shall prepare and provide a geotechnical wet season groundwater monitoring report to verify seasonal high water table depth and determine if ground water mounding analysis is required. The results of said monitoring shall be provided to the City prior to recording the final plat.
7.	Prior to civil plan approval, the applicant shall complete and provide a hydrogeologic site review and design report, prepared by a professional hydrogeologist, to supplement the stormwater design and address concerns pertaining to proposed stormwater infiltration Best Management Practices (BMPs) in the vicinity of existing wells surrounding the project site.

8.	The applicant shall develop an Operation and Maintenance Plan for the stormwater system that includes provisions for regular and perpetual maintenance of the infiltration BMPs, including replacement and/or reconstruction of any media relied upon for Runoff Treatment purposes.
9.	Pursuant to MMC 22D.030.070(6)(a)(ii), the traffic concurrency determination and the project's impacts and mitigation obligations shall expire upon expiration of the subdivision. The project is subject to the traffic mitigation obligations as required by the Traffic Concurrency Recommendation (Exhibit 021), dated October 16, 2024.

APPEALS

☒ This (M)DNS may be appealed pursuant to the requirements of MMC 22E.030.180. There is a 14-day appeal period on the DNS that commences from the date the (M)DNS was issued. Any appeal must be addressed to the responsible official, accompanied by a filing fee of $500.00, and be filed in writing at the City of Marysville Community Development Department, 501 Delta Avenue, Marysville, WA 98270. The appeal must be received by 4:30 p.m., **November 20, 2024**. The appeal must contain the items set forth in MMC 22G.010.530.

☐ There is no agency appeal.

BEFORE THE HEARING EXAMINER

IN AND FOR THE CITY OF MARYSVILLE

35TH AVENUE COMMUNITY ACTION GROUP, LLC, a Washington limited liability company, Appellant, and THE CITY OF MARYSVILLE; KB HOMES LLC, Respondent.	**NO. PA24-024** **NOTICE OF APPEAL (MMC 22G.010.550)**

COMES NOW the Appellant, 35TH AVENUE COMMUNITY ACTION GROUP, LLC, by and through its attorney, William B. Foster, and submit this Notice of Appeal.

1. Decision Appealed. The Appellant hereby appeals the following decision(s): The issuance of The Mitigated Determination of Non-Significance ("MDNS") dated the 6th day of November, 2024 issued by the City of Marysville.[1].

2. The Appellant. The Appellant is:

35TH AVENUE COMMUNITY ACTION GROUP, LLC
c/o Mike Soderstrom
10117 – 35th Drive NE
Marysville, Washington 98270
Telephone: (425) 263-0080
Email: mjsody@gmail.com

Appellant's attorney:

2.1. **WILLIAM B. FOSTER, INC., P.S.**
Attn: William B. Foster
1907 Everett Avenue
Everett, Washington 98201
Telephone: (425) 776-2147

[1] Exhibit 1.

Facsimile: (425) 776-2140
Email: bfosteresq@comcast.net

3. Standing of Appellants. The Appellants are a limited liability company whose members are property owners of real property located in the vicinity of the proposed project. The Appellant is aggrieved by the decision appealed as owners of the real property that is the subject of the MDNS identified above, and is adversely affected by the issuance of the MDNS.

4. Decision Appealed. The Decision that is the subject of this Appeal is that certain MDNS issued by the City of Marysville (the "City") dated November 6, 2024, Exhibit 1 hereto.

5. Grounds for Appeal. This Appeal is based upon the following:

5.1. On the 6th day of November, 2024, the City issued a MDNS for the project identified above. The MDNS concluded that "this proposal does not have a probable significant adverse impact on the environment".

5.2. The City knew, or should have reasonably known, that the City's Decision to issue the MDNS were arbitrary, capricious, unlawful, and/or exceeded the City's lawful authority under the United States Constitution Amendment XIV regarding due process, Washington State Constitution Article 11, Section 11 regarding police powers, RCW 82.02.020, RCW 43.21C.030, 43.21C.033 and 43.21C.060, RCW 36.70B.060, Marysville Municipal Code, and common law based on the following reasons:

5.3. The City acted in an arbitrary, capricious and unlawful manner and/or exceeded the City's lawful authority, and erred in issuance of the MDNS;

5.4. The director committed an error of law or misinterpreted the applicable city regulation, ordinance or other state law or regulation;

5.5. The director's findings, conclusions and/or conditions are not supported by the record; and/or

5.6. Newly discovered evidence alleged to be material to the director's decision which could not reasonably have been produced prior to the director's decision.

6. Factual Basis of Appeal.

6.1. Standing of the Appellants. The Appellants are a group of residents owning property north of the proposed project. The Appellants will be adversely affected if the project is approved as proposed.

6.2. The Appellants only access to their respective parcels via 35th Avenue N.E., a public street. That access requires the use of the intersection of 88th Street N.E. and 36th Avenue NE. Access is further limited by the existence of train tracks located west of 88th Street N.E. and State Avenue, a public street.

6.3. The Appellants have no alternative access to their respective parcels other than stated above. This access is also the only access to the Appellants parcels for Fire, law enforcement or other similar emergency service providers.

6.4. The access afforded the Appellants under current conditions is inadequate. Often times during each day the traffic on 88th Street N.E. is severely congested and vehicles attempting to reach 36th Avenue NE are unable to do so because of the congestion. This congestion also restricts access to the Appellants properties by Fire, law enforcement or other similar emergency service providers. This traffic congestion is further impacted when a train is traveling along the train tracks that parallel State Avenue, resulting in a complete traffic stoppage between Interstate 5 (to the west) and State Avenue (to the east).

6.5. The addition of 509 additional daily trips will exacerbate the existing conditions to a point where the traffic congestion will result in a level of service ("LOS") that is below the LOS that is acceptable in the City.

6.6. Many of the Appellants' properties obtain water through private wells. The surface water that will be generated by the additional impermeable surfaces that result from 59 additional dwelling units threatens contamination of these private wells, depriving the residents of potable water.

7. Conclusion. The Appellant respectfully submits that the MDNS be withdrawn, and the Director issue a revised MDNS which includes additional mitigating

factors to address the significant impacts that will result from the approval of this land use application. In the alternative the City should withdraw the MDNS and issue a Determination of Significance.

DATED THIS 16th day of November, 2024.

William B. Foster
Attorney/Agent of Appellants

ENVIRONMENTAL IMPACTS	
The proposed construction and subsequent use of the property could result in the following adverse environmental impacts:	
1.	Increase in the amount and rate of stormwater runoff and attendant pollutants from the introduction of paved and building roof surfaces.
2.	Increase in erosion, surface water pollutants, siltation and sedimentation as a result of site preparation and construction.
3.	Increase in demand for police, fire protection, parks and other public services generated as a result of the development.
4.	Increase in noise, dust, light and glare from construction activity and subsequent use of the site.
5.	Increase in vehicular traffic on 36th Ave NE, 35th Ave NE, and 98th St NE, as well as other City streets and arterials in the vicinity.
MITIGATION MEASURES	
The following mitigation measures are required to minimize the probable significant adverse environmental impacts as a result of the proposed development activity:	
1.	Prior to civil construction plan approval, the applicant shall be required to submit a FINAL Geotechnical Assessment, prepared by a Professional Engineer registered in the State of Washington. Additionally, the applicant/contractor shall be required to adhere to the recommendations of the FINAL Geotechnical Assessment. Prior to granting occupancy permits, the applicant shall provide a letter from the project engineer to verify that final project grading has been completed consistent with the approved grading plans; that all recommendations outlined in the Geotechnical Assessment and subsequent amendments have been followed; and that all fill has been properly placed.
2.	If at any time during construction archaeological resources are observed in the project area, work shall be temporarily suspended at that location and a professional archaeologist shall document and assess the discovery. The Department of Archaeology and Historic Preservation (DAHP) and all concerned tribes shall be contacted for any issues involving Native American sites. If project activities expose human remains, either in the form of burials or isolated bones or teeth, or other mortuary items, work in that area shall be stopped immediately. Local law enforcement, DAHP, and affected tribes shall be immediately contacted. No additional excavation shall be undertaken until a process has been agreed upon by these parties, and no exposed human remains should be left unattended.
3.	Prior to civil construction plan approval, all trees identified to be retained per Tree Conservation Plan, prepared by Soundview Consultants, LLC, dated August 28, 2024, shall be clearly identified on the grading plans. Prior to commencement of ground disturbing activities, all retained trees shall be protected and marked in the field.
4.	Prior to civil construction plan approval, the on-site septic systems shall be decommissioned in accordance with WAC 246-272A-0300. Documentation demonstrating that the septic systems have been decommissioned shall be submitted prior to final plat approval.
5.	Any existing on-site well(s) shall be decommissioned in accordance with WAC 173-160-381. A copy of the well(s) contractor's decommissioning report(s) shall be submitted prior to final plat approval.
6.	The applicant shall prepare and provide a geotechnical wet season groundwater monitoring report to verify seasonal high water table depth and determine if ground water mounding analysis is required. The results of said monitoring shall be provided to the City prior to recording the final plat.
7.	Prior to civil plan approval, the applicant shall complete and provide a hydrogeologic site review and design report, prepared by a professional hydrogeologist, to supplement the stormwater design and address concerns pertaining to proposed stormwater infiltration Best Management Practices (BMPs) in the vicinity of existing wells surrounding the project site.

8.	The applicant shall develop an Operation and Maintenance Plan for the stormwater system that includes provisions for regular and perpetual maintenance of the infiltration BMPs, including replacement and/or reconstruction of any media relied upon for Runoff Treatment purposes.
9.	Pursuant to MMC 22D.030.070(6)(a)(ii), the traffic concurrency determination and the project's impacts and mitigation obligations shall expire upon expiration of the subdivision. The project is subject to the traffic mitigation obligations as required by the Traffic Concurrency Recommendation (Exhibit 021), dated October 16, 2024.

APPEALS

☒ This (M)DNS may be appealed pursuant to the requirements of MMC 22E.030.180. There is a 14-day appeal period on the DNS that commences from the date the (M)DNS was issued. Any appeal must be addressed to the responsible official, accompanied by a filing fee of $500.00, and be filed in writing at the City of Marysville Community Development Department, 501 Delta Avenue, Marysville, WA 98270. The appeal must be received by 4:30 p.m., **November 20, 2024.** The appeal must contain the items set forth in MMC 22G.010.530.

☐ There is no agency appeal.

A notice of application was posted at the end of my driveway. I live at 3625 98th ST NE #B, which is an official address with the USPS but not acknowledged in any documents associated with Notice of Pending Land Use.

It appears there is a plan to demolish my residence in the near future. This is the first time that I am learning about plans that will affect my home. I am under contract with the Gleasons and Section 8 (HUD) Housing Choice Voucher program. No notice has been given to the Everett Housing Authority, or to myself directly, that my housing is in jeopardy. I have no plans to relocate in the near future. I am disabled and on a fixed income, hence the Section 8 assistance. This home and location were chosen to accommodate my disability. I am stable here and looking forward to continued stability.

It would be appreciated if you would keep me informed regarding the proposed development that affects my home. My name is not listed on any of the plan documents even though I reside in my own home on the property in question.

Sincerely,
Ann M Beauchamp

Emily,

I had participated in a previous write in regarding the plans for the 35th Ave neighborhood as well as the developments on 88th Street nearby.

I am informed due to fire risk, new homes are required to have sprinkler systems. Existing homes gain the increased risk of greater population and traffic, while being impossible to retrofit with a sprinkler system.
Unless the city provides water services to houses on wells, there is no way a sprinkler system can work during a fire. Well pumps do not work during power outages and breakers shut off during a fire. To have the fire Marshall suggest I pay for a retrofit that won't even function during a fire concerns me that the profit motive for approving developments has overrun our right to safety. It does not appear to me that the previous emails were responded to beyond a generic AI generated response sent to each of us.

I have been separated from family in the past when storms block the neighborhood and increasing the number of households will just increase the impact. I have seen emergency services unable to access the neighborhood more than 2 days after a wind event. To bypass existing neighborhood designs to increase density will increase the cities exposure to liability and and decrease quality of life for all current taxpayers in the area. The developer is able to make a healthy profit even if they put 1 house per acre due to the low costs of obtaining the land from my neighbor Adrian Stevens. The only reason to add extra homes is greed and discounting the quality of life previously known by Residents of 35th Avenue houses.

I am also concerned regarding 88th and 36th that the cumulative impact of all future projects has intentionally not been not calculated in order to approve as many things as possible before the effects of soon to fail roundabouts are felt. People will soon be trapped in the roundabouts when the trains come, and the trains will be coming more and more each year according to future freight plans. Traffic lights prevent people from blocking intersections and that safety allows our neighborhood and the neighborhood south of 88th to exit west even if eastbound flow is blocked which is often is.
To add even one more house beyond current neighborhood standards is irresponsible and disrespectful to the life of current residents. Just because someone is helping pay for something does not mean our families will be safe or respected.

I include pictures proving the city is unable to provide services as things already are during wind storms. Tear up the street and provide water and sewer before disrupting our lives and lowering our property values. I will no longer be able to trust the water my family drinks when 59 homes backing my property can poison their grounds and feed into my well. People with no incentive to keep ground water clean will not respect our water rights. There will be only

one entitity to blame and that is the approver of such development.

Pictures show November 6th 2022, emergency services are still unable to access an emergency past 98th. These problems happen constantly and consistently.

Extremely concerned,

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Ms Morgan,

I am writing in regard to the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development between 98th St. and 100th Pl. in Marysville.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and the concerns of the families residing in the neighborhood.

Amongst our concerns are:

1. The amount of traffic that would be added to our streets with only one way in and one way out.
2. The amount of time it will take for emergency vehicles to reach us.
3. How our trees will survive the storms once the protection of the Stevens property is cleared.
4. Being as our area is on wells, how will this affect our water.

There are many other concerns but this is just to name a few.

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

My concerns surrounding the proposed builds for 59 homes by KBHomes and the Burgermaster/ multipurpose residential/commercial build have not changed. The neighborhood meeting did not change what the facts show so clearly.

1. The traffic will become increasingly more dangerous as more people move here.
2. The area doesn't have the infrastructure to support the proposed builds in this area without significant impact to what is already here.
3. No other road out or in is careless and does reflect the concerns for our safety in any emergency situation that arises.

I wish I had more time to write but given a 7 day notice is not enough time in our busy lives. I wish that fact would have been considered.

Thank you,
Carol McKinney

Dear Elected Officials,

We are writing with our concerns over the excessive development north of 88th St and 36th St. Our neighborhood, as you know, has one entrance and exit. You obviously did not take that into consideration when you allowed Chic Filet, Starbucks, Dickey's, Sub shop, plus a dental office to go in. The result caused numerous traffic tie ups where police were needed to direct traffic. If that isn't bad enough, you are now allowing Burgermaster, apartments and other businesses into that space.

You have also invited into our lives, KB Construction. This is a multibillion-dollar national company that has no ties to our city or county. They are here to make money and give you more tax revenue. The Steven's development, between 98th and 100th, is to include 59 homes with 40 ft frontages. There is one way in and out of that neighborhood. You know people in this neighborhood are on wells and septic systems. It is not hard to guess the water quality will become an issue.

Adding 59 homes with 2-3 cars per home, will add to the traffic hazards already taking place. The safety of our residents is another concern. Any accident at the intersection of 88th and 36th shuts down emergency vehicles to access the neighborhood; thus, more houses, more cars, more accidents. The round abouts will make this worse and there will be times when we cannot get out of our neighborhood. The traffic lights allow for residents to come and go. Traffic circles will have a constant flow of cars and trucks. No comparison as to which is the best for Marysville residents.

KB Homes, and apparently you, don't care how these developments harm your constituent's quality of life. We understand this property will be developed but hope for less homes. We also know KB Construction is planning similar development north of 100th.

You were elected to represent your voters, so let's see you do just that.

Marysville voters,
Chuck and Kandis Goetz

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Dear Ms. Morgan,

I am writing to express my concern regarding the proposed development referenced above. My biggest concern is regarding safety for all that live in this area. Our neighborhood has only one road in and the same road out basically it is a dead end. When emergency vehicles need access this will become more problematic by adding an additional 59 units and vehicles. We already have to deal with emergency vehicles having to cross the railroad tracks and sometimes getting stopped by a train making response time worse then neighborhoods to the east of State Street. In addition, 36th Ave NE the road leading off of 88th becomes backed up most days due to traffic in and around Chick-fil-A and Haggen's adding to the response time. Once again approving so many units and vehicles just does not make sense on a dead end street.

I would request that you reconsider the decision to add 59 units and think of the safety of the Marysville citizens that live in the neighborhood that would be negatively impacted by this large of a development.

Respectfully,

Cindy Phillips

City of Marysville
Emily Morgan/Senior Planner
501 Delta Ave
Marysville, WA,98270

Dear Emily Morgan,

I am writing to express my concerns regarding the new home development by KB Homes (PA24-024). As a resident of Marysville, I want to ensure that the community's needs are addressed during this project.

First, I urge the city to ensure that a sidewalk is installed along with the extension of the sewer pipe along 35th Ave NE and 98th St NE for the new development. A safe pedestrian pathway is essential for the well-being of residents and will enhance connectivity in our community.

Additionally, I request that the city implement monthly testing of our well water to monitor for any potential contamination stemming from the development. The health and safety of our community should be a top priority, and regular testing will help ensure that our water remains safe for all residents and if any irregularities occur then the developer should be held accountable to assure the surrounding neighbors continue to have safe drinking water.

Thank you for your attention to these important matters. I look forward to your response.

Sincerely,

Duane and Tina Leach

November 18, 2024

To: Chris Holland, Planning manager

This memo is a comment on the MITIGATED DETERMINATION OF NON-SIGNIFICANCE that was recently issued on the planned development between 35th Ave, NW and 98th Place NW AKA the Stevens Development.

The current area presently has approximately 200 homes. The development planned is for 59 homes. This development will increase the population in this area by approximately 30%.

Currently this area has only 1 way of access and egress via 35th Ave to 36th Ave., to 88th Street. The recent traffic study done by KB Homes showed that the access intersection of 88th and 36th as rated as a C. There was recently an accident on 88th St and 36th Avenue which shut down access to this whole development for several hours. THIS ALSO DENIED ACCESS TO THE AREA TO EMERGENCY AND ALL OTHER VEHICLES. I have a problem with this traffic Study due to the above example. The study also showed only an increase of traffic by 10% not the 30% that in actuality would result in 30% more homes The above document did not require any mitigation of the traffic problem.

The above-mentioned document DOES NOT address the issue of safety and access to present occupants of this area. Due to the limited access to this area the Fire Department has declared ALL the new homes to require fire sprinklers be installed due to the possible limited access to the area by the fire Department for fire suppression.

I would like to remind you that the current neighborhood is serviced by private wells. The only mention of how this might affect these wells was about a wet season ground water report to verify wet season high water table.

Yours truly,

Glenice McKeon

November 18, 2024

To: Haley Miller, manager Community Development Department

This memo is a comment on the MITIGATED DETERMINATION OF NON-SIGNIFICANCE that was recently issued on the planned development between 35th Ave, NW and 98th Place NW AKA the Stevens Development.

The current area presently has approximately 200 homes. The development planned is for 59 homes. This development will increase the population in this area by approximately 30%.

Currently this area has only 1 way of access and egress via 35th Ave to 36th Ave., to 88th Street. The recent traffic study done by KB Homes showed that the access intersection of 88th and 36th as rated as a C. There was recently an accident on 88th St and 36th Avenue which shut down access to this whole development for several hours. THIS ALSO DENIED ACCESS TO

THE AREA TO EMERGENCY AND ALL OTHER VEHICLES. I have a problem with this traffic Study due to the above example. The study also showed only an increase of traffic by 10% not the 30% that in actuality would result in 30% more homes The above document did not require any mitigation of the traffic problem.

The above-mentioned document DOES NOT address the issue of safety and access to present occupants of this area. Due to the limited access to this area the Fire Department has declared ALL the new homes to require fire sprinklers be installed due to the possible limited access to the area by the fire Department for fire suppression.

I would like to remind you that the current neighborhood is serviced by private wells. The only mention of how this might affect these wells was about a wet season ground water report to verify wet season high water table.

Yours truly,

Glenice McKeon

Concerns Regarding Housing Development Project (PA24-024)

Dear Emily Morgan,

I am writing to submit my comments on the proposed housing development project (PA24-024). While I understand the need for growth, I have several concerns about the potential impacts this project will have on the surrounding community and environment, particularly in terms of traffic, environmental degradation, tree retention, fire safety, and potential effects on nearby water sources. Below are my key points:

1. Traffic Impact, Emergency Access, and Roundabouts

The Traffic Impact Analysis highlights that the development will significantly increase traffic, particularly on 35th Ave., which serves as the only entry and exit point for both current and future residents. The proposed traffic improvements, including the addition of three roundabouts, are insufficient to mitigate the congestion, particularly when trains are passing through the area.

What is more troubling is that the Environmental Impact Study admits that instead of meaningfully addressing traffic issues, the developers will pay an impact fee, effectively acknowledging they are worsening the traffic situation. This gives the impression that the developers prioritize their profits over community wellbeing, as it appears they prefer to pay a fee rather than invest in improving the infrastructure for the neighborhood.

I urge the city to reconsider this approach and require the developers to implement traffic improvements beyond paying a fee, as the current plan will exacerbate traffic congestion, negatively affecting current residents.

2. Fire Safety and Increased Danger for Existing Residents

I am also deeply concerned about the increased fire safety risks this development imposes on current residents. The new homes will likely be equipped with modern fire safety measures, but existing residents will face a higher danger without the ability to afford expensive upgrades like water sprinklers.

Moreover, the current homes are not being given access to public water and sewer systems, which

places them at a further disadvantage. These homes rely on well systems, and in the event of a power outage, the well pumps will not function, leaving residents without water pressure. Even if sprinklers were added, they would not work under these circumstances. The increased fire risk, paired with the lack of support for traditional homes, puts current residents in a more precarious and dangerous situation.

The city must consider the inequitable situation this creates, where new, wealthier homes are built with modern safety features, while long-standing, traditional homes are left in an increasingly dangerous environment. This is particularly unjust given the rich historical attributes of the neighborhood, which are not being respected or preserved.

3. Environmental Impact and Unmentioned Creek Belonging to the Tulalip Tribe

Another significant concern is that the Environmental Checklist failed to mention a nearby creek that belongs to the Tulalip Tribe. This is a serious oversight, as the creek plays an important role in the Tribe's cultural and environmental heritage.

There is a real risk of pollution from construction runoff, chemicals, and sedimentation, which could harm water quality and the ecosystem. Furthermore, future residents may use yard chemicals—such as fertilizers, pesticides, and herbicides—that could seep into the groundwater, impacting both the creek and the existing wells used by current residents. It is especially concerning that future residents, whose water will come from the city, will not have the same concerns about protecting the groundwater that current residents depend on.

The city must ensure that the developers implement robust environmental protections, including restrictions on chemical use and a comprehensive plan to safeguard the creek and the water resources of the community. Furthermore, it is critical that the Tulalip Tribe is consulted and their rights and interests are respected.

4. Risk of Groundwater Contamination and Well Drying for Nearby Residents

The project raises serious concerns about both the contamination and drying up of existing wells, which many current residents rely on for their water supply. The construction process and potential changes to the groundwater table could disrupt these wells, while chemical runoff from the new development could further contaminate the water.

The city should require a thorough hydrological study to assess the potential risks to the water table and ensure the continued water security of existing residents. Moreover, given that the new development will have city water, current residents should not be disproportionately affected by risks created by the development.

5. Tree Retention and Loss of Vegetation

The Arborist Report reveals plans for significant tree removal, which will reduce the area's natural beauty, wildlife habitats, and stormwater absorption. These trees are not only essential for the local ecosystem but also contribute to the historical and aesthetic character of the neighborhood.

I recommend that the city enforce stronger measures to minimize tree removal and require the replanting of native species to replace any lost trees. This would help maintain the ecological balance and preserve the unique character of the neighborhood.

In conclusion, I have significant concerns about the negative impacts this development will have on traffic, fire safety, water resources, and the environment. The development is increasing risks for existing residents—both in terms of safety and quality of life—without providing meaningful solutions to mitigate those risks. The developers' plan to simply pay an impact fee for worsening traffic, without addressing the root issues, is particularly troubling, as it demonstrates a disregard for the long-term needs of the community.

I urge the city to prioritize the safety and well-being of the current residents, the protection of the local environment, and the preservation of the neighborhood's historical attributes. Further studies,

improved infrastructure, and greater consideration for existing residents and the Tulalip Tribe are necessary before any approval is granted for this project.

Thank you for your attention to these important matters.

Sincerely,

Brent and Jade Seman

Attn: Emily Morgan

Planning Department

Community Development

Marysville, WA

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed currently to the Marysville Planning Commission for a 59 single home development just north of 98th Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024 in the Marysville Civic Center the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families currently living in this neighborhood. Beyond the many concerns about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water and the sewer constraints, my concern is over the issue of safety for the neighborhood and the increase in bottlenecking traffic.

The developers feel they have alleviated a fire risk by installing sprinkler systems in the new homes because code states you must have two access points in and out of a neighborhood for fire safety or install sprinkler systems in all the houses. However, our neighborhood has only one in/out access to begin with, and with the addition of 59 families accessing our one way out (35th Ave NE) the added traffic will bottleneck our neighborhood access to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access, not addressing other emergency vehicles such as ambulances and police emergency access in and out.

The property has not yet been purchased so this is only a proposal, but I (and 99% of my neighbors) believe this housing project should be stopped before it is even started. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Regards

James R. Lubbehusen

Subject: [External!] Stevens PRD/ KB Home Law Suites
Date: Tuesday, September 24, 2024 11:33:37 AM

[CAUTION:] This email originated from outside the City of Marysville. Do not click links or open attachments unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Emily,

I was up until midnight reading about all the law suits KB Homes has filed against them. In addition to the 120 plus neighbors in our current development that do not want to see our trees disappear and out well water contaminated by the 59 home proposal, my concern is also with the quality and reputation on this company. Although the BBB has a high rating for the company, they note they don't even use complaints and apparently law suits in deterring their rating. I'm sure with the right amount of money and influence any company can manipulate a high BBB rating.

My concern with this project beyond the unsafe/limited access to our neighborhood (only 35th Ave NE in and out), I am concerned that with the reputation of KB, our well water will be contaminated by the removal of hundreds or century old trees and construction pollution from this project. My neighbors and I implore you to listen to our concerns and stop, or at minimum, reduce this housing project to match our neighborhood of one house per half acre, not the rroposed cramming of 5 or 6 homes per acre.

Please add this comment to the Notice of Application file PA24-024.

Regards,
Concerned Citizen of Marysville,

[CAUTION:] This email originated from outside the City of Marysville. Do not click links or open attachments unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Good Morning,

I would like to offer my comments concerning the application submitted by KB Homes for the high density build in our neighborhood.

My family has been living in this community for 33 years and have witnessed first hand the impact of the I-5 88th street on/off ramps and various commercial projects and improvements which brought grocery, gas and restaurants to 88th. This brought services as well as much traffic stress accessing our homes. The narrow road which winds back to our community is a dead end. There is only one way in and out. At peak traffic the intersection is often blocked affording no ability access 36th. Factor in the congestion pinch of the left turn to access the strip mall dev grounded by Chik Fil A, Starbucks, Jersey Mike's and other tenants -the narrow two lane road is blocked completely. Adding 59 homes - potentially 2-3 cars per household will undoubtedly have a negative impact on travel in and out. There are concerns about Fire/ Aid access as well.

Traffic along 35th Street is treacherous now. No sidewalks. No ADA provisions? Can we get side walks and ADA?

How will the build affect on our water quality? Are there City assurances that the build will not impact our wells?

In closing I would like to invite you all to visit our neighborhood. Arrange to come at peak hours during the week. Weekends too.
Word of caution - If you stop at the Starbucks on 88th for coffee you won't be able to take a legal left out of the retail strip mall to travel north in order access our community where the 59 houses are proposed. Who thought that was a good idea?

I appreciate your time.

Regards,

Joan Sauter

To all whom it may concern,

We as a family are very concerned how this proposed construction (PA24-024) and subsequent use of property
in our neighborhood will have adverse short term and long term impacts on the environment.

Safety should always be the highest priority when considering any new developments.As we all know the intersection at 36th Avenue and 88th street has several issues going on that impact the safety of all Marysville drivers and visitors who use this roadway daily.However there is a even greater danger for those
who live in our neighborhood and those who also live on the other side of 36th avenue and 88th street. Why
you may ask, maybe because there is only one road in and out of these residential areas.Durning KB Homes proposed
construction project 35th avenue will be torn up for a period of time, durning that time only one lane will be available, There will be heavy machinery
and trucks ect coming in and out of the area.What is an unsafe situation will only be made worse.After the 59 homes are added the increased quantity of
of traffic will be permanent stress on this intersection.
It is very unfortunate and sad that the new homeowners will not be informed of the present traffic situation and the upcoming development plans for a Burger Master
and the two multi purpose buildings with16 residential apartments that will be crammed into the small piece of land at the end of 35th avenue.
So my question to you today as leaders and elected officials in our city how can we develop more responsibility in spite of zoning rights and
city ordinances that we the residents keep being told over and over again make everything perfectly ok to do. Is not the safety of people more important than any
form of economic gain for developers and others involved?

We as family are also very concerned that ground disturbing activities and KB's tree removal plan will cause our adjacent trees to be weakened
at the root level and also become unprotected from the wind. How will this potential serious problem be migrated? I see nothing in the migration
measures listed to address that, however I do see that it is stated in mitigation measure #3 that the retained trees in the development area will be protected.
It would be only fair to the residents who will be left with this serious concern to have a plan to also to protect their trees from any ground digging activities.
Some of our trees and my neighbors trees are almost touching the trees that will be ripped out.This needs to be addressed and so far it has not been at all.

There are still more concerns that we as a family have but I will only address this last one for time sake. Is it really necessary to destroy five homes and a mother in law cottage?
KB homes actually wanted to destroy 8 homes, however the 3 homeowners including ourselves did not chose their plan,My family is extremely close to the homes
being demolished,The noise, dust, light and glare is a serious concern for not just our family, but the whole neighborhood.How can our breathing air be checked during home, landscape

and driveway ect destruction? Please show me where there are any proposed mitigation measures in place for this, again it is a matter of safety with this issue
too.

Please consider visiting our neighborhood in real time to get a much clearer picture of how this development will impact us all.
I have yet to see one person we have voiced our concerns to care enough to take the time to do that.
The neighborhood meeting held on July 31, 2024 has been edited for better listening quality by one of our wonderful neighbors, please take the time to listen to it.
I would be happy to send you a link to the edited version, because the one the city sent to those who attended the meeting was very hard to listen due to it's poor quality.
This recording will help you to become much more aware of the deep concerns that we all have.

Marysville is a wonderful city, lets keep it safe for all who call it home.

Thank You,
Ray and Lisa Weiss

Here's one and the other is attached:

Dear Members of the Marysville Planning Committee:
I am writing to express my concerns regarding the KB Developers' proposal to construct 59 new houses in our neighborhood, particularly focusing on the implications of having only one access point for both entry and exit. This layout may significantly compromise our safety, as emergency vehicles would face delays reaching homes in care of a crisis, and congestion could lead to hazardous traffic patterns at peak times. Additionally, I worry about the strain this development could place on community resources and our local ecosystem, as increased population density can overwhelm existing infrastructure and lead to the degradation of nearby natural habitats. I urge the Planning Commission to consider these critical factors before moving forward with the project.
Thank you for your attention to these matters.

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

To Whom It May Concern,

We are writing this letter in regards to Project PA24-024 being planned for my neighborhood. As we all know there is only

one entrance in and out of this neighborhood. The intersection at 88th street and 36th Ave NE is very congested durning peak traffic times,

which already poses an unsafe situation for all drivers involved.The train is also a factor that we know is out of the city's control, however it does contribute

to the problem and it effects on the traffic issues should not be dismissed. If an emergency were to occur during peak traffic times it could be a devastating situation

for the residents of this neighborhood and or the neighborhood on the other side of 88th street, which we all know also only has one entrance in and out. The health and safety

of all the residents of Marysville should be considered when building houses and other infrastructure that will bring more traffic to an already stressed traffic intersection.

Please consider first people's safety above profit when making decisions where you will build infill housing in our city and in our neighborhood.

Thank you,
Ray and Lisa Weiss

Hi Loretta,

Thank you for your email. It looks like this was intended for Mayor Nehring, who I have cc'd on this response.

Nate

On Sep 19, 2024, at 12:00 PM, LORETTA EDSON <ledson71@yahoo.com> wrote:

Hello Mayor Nehring,

I have hesitated to send you this, but I want to make sure you are in the loop on this purposed housing development. I live on 97th Pl NE, a wonderful older established community of with homes on large lots. It was brought to our attention that a developer was making a bid to build a 59 house development in our community.

We were notified there would be a council meeting to discuss this proposal on July 31 2024 at 5pm at city hall. This notification unfortunately did not come from the city planning dept, but from home owners in the community that got wind of this development. They went door to door handing out flyers for the meeting.

We all showed up to the meeting on July 31st, (much to the dismay of the city council, city planner and the housing developer Rep.) to object this housing development . You are more than welcome to review the tapes from the hearing. You will see this community of home owners are very frustrated and upset over this proposal.

We have been impacted greatly, already on entering and leaving our housing development due to the installation of Chik-fil-a and Starbucks on our road. You see we have one way in and one way out of our development.

The intersection and the businesses at our entrance has caused multiple accidents and traffic backups.

At this meeting, it was also brought up that a apartment complex and a Burger Master are also proposed at the backside of Starbucks. This will cause even more traffic on our roads. Throw the idea of roundabouts being installed on 88th, will be most certainly lead to disastrous consequences. I have not seen any traffic impact studies, no car counting strips on 88th or our road to track the amount of traffic this area gets on a daily basis.

With a housing development coming in, that will be adding a minimum of 118 more cars on our street (35th Ave NE). They proposed no other streets to be added as an entrance or outlet. We suggested to put another bridge over Quilceda Creek, to be able to use the area at the back of the proposed housing development that would come out at State Ave. Not having a second outlet/entrance, will create a emergency hazard to and from our neighborhood.

Not to mention the enviromental impact this will have in our area. You see the majority of the houses are on Well/Septic, City Water only is available for the first couple of streets off of 35th Ave NE. This is also a heavily treed area with huge trees. They would need to clear a large amount of trees, which would impact our air quality and the wind protection.

As a community we are not against growth, but just not in our neighborhood.

We are still currently organizing, to further protest this development. We are looking at further action to prevent this development from happening.

I would love to sit down and discuss this in person with a tour of our neighborhood, to show you what exactly we are concerned about.

As stated by the whole neighborhood in the meeting on July 31st, we do not have faith in the city council or the city planner in doing what is best for the community members that are impacted but rather what economic impact it will have on them.

Thank you for your time, this is just a brief synopsis of the issue at hand.

Mr Mayor J Nehring,

My name is Loretta Garduno and I've lived in Maysville for 30 years. I am writing to you to bring attention to a vacant lot that has become a hazardous waste/dumping ground just north of 88th St NE in Marysville. Unshelted folks have camped there and there is excessive garbage there, attracting rodents and disease. A deceased person was found in the woods a year or so ago.

I attended a neighborhood meeting and heard about a proposal to build 59 homes less than 1 mile from my home. Our community opposes this and concerns were raised about many issues

concerning, water, sewer, loss of trees and traffic nightmares. There is only one road in and out of this area and it is already difficult to get through.

I have raised multiple complaints. The priority is safety. I will contact code enforcement about the building garbage problem again. I left a voice mail messages for Doug Lee and no response. Please respond and let me know you care about our community.

Sincerely, Loretta Garduno

Concerns with the proposed 59 homes on 13.5 acres off of 88th in Marysville.

There is only one way in and out of this neighborhood. Adding a potential 120+ additional cars driving in and out to an already congested roadway (88th) is beyond making sense.

The City of Marysville doesn't take care of the roads, trees, etc as of now. A tree from this corner fell during a storm and took out a power line. Took the city a couple DAYS to get to it, we were stuck. Watched medics walk a stretcher back here because they could not get their vehicle past the tree with wires tangled in it.

The frontage road (35th) suffers from at least once a year a tree falling from the west side across the power lines. Always takes days for someone from the city to take care of it. GENERATORS ARE A MUST BACK HERE. Will those families buying houses back here be advised to buy generators? So irresponsible of the City.

It is all over the news that 2 elementary schools will be closing their doors in Marysville, as well as the potential for programs such as sports, etc to be discontinued. The two schools closing are on each side of the school serving kids from this neighborhood. Where are these potential 100 kids going to school? I wouldn't buy a house in Marysville if I had school aged children.

At the Q&A meeting that was set up for this project, it was all questions, no answers. We did learn that not only is this new neighborhood going in this area, but the City has also approved another restaurant/strip mall and apts?!?! Remember one way in and one way out of here! We invite everyone that is apart of this project to drive back here, preferable in separate cars, at the same time, either at 7-8:30am, noon, or 4-6pm, when a train has passed thru and when Chic Fillet has REOPENED. There was a EMT that spoke at this meeting stating that their response time is high due to congestion on 88th, and was concerned about more traffic. Can't change the trains coming thru, but until the roads are fixed for traffic that it has now, zero additional building should be granted. An accident at the entrance to this neighborhood causes HOURS of delay in and out of here! Not OK!!

We moved back here when it was a 2 lane road over the RR tracks from State Street, and a wooden bridge over Quilceda Creek (35 years ago). We can't stop progress, but when it comes to our safety, emergency response, that we as City of Marysville taxpayers deserve, we have to speak up. Please, take a drive, and see how very irresponsible and unsafe it is to put so many additional homes in this area.

Thank you for your time,
Concerned Neighbor

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development just north of 98th
Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families residing in the neighborhood. We are concerned about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water, and the sewer constraints, and my biggest concern is safety for the neighborhood with the increase in bottlenecking traffic. Most of my neighbors are elderly and have health issues.

However, our neighborhood has only one in/out access, and with the additional fifty-nine houses which increases the neighborhood by thirty-three percent. The added traffic will bottleneck our neighborhood to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access,
not addressing other emergency vehicles such as ambulances and police emergency access in and out.

To the best of my knowledge, the property has not yet been purchased. I believe this housing project should be stopped immediately. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Thank you for your time.

Mary Steiner

Subject: [External!] Notice of Mitigated Determination of Non-Significance - Stevens PRD - PA 24-024
Date: Friday, November 15, 2024 12:15:16 PM

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Dear Emily Morgan, Senior Planner,

This project will have a significant safety factor for the existing residence within the project area. We are already facing issues of EMT and fire vehicles to respond in a timely manner although the fire department disputes this issue. I know for a fact that it took EMT to reach my house over half an hour and this happened two years ago.

At this time, there is only one way in/one way out. Sprinkler systems in the new homes will not protect people trying to evacuate our homes due to earthquakes, forest fires, etc. While I appreciate the thought, please consider the existing homes that do not have sprinklers.

Lastly, the proposed four round-a-bouts will only create havoc in an already congested traffic area. Honestly, when the train is traveling through the city, traffic automatically stops. Also, lots of us are walkers, no one mentions how walkers are to manure the round-a-bouts.

The Stevens PRD - PA 24-024 is a HUGE safety issue that needs to be reconsidered.

Thank you,

Mary Steiner

Subject: Follow-Up on Drinking Water Concerns and Analysis Gaps for Stevens PRD (File No. PA24-024)

Dear Ms. Morgan,

I am writing to formally address significant concerns in the **Mitigated Determination of Non-Significance (MDNS)** for the Stevens PRD project (File No. PA24-024). While I appreciate some of the identified mitigations, my previous public comments regarding drinking water contamination risks remain unaddressed. These omissions, combined with concerns about the adequacy of the proposed stormwater management system, demand further clarification and action.

Lack of Drinking Water Contamination Analysis

The MDNS acknowledges the potential for increased **stormwater runoff, pollutants, and erosion**, as well as **groundwater disturbance** from site preparation and construction. However, it completely ignores the **ongoing** contamination risks to **private drinking water wells** and our **shared groundwater** supply from the **59 proposed homes,** including:

- **Herbicides, pesticides, and chemical runoff**:
  The proposed stormwater system does not adequately prevent contaminants from

infiltrating the shared groundwater supply. Roof runoff, yard maintenance (e.g., fertilizers, pesticides), and chemical spills from 59 new homes and common areas are likely to introduce harmful substances into our wells, particularly given the site's proximity to existing private water supplies.

- **Stormwater system limitations**:
  The stormwater system as described will not capture:

  - All roof runoff from every house. (including but not limited to: **heavy metals like lead, zinc, copper, cadmium, and arsenic, along with organic compounds like polycyclic aromatic hydrocarbons (PAHs))**

  - Pesticides, fertilizers, or chemical spills that infiltrate through lawns, gardens, or common areas.
    This inadequacy exposes groundwater to a significant risk of contamination.

Clarifications and Requirements for Hydrologic Analysis

To adequately protect drinking water supplies, the **hydrogeologic assessment** and monitoring wells must address the following:

- **Scope of Hydrogeologic Assessment**:

  - The assessment must explicitly evaluate contamination risks from pesticides, herbicides, fertilizers, and other chemicals commonly used in residential developments. This should include substances homeowners are likely to use for weed and pest control.

  - The assessment must also consider emerging risks, such as **microplastics** leaching from artificial lawns, artificial barks, and other future homeowner-introduced factors.

  - It must evaluate whether the stormwater infiltration system can fully prevent such contaminants from reaching groundwater.

- **Monitoring Wells**:

- The monitoring wells must test for **water quality contaminants**, not just seasonal water table fluctuations. Testing should include pesticides, herbicides, and fertilizers. Results must be made publicly available.
- Monitoring wells should be placed strategically to assess groundwater flow and simulate conditions of private wells where necessary.

- **Stormwater System Design**:
  - Confirm whether the system will capture **roof runoff and yard runoff** from all 59 homes, in addition to runoff from roads, driveways, and common areas.
  - Include measures to prevent chemical infiltration from lawns, gardens, and common areas.

- **Evaluation of Private Wells**:
  - Ensure the study accounts for the proximity of **existing private wells** and their 30-50-foot depth.
  - This analysis must include all wells located between the project site and the creek, as these are highly susceptible to contaminants leaching into the groundwater from neighboring properties.

EXAMPLES

- EXAMPLES OF COMMON PESTICIDES THAT LEACH INCLUDE BUT IS NOT LIMITED TO :
  - **Imidacloprid** (e.g., Bayer Advanced, Merit): A neonicotinoid used for lawn grub and insect control.
  - **Permethrin** (e.g., Ortho Home Defense, Raid): A synthetic pyrethroid used in many residential pest control products.
  - **Chlorpyrifos** (banned for residential use in some areas but still found in older applications): Known for its risk to human health and environmental contamination.
  - **Bifenthrin** (e.g., Talstar, Ortho Bug B Gon): Commonly used for mosquito and general insect control.
  - **Fipronil** (e.g., Termidor, Taurus SC): Often used for termite and ant

control.
- **Carbaryl** (e.g., Sevin Dust): Used on lawns and gardens; known to leach into groundwater.
- Rodenticides: **Bromadiolone** and **Diphacinone**: which are common rodenticides can contaminate soil and leach,

Fertilizers:

Nitrates, etc

- EXAMPLES OF FUNGACIDES INCLUDE BUT IS NOT LIMITED TO:

  Fungacides: **Chlorothalonil** (e.g., Daconil): Used for mold and mildew prevention in gardens and landscaping.

- EXAMPLES OF COMMON HERBICIDES THAT LEACH INCLUDE BUT IS NOT LIMITED TO :

  1. **Non-Selective Herbicides:**

     - **Glyphosate** (e.g., Roundup): Widely used for weed control; although it binds tightly to soil, it can leach in certain soil types.
     - **Diquat** (e.g., Spectracide): Less prone to leaching but can still affect nearby water systems.

  2. **Selective Herbicides:**

     - **2,4-D** (common in lawn weed control products): Frequently used in residential settings; linked to groundwater contamination.
     - **Dicamba**: Used for broadleaf weed control; highly mobile in soil.
     - **Atrazine**: Used in some turf management products; a known groundwater contaminant in many areas.

  3. **Pre-emergent Herbicides:**

     - **Pendimethalin** (e.g., Preen): Used to prevent weed seed germination; can leach into groundwater if over-applied.

- EXAMPLES OF COMMON FERTILIZER CHEMICALS THAT LEACH INTO GROUNDWATER INCLUDE BUT IS NOT LIMITED TO:

  - **Nitrogen-based Fertilizers:**

    - **Urea**: Breaks down into ammonia and nitrates, which can leach

easily into groundwater.
    - **Ammonium Nitrate**: Common in lawn care; nitrates are highly soluble and contaminate water sources.
    - **Ammonium Sulfate**: Used in acid-loving plant fertilizers; also a groundwater contaminant.

- **Phosphorus-based Fertilizers:**
    - **Superphosphate**: Common in garden and lawn fertilizers; contributes to algal blooms if it reaches water bodies.
    - **Triple Superphosphate**: Used for promoting root growth; poses risks to water quality.

- **Potassium-based Fertilizers:**
    - **Potassium Chloride**: Often used in lawn and garden fertilizers.

Impact of Sandy Loam and Shallow Water Tables

*In a sandy loam soil with a shallow water table of 36 feet and significant rainfall, the risk of groundwater contamination from pesticides, fertilizers,

and herbicides are heightened. The combination of porous sandy loam and rain promotes faster chemical movement downward and laterally, making

groundwater contamination a significant concern.

1. **Sandy Loam Soil**:
    - **High permeability**: Allows water and dissolved chemicals to infiltrate quickly.
    - **Low adsorption capacity**: Provides less resistance to chemical leaching compared to clay or silt soils.
    - **Moderate organic content**: May bind some chemicals, but binding is often insufficient for highly soluble or persistent compounds.
2. **Shallow Water Table (36 feet)**:
    - Increases the likelihood that leaching chemicals will reach groundwater.
    - Shorter travel distance means less time for natural attenuation or degradation of contaminants.
    - Seasonal rain or over-irrigation can rapidly push chemicals into the water table.

Leaching Risks for Common Residential Chemicals

1. **Pesticides**:

- **Imidacloprid** and **atrazine**: Highly mobile in sandy loam; can leach to a depth of **10-36 feet** and enter groundwater, especially during rainy seasons.
- **Permethrin**: Less mobile but still reaches groundwater in porous soils when over-applied or during heavy rains.
- **Fipronil**: Moderate mobility; potential to reach groundwater in sandy loam with consistent rainfall.

2. **Fertilizers**:
    - **Nitrates** (from urea or ammonium nitrate): Extremely mobile in sandy loam and can leach into groundwater quickly, often traveling **several feet per year**, especially with rainfall. With a water table of 36 feet, nitrates could contaminate wells within a **few months to a few years**, depending on application rates.
    - **Phosphates**: Typically less mobile but can travel to shallow groundwater in sandy loam due to erosion or in areas with excessive application.
3. **Herbicides**:
    - **2,4-D**: Mobile in sandy soils and can reach groundwater in weeks to months, depending on rainfall.
    - **Atrazine**: Known for leaching; with sandy loam and rain, it could contaminate water tables **within months**.
    - **Glyphosate**: Generally binds to soil, but in sandy loam with low organic matter, it can leach into groundwater, albeit at a slower rate than atrazine or nitrates.

Estimated Chemical Travel Time

Given our sandy loam soil and environmental conditions:

- **Nitrates and Soluble Pesticides**: Could reach the water table **within a few months to a year**.
- **Less Mobile Chemicals (e.g., phosphates, glyphosate)**: Likely to take **1-3 years** to leach significantly, but this is still concerning with prolonged application.

ADA Accommodation and Public Notification

As I previously informed the City of Marysville, I require reasonable accommodations under the **Americans with Disabilities Act (ADA)**. I must receive **written updates** on **all** developments and be directly notified about project changes and decisions that may affect my property, particularly those regarding concerns and comments for which I have raised.

To date, my comments about drinking water concerns have not been fully addressed, and I

have not received accessible, written explanations regarding these omissions. I reiterate my need for timely, written communication to ensure I am included in the decision-making process. As you should be aware, The ADA requires that modifications to policies, practices, and procedures, as well as rigid rules and laws, must be provided to those who have need, especially upon reasonable accommodation request based on reasonableness and need, determined by the size and resources of the organization and whether or not the request fundamentally alters the nature of product or service, or creates undue burden, in this instance, my request is simply to ensure equal access, as required under applicable disability rights laws and principles of equity and does not create undue burden nor does it fundamentally alter the product or service.

Next Steps

To ensure the MDNS properly addresses these gaps and protects existing private wells, I request the following:

1. Include specific mitigations in the MDNS to address contamination risks from pesticides, herbicides, and chemical runoff related to the 59 homes and common areas, addressing the issues I have raised.

2. Confirm that the **hydrogeologic assessment** will comprehensively evaluate contamination risks specific to drinking water wells at a 30-50-foot depth.

3. Expand the scope of **monitoring well testing** to include contaminants such as pesticides, herbicides, and fertilizers, and ensure results are publicly available.

4. Provide a clear explanation of how the **stormwater system** will prevent contamination from roof runoff, yard chemicals, and common areas.

5. Ensure all future project updates and responses to my concerns are provided in writing as part of my ADA accommodation.

Accountability

Should my drinking water, property value, or rental viability be adversely affected due to inadequate mitigation or lack of reasonable accommodations, I will hold the City of Marysville accountable for violating my rights under the ADA, as well as for any resulting damages.

Closing

I trust the city will address these significant omissions in the MDNS and take all necessary steps to safeguard our drinking water supply. I look forward to your written response outlining how these concerns will be addressed.

Sincerely,
Matt Johnson

Emily,

Today is the deadline for submitting comments, however I have comments that I would like to submit however they are on my computer, and our power went out. I will be able to submit them in the next couple days, as stated previously, as if power outage were not enough to allow modification to this policy of deadline, I specifically request additional time as a reasonable accommodation under the ada, given my increase in symptoms resulting from the power outage.

Please acknowledge this and that my comments will be considered and responded to.

Regards,

Douglas

Traffic and Safety Concerns Regarding the Proposed Development of 59 Homes

To: City of Marysville Planning Department
Re: Proposed Development near 10011 39th Dr NE, Marysville, WA
From: Matt Johnson
Date: 09/20/24

I am writing to express serious concerns regarding the traffic and safety implications of the proposed 59-home development near **10011 39th Dr NE**. The findings from the **Traffic Impact Analysis** reveal significant issues that will exacerbate traffic congestion in an area already burdened by commercial activity from **Burgermaster** and **Chick-fil-A**. These businesses already generate substantial traffic, which will only worsen with the introduction of new homes, impacting local traffic flow, safety, and pedestrian infrastructure.

Cumulative Traffic Impact from Burgermaster, Chick-fil-A, and New Development

The traffic generated by **Burgermaster** and **Chick-fil-A** regularly causes congestion on **35th Avenue NE** and **98th Street NE**, especially during peak meal times. The proposed development of 59 homes is projected to add **509 daily trips**, with **54 new PM peak-hour trips**. This additional traffic will compound the existing congestion caused by these commercial businesses, leading to further delays, increased accident risks, and safety concerns for both drivers and pedestrians.

Without proper mitigation measures, traffic flow on these streets will deteriorate, leading to further degradation of the **Level of Service (LOS)** at critical intersections such as the **I-5 ramps at 88th Street NE**. A **Traffic Impact Analysis (TIA)** must be conducted or updated to account for the **cumulative traffic** from both the new development and the nearby commercial establishments, and the analysis should recommend necessary improvements, such as traffic signals, turn lanes, or roundabouts to alleviate these issues.

Pedestrian Safety: The Need for Sidewalks

The current infrastructure on **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** is inadequate to support safe pedestrian movement. With increased traffic from both the development and commercial activity, it is critical that the City installs **sidewalks** along these roads. Pedestrians, including families and children, are at significant risk of accidents if forced to walk on roads shared with vehicles.

Burgermaster and **Chick-fil-A** already generate considerable vehicle and foot traffic, particularly during lunch and dinner hours. The proposed development will introduce additional vehicles and pedestrians into the mix, further complicating the traffic dynamics in this area.

Sidewalks are necessary not only for pedestrian safety but to ensure that traffic flow remains smooth by keeping pedestrians off the road.

Single Access Point and Emergency Response Concerns

39th Dr NE, where I reside, is a **dead-end street** with only one entry and exit point. The increased traffic resulting from the development will exacerbate congestion along this single route, creating delays and bottlenecks, particularly during peak times. This will also pose a significant risk in emergency situations, as emergency vehicles may be delayed by traffic jams or accidents blocking the only route in and out of the neighborhood.

In addition, the **five-year collision history** at the **I-5 ramps at 88th Street NE** indicates a high risk of accidents at these intersections, which further underscores the need for mitigation. The City must ensure that emergency response times are not compromised by increased congestion, and traffic management measures such as **emergency lanes** or optimized **traffic signal prioritization** should be considered.

Conclusion

To address the serious traffic and safety concerns related to the proposed development and the cumulative impact from **Burgermaster** and **Chick-fil-A**, I urge the City of Marysville to:

1. **Conduct or update a comprehensive Traffic Impact Analysis (TIA)** to account for the **combined effects** of traffic from the new development, Burgermaster, and Chick-fil-A.
2. **Install sidewalks** along **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** to provide safe walking spaces for pedestrians.
3. Address the **single access point** issue on 39th Dr NE by considering alternative routes or traffic management solutions to prevent bottlenecks and ensure emergency response times are not compromised.
4. Implement **traffic calming measures** to mitigate the increased congestion and improve safety at key intersections, particularly at the **I-5 ramps at 88th Street NE**.

These measures are critical to ensuring that the development proceeds safely and responsibly, without exacerbating existing traffic problems caused by nearby commercial establishments. I trust that the City will take these concerns seriously and implement the necessary infrastructure improvements.

Thank you for your attention.

Sincerely,
Matt Johnson

State Environmental Policy Act (SEPA, RCW 43.21C)
https://app.leg.wa.gov/RCW/default.aspx?cite=43.21C
SEPA requires the assessment of environmental impacts, including traffic congestion and road safety, for new developments.

Washington State Growth Management Act (RCW 36.70A)
https://app.leg.wa.gov/RCW/default.aspx?cite=36.70A
This act mandates proper infrastructure planning, including traffic and transportation systems, to accommodate new developments and protect public safety.

Hirst Decision (Whatcom County v. Hirst, Futurewise, et al., 2016)
https://fortress.wa.gov/ecy/publications/parts/1611064part1.pdf
While focused on water, this case emphasizes the importance of evaluating infrastructure impacts, including traffic, before allowing development.

Snohomish County v. Pollution Control Hearings Board (2016)
https://law.justia.com/cases/washington/supreme-court/2016/91335-6.html
This case underlines the need for compliance with regulations that address environmental and infrastructure impacts, including the effects on traffic and public safety.

Washington Stormwater Management Regulations (WAC 173-201A)
https://app.leg.wa.gov/WAC/default.aspx?cite=173-201A
Stormwater runoff affects traffic safety, especially in areas where roads are impacted by excess water and insufficient drainage, increasing accident risks.

Marysville SEPA Rules (22E.030)
https://www.codepublishing.com/WA/Marysville/html/Marysville22E/Marysville22E030.html
The local SEPA rules require traffic impact analysis for developments, focusing on the safety and functionality of transportation systems.

Marysville Stormwater Code (6.20)
https://www.codepublishing.com/CA/Marysville/#!/MarysvilleCA06/MarysvilleCA0620.html
Managing stormwater runoff is essential to maintaining safe road conditions, as poorly managed runoff can lead to unsafe driving conditions.

Comments on Groundwater Contamination Risk Due to the Proposed Development of 59 Homes

To: City of Marysville Planning Department
Re: Proposed Development near 10011 39th Dr NE, Marysville, WA
From: Matt Johnson
Date: 09/22/24

I am submitting this statement in opposition to the proposed development of 59 homes near my property at 10011 39th Dr NE, Marysville, WA, as it stands, due to the serious and immediate risks posed to our drinking water and groundwater. While I am not opposed to the development itself, my opposition is contingent upon my concerns being adequately addressed and satisfactorily mitigated. As a taxpayer in the City of Marysville, Snohomish County, and the State of Washington, I expect that the City and other government agencies ensure safe living conditions for residents, with a particular focus on water safety. I understand that the city must grow, however I want to ensure that my family's best interests are protected.

I must also inform you that I have a disability protected under the **Americans with Disabilities Act (ADA)** and may require reasonable accommodations throughout this process. Any personal discussion regarding my disability should be conducted confidentially and be exempt from public records requests or fully redacted.

The Necessity of Pre-Contamination Action

The sandy soil and shallow private wells in this area make groundwater highly susceptible to contamination. Water containing pesticides, herbicides, and other residential chemicals will leach into the ground and migrate toward private wells and **Quilceda Creek**, a vital salmon-bearing waterway.

This is not speculative. My well and others nearby are shallow, approximately at the same depth as the creek. Our wells have already been affected by E. coli and coliform bacteria, likely due to groundwater movement from nearby septic systems. The same hydrological processes will carry harmful chemicals introduced by the development into our drinking water, posing immediate risks to health and safety. While filtration for bacteria like E. coli is simple and inexpensive, solutions for chemicals such as pesticides are far more complex and costly, making filtration impractical for individual homeowners.

Under the **Washington Water Pollution Control Act (RCW 90.48)** and **Antidegradation Policy (WAC 173-200-030)**, groundwater quality must be preserved to protect public health and environmental integrity (Washington State Department of Ecology)

Allowing this development without adequate preventive measures would violate these legal requirements and jeopardize residents' well water, including my own.

Ineffectiveness of Pesticide and Herbicide Bans

A ban on pesticide and herbicide use within the development would be unenforceable. My family’s health and property value cannot depend on residents adhering to such restrictions. Only preemptive action to ensure contamination does not occur can safeguard water quality.

Comprehensive Environmental Impact Study (EIS) is Essential

Before any construction, the City of Marysville must require a **comprehensive Environmental Impact Study (EIS)** that includes:

1. **Comprehensive Hydrological Study:** This study must assess how water moves through the sandy soil and how contaminants will flow from the development into the groundwater and **Quilceda Creek**. The **Washington State Growth Management Act (RCW 36.70A)** and the **State Environmental Policy Act (SEPA, RCW 43.21C)** both require such detailed environmental planning(https://ecology.wa.gov/Water-Shorelines/Water-supply/Water-rights/Case-law/Hirst-decision) (Washington State Department of Ecology).
2. **Groundwater Contamination Risk Assessment:** This assessment should model how pesticides, herbicides, and fertilizers used by the 59 homes will travel through the soil and how quickly they will reach private wells. The assessment is particularly crucial due to the existing E. coli and coliform contamination in local wells.
3. **Pre- and Post-Development Water Testing:** Baseline water quality testing must be conducted, and ongoing testing must be required throughout and after construction to ensure contamination is prevented. This is mandated under **SEPA** and the **Snohomish County Code 22E.030**, which requires thorough environmental review (Washington State Department of Ecology)Snohomish County WA). https://snohomishcountywa.gov/3804/Water---Exempt-Well-Information

Stormwater Management

The development will create significant amounts of impervious surfaces, which will increase stormwater runoff. **Washington Stormwater Management Regulations (WAC 173-201A)** require that stormwater runoff be managed to prevent contamination of water bodies like **Quilceda Creek** and nearby wells (Washington State Department of Ecology).

Despite paying stormwater fees, my neighborhood currently receives no visible stormwater management. This raises concerns about how these fees are being used and how runoff from the development will be managed. The City must ensure that proper infrastructure is in place to protect residents from increased runoff risks, and **WITH consideration of surrounding drinking water wells**, as required under the **Protection of Upper Aquifers (WAC 173-154)** (Washington State Department of Ecology).

Developer and City Responsibility for Preemptive Mitigation

Mitigation must occur **before** contamination is allowed to happen. The developer must be held fully responsible for implementing preventive measures, including:

- **Installation of Whole-Home Filtration Systems:** The developer must install comprehensive filtration systems capable of removing pesticides, herbicides, and other chemicals from well water before construction begins.
- **Connection to Municipal Water:** If filtration systems are insufficient or impractical, the City and developer must cover the full cost of connecting homes to municipal water, including infrastructure, connection fees, and ongoing water bills.

Well Construction Standards/Maintenance

The **Washington Well Construction Standards (WAC 173-160)** establish minimum requirements for constructing and maintaining wells (Washington State Department of Ecology)(Snohomish County Health Department). The EIS must evaluate whether additional protections are needed for existing wells. If the development impacts these wells, the City and developer must bear all costs related to ensuring drinking water safety.

Legal Precedents Supporting Water Protection

The **Hirst Decision (Whatcom County v. Hirst, Futurewise, et al., 2016)** mandates that counties ensure legal water availability before approving developments that rely on wells (Washington State Department of Ecology).
https://ecology.wa.gov/Water-Shorelines/Water-supply/Water-rights/Case-law/Hirst-decision

This is a crucial precedent in ensuring that developments like this one do not harm existing water supplies.

Additionally, the **Snohomish County v. Pollution Control Hearings Board (2016)** ruling underscores the importance of complying with stormwater management regulations and environmental protection laws (Justia Law https://law.justia.com/cases/washington/supreme-court/2016/92805-3.html). These legal precedents support the need for the City of Marysville to take the potential impacts on groundwater and well water seriously.

Public Health and Environmental Risks

Groundwater contamination poses severe public health risks, including gastrointestinal diseases, reproductive harm, neurological disorders, and cancer. Under the **Washington Water Pollution Control Act (RCW 90.48)**, the City has a duty to prevent contamination of water sources(Justia Law https://law.justia.com/cases/washington/supreme-court/2016/92805-3.html). Further, this development risks harming **Quilceda Creek**, a salmon-bearing waterway that must be protected under the **Clean Water Act (33 U.S.C. §1251)**.

Beyond the impact on drinking water, the proposed development risks harming **Quilceda Creek**, a critical salmon-bearing stream. Changes to groundwater flow and contamination could degrade water quality and harm salmon habitats. A thorough hydrological study must be conducted to assess and mitigate these risks.

Financial Compensation for Transition to City Water

As a homeowner who relies on a private well, I did not plan for the financial burden of switching to city water. If contamination forces this transition, I expect significant compensation to offset the additional costs, including infrastructure improvements, connection fees, and ongoing water bills.

Buyout Offer

If the City and developer cannot guarantee the safety of my well water through preemptive action and preserve and add value to our property, I would not want to live in the community, and I am willing to consider a buyout offer. This compensation must reflect not only the current appraised value 2024 of my property, which is $1,100,000.00 + but also the long-term anticipated rental income potential I would be forfeiting over my intended ownership.

Conclusion

As it stands, the proposed development poses an unacceptable risk to groundwater quality and public health. I strongly urge the City to:

- Require a comprehensive **EIS** that addresses hydrological and contamination risks.
- Hold the developer fully responsible for implementing preventive mitigation measures, including comprehensive filtration systems or connection to municipal water at no cost to homeowners.
- Provide financial compensation for any costs imposed on homeowners due to contamination risks, myself and others.

Thank you for considering these critical issues. I trust the City of Marysville, and all reviewing this, will prioritize the health, safety, and financial well-being of its residents.

Sincerely,
Matt Johnson

Date of Completeness: August 29, 2024

NOTICE IS HEREBY GIVEN THAT AN APPLICATION WAS MADE FOR THE

FOLLOWING PROPOSAL:

The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.

Existing Environmental Documents: SEPA Environmental Checklist; Traffic Impact Analysis; Geotechnical Report; Critical Area Report; Tree Retention Plan; Preliminary Drainage Report

Public Hearing: An Open Public Record Decision Hearing is required for this application; a subsequent Notice of Hearing will be published at a later date.

Public Comment Period: Written comments must be submitted to the contact person listed below by

5:00 PM on September 24, 2024.

Document Availability: http://docs.marysvillewa.gov/htcomnet/public/?folder=7607ade1

ANY PERSON HAS THE RIGHT TO RECEIVE NOTICE, PARTICIPATE IN ANY HEARINGS, REQUEST A COPY OF THE FINAL DECISION AND APPEAL THE DECISION AS PROVIDED BY LAW.

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Emily,

I am writing to formally notify you of my grave concern regarding the proposed plan to build 59 housing units in our neighborhood in Marysville.

Now, this is not a “Not in my backyard” situation. I am not against growth in areas of Marysville that can safely accommodate the growth. We do need more housing options for our growing populations.

The fact of the matter is that our neighborhood physically can not safely support the current population that exists now. We are a mostly older neighborhood. The lady that lives next door to me is in her nineties and is on a pacemaker. She needs medical help frequently.

Because there is only on road into our community, we have no options when that road becomes unpassable. We are bordered on the West by I-5, on the North and East by Quill Ceda creek and on the South by 88th street. Our only way out is to take 35th Ave NE to the 88th Street NE intersection.

On average, one or two time per year, during storms, we get trees down on 35th Ave. This makes the road unpassable for several hours or more. It also can take out our electricity when the trees fall on the powerlines. Because this is the only way out, our residents become trapped. Not only can we not get out, but emergency services can’t get in.

Earlier this year we had and accident in front of the Chic Filet, again, on the only path into our community. The accident caused the road and intersection to close. I was on my way home from work. . I was not even able to get off I-5 to reach 88th Steet. That one accident closed down all

Eastbound I-5 off ramps, 88th street NE Eastbound and Westbound, 36th Ave NE on both sides of 88th. It even stopped traffic on 27th Ave NE with cars trying to find another way to 88th Street NE. The intersection was closed for 4 hours and no one could get into or out of the neighborhood.

When you add the train to the mix it makes getting into or out of the neighborhood by emergency services or residents impossible if there is an accident or trees down on the road. Adding 59 more homes to neighborhood can only make an unsafe situation even more dangerous.

We have already had wildfires start in the trees along I-5. Because we are surrounded by the Quill Ceda creek greenbelt and the I-5 greenbelt, if there is a wildfire and a burning tree comes down on 35th Ave NE, we all will be trapped if a large wildfire breaks out.

As said before, I am not against development where it makes sense and where it can be safety implemented. Our neighborhood has unique physical limitations. We were told that a road cannot be installed over the creek or over I-5. With the stated limitations our neighborhood is just not the place for these developments.

Adding 59 new homes to an already unsafe situation is unacceptable. Then when you add the proposed BurgerMaster complex with its added 16 homes and added commercial traffic, the situation becomes reckless and irresponsible. The city of Marysville must not approve these new developments.

Sincerely,

Mike Soderstrom

RE: KB Homes development

Project Contact: Neil Latta, Latta Engineering
5970 Birch Point Rd, Blaine, WA 98230
Project Location: 9815/9909/9907/9921 35th Ave NE
3705/3625/3609 98th St NE
APN: 30051600301400, 30051600301500, 30051600301600, 30051600304500 30051600304501, 30051600305800, 30051600306500, 30051600306600

Dear Emily,

Thank you for receiving this public comment relating to the subject proposed development. We are residents of the neighborhood in which this development is being planned for construction and are submitting the following comments, concerns, and questions for your review and response.

Concerns

1) We are concerned that the overall safety of the neighborhood community is not being properly addresses or mitigated within the development proposal. We would like to have this issue properly addressed and mitigated to the neighborhood's satisfaction before any development begins.

As was indicated in the public meeting on this subject previously held at the Marysville City Hall on Wednesday, July 31, 2024, there is only one way in and one way out of the neighborhood, with no ability to establish a second entrance or exit. This is in itself a very unsafe and dangerous condition for the current residents and will only be exacerbated by the addition of 59 new homes. Emergency services already have a difficult time entering the neighborhood via 36th Avenue during peak traffic conditions, and especially if a train is crossing at the intersection of 88th Avenue and State streets which already delays responses from Fire Station 62. Station 62 and other units respond to the neighborhood several times per month as there is a hospice located on 100th Place. The fact that sprinklers are required for the planned new homes affirms and acknowledges that the City knows that access by emergency vehicles is already delayed to the neighborhood and is a therefore a serious safety concern. Unfortunately, the addition of sprinklers to the new homes does nothing to mitigate or solve the actual cause of the issue, which is that there is only one way into and out of the entire neighborhood.

Entrance to the neighborhood is also severely delayed if not made impossible during wind storms where trees are blown down across 35th Avenue and on other neighborhood streets. It generally takes two to three days before the roadway is cleared and power is restored. The trees that blow down are mainly, but not exclusively from the greenbelt along I-5. Without a second entrance or exit available this safety risk is also unable to be properly mitigated.

2) We are also concerned that the traffic impact study that was provided by Kimley Horn and funded by KB Homes does not adequately convey the current traffic conditions or the expected future traffic conditions at the intersection of 88th Street and 36th Avenue if the proposed development is built.

The following are issues and questions that we have identified and require a proper response to the neighborhood's satisfaction before any development begins.
Calculations used to determine traffic impact are based on the ITE Trip Generation Manual, 11th Edition published in 2021.
- What revisions have occurred that make this data applicable in 2024? How is this data relevant to the years 2024, 2027, and 2033 as indicated were used in the study?

A. The rate used to calculate the expected impact of the new 59 houses is one trip per household in the peak hour.
   - One trip per household severely understates the reality of trips that will occur from the new residents. One only needs to look at all of the other similar developments that have been built around the city to see that most homes have more than one car and more than one driver that take multiple trips to and from the neighborhoods during most daily hours; not just peak hours. One trip per household per peak hour is an incorrect assumption and would like to see that number verified by actual traffic study data of other similar neighborhoods with one entrance/exit with the same housing density as proposed by the developer. This severely understates the amount of traffic that is "predicted" to occur if the development is built, which then understates the potential traffic volume that is used to calculate the rating of the intersection of 88th Street and 36th Avenue.
B. The calculations were also "based on discussions with City staff" and "adjustments were made to the nearest City trip distribution".
   - What did the discussions with City staff contain?
   - What adjustments were made?
   - What was the nearest City that was used?

- The calculations only included theorized trips made by the proposed new development, and do not include the existing traffic that already uses 35th and 36th Avenues.

D. Section 3, Table 1 of the report indicates an ADT of 556 for the development and 47 for the 5 houses to be removed. How are the 556 and 47 amounts calculated?
E. The report indicates that the AM peak hours are between 7-9 am, and the PM peak hours are between 4-6 pm. Several people in the neighborhood work at Boeing or other companies and leave for work earlier than 7 am and arrive home before 4 pm, so the peak hours need to be expanded as they do not adequately represent the current traffic volume.
F. The report concludes that it is estimated that only 37 new AP peak hour trips will occur from the new development and 54 trips will occur in the PM peak hours. This calculation severely underestimates the total frequency of trips based on only one trip per household per peak period as indicated above.
G. The following calculations are based on the data provided in the report from Section 5, Table 3 of Figures 4 through 8 respectively, and *only include numbers that actually affect 36th Avenue*.
   - Are the numbers in the Figures based on actual observed data?

- Are the numbers only from peak hours or some sort of average?
- Do the 2027 and 2033 numbers include the increased traffic from the Burgermaster development?
- Once again, the small increase of 31 and 54 trips for 2027 and 2033 respectively severely underestimate the increase amount of traffic that the intersection of 88th Street and 36th Avenue will experience due to the development. Traffic circles will not mitigate the increased traffic enough to provide prompt access to the neighborhood via 36th Avenue during peak hours or if there is an accident or a train crossing.

	2024	2027	2033
Current	654 (Figure 4)		
No Build		734 (Figure 5)	854 (Figure 7)
Build		765 (Figure 6)	908 (Figure 8)
		+ 31	+ 54

H. Section 5.3 of the report indicates that the current 2024 delay at the intersection of 88th street and 36th Avenue is 28.9 seconds.
- How is this calculated?
- Is it for just the light cycle, because if it is then the light does not change every 28.9 seconds.
- Is it an average of all delays after the light turns green for 36th Avenue traffic?

I. Section 5.2 of the report lists the level of service range of controlled intersection delay for level B at 10 – 20 seconds **PER CAR**; for level C at 20 – 35 seconds; level D at 35 – 55 seconds; and level E at 55 – 80 seconds.
- Why does the increment amount jump from 15 seconds at level C to 20 seconds at level D, and then 25 seconds at level E?
- If the intersection at 88th and 36th is rated an E then by City rules the development cannot be built. If the increment amounts are kept the same for all levels then the calculated rate of 44.5 seconds in 2033 if the development is built would fall within level E and thus would not be allowed to be built.
- If the times indicated are the delays experienced PER CAR, then the 908 cars that I've calculated per day that will use 36th Avenue to enter 88th will be delayed 44.5 seconds X 908 = 40,406 seconds, or 673.43 minutes, or 11.22 hours. This is if no other factors are included such as accidents and train crossings or other lanes of the intersection that do not directly have traffic entering or exiting 36th Avenue. This level of service is unacceptable.

J. The collision analysis only provides the number of collisions; it does not include the amount of time that traffic was delayed during each accident. Accidents severely delay access to 36th Avenue and the time that access is delayed MUST be accounted for in all traffic LOS calculations, and it does not appear to be

3) I am concerned that the groundwater will be permanently polluted, damaged and be unusable due to the construction and future runoff from the development.

Many of the existing houses use well water and once a well is polluted it is extremely difficult if not impossible to restore the water to the level of purity that previously existed before construction. No effective mitigation plan has been submitted that addresses this concern. Please provide a proper

mitigation plan that not only addresses the water purity concerns and also provides an avenue of effective resolution should wells become polluted and unusable in the future.

Additionally, who is going to be responsible for the polluting of the wells and/or the potential health risks associated? Who will be responsible for addressing and mitigating the issue to the satisfaction of the homeowners impacted?

Conclusion

- Based on existing neighborhood factors and information received from the City of Marysville and KB Homes, it is unsafe to allow the addition of 59 homes to the existing neighborhood to proceed
- The neighborhood's concerns over the safety of adding an additional 59 homes to an already unsafe situation for the entire neighborhood of only one way in and one way out are not being properly acknowledged, addressed, or mitigated by the City of Marysville or KB Homes
- The neighborhood's concerns over maintaining the purity of the existing well water and water table are not being properly acknowledged, addressed, or mitigated by the City of Marysville or KB Homes
- It appears that the numbers of trips per household that are calculated for the new development are being severely underestimated, which improperly skews the numbers in to result in a lower LOS rating for the 88th and 36th Avenue intersection, and in favor of KB Homes and approval of the development
- It appears that the City of Marysville is not interested in allowing the existing residents of the neighborhood in which the development is planned to have any input to the decision of whether or not the development can proceed

Please provide sufficient answers to the above questions and provide proper and effective mitigation plans for all areas of concern before any further progress is made on this development. Thank you.

Sincerely,

John W. and Nikki V. Ray

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Dear Emily,

Below are our concerns regarding the SEPA report.

RE: 30051600301400, 30051600301500, 30051600301600, 30051600304500
30051600304501, 30051600305800, 30051600306500, 30051600306600

File #PA24-024

On Wednesday, July 31, 2024 the City of Marysville city council held a meeting regarding the above referenced development. Over 70 residents attended and voiced their concerns over the development of said project by KB Homes.

At the meeting the city council did not address any of the resident's concerns. Some of the council members were laughing at the residents and made light of our concerns (it is on the audio and video recordings). The way the residents' concerns were not addressed and ignored is not appropriate.

We are writing to explain to you specific issues we have with the KB Homes development.

The City of Marysville openly disregarding it's own codes and ordinances in how traffic and safety is to be addressed**. Specifically not addressed:**

a. Two entrances
b. Complete Street requirement of making traffic decision that properly serve all residents of the community

Not taking into account the cumulative impact of the KB Homes development will have. Concerns being the current residents potential for well contamination from the development. 90% of the homes that will immediately surround the development are on wells and the potential for the development run off to adversely impact safe drinking water is a real

concern.

a. 4 round-a-bouts in less than half mile
b. Train traffic
c. When train traffic stops all traffic that means emergency vehicles will not be able to reach residents in need
d. Impact of additional businesses opening (potentially BurgerMaster) at 90th & 36th
e. Impact of an additional apartment development at 90th & 36th

We are for responsible growth within Marysville; however, we are against blatant lack of respect to it's citizens by repeatedly not addressing stated and written concerns about traffic and emergency services.

We look forward to hearing back from you in addressing these real and deeply concerning issues.

Cordially,

John and Nikki Ray

Some people who received this message don't often get email from sa.warthen@gmail.com. Learn why this is important

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Thank you for this email.

I believe there are many reasons that this project needs to be on hold **until multiple Safety issues are resolved**. If the following issues cannot be resolved to protect the current residents, the development needs to be reduced or denied.

1. Fire Department and Emergency Services access -- currently problematic
2. Street Access - Dead End Road
3. City Water Capacity,
4. Well Water Quality & Contamination Risk
5. City Sewer extension and capacity

Fire Department and Emergency Services access
Multiple times each day 88th Street has all lanes full of vehicles for an extended period of time due to the Train at 88th and State, or the huge quantity of traffic that travels that road. It is impossible for emergency vehicles to gain access to this neighborhood.

The business traffic for Chick-Fil-A, Starbucks, and other businesses in the area, which was added in 2020, have added the complexity of all lanes of 36th, the single access point, being frequently blocked with that business traffic. In addition, the proposed addition of Burger Master, businesses, and 16 apartments is additional congestion added to an already over burdened street capacity.

During the July 31, 2024 meeting regarding the development, there was a reference to the addition of multi lane traffic circles but these add minimal space. I-5 Exit 200 is frequently at a stand still for a half mile of I-5. Those cars could easily pack all lanes of the circles. Any road capacity changes need to happen prior to adding additional traffic.

Street Access - Dead End Road
Replacing 5 homes, down a **one and one half mile long dead end road**,

with 59 homes is a 34% increase in the number of homes which already have safety issues. This seems unreasonable without the addition of at least one external access road. I don't believe this complies with the intent of the residential access laws mentioned during the July 31, 2024 meeting regarding the requirement for two or more exits from neighborhoods. The current long narrow access road runs parallel to the I-5 Right of way and weaves through the neighborhood.

The proposed subdivision shows two exits, however, both exits go onto the same dead end road, the roads show different street names, however, it's logically all one long road.

If you look at the street map of the area, you will see that turning from 88th onto 36th between 7-11 and Chick-Fil-A, the road becomes a long dead end road. There are multiple street names as the road weaves through the older large isolated residential area. The turns are 36th, left on 90th, right on 35th; which runs parallel to I-5; right on 98th, left on 39th, left on 100th, 100th ends in a Cul-de-sac near I-5 Right of Way. There is a side street onto 35th which also ends in a cul de sac. The number of homes that currently rely on this single access point is about 170, all relying on one way in and out, complicated by multiple businesses at the single entrance/exit point of 88th and 36th.

The permit plan says there are two exits from the proposed neighborhood, however, even though the neighborhood exits are onto two different street names they both exit to the same long dead end road.

City Water
Does the current City Water system have the capacity to provide good water pressure, since many of the current homes have wells the system may be overwhelmed. It could potentially need to serve a 100% growth in number of home served.

Well Water Quality & Contamination Risk
A majority of the homes in the area are not on City Water or Sewer. It's essential to protect the existing homes, this new subdivision will put the existing homes at risk. The average city dweller has no knowledge about protecting the ground water quality since they totally rely on the City Water system.

The addition of 59 homes and over 120 cars; based on average vehicles per household; will result in lots of contaminants, which will pollute the well water. Many of the things we see as normal daily tasks result in contaminants being introduced into the ground water; washing a car or other outside items, chemicals used for lawns and gardens, treating for pests, things that leak onto the ground from vehicles and much more.

City Sewer Capacity and Construction Plan

The plan is to extend the city sewer system which runs the length of 35th. This work will also cause traffic and safety problems since the work will need to be completed under the road that is the single access point for the neighborhood. What is the plan to be sure people can traverse the full 1.5 miles while this work is being performed? It's very likely the emergency response time will be impacted during the work. The statement was just one week to perform the work. That seems barely enough time to get the work started, much less completed.

Will this dump into the sewer collection point behind Haggen, does that collection point have the capacity to handle the increase, a majority of the 170 homes that will remain have septic tanks, it's very likely a 100% increase in sewage that will need to be handled.

Thank you very much for addressing these concerns. I look forward to your response.

30051600304501, 30051600305800, 30051600306500, 30051600306600

Date of Completeness: August 29, 2024

NOTICE IS HEREBY GIVEN THAT AN APPLICATION WAS MADE FOR THE FOLLOWING PROPOSAL:

The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.

Existing Environmental Documents: SEPA Environmental Checklist; Traffic Impact Analysis; Geotechnical Report; Critical Area Report; Tree Retention Plan; Preliminary Drainage Report

Public Hearing: An Open Public Record Decision Hearing is required for this application; a subsequent Notice of Hearing will be published at a later date.

Public Comment Period: Written comments must be submitted to the contact person listed below by

5:00 PM on September 24, 2024.

Document Availability: **http://docs.marysvillewa.gov/htcomnet/public/?folder=7607ade1**

ANY PERSON HAS THE RIGHT TO RECEIVE NOTICE, PARTICIPATE IN ANY HEARINGS, REQUEST A COPY OF THE FINAL DECISION AND APPEAL THE DECISION AS PROVIDED BY LAW.

For project information or to become a party of record, please contact:

Emily Morgan, Senior Planner | (360) 363-8216 | **emorgan@marysvillewa.gov**

How are we doing? Please take our survey and let us know!

QUESTIONS/CONCERNS FROM PUBLIC	STAFF RESPONSES
Fire safety and emergency access	• Analysis of police response was prepared by Marysville Police Department (included in Exhibit 023). Chief Erik Scairpon concludes that recent years show lower call responses to this neighborhood compared to earlier years taken into account. Further, traffic incidents/accidents occurring at the 36th Ave NE and 88th St NE intersection were reviewed with the following statement: ○ *According to the incident data, 16 collisions have been reported at said intersection in 2024 (as of 8/15/24). In total, there have been 131 collisions reported in the vicinity of this intersection since 2016 with an average of 15 collisions per year. Within the measured area [98th Street NE Neighborhood Area], 83% of collisions occur at this intersection. In 2024, there appear to have been three major collisions at this intersection* • The proposed development has two points of access proposed, but there is only one point of access into the greater neighborhood. Typically, (2) points of access are required into neighborhoods, however, when residential fire sprinklers are installed, (1) access is allowable. • Per Exhibit 024, Tom Maloney, Marysville Fire District Fire Marshal, provided the following response: ○ *MFD response times would be similar to our current response times (fire trucks and aid cars). The plans were reviewed based on current adopted standards. All response vary based on availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.* *All of the new buildings will be equipped with fire sprinklers. The fire department is willing to provide neighborhood fire safety talks to raise the awareness of fire safety practices for all residents. The fire district will continue to provide service at a high level to the neighborhood.* *If residents would like more information on retrofitting their homes with fire sprinklers using a well, we can provide that as well. This is an option for those who would like to add additional safety in their homes. A good website for residential fire sprinklers is www.homefiresprinkler.org or they can contact Fire Marshal Tom Maloney 360-363-8506.* • Adequate fire flow to hydrants must be demonstrated. Further, additional fire hydrants must be installed with development.
Wells and groundwater contamination	• As part of the development, the existing wells and septic systems in the project area would be decommissioned per the standards of the Snohomish County Health District and Washington State Department of Ecology.

	• All runoff from the site would be required to be contained and treated onsite via a stormwater facility. Facilities that treat stormwater are required to be located a minimum of 100 ft. from private wells.
	  ○ With application, a Preliminary Drainage Report, dated August 1, 2024, prepared by Latta Engineering, PLLC, was provided. Said report outlines how all runoff from pollutant generating impervious and pervious areas will be routed to underground stormwater infiltration chamber facilities for flow control and water quality treatment to fully mitigate stormwater runoff in accordance with the 2019 WA Dept. of Ecology Stormwater Management Manual. No untreated runoff would be permitted to discharge off the proposed project site.
	  ○ The preliminary storm drainage design was performed in accordance with the current State regulations, which the City of Marysville has adopted. Those regulations call for stormwater to generally maintain the surface-runoff patterns that existed historically. This site is underlain by a soil identified as the "Marysville Sand" unit, which is an outwash variety of soil that is typically conducive to stormwater infiltration. The vast majority of rainfall at this site can be expected to infiltrate into the underlying soil in the historic condition, so the State regulations require the site to continue infiltrating this stormwater. Prior to infiltration, stormwater must be routed through a pre-settling device to remove sediment, and a stormwater treatment mechanism must be provided. Percolation of water through native soil can be an effective treatment mechanism if the soil meets certain criteria. The project will be required to perform lab tests to determine if the underlying soil is suitable for treatment. Regardless of those tests, the preliminary stormwater design calls for a maintenance-layer of sand, to be installed immediately beneath the stormwater facility. This sand will be an engineered-mix, specifically intended to provide the required treatment, in addition to any pollutant removal that will occur via percolation through the native soil.
	• The applicant shall be required to prepare and provide a geotechnical wet season groundwater monitoring report to verify seasonal high water table depth and determine if groundwater mounding analysis is required. The results of said monitoring shall be provided to the City prior to recording the final plat.
	• The applicant shall be required to complete and provide a hydrogeologic site review and design report, prepared by a professional hydrogeologist, to supplement the stormwater design and address concerns pertaining to proposed stormwater infiltration Best Management Practices (BMPs) in the vicinity of existing wells surrounding the project site.

Traffic issues and roadway improvements	• Development traffic impacts are addressed with each development as applications are submitted and reviewed per the City Traffic Impact Analysis (TIA) Guidelines. At this time, no formal application has been submitted for the development of a Burger Master/Mixed Use development at 8917 and/or 8925 35th Ave NE. If/when an application is submitted for these parcels, the developer will be required to submit a TIA to evaluate the traffic impacts of such development which will include a requirement that

	the traffic impacts of any surrounding developments, such as the Stevens PRD development, be included within the baseline traffic to be analyzed. ○ With application, a Traffic Impact Analysis (TIA) prepared by Kimley-Horn & Associates, Inc., dated July 2024 (Exhibit 011), was provided. Said TIA was reviewed and accepted by the City's Traffic Engineer. ○ The City of Marysville, nor does any other local jurisdiction, have the ability to alter train operations, including the number of and/or time of operation of train traffic. Given the unpredictability of train traffic and subsequent impossibility of determining, influencing or altering train traffic, traffic impacts are not feasible to fully evaluate train traffic impacts. Being as the purpose of a TIA is to evaluate a typical PM Peak (or other) time period, traffic impacts caused by trains are not evaluated as part of a TIA. ○ The City's Traffic Engineering Manager reviewed the TIA and issued a written concurrency recommendation dated October 16, 2024 (Exhibit 021), informing the developer of the project's impacts and mitigation obligation pursuant to MMC 22D.030, Traffic Impact Fees and Mitigation. Pursuant to MMC 22D.030.070(1)(d), an applicant is required to make a written proposal for mitigation of traffic impacts based on the concurrency recommendation. The applicant accepted the requirements outlined in the traffic concurrency recommendation on October 16, 2024 (Exhibit 025). Said issued recommendation determines that the proposed development, as conditioned, would meet concurrency as required per MMC 22D.030. • The development is required to construct new public roadways internal to the development and upon existing roadway frontage to accommodate a Complete Streets approach. This is accomplished through City planning and design with planned roadway cross-sections established based upon a context sensitive approach that is, in the case of developments, required for construction as part of a development and subsequent frontage improvements. For the subject development, public streets internal to the development and upon adjacent frontage of existing streets will be required to construct roadway improvements that include pedestrian friendly features such as sidewalks, ADA curb ramps, landscape strips, etc. that meet City Roadway standards developed with a Complete Streets context sensitive philosophy. • A roundabout at 88th and 36th is planned for construction soon. The effectiveness of the roundabout has been extensively studied by Washington State Department of Transportation (WSDOT) and has taken into consideration future trip forecasts through 2044. Refer to the project and link below. • The Tulalip Tribes, in partnership with WSDOT and the City, plan to construct a series of roundabouts at the I-5 and 88th Street NE interchange, including the intersection at 36th Street NE and 88th Street NE. This project is funded in part by State, Federal and Tribal funds and is slated for construction in

	2025/2026. Learn more about the project here: I-5 - SR 528 - Marine Drive and 88th St. NE Interchanges - Tulalip Tribes lead | WSDOT (wa.gov)

Tree removal/retention
(i.e. wind damage, wildlife, air quality)
	• Significant trees, which include evergreen trees 8 in. in diameter or greater and/or deciduous trees 12 in. in diameter or greater, shall be retained as outlined in MMC 22G.090.570(2).
	  ○ With application, the applicant provided a Tree Conservation Plan, dated August 28, 2024, prepared by an ISA Certified Arborist with Soundview Consultants, LLC (Exhibit E008) that assessed the significant trees located on and adjacent to the project site. Of the significant perimeter trees identified, (97) have been assessed as having the highest potential for retention. Many of these perimeter trees to be retained have identified Critical Root Zones (CRZ), which would be protected to the greatest extent possible. All trees identified to be retained shall be clearly identified on the grading plans. Prior to commencement of ground disturbing activities, all retained trees shall be protected and marked in the field.
	• With application, a Wetland and Fish and Wildlife Habitat Assessment, dated June 20, 2024, prepared by Soundview Consultants, LLC, assessed the site for the presences of critical areas. Staff reviewed the provided assessment and concurred with the finding that no critical areas as regulated by MMC 22E.010 were present on the project site.
	  ○ While displacing wildlife is never ideal, this area is in the vicinity of the large, protected habitat around Quil Ceda Creek. The area surrounding the creek is highly protected and should provide adequate habitat for local wildlife.

Septic systems and sewer failing	• Engineering analysis indicates that gravity flow of the proposed sewer line extension is acceptable. No lift or pump station is needed to support sanitary sewer for the proposed development. • The proposed development would be utilizing public sewer with the existing septic systems being decommissioned. • With development bringing sewer into the neighborhood, this may provide opportunity for other properties to connect to City sewer if a property owner's septic system were to fail.
Road closures with construction	If restrictions are required, the developer is required to keep one lane of travel open with traffic control to assist. At least one lane of 35th Ave NE will be required to remain open during installation of the sewer main to the property. Appropriate traffic control and flagging will be required. Typical traffic delays through construction zones can be expected. Based on the length of sewer extension it is anticipated these delays could last between two (2) to three (3) weeks.

Sidewalks and pedestrian safety	As a requirement for this development, frontage improvements (curb, gutter and sidewalk) along the involved parcels are required. Typically, there is no nexus and proportionality to require a developer to extend frontage improvement outside the boundaries of the project road frontages.
Prices of homes and property values	Typically, development within more "rural" portions of a community raises property values as it increases the opportunity for urban services (i.e. water and sewer). Additionally, the type of residential development can either increase or decrease property values. For instance, high-end, well-planned housing development can attract more affluent buyers, thereby raising the area's overall market value.
Costs for taxpayers	The developer is responsible for all required upgrades and improvements, including payment of all land use, construction, and building review fees.
School district capacity	The Marysville School District (MSD) is required to adopt a 6-year Capital Facilities Plan (CFP) biannually. The CFP provides an analysis of facilities needed to support student capacity for grade, middle and high school facilities. Based on a review of the existing CFP the MSD has experienced a decrease in population and has adequate capacity for additional students for new families moving into the district.
Loss of privacy and neighborhood character	• While the proposed development would increase the housing density within the neighborhood, the proposed land use would remain the same as the surrounding single family residential neighborhood. This proposed development would keep with the residential character, just done in a more compact manner. • When this area was developed under Snohomish County, the lot sizes were required to be large enough to accommodate private/shared wells along with on-site septic systems. The previous zoning of this area under Snohomish County jurisdiction allowed for the same density as the current zoning allows under the City. • There was a development done in 2002 (Quil Ceda Vista) when this area was still in unincorporated Snohomish County. The density of that plat area is the same as what is proposed in this current project because the Quil Ceda Vista development had access to public water and sewer. • Given that there is now availability to public utilities, this area can accommodate these smaller lots sizes. The zoning for the property allows for single family lots at higher density. These parameters were set in place based on the availability of public utilities and housing demands. This proposed development would be reviewed to ensure compliance with all applicable City zoning code as well as the comprehensive plan, including density and bulk and dimensional standards for the R-4.5 zone (medium density, single-family).

PLAT RESTRICTION NOTES - PRD DEVELOPMENT STANDARDS

1. ACCESSORY DWELLING UNITS SHALL NOT BE PERMITTED FOR SINGLE-FAMILY DETACHED DWELLINGS.
2. EACH SINGLE-FAMILY DETACHED UNIT SHALL HAVE AT LEAST 200 SQUARE FEET OF PRIVATE OPEN SPACE SET ASIDE AS PRIVATE SPACE FOR THAT DWELLING UNIT. NO DIMENSION OF SUCH OPEN SPACE SHALL BE LESS THAN 10 FEET. THE OPEN SPACE DOES NOT NEED TO BE FENCED OR OTHERWISE SEGREGATED FROM OTHER DWELLINGS OR OPEN SPACE IN THE DEVELOPMENT UNLESS SO CONDITIONED THROUGH THE APPROVAL PROCESS.
3. PURSUANT TO MMC 22G.080.080, MODIFICATION OF DEVELOPMENT REGULATIONS, A MINIMUM OF THREE PARKING STALLS ARE REQUIRED TO BE PROVIDED FOR EACH DETACHED SINGLE-FAMILY DWELLING UNIT. TWO OF THE STALLS MUST BE ON THE SITE AND READILY AVAILABLE TO THE DWELLING UNIT. THE THIRD STALL MAY BE ON-STREET PARKING OR PROVIDED NEARBY TO THE DWELLING. COMPLIANCE FOR THESE PARKING REQUIREMENTS SHALL BE VERIFIED BASED ON REVIEW OF THE FINAL CIVIL CONSTRUCTION PLANS AND SUBMITTAL OF THE BUILDER'S HOUSE PLANS AT THE TIME OF BUILDING PERMIT SUBMITTAL.
4. NO DIRECT ACCESS IS PERMITTED FROM LOTS WITHIN THE SUBDIVISION ONTO 98th STREET NE.
5. PURSUANT TO MMC 22G.080.070, AT LEAST 25% OF THE DWELLING ON LOTS LESS THAN 5,000 SF MUST HAVE VEHICLE ACCESS POINTS VIA SHARED OR SINGLE-CAR-WIDTH DRIVEWAY, ALLEY, AUTO COURT, OR OTHER METHOD OF ACCESSING DWELLINGS OTHER THAN DIRECT STREET ACCESS:
   – ALL 59 PROPOSED LOTS ARE GREATER THAN 5,000 SF (NOT APPLICABLE).
6. ANY LOT UNDER 5,000 SF MUST DEMONSTRATE COMPLIANCE WITH MMC 22C.010.310, SMALL LOT SINGLE FAMILY DEVELOPMENT STANDARDS, PRIOR TO BUILDING PERMIT ISSUANCE.
7. PURSUANT TO MMC 22G.080.050(2)(C), DESIGN OF THE PROPOSED DEVELOPMENT ACHIEVES THE FOLLOWING RESULTS:
   – (iv) LANDSCAPING, BUFFERING, OR SCREENING IN OR AROUND THE PROPOSED PRD
   – (vii) INCORPORATING ENERGY-EFFICIENT SITE DESIGN OR BUILDING FEATURES
8. PER MARYSVILLE FIRE DISTRICT REVIEW, FIRE SPRINKLERS ARE REQUIRED FOR ALL HOMES DUE TO THE SINGLE ACCESS POINT VIA 35 AVE NE.

ZONING AND LAND USE SUMMARY

ZONING:	R-4.5
PROPOSED LAND USE:	MEDIUM DENSITY SINGLE FAMILY RESIDENTIAL
PROPOSED DENSITY:	59 LOTS
PHASING:	1 PHASE
HOUSING MIX RATIO WITHIN 300 FT:	100% SINGLE FAMILY DETACHED

LOT DENSITY AND RESIDENTIAL DENSITY INCENTIVES SUMMARY

1. NET PROJECT AREA (PER MMC 22A.020.150)

GROSS SUBJECT PROPERTY AREA (R-4.5 ZONE):	595,713 SF	13.676 Ac
LESS FLAT 20% REDUCTON PER MMC 22A.020.150 (R-6.5 ZONE):	(119,143 SF)	(2.735 Ac)
NET PROJECT AREA (FOR DENSITY CALCULATIONS):	476,570 SF	10.941 Ac

2. LOT DENSITY CALCULATION (PER MMC 22C.010.080)

BASE DENSITY (4.5 DWELLING UNITS PER AC): (13.676 Ac – 2.735 Ac) x 4.5 DU/Ac = 49.2 (49)
MAX. BONUS DENSITY (20% PRD INCREASE): BASE DENSITY (49) x 0.20 = 9.8 (10) *
*BONUS DENSITY ACHIEVED VIA APPLICATION OF RESIDENTIAL DENSITY INCENTIVES (RDI'S).

MAX. ALLOWABLE DENSITY: 49.2 + 9.8 = 59.0 (59 DU)

PROPOSED PROJECT PRD DENSITY: BASE DENSITY (49.2) + BONUS (9.8) = 59 LOTS **

** NOTE:
REQUIRE 9.8 RDI BONUS UNITS TO ACHIEVE PROPOSED 59 LOT PRD DENSITY.
RDI UNITS PROPOSED = 9.85 (10)

3. LOT PROPOSAL SUMMARY

TOTAL NUMBER OF SINGLE FAMILY LOTS PROPOSED:	59 LOTS
AVERAGE LOT SIZE:	6,776 SF

CITY PROJECT FILE #: PA24-024

TITLE REPORT ENCUMBRANCES: PARCEL A

TPN 300516-003-016-00

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry
   Grantor: State of Washington
   Recording No.: 1209090
   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.
2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress, egress and utilities
   Recording Date: August 17, 1962
   Recording No.: 1553273
3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: Public Utility District No. 1 of Snohomish County and West Coast Telephone Company
   Purpose: Electric transmission and/or distribution system
   Recording Date: December 27, 1962
   Recording No.: 1581756
   Affects: Portion of said premises
4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209
5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):
   Recording No: 8003100173
   Said short plat is a revision of short plat recorded under Recording No. 7810200401.
6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:
   Recording Date: July 26, 1999
   Recording No.: 199907260975
7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines and/or water lines
   Recording Date: February 12, 2001
   Recording No.: 200102120728
   Affects: Portion of said premises
8. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
   Year: 2024
   Tax Account No.: 300516-003-016-00
   Levy Code: 00511
   Assessed Value-Land: $272,800.00
   Assessed Value-Improvements: $219,700.00
   General and Special Taxes:
   Billed: $3,927.28
   Paid: $0.00
   Unpaid: $3,927.28
9. A deed of trust to secure an indebtedness in the amount shown below,
   Amount: $282,276.00
   Dated: December 7, 2020
   Trustor/Grantor: Isaac A. Steimle and Rebekah L. Steimle, who acquired title as Isaac Steimle and Rebekah Steimle, husband and wife
   Trustee: George C. Reinmiller Trustee Inc
   Beneficiary: Mortgage Electronic Registration Systems, Inc., solely as nominee for Boeing Employees' Credit Union
   Loan No.: 336148
   Recording Date: December 11, 2020
   Recording No.: 202012110574
10. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $100,000.00
    Dated: August 20, 2022
    Trustor/Grantor: Isaac Steimle and Rebekah Steimle, husband and wife
    Trustee: Trustee Services, Inc.
    Beneficiary: Boeing Employees' Credit Union
    Recording Date: August 30, 2022
    Recording No.: 202208300421
    The Deed of Trust set forth above is purported to be a "Credit Line" Deed of Trust. It is a requirement that the Trustor/Grantor of said Deed of Trust provide written authorization to close said credit line account to the Lender when the Deed of Trust is being paid off through the Company or other Settlement/Escrow Agent or provide a satisfactory subordination of this Deed of Trust to the proposed Deed of Trust to be recorded at closing.

    Levy Code: 00511
    Assessed Value-Land: $0.00
    Assessed Value-Improvements: $32,000.00
    General and Special Taxes:
    Billed: $254.51
    Paid: $0.00
    Unpaid: $254.51
    Affects: Mobile home on Lot 2
18. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
    Year: 2024
    Tax Account No.: 300516-003-014-00
    Levy Code: 00511
    Assessed Value-Land: $308,300.00
    Assessed Value-Improvements: $290,100.00
    General and Special Taxes:
    Billed: $4,769.56
    Paid: $0.00
    Unpaid: $4,769.56
    Affects: Lot 4
19. Mobile home improvements are expressly excluded.
20. It appears Bonnie Stevens is deceased. The Company finds no probate of the decedent's estate in Snohomish County County. This commitment is therefore subject to the rights of heirs and devisees, creditors (including liens under RCW 43.20B.080), liability for inheritance tax, or other matters that a probate of the estate might disclose.
    If we are requested to insure title passing outside of probate, the Company will require the following:
    a. Completed, signed and acknowledged Lack of Probate Affidavits (both the Company's internal underwriting version and the shorter version for recording).
    b. A certified copy of the Death Certificate.
    c. A copy of the Community Property Agreement, if any.
    d. A copy of the decedent's Will and codicils, if any.
    e. A Real Estate Excise Tax Affidavit executed by the inheriting party(ies), to file at the time of recording the Lack of Probate Affidavit, as required by WAC 458-61A-202(6).
    The Company reserves the right to make additional requirements upon review.
21. Any unrecorded leaseholds, right of vendors and holders of security interests on personal property installed upon the Land and rights of tenants to remove trade fixtures at the expiration of the terms.

TITLE REPORT ENCUMBRANCES: PARCEL D (CONTINUED)

TPN 300516-003-065-00

4. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: Ingress and egress
   Recording Date: March 30, 1978
   Recording No.: 7803300209
5. Covenants, conditions, restrictions, recitals, reservations, easements, easement provisions, encroachments, dedications, building setback lines, notes, statements, and other matters, if any, but omitting any covenants or restrictions, if any, including but not limited to those based upon race, color, religion, sex, sexual orientation, familial status, marital status, disability, handicap, national origin, ancestry, or source of income, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth on Short Plat No. SP-182(4-78):
   Recording No: 8003100173
   Said short plat is a revision of short plat recorded under Recording No. 7810200401.
6. City of Marysville Recovery Contract No. 214 and the terms and conditions thereof:
   Recording Date: July 26, 1999
   Recording No.: 199907260975
7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: City of Marysville
   Purpose: Storm sewer and sanitary sewer lines and/or water lines
   Recording Date: February 12, 2001
   Recording No.: 200102120728
   Affects: Portion of said premises
8. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.
9. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):
   Year: 2024
   Tax Account No.: 300516-003-065-00
   Levy Code: 00511
   Assessed Value-Land: $278,500.00
   Assessed Value-Improvements: $385,400.00
   General and Special Taxes:
   Billed: $857.34
   Paid: $428.67
   Unpaid: $428.67.
10. The property herein described is carried on the tax rolls as partially exempt under a Senior Citizen's exemption and the assessed values have been "frozen." If said taxes are not paid prior to the sale by or death of the qualifying taxpayer, the exemption will be disallowed, the assessed value will be adjusted and the full tax amount for the current and/or prior years, if any, will be due:
    Levy Code: 00511
    Estimated amount of tax without exemption, including special taxes and charges: $ 3,133.61.
11. A deed of trust to secure an indebtedness in the amount shown below,
    Amount: $101,900.00
    Trustor/Grantor: Stanley G. Hipkiss and Christine J. Hipkiss, husband and wife
    Trustee: First American Title Insurance Company
    Beneficiary: Metlife Home Loans
    Recording Date: June 27, 2011
    Recording No.: 201106270341.

TITLE REPORT ENCUMBRANCES: PARCEL D (CONTINUED)

TPN 300516-003-015-00

1. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry
   Grantor: State of Washington
   Recording No.: 1209089
2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Purpose: ingress, egress and utilities
   Recording Date: August 10, 1962
   Recording No.: 1551572
   Affects: West 20 feet
3. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:
   Granted to: Public Utility District No. 1 of Snohomish County
   Purpose: Transmission and/or distribution system

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Ms Morgan,

I am writing in regard to the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development between 98th St. and 100th Pl. in Marysville.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and the concerns of the families residing in the neighborhood.

Amongst our concerns are:

1. The amount of traffic that would be added to our streets with only one way in and one way out.
2. The amount of time it will take for emergency vehicles to reach us.
3. How our trees will survive the storms once the protection of the Stevens property is cleared.
4. Being as our area is on wells, how will this affect our water.

There are many other concerns but this is just to name a few.

Carmen Nielsen
3814 100th Pl.
N.E.
Marysville, Wa.
98270

(carmien@msn.com)

This is answer to question #2 about emergency response from fire. Our response times would be similar to our current response times. All responses vary based on availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.

Concerns Regarding Housing Development Project (PA24-024)

Dear Emily Morgan,

I am writing to submit my comments on the proposed housing development project (PA24-024). While I understand the need for growth, I have several concerns about the potential impacts this project will have on the surrounding community and environment, particularly in terms of traffic, environmental degradation, tree retention, fire safety, and potential effects on nearby water sources. Below are my key points:

1. Traffic Impact, Emergency Access, and Roundabouts

The Traffic Impact Analysis highlights that the development will significantly increase traffic, particularly on 35th Ave., which serves as the only entry and exit point for both current and future residents. The proposed traffic improvements, including the addition of three roundabouts, are insufficient to mitigate the congestion, particularly when trains are passing through the area.

What is more troubling is that the Environmental Impact Study admits that instead of meaningfully addressing traffic issues, the developers will pay an impact fee, effectively acknowledging they are worsening the traffic situation. This gives the impression that the developers prioritize their profits over community wellbeing, as it appears they prefer to pay a fee rather than invest in improving the infrastructure for the neighborhood.

I urge the city to reconsider this approach and require the developers to implement traffic improvements beyond paying a fee, as the current plan will exacerbate traffic congestion, negatively affecting current residents.

2. Fire Safety and Increased Danger for Existing Residents

I am also deeply concerned about the increased fire safety risks this development imposes on current residents. The new homes will likely be equipped with modern fire safety measures, but existing residents will face a higher danger without the ability to afford expensive upgrades like water sprinklers.

Moreover, the current homes are not being given access to public water and sewer systems, which

places them at a further disadvantage. These homes rely on well systems, and in the event of a power outage, the well pumps will not function, leaving residents without water pressure. Even if sprinklers were added, they would not work under these circumstances. The increased fire risk, paired with the lack of support for traditional homes, puts current residents in a more precarious and dangerous situation.

The city must consider the inequitable situation this creates, where new, wealthier homes are built with modern safety features, while long-standing, traditional homes are left in an increasingly dangerous environment. This is particularly unjust given the rich historical attributes of the neighborhood, which are not being respected or preserved.

3. Environmental Impact and Unmentioned Creek Belonging to the Tulalip Tribe

Another significant concern is that the Environmental Checklist failed to mention a nearby creek that belongs to the Tulalip Tribe. This is a serious oversight, as the creek plays an important role in the Tribe's cultural and environmental heritage.

There is a real risk of pollution from construction runoff, chemicals, and sedimentation, which could harm water quality and the ecosystem. Furthermore, future residents may use yard chemicals—such as fertilizers, pesticides, and herbicides—that could seep into the groundwater, impacting both the creek and the existing wells used by current residents. It is especially concerning that future residents, whose water will come from the city, will not have the same concerns about protecting the groundwater that current residents depend on.

The city must ensure that the developers implement robust environmental protections, including restrictions on chemical use and a comprehensive plan to safeguard the creek and the water resources of the community. Furthermore, it is critical that the Tulalip Tribe is consulted and their rights and interests are respected.

4. Risk of Groundwater Contamination and Well Drying for Nearby Residents

The project raises serious concerns about both the contamination and drying up of existing wells, which many current residents rely on for their water supply. The construction process and potential changes to the groundwater table could disrupt these wells, while chemical runoff from the new development could further contaminate the water.

The city should require a thorough hydrological study to assess the potential risks to the water table and ensure the continued water security of existing residents. Moreover, given that the new development will have city water, current residents should not be disproportionately affected by risks created by the development.

5. Tree Retention and Loss of Vegetation

The Arborist Report reveals plans for significant tree removal, which will reduce the area's natural beauty, wildlife habitats, and stormwater absorption. These trees are not only essential for the local ecosystem but also contribute to the historical and aesthetic character of the neighborhood.

I recommend that the city enforce stronger measures to minimize tree removal and require the replanting of native species to replace any lost trees. This would help maintain the ecological balance and preserve the unique character of the neighborhood.

In conclusion, I have significant concerns about the negative impacts this development will have on traffic, fire safety, water resources, and the environment. The development is increasing risks for existing residents—both in terms of safety and quality of life—without providing meaningful solutions to mitigate those risks. The developers' plan to simply pay an impact fee for worsening traffic, without addressing the root issues, is particularly troubling, as it demonstrates a disregard for the long-term needs of the community.

I urge the city to prioritize the safety and well-being of the current residents, the protection of the local environment, and the preservation of the neighborhood's historical attributes. Further studies,

improved infrastructure, and greater consideration for existing residents and the Tulalip Tribe are necessary before any approval is granted for this project.

Thank you for your attention to these important matters.

Sincerely,

Brent and Jade Seman

Answer to question #2:
All of the new buildings will be equipped with fire sprinkler systems which should operate during a power interruption as long as the pressure within the water system is unaffected. While this cannot be for certain, all fire systems within the area would be impacted as well.

The fire department is willing to provide neighborhood fire safety talks to raise the awareness of fire safety practices for all residents.

The fire district will continue to provide service at a high level to the neighborhood.

If residents would like more information on retrofitting their homes with fire sprinkler systems using a well we can provide that as well. This is an option for those who would like to add additional safety in their homes. A good website for residential fire sprinklers is www.homefiresprinkler.org or they can contact Tom Maloney 360-363-8506.

Attn: Emily Morgan

Planning Department

Community Development

Marysville, WA

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed currently to the Marysville Planning Commission for a 59 single home development just north of 98th Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024 in the Marysville Civic Center the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families currently living in this neighborhood. Beyond the many concerns about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water and the sewer constraints, my concern is over the issue of safety for the neighborhood and the increase in bottlenecking traffic.

The developers feel they have alleviated a fire risk by installing sprinkler systems in the new homes because code states you must have two access points in and out of a neighborhood for fire safety or install sprinkler systems in all the houses. However, our neighborhood has only one in/out access to begin with, and with the addition of 59 families accessing our one way out (35th Ave NE) the added traffic will bottleneck our neighborhood access to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access, not addressing other emergency vehicles such as ambulances and police emergency access in and out.

The property has not yet been purchased so this is only a proposal, but I (and 99% of my neighbors) believe this housing project should be stopped before it is even started. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Regards

James R. Lubbehusen

[CAUTION:] This email originated from outside the City of Marysville. Do not click links or open attachments unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Good Morning,

I would like to offer my comments concerning the application submitted by KB Homes for the high density build in our neighborhood.

My family has been living in this community for 33 years and have witnessed first hand the impact of the I-5 88th street on/off ramps and various commercial projects and improvements which brought grocery, gas and restaurants to 88th. This brought services as well as much traffic stress accessing our homes. The narrow road which winds back to our community is a dead end. There is only one way in and out. At peak traffic the intersection is often blocked affording no ability access 36th. Factor in the congestion pinch of the left turn to access the strip mall dev grounded by Chik Fil A, Starbucks, Jersey Mike's and other tenants -the narrow two lane road is blocked completely. Adding 59 homes - potentially 2-3 cars per household will undoubtedly have a negative impact on travel in and out. There are concerns about Fire/ Aid access as well.

Traffic along 35th Street is treacherous now. No sidewalks. No ADA provisions? Can we get side walks and ADA?

How will the build affect on our water quality? Are there City assurances that the build will not impact our wells?

In closing I would like to invite you all to visit our neighborhood. Arrange to come at peak hours during the week. Weekends too.
Word of caution - If you stop at the Starbucks on 88th for coffee you won't be able to take a legal left out of the retail strip mall to travel north in order access our community where the 59 houses are proposed. Who thought that was a good idea?

I appreciate your time.

Regards,

Joan Sauter
3602 100th PL NE.

Here's one and the other is attached:

Dear Members of the Marysville Planning Committee:
I am writing to express my concerns regarding the KB Developers' proposal to construct 59 new houses in our neighborhood, particularly focusing on the implications of having only one access point for both entry and exit. This layout may significantly compromise our safety, as emergency vehicles would face delays reaching homes in care of a crisis, and congestion could lead to hazardous traffic patterns at peak times. Additionally, I worry about the strain this development could place on community resources and our local ecosystem, as increased population density can overwhelm existing infrastructure and lead to the degradation of nearby natural habitats. I urge the Planning Commission to consider these critical factors before moving forward with the project.
Thank you for your attention to these matters.

"Love me when I least deserve it, because that's when I really need it." ~~ Swedish Proverb

[CAUTION:] This email originated from outside the City of Marysville. Do not click links or open attachments unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Concerns with the proposed 59 homes on 13.5 acres off of 88th in Marysville.

There is only one way in and out of this neighborhood. Adding a potential 120+ additional cars driving in and out to an already congested roadway (88th) is beyond making sense.

The City of Marysville doesn't take care of the roads, trees, etc as of now. A tree from this corner fell during a storm and took out a power line. Took the city a couple DAYS to get to it, we were stuck. Watched medics walk a stretcher back here because they could not get their vehicle past the tree with wires tangled in it.

The frontage road (35th) suffers from at least once a year a tree falling from the west side across the power lines. Always takes days for someone from the city to take care of it. GENERATORS ARE A MUST BACK HERE. Will those families buying houses back here be advised to buy generators? So irresponsible of the City.

It is all over the news that 2 elementary schools will be closing their doors in Marysville, as well as the potential for programs such as sports, etc to be discontinued. The two schools closing are on each side of the school serving kids from this neighborhood. Where are these potential 100 kids going to school? I wouldn't buy a house in Marysville if I had school aged children.

At the Q&A meeting that was set up for this project, it was all questions, no answers. We did learn that not only is this new neighborhood going in this area, but the City has also approved another restaurant/strip mall and apts?!?! Remember one way in and one way out of here! We invite everyone that is apart of this project to drive back here, preferable in separate cars, at the same time, either at 7-8:30am, noon, or 4-6pm, when a train has passed thru and when Chic Fillet has REOPENED. There was a EMT that spoke at this meeting stating that their response time is high due to congestion on 88th, and was concerned about more traffic. Can't change the trains coming thru, but until the roads are fixed for traffic that it has now, zero additional building should be granted. An accident at the entrance to this neighborhood causes HOURS of delay in and out of here! Not OK!!

We moved back here when it was a 2 lane road over the RR tracks from State Street, and a wooden bridge over Quilceda Creek (35 years ago). We can't stop progress, but when it comes to our safety, emergency response, that we as City of Marysville taxpayers deserve, we have to speak up. Please, take a drive, and see how very irresponsible and unsafe it is to put so many additional homes in this area.

Thank you for your time,
Concerned Neighbor

RE: File Number: PA24-024
Project Title: Stevens PRD

Dear Emily,

I am referencing the Stevens Marysville housing project being proposed to the Marysville Planning Commission for a fifty-nine single home development just north of 98th
Street and 35th Ave NE in Marysville, WA.

During a meeting held on July 31, 2024, in the Marysville Civic Center, the neighbors of the proposed project met with developers and city planners to discuss the details of the proposal and concerns of the families residing in the neighborhood. We are concerned about losing the natural beauty provided by dozens of 100+ year old trees, the degradation to our well water, and the sewer constraints, and my biggest concern is safety for the neighborhood with the increase in bottlenecking traffic. Most of my neighbors are elderly and have health issues.

However, our neighborhood has only one in/out access, and with the additional fifty-nine houses which increases the neighborhood by thirty-three percent. The added traffic will bottleneck our neighborhood to an extremely unsafe condition, and subsequently violate city code. Additionally, their comment about the code only discussed fire equipment access,
not addressing other emergency vehicles such as ambulances and police emergency access in and out.

To the best of my knowledge, the property has not yet been purchased. I believe this housing project should be stopped immediately. Please listen to the families of our beautiful and relatively safe neighborhood, and do not allow this project to continue.

Thank you for your time.

Mary Steiner

MFD response times would be similar to our current response times (fire trucks and aid cars). The plans were reviewed based on current adopted standards. All response vary based on availability of fire units and location of the units. Our average response times are within acceptable ranges. Traffic and Safety Concerns Regarding the Proposed Development of 59 Homes

To: City of Marysville Planning Department
Re: Proposed Development near 10011 39th Dr NE, Marysville, WA
From: Matt Johnson
Date: 09/20/24

I am writing to express serious concerns regarding the traffic and safety implications of the proposed 59-home development near **10011 39th Dr NE**. The findings from the **Traffic Impact Analysis** reveal significant issues that will exacerbate traffic congestion in an area already burdened by commercial activity from **Burgermaster** and **Chick-fil-A**. These businesses already generate substantial traffic, which will only worsen with the introduction of new homes, impacting local traffic flow, safety, and pedestrian infrastructure.

Cumulative Traffic Impact from Burgermaster, Chick-fil-A, and New Development

The traffic generated by **Burgermaster** and **Chick-fil-A** regularly causes congestion on **35th Avenue NE** and **98th Street NE**, especially during peak meal times. The proposed development of 59 homes is projected to add **509 daily trips**, with **54 new PM peak-hour trips**. This additional traffic will compound the existing congestion caused by these commercial businesses, leading to further delays, increased accident risks, and safety concerns for both drivers and pedestrians.

Without proper mitigation measures, traffic flow on these streets will deteriorate, leading to further degradation of the **Level of Service (LOS)** at critical intersections such as the **I-5 ramps at 88th Street NE**. A **Traffic Impact Analysis (TIA)** must be conducted or updated to account for the **cumulative traffic** from both the new development and the nearby commercial establishments, and the analysis should recommend necessary improvements, such as traffic signals, turn lanes, or roundabouts to alleviate these issues.

Pedestrian Safety: The Need for Sidewalks

The current infrastructure on **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** is inadequate to support safe pedestrian movement. With increased traffic from both the development and commercial activity, it is critical that the City installs **sidewalks** along these roads. Pedestrians, including families and children, are at significant risk of accidents if forced to walk on roads shared with vehicles.

Burgermaster and **Chick-fil-A** already generate considerable vehicle and foot traffic, particularly during lunch and dinner hours. The proposed development will introduce additional vehicles and pedestrians into the mix, further complicating the traffic dynamics in this area.

Sidewalks are necessary not only for pedestrian safety but to ensure that traffic flow remains smooth by keeping pedestrians off the road.

Single Access Point and Emergency Response Concerns

39th Dr NE, where I reside, is a **dead-end street** with only one entry and exit point. The increased traffic resulting from the development will exacerbate congestion along this single route, creating delays and bottlenecks, particularly during peak times. This will also pose a significant risk in emergency situations, as emergency vehicles may be delayed by traffic jams or accidents blocking the only route in and out of the neighborhood.

In addition, the **five-year collision history** at the **I-5 ramps at 88th Street NE** indicates a high risk of accidents at these intersections, which further underscores the need for mitigation. The City must ensure that emergency response times are not compromised by increased congestion, and traffic management measures such as **emergency lanes** or optimized **traffic signal prioritization** should be considered.

Conclusion

To address the serious traffic and safety concerns related to the proposed development and the cumulative impact from **Burgermaster** and **Chick-fil-A**, I urge the City of Marysville to:

1. **Conduct or update a comprehensive Traffic Impact Analysis (TIA)** to account for the **combined effects** of traffic from the new development, Burgermaster, and Chick-fil-A.
2. **Install sidewalks** along **35th Avenue NE**, **98th Street NE**, and **39th Dr NE** to provide safe walking spaces for pedestrians.
3. Address the **single access point** issue on 39th Dr NE by considering alternative routes or traffic management solutions to prevent bottlenecks and ensure emergency response times are not compromised.
4. Implement **traffic calming measures** to mitigate the increased congestion and improve safety at key intersections, particularly at the **I-5 ramps at 88th Street NE**.

These measures are critical to ensuring that the development proceeds safely and responsibly, without exacerbating existing traffic problems caused by nearby commercial establishments. I trust that the City will take these concerns seriously and implement the necessary infrastructure improvements.

Thank you for your attention.

Sincerely,
Matt Johnson

MFD response times would be similar to our current response times (fire trucks and aid cars). The plans were reviewed based on current adopted standards. All response vary based on availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.

All of the new buildings will be equipped with fire sprinklers. The fire department is willing to provide neighborhood fire safety talks to raise the awareness of fire safety practices for all residents.

The fire district will continue to provide service at a high level to the neighborhood.
If residents would like more information on retrofitting their homes with fire sprinklers using a well we can provide that as well. This is an option for those who would like to add additional safety in their homes. A good website for residential fire sprinklers is www.homefiresprinkler.org or they can contact Fire Marshal Tom Maloney 360-363-8506.

State Environmental Policy Act (SEPA, RCW 43.21C)
https://app.leg.wa.gov/RCW/default.aspx?cite=43.21C
SEPA requires the assessment of environmental impacts, including traffic congestion and road safety, for new developments.

Washington State Growth Management Act (RCW 36.70A)
https://app.leg.wa.gov/RCW/default.aspx?cite=36.70A
This act mandates proper infrastructure planning, including traffic and transportation systems, to accommodate new developments and protect public safety.

Hirst Decision (Whatcom County v. Hirst, Futurewise, et al., 2016)
https://fortress.wa.gov/ecy/publications/parts/1611064part1.pdf
While focused on water, this case emphasizes the importance of evaluating infrastructure impacts, including traffic, before allowing development.

Snohomish County v. Pollution Control Hearings Board (2016)
https://law.justia.com/cases/washington/supreme-court/2016/91335-6.html
This case underlines the need for compliance with regulations that address environmental and infrastructure impacts, including the effects on traffic and public safety.

Washington Stormwater Management Regulations (WAC 173-201A)
https://app.leg.wa.gov/WAC/default.aspx?cite=173-201A
Stormwater runoff affects traffic safety, especially in areas where roads are impacted by excess water and insufficient drainage, increasing accident risks.

Marysville SEPA Rules (22E.030)
https://www.codepublishing.com/WA/Marysville/html/Marysville22E/Marysville22E030.html
The local SEPA rules require traffic impact analysis for developments, focusing on the safety and functionality of transportation systems.

Marysville Stormwater Code (6.20)
https://www.codepublishing.com/CA/Marysville/#!/MarysvilleCA06/MarysvilleCA0620.html
Managing stormwater runoff is essential to maintaining safe road conditions, as poorly managed runoff can lead to unsafe driving conditions.

Some people who received this message don't often get email from sa.warthen@gmail.com. Learn why this is important

[CAUTION:] This email originated from outside the City of Marysville. **Do not click links or open attachments** unless you recognize the sender and know the content is safe. Contact helpdesk if you have any concerns or questions.

Thank you for this email.

I believe there are many reasons that this project needs to be on hold **until multiple Safety issues are resolved**. If the following issues cannot be resolved to protect the current residents, the development needs to be reduced or denied.

1. Fire Department and Emergency Services access -- currently problematic
2. Street Access - Dead End Road
3. City Water Capacity,
4. Well Water Quality & Contamination Risk
5. City Sewer extension and capacity

Fire Department and Emergency Services access
Multiple times each day 88th Street has all lanes full of vehicles for an extended period of time due to the Train at 88th and State, or the huge quantity of traffic that travels that road. It is impossible for emergency vehicles to gain access to this neighborhood.

The business traffic for Chick-Fil-A, Starbucks, and other businesses in the area, which was added in 2020, have added the complexity of all lanes of 36th, the single access point, being frequently blocked with that business traffic. In addition, the proposed addition of Burger Master, businesses, and 16 apartments is additional congestion added to an already over burdened street capacity.

During the July 31, 2024 meeting regarding the development, there was a reference to the addition of multi lane traffic circles but these add minimal space. I-5 Exit 200 is frequently at a stand still for a half mile of I-5. Those cars could easily pack all lanes of the circles. Any road capacity changes need to happen prior to adding additional traffic.

Street Access - Dead End Road
Replacing 5 homes, down a **one and one half mile long dead end road**,

with 59 homes is a 34% increase in the number of homes which already have safety issues. This seems unreasonable without the addition of at least one external access road. I don't believe this complies with the intent of the residential access laws mentioned during the July 31, 2024 meeting regarding the requirement for two or more exits from neighborhoods. The current long narrow access road runs parallel to the I-5 Right of way and weaves through the neighborhood.

The proposed subdivision shows two exits, however, both exits go onto the same dead end road, the roads show different street names, however, it's logically all one long road.

If you look at the street map of the area, you will see that turning from 88th onto 36th between 7-11 and Chick-Fil-A, the road becomes a long dead end road. There are multiple street names as the road weaves through the older large isolated residential area. The turns are 36th, left on 90th, right on 35th; which runs parallel to I-5; right on 98th, left on 39th, left on 100th, 100th ends in a Cul-de-sac near I-5 Right of Way. There is a side street onto 35th which also ends in a cul de sac. The number of homes that currently rely on this single access point is about 170, all relying on one way in and out, complicated by multiple businesses at the single entrance/exit point of 88th and 36th.

The permit plan says there are two exits from the proposed neighborhood, however, even though the neighborhood exits are onto two different street names they both exit to the same long dead end road.

City Water
Does the current City Water system have the capacity to provide good water pressure, since many of the current homes have wells the system may be overwhelmed. It could potentially need to serve a 100% growth in number of home served.

Well Water Quality & Contamination Risk
A majority of the homes in the area are not on City Water or Sewer. It's essential to protect the existing homes, this new subdivision will put the existing homes at risk. The average city dweller has no knowledge about protecting the ground water quality since they totally rely on the City Water system.

The addition of 59 homes and over 120 cars; based on average vehicles per household; will result in lots of contaminants, which will pollute the well water. Many of the things we see as normal daily tasks result in contaminants being introduced into the ground water; washing a car or other outside items, chemicals used for lawns and gardens, treating for pests, things that leak onto the ground from vehicles and much more.

City Sewer Capacity and Construction Plan

The plan is to extend the city sewer system which runs the length of 35th. This work will also cause traffic and safety problems since the work will need to be completed under the road that is the single access point for the neighborhood. What is the plan to be sure people can traverse the full 1.5 miles while this work is being performed? It's very likely the emergency response time will be impacted during the work. The statement was just one week to perform the work. That seems barely enough time to get the work started, much less completed.

Will this dump into the sewer collection point behind Haggen, does that collection point have the capacity to handle the increase, a majority of the 170 homes that will remain have septic tanks, it's very likely a 100% increase in sewage that will need to be handled.

Thank you very much for addressing these concerns. I look forward to your response.

Date of Completeness: August 29, 2024

NOTICE IS HEREBY GIVEN THAT AN APPLICATION WAS MADE FOR THE FOLLOWING PROPOSAL:

The applicant is proposing a 59-lot Planned Residential Development (PRD) subdivision of approximately 13.67 acres. The subject site is comprised of an assemblage of (7) existing lots; there are (5) existing residences with accessory structures that are to be demolished with development. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.

Existing Environmental Documents: SEPA Environmental Checklist; Traffic Impact Analysis; Geotechnical Report; Critical Area Report; Tree Retention Plan; Preliminary Drainage Report

Public Hearing: An Open Public Record Decision Hearing is required for this application; a subsequent Notice of Hearing will be published at a later date.

Public Comment Period: Written comments must be submitted to the contact person listed below by

5:00 PM on September 24, 2024.

Document Availability: **http://docs.marysvillewa.gov/htcomnet/public/?folder=7607ade1**

ANY PERSON HAS THE RIGHT TO RECEIVE NOTICE, PARTICIPATE IN ANY HEARINGS, REQUEST A COPY OF THE FINAL DECISION AND APPEAL THE DECISION AS PROVIDED BY LAW.

For project information or to become a party of record, please contact:

Hi Emily,

I was engaged by KB Home to complete a peer review of the TIA completed by KimleyHorn for the Stevens Assemblage development. The attached reflects my responses for comments 1 and 2. Please let me know if you have any questions or comments.

Thanks,
Kassi

Constitution Amendment XIV regarding due process, Washington State Constitution Article 11, Section 11 regarding police powers, RCW 82.02.020, RCW 43.21C.030, 43.21C.033, and 43.21C.060, RCW 36.70B.060, Marysville Municipal Code, and common law based on the following reasons:

1.1. *The City acted in an arbitrary, capricious, and unlawful manner an/or exceeded the City's lawful authority, and erred in issuance of the MDNS;*

1.2. *The director committed an error of law or misinterpreted the applicable city regulation, ordinance, or other state law or regulation;*

1.3. *The director's findings, conclusions, and/or conditions are not supported by the record; and/or;*

1.4. *Newly discovered evidence alleged to be material to the director's decision which could not reasonably have been produced prior to the director's decision.*

In accordance with WAC 197-11-680(3)(a)(v), any SEPA appeal is consolidated with the hearing on the underlying governmental action in a single simultaneous hearing before the hearing examiner. For clarity, an evaluation and recommendation of the underlying land-use permit application is provided in a separate staff recommendation.

The City suggests the Hearing Examiner conduct a review of the SEPA appeal first, followed by review of the proposed PRD Subdivision.

RESPONSE TO APPELLANT'S CONTENTIONS

The appellant made the following contentions in the appeal:

1. ***The access afforded the Appellants under current conditions is inadequate. Often times during each day the traffic on 88th Street NE is severely congested and vehicles attempting to reach 36th Avenue NE are unable to do so because of the congestion. This congestion also restricts access to the Appellants' properties by Fire, law enforcement, or other similar emergency service providers. This traffic congestion is further impacted when a train is traveling along the train tracks that parallel State Avenue, resulting in a complete traffic stoppage between Interstate 5 (to the west) and State Avenue (to the east).***

   Applicant's Response: The *Stevens Assemblage Traffic Impact Analysis* (Kimley-Horn, July 2024) evaluated the 88th Street NE corridor which was shown to meet the identified LOS standards. Note that the TIA evaluates typical conditions, which does not assume a train event is taking place which is typical of all jurisdictions. The TIA also identifies that there is a planned improvement along the 88th Street corridor to address existing congestion concerns. This project is identified to be funded and would include the installation of roundabouts at the three study intersections of 36th Avenue NE and the two I-5 Ramps.

   In addition to the TIA review, the Fire Marshal and Police Department provided feedback for the proposed development which is summarized below.

   Fire Marshal: The Fire Marshal has reviewed the proposal and has provided a number of access related requirements to which the project will need to adhere. By addressing these requirements, the project will be in compliance and meeting the safety needs; therefore, providing adequate service for both the existing users as well as the proposed dwellings.

   Marysville Police department: The Police department conducted a review of public safety access and call volumes in the vicinity of the proposed project (September 2024). The review identified that "recent years show lower call responses to this neighborhood compared to earlier years taken into account in this review."

1.1. **Supplementary Staff Response:** The City of Marysville, nor does any other local jurisdiction, have the ability to alter train operations, including the number of and/or time of operation of train traffic. Given the unpredictability of train traffic and subsequent impossibility of determining, influencing or altering train traffic, traffic impacts are not feasible to fully evaluate train traffic impacts. Being as the purpose of a TIA is to evaluate a typical PM Peak (or other) time period, traffic impacts caused by trains are not evaluated as part of a TIA.

Per Exhibit 024, Tom Maloney, Marysville Fire District Fire Marshal, provided the following response: *MFD response times would be similar to our current response times (fire trucks and aid cars). The plans were reviewed based on current adopted standards. All responses vary based on the availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.*

2. ***The addition of 509 additional daily trips will exacerbate the existing conditions to a point where the traffic congestion will result in a level of service (LOS) that is below the LOS that is acceptable in the City.***

2.1. **Applicant's Response:** Level of service impacts at an intersection are reviewed for the City of Marysville during the PM peak hours, when traffic volumes are greatest. The *Stevens Assemblage Traffic Impact Analysis* (Kimley-Horn, July 2024) estimated the project would add 54 net new trips during the PM peak hour with 34 inbound and 20 outbound. The analysis as reviewed and approved by City of Marysville staff shows the study intersections along 88th Street NE are forecast to meet the identified LOS standards with the development of the project.

2.2. **Supplementary Staff Response:** With application, a Traffic Impact Analysis (TIA) prepared by Kimley-Horn & Associates, Inc., dated July 2024 (Exhibit 011), was provided. Said TIA was reviewed and accepted by the City's Traffic Engineer.

The City's Traffic Engineering Manager reviewed the TIA and issued a written concurrency recommendation dated October 16, 2024 (Exhibit 021), informing the developer of the project's impacts and mitigation obligation pursuant to MMC 22D.030, Traffic Impact Fees and Mitigation. Pursuant to MMC 22D.030.070(1)(d), an applicant is required to make a written proposal for mitigation of traffic impacts based on the concurrency recommendation. The applicant accepted the requirements outlined in the traffic concurrency recommendation on October 16, 2024 (Exhibit 025). Said issued recommendation determines that the proposed development, as conditioned, would meet concurrency as required per MMC 22D.030.

3. ***Many of the Appellants' properties obtain water through private wells. The surface water that will be generated by the additional impermeable surfaces that result from the 59 additional dwelling units threatens contamination of these private wells, depriving the residents of potable water.***

3.1. **Applicant's Response:** The project design proposes to mitigate stormwater runoff utilizing standard Best Management Practices (BMPs) in accordance with the following requirements:

- MMC 14.15 (Controlling Storm Water Runoff from New Development, Redevelopment and Construction Sites);
- State Dept of Ecology's 2019 Stormwater Management Manual for Western Washington (2019 SWMM); and

Ms. Emily Morgan - Senior Planner
City of Marysville – Community Development Department
80 Columbia Avenue
Marysville, WA 98270

Re: Technical Review #1 Comments (PA24-024)
Stevens PRD, 98th Street NE, Marysville, WA

Dear Ms. Morgan,

Latta Engineering, PLLC has prepared this letter to summarize project design revisions in accordance with your City staff technical review comments letter dated Sept 25, 2024.

Subdivision/PRD Comments (Ms. Emily Morgan - Senior Planner)

1. Include File Number PA24-024 on all future correspondence, in addition to all site, civil and landscape plans:
   - File Number PA24-024 is now included on all civil and landscape plans as noted.
2. Given the large public interest in the project, with one of the major concerns relating to groundwater contamination of existing on-site wells, please provide an analysis that would address how this concern would be mitigated and/or prevented:
   - The project design proposes to mitigate stormwater runoff utilizing standard Best Management Practices (BMPs) in accordance with the following requirements:
     - MMC 14.15 (Controlling Storm Water Runoff from New Development, Redevelopment and Construction Sites),
     - State Dept of Ecology's 2019 Stormwater Management Manual for Western Washington (2019 SWMM), and
     - City of Marysville Engineering Design and Development Standards (EDDS)
   - This project will result in greater than 5,000 sf of new impervious surface area therefore the project shall comply with all 9 Minimum Requirements outlined in the 2019 SWMM. **Minimum Requirement #2 (Construction Stormwater Pollution Prevention), Minimum Requirement #3 (Source Control of Pollution) and Minimum Requirement #6 (Runoff Treatment) are most applicable to the public's concerns pertaining to potential groundwater contamination**.
   - A full Construction Stormwater Pollution Prevention plan will be prepared for the project addressing all 13 elements to fully satisfy **Minimum Requirement #2** in accordance with the 2019 SMWW.
   - Appropriate source control BMPs shall be applied to the project to fully satisfy **Minimum Requirement #3** in accordance with the 2019 SMWW. The intent of source control BMPs is to prevent stormwater from coming in contact with pollutants. Proposed source control BMPs will include Operational BMPs and Structural Source Control BMPs. These BMPs will be detailed and shown the stormwater site plan and civil construction plans for City review and approval.

- Runoff Treatment (**Minimum Requirement #6**) is required to reduce pollutant loads and concentrations in stormwater run-off using physical, biological, and chemical removal mechanisms so that beneficial uses of receiving waters are maintained. Single family residential subdivision projects are required to meet the Basic Treatment Performance Goal per the 2019 SWMM.
- Please note that the storm water site plan design proposed for the Stevens PRD exceeds the Basic Treatment Performance Goal. When site conditions are feasible, storm water infiltration can potentially be the most effective BMP for Runoff Treatment. Moreover, due to the hydrologic benefits of infiltration, the State Dept of Ecology recommends providing runoff treatment by infiltrating into the site's native soils when site conditions are feasible to do so.
- As stated above, the storm water runoff management design proposed herein for the project exceeds the Basic Treatment Performance Goal (i.e. full infiltration design meets the Phosphorus Treatment, Enhanced Treatment, and Basic Treatment Performance Goals).
- Potential adverse impact on ground water quality was evaluated in the storm water design process (site characterization evaluation and site suitability criteria considerations). A geotechnical investigation was completed by Earth Solution NW, LLC that evaluated the suitability of the site for infiltration, established the infiltration rate for design, depth to seasonal high groundwater table and other geotechnical information needed to design and assess constructability of the infiltration BMP.
- To protect ground water quality, the final infiltration BMP design will include the following to comply with and exceed the 2019 SWMM requirements:
    - Perform geotechnical wet season groundwater monitoring program (by Earth Solution NW, LLC) to verify seasonal high water table depth and determine if ground water mounding analysis is required. Four groundwater monitoring wells have already been installed on the site for groundwater monitoring throughout the 2024–2025 wet season (October 2024 to April 2025).
    - Perform hydrogeologic site review and design memorandum by professional Hydrogeologist (The Riley Group, Inc) to supplement the stormwater design and address neighbor concerns pertaining to proposed stormwater infiltration BMPs in vicinity of existing wells surrounding our project site.
    - Design and construct stormwater management BMPs for the project that exceeds the Basic Treatment Performance Goal required for this project (design shall meet the Phosphorus Treatment and Enhanced Treatment Performance Goals)
    - Install pre-treatment BMPs (hydrodynamic separator or filter cartage vault) prior to infiltration facilities to remove oil and influent suspended solids (to reduce potential plugging of the soils).
    - Construct infiltration gallery BMPs with imported underlying amended soils to ensure soil suitability for water quality treatment (i.e. soil with sufficient organic content and sorption capacity to remove pollutants).
    - Develop an Operation and Maintenance Plan for the stormwater system that includes provisions for regular and perpetual maintenance of the infiltration BMPs, including replacement and/or reconstruction of any media relied upon for Runoff Treatment purposes.

3. On page C-1, the total number of lots proposed (see under #3 of Lot Density and Residential Density Incentives Summary) is 49; please revise accordingly.

   - Number of lots corrected as noted.

4. To be eligible for RDI credits, the proposed benefit incentive must go above what is required per code. Per MMC 22G.080.100, 35% of required area of open space must be in active recreation. Therefore, 0.574 acres must be for active open space. Any area in excess of that total may be used towards RDI benefits. Active open space area to be dedicated for RDI 6(a) must not be double counted. Meaning open space area that is required per the PRD standards of MMC 22G.080.100 (in this case 0.574 acres) may not be used to achieve bonus density. Please revise the open space and RDI calculations accordingly.

   - **RDI 6.a**: Calculations revised as noted as is summarized on Civil Sheet C-1. The minimum active open space for the project (0.574 Ac) has been subtracted from Tract 999 area (1.239 Ac) to apply the Dual Use Storm Detention RDI calculation as follows:
     - [Tract 999 Area – Min. Open Space Area] x 5 = RDI 6a Credit
       [1.239 Ac – 0.574 Ac] x 5 Bonus Units per Ac = **3.32 RDI Bonus Units**
   - **RDI 6.b**: Dual Use Storm Detention (Tract 998) provides 2 bonus units per acre of storm water facility tracts used for passive recreation as follows:
     - Tract 998 Area x 2 = RDI 6b Credit
       0.287 Ac x 2 Bonus Units per Ac = **0.57 RDI Bonus Units**
   - **RDI 7.c**: Project Design - Perimeter Fencing with landscaping provides 1 bonus unit per 500 LF of PRD perimeter fencing as follows:
     - Length of Fence / 500 = RDI 7c Credit
       2,978 LF / 500 = **5.96 RDI Bonus Units**
   - Please note that RDI 7.f credit for enhanced entry landscaping has been deleted (i.e. no longer proposing this as an RDI credit).

5. Per the RDI benefits outlined in the preliminary civil plans, sections of perimeter fencing is proposed. Please clearly demonstrate where this fencing is proposed along with the details of the proposed fencing:

   - Perimeter fencing locations and extents are shown and called on revised civil Sheet C-5.
   - Fencing details are provided on the revised landscape plans.

5.1 Per MMC 22G.090.580, a 6 ft. sight obscuring fence shall be required if: during grading plan review, the existing grade will be increased by a 2 ft. or greater vertical grade change and the grade increase causes the new lots to be at a higher elevation than the abutting property. Therefore, in areas that are required to be fenced pursuant to the above, those sections of perimeter fencing would not be eligible for RDI as previously mentioned.

   - Comment noted. Proposed site grading design shall match adjacent surrounding properties as noted.

Critical Area Comments

6. Staff has reviewed and concurs with the findings that the site does not contain critical areas per the Wetland and Fish and Wildlife Habitat Assessment, prepared by Soundview Consultants, LLC, dated June 20, 2024.

    - Comment noted.

Landscape Plan Comments

Prior to civil construction plan approval, a detailed landscape plan depicting all the applicable elements outlined in MMC 22C.120 and 22C.070.210 shall be approved. Based on a cursory review of the proposed landscaping plan, staff has the following comments:

7. The provided landscape plan does not include the required elements of MMC 22C.120.030(2), specifically:

7.1 As mentioned above in #5, please depict all proposed perimeter fencing and include the fencing details/specs.

- Perimeter fencing locations and details are provided on the revised preliminary landscape plans. Detailed landscape plans, specifications and details shall be provided with the future civil construction plan set and land disturbance permit submittals.

7.2 All landscaped areas shall be provided with an irrigation system or a readily available water supply with at least one outlet located within 50 feet of all plant material. Please provide an irrigation plan.

- Comment noted. Detailed irrigation plans, specifications and details shall be provided with the future civil construction plan set and land disturbance permit submittals.

7.3 The common and scientific names of all plant materials used, along with their size at time of planting.

- Comment noted. Plant material specifications and details shall be provided with the future civil construction plan set and land disturbance permit submittals.

7.4 Existing trees and other natural and unique features shall be preserved wherever possible. The location of these features must be considered when planning the open space, location of buildings, underground services, walks, paved areas, playgrounds, parking areas, and finished grade levels.

- Comment noted. The Tree Conservation Plan prepared by Soundview Consultants LLC dated August 28, 2024 was completed to assess the size and condition of significant trees present on the subject property. The PRD civil grading plan will not significantly alter the existing site (landform grading). Tree retention considerations shall be completed in accordance with MMC 22G.090.570. When and where it is not feasible to retain healthy significant trees, the trees shall be replaced onsite within a proposed planting plan, an alternative site plan, or by payment into the City's tree fund per MMC 22G.090.570 (2)(d).
- Per the Soundview Tree Conservation Plan, 97 of the perimeter trees have been assessed as having the highest potential for retention, with the majority situated along the northern property boundary. Soundview's Tree Retention Map and removal analysis plan has been reviewed by the project's Landscape Design Consultant (Cascade Design Group). The retention of the perimeter trees however will be determined on a case-by-case basis during construction by the project's Certified Arborist, taking into account several key factors. Future civil construction plans for site clearing and

land disturbance shall detail clearing limits to preserve these trees. All trees being retained shall have tree protection fencing installed at the extent of their driplines or their critical root zones (CRZ). Tree protection fencing shall consist of high visibility mesh fencing that will be installed prior to the commencement of site work. No traffic or materials shall enter the tree protection zone.

- Please refer to the revised preliminary civil grading plan (Sheet C-5) that incorporates and depicts the trees included for retention per the Tree Conservation Plan prepared by Soundview Consultants, dated August 28, 2024.

8. As proposed, the enhanced landscaped area does not appear to be compliant with the RDI provision of 7(f). The landscaping would not be considered "exceptional, outstanding, or unique design". Please provide more elements to better meet those standards.

   - Please note that RDI 7.f credit for enhanced entry landscaping has been deleted (i.e. no longer proposing this as an RDI credit).

9. Please include trees that provide shade in areas where pedestrians would be gathering (i.e. picnic tables, benches, etc.).

   - See attached revised preliminary landscape plans as noted. The future detailed landscape plans will ensure shade trees are proposed in areas where pedestrians will be gathering.

10. All open space areas that include children's play areas need to be fenced. Please provide example/details of said fencing to the details sheet of the plans.

    - See attached revised preliminary landscape plans as noted.

11. The details page on L5 appears to have some errors or are providing wrong images; see the "Active Open Space West" and the "Playground" details.

    - See attached revised preliminary landscape plans as noted.

12. Location of precast vault lids need to be shown as well as proposed access to said lids:

    - Future detailed civil construction plans need to be completed in order to identify all proposed vault access lid and cover location. Detailed landscape plans will show all access lid locations as noted.

Civil Review Comments (Kacey Simon, Civil Plan Reviewer)

1. Existing utilities:

   a) Sanitary sewer: The nearest sewer is a 10" PVC main located south at the intersection of 35th Ave NE and 94th PL NE which is about 1500 feet away.

      - Comment noted. This is the sewer connection point for extension to our site.

   b) Water: There currently is an 18" ductile iron water main located along the west side of the property that can be found on record drawing W745.

      - Comment noted.

   c) Storm: There is not any storm infrastructure in this area.

- Comment noted. Stormwater management will be based on infiltration BMPs in accordance with City development standards.

2. Per MMC 14.03.250, utilities are to be extended along the street frontages of the proposed project.
   a) Sewer, water and storm will need to be extended along all property frontage on both sides. Please note that manholes shall be provided at a maximum of 400' intervals for 8" – 15" sewer mains and the minimum slope for 8" sewer main is 0.40% and for 10" sewer main is 0.28.
      - Comment noted. Revised civil plans propose utilities along the project frontage as noted.
3. Frontage improvements are required per MMC 12.02A.090 on all projects. Frontage improvements are described as curbs, gutters, and sidewalks; underground storm drainage facilities; patching the street from its preexisting edge to the new curb line; and overlayment of the existing public street to its centerline.
   a) 98th St NE is classified as a local access street and is to be built compliant with SP 3-202-002 of the EDDS with half street improvements along the project frontage.
      - Comment noted.
   b) 35th Ave NE shall be built compliant with SP 3-218-002. We originally thought there was only 26' so we asked for two – ten foot travel lanes and a sidewalk adjacent to the north bound traffic lane. Since it appears we have 30', we would like to keep two – ten foot travel lanes with a 5' landscape strip and 5' sidewalk.
      - The proposed typical section on civil sheet C-6 reflects the revised road section per our recent conference call with City staff as follows:
        - Two 10 ft travel lanes
        - Sidewalk on east side only (6 ft width) located adjacent to the curb (no landscape strip)
        - Street trees to be located behind the sidewalk adjacent to the east ROW property line.
4. Access:
   a) The new roads shall be constructed to SP 3-218-001.
      - Comment noted.
   b) Auto courts are permitted in a PRD. The auto court is to be built per the private road profile, SP3-202-004, with decorative concrete or stamped asphalt. They shall not exceed 150' in length or come off a cul-de-sac and shall serve a maximum of 6 lots.
      - Comment noted.
   c) Elbow intersections per SP 3-209-002 are allowable on local access streets only and are subject to intersection spacing requirements established under section 3-209 of the EDDS.
      - Comment noted.
   d) The minimum width of a residential driveway is 12', and the maximum is 26'. Curb cuts shall be limited to a 20' maximum.
      - Comment noted.

5. Drainage: All projects in the city of Marysville must comply with requirements stipulated under the MMC 14.15.040 and 14.15.050.

   a) Stormwater drainage: The city has adopted the 2019 Ecology Manual. Projects above the 2,000 square feet and/ or 5,000 square feet threshold must comply with requirements stipulated in Volume I of the Stormwater Management Manual for Western Washington.

      - Comment noted.

   b) It looks like infiltration is being proposed and there appears to be at least 5' of separation to the seasonal high-water table, a mounding analysis will be required if there is less than 5' of separation. The mounding analysis shall be performed during the wet season.

      - Comment noted.

   c) The maximum allowed impervious surface coverage for the Zoning designation is 70%.

      - Comment noted.

6. Survey control datum NAVD-88 and NAD-83 are required to be used. Civil construction plans will not be accepted in any other datum.

   - Comment noted.

7. Fire flow will need to be completed prior to 1st civil plan review and submitted with 1st civil plan review. Contact Ryan Keefe at 360-363-8168 to schedule.

   - Fire flow test has already been completed (see attached City memo from Ryan Keefe).

8. Trench restoration is to be completed in accordance with section 3-703 of the EDDS. A full lane or full street overlay may be required.

   - Comment noted.

9. The onsite grading and placement of any retaining walls must be compliant with section 22D.050.030 of the MMC.

   - Comment noted.

10. The applicant is responsible for identifying any existing well or septic systems on site or on adjacent properties. If there are any existing septic systems on site, they need to be decommissioned based on the Snohomish Health District standards. If there are any wells on site, they need to be decommissioned based on Department of Ecology standards.

    - Comment noted.

11. Please refer to MMC 22G.030.020 for applicable plan review and construction inspection fees.

    - Comment noted.

12. All civil construction plan submittals are to be uploaded directly to our online portal...

    - Comment noted.

13. Please be advised these comments are in reference to specific items and do not imply a full review of the proposed application. Additional comments which may change the design requirements will be provided during the civil construction plan review process.

    - Comment noted.

Traffic Comments (Mr. Danny Hagen – Associate Traffic Engineer)

1. The traffic impact analysis performed in Exhibit–011 of 54 new PM peak-hour trips is accepted with a mitigation fee of $340,200.
   - Comment noted.

2. The Snohomish County Traffic Mitigation Offer document in Exhibit-012 is accepted and a filled copy is attached
   - Comment noted.

3. Driveways accessing public streets shall not be aligned with driveways on the opposite side but instead shall be staggered to enable parking and emergency vehicle access without parking restrictions. Driveway access locations should be reconsidered for lots accessing Road C, Road A west of Road B, and Road B south of Road C.
   - Comment and requirement noted. Driveways location within the PRD have been staggered to the extent feasible considering intersection setbacks, sight distance, civil utility lot services, and dry utility lot services.

4. Although not required for land use approval, the following comments are provided to guide later civil construction plan approval. No response is required at this time.
   a) Street Lights are required along on-site roadways and any constructed frontage improvements.
      - Comments and requirements noted.
   b) A sight-distance analysis will be required at all new roadway intersections. See EDDS Std. Plans 3-212-001 & 002 for further guidance improvements.
      - Comments and requirements noted.
   c) A signing and marking plan shall be required as part of civil construction plans.
      - Comments and requirements noted.

Fire District Comments (Mr. Brian Merkley, Deputy Fire Marshal)

1. General Information:
   a) The project shall comply with current fire code requirements (2021 IFC) including WA State and local City of Marysville amendments to the fire code, city design standards, and all applicable NFPA standards, including IFC Chapter 33 and NFPA 241 construction codes.
      - Requirement noted.
   b) Fire marshal approval of fire access and fire hydrant/water supply systems is required as part of the civil construction plan review and approval process.
      - Comment noted.

2. Water Related:

a) All homes will require fire sprinklers per MMC 9.04.503.1.5 Exception 1. Due to single point of access at 36th Ave NE, fire sprinklers will be required, has been noted on plans.

   - Requirement noted.

b) It is the developer's responsibility to see that adequate water for fire protection is attainable. The minimum required fire flow is determined using IFC Appendix B, and depends upon building sizes, construction types, and sprinkler systems. Proof of fire flow will be required. No fire flow information provided at this time, please provide.

   - Fire flow test has already been completed (see attached City memo from Ryan Keefe).

c) The buildings will require residential fire sprinkler system installations. Be clear when plans are submitted to show if these will be IRC townhomes, or IBC apartments (sprinklers and construction differ). The buildings will require NFPA 13D fire sprinkler systems in each unit (for townhomes), or NFPA 13R fire sprinkler systems in each building (for apartment).

   - Requirement noted.

d) Provide water main extensions with hydrants along the new roadways and at all road intersections in approved locations, with maximum spacing of 600' apart. Hydrants shown appear acceptable.

   - Requirement noted.

e) Fire hydrants shall comply with city Water Design Standard 2-060 Hydrants, including 5" Storz fittings, with blue reflective hydrant markers to be provided in the roadways, located four inches off the centerline on the hydrant side of the road.

   - Requirement noted.

f) Fire hydrants with approved water supply must be in service prior to building construction.

   - Requirement noted.

g) Where residential fire sprinklers may be required the developer should install a water service per Standard Plan 2-090-001 Full ¾" x 1" Meter Service. Under this plan a 1" tap is made at the water main and 1" piping is run to the 1" meter setter. If in the end a ¾" water meter will suffice then all that is required is to install two reducer bushings with the ¾" water meter. A single service tap should be used where sprinklers are required, not a double service installation.

   - Requirement noted.

3. Access Related:

a) Turnaround provision is required for dead-end access in excess of 150 feet long. Turnarounds shall comply with city standard plans. (MMC 9.04.503.2.5). Turnaround shown on plans appear adequate, 80' cul de sac.

   - Requirement noted.

b) "Where the vertical distance between the grade plane and the highest roof surface exceeds 30 feet (9144 mm), approved aerial fire apparatus access roads shall be provided. For purposes of this section, the highest roof surface shall be determined by measurement to the eave of a pitched roof, the intersection of the roof to the exterior wall, or the top of parapet walls, whichever is greater." (2018 IFC D.105.1). Building heights are not known at this time, disregard if under 30'.

   - Requirement noted.

c) An adequate access route for fire apparatus must be in service prior to any building construction.

- Requirement noted.

d) Access for firefighting operations along all sides of all buildings is required. A minimum 5' wide access is required for MF dwellings. All parts of building exteriors should be accessible for firefighting by an approved route around the building, and be within 150 feet of a minimum 20' wide fire apparatus access.

- Requirement noted.

e) "NO PARKING - FIRE LANE" signs are required on both sides of all roads that are 26 feet wide or less, and one side of roads 26 to 32 feet wide. The signage shall be identified on the approved Civil Plans. (MMC 9.04.101, 2018 IFC Appendix D103.6.1).

- Requirement noted.

f) The city address committee will determine road names and address numbers for the lots.

- Comment noted.

Police Dept. Comments (Mr. Erik Scairpon - Police Chief, City of Marysville)

All police dept. report on incidents located within the project neighborhood accessed by 35th Ave NE is noted.

Utility Fees Memo (Mr. Ryan Carney, Development Services Technician)

All information about Utility Capital Improvement Fees, Recovery (Latecomer) Fees, Utility Main Fees and ULID/LID Fees are noted.

Public Works Comments (Mr. Brian McDaniel, Water Utility Supervisor)

1. Move water meters for lots 10 and 11 to other sides of lots. Currently service lines are shown tapped on gate valves.
   - Water services and tap location revised and noted. Refer to civil Sheet C-5.
2. Water main tie in to 18" water main needs to be a live tap.
   - Requirement noted.
3. Water details not shown.
   - Water main detail design, specifications and details will be provided with the future civil construction drawings.

Public Works Comments (Mr. David Jackson, NPDES Coordinator)

1. For residential projects triggering minimum requirements #6 Runoff Treatment and #7 Flow Control, the stormwater facility lot will be dedicated to the HOA. This policy may be modified depending on facility design. The City will receive an easement to inspect the facility, and, if needed, repair and maintain the facility in an emergency.
   - Requirement noted.

2. The City has adopted the 2019 Stormwater Management Manual for Western Washington (UIC rules apply to infiltration trenches, see Volume I chapter 4 UIC Program. Contact the Department of Ecology for permitting information).
    - Requirement noted.

3. Infiltration BMPs require pre-treatment. Appropriate options for treatment can be found in the Stormwater Management Manual for Western Washington 2019.
    - Requirement noted.

4. Stormwater Covenant and Easement
    - Requirement noted.

Public Works Comments (Ms. Krista Gessner, Cross Connection Specialist)

1. Plumbing system is subject to applicable requirements of MMC Chapter 14.10 "Water Supply Cross-Connections" and WAC 246-290-490.
    - Requirement noted.
2. If any wells are on site, they must be either decommissioned by a certified well driller, or a DCVA is required to be installed behind each water meter.
    - Requirement noted.
3. A Reduced Pressure Backflow Assembly (RPBA) is required immediately downstream of any irrigation meter and in an above ground hotbox if a chemical/fertilizer injection system is installed. If the irrigation system is not chemically injected, a DCVA is sufficient for this application. The DCVA may be installed in an in-ground meter type box or vault. In accordance with Design Standards 2-15-001.
    - Requirement noted.
4. On-site inspections are to be performed by the City of Marysville Cross Connection Control Specialist at rough-in and final. 48 hours' notice is required, prior to inspection.
    - Requirement noted.
5. Testing of all backflow prevention assemblies, by a Washington State Certified Backflow Assembly Tester, is required prior to occupancy use per MMC 14.10.120. Test report shall be forwarded to the City of Marysville Water Quality Office, prior to occupancy.
    - Requirement noted.
6. All backflow assemblies are required to be lead-free.
    - Requirement noted.

Public Works Comment (Ms. Kimberly Bourns, PLS - Engineering Technician)

1. The East-West lot lines of lots 43-50 are missing dimensions.
    - Missing lot dimensions added to plans noted. Refer to revised prelim plat civil Sheet C-4.

Community Development Comments (Mr. Michael Snook, Building Official)

All building official comments noted (actionable for civil construction design plan submittal and building permit applications).

Public Comments

Public comments submitted to the City are noted.

If you have any questions or comments regarding this letter, please contact the undersigned at (360) 671-7002.

Sincerely,

Latta Engineering, PLLC

Neil Latta, P.E.
Principal Engineer

STAFF RECOMMENDATION - STEVENS PRD MDNS APPEAL

Community Development Department ◆ 501 Delta Avenue ◆ Marysville, WA 98270
Office Hours: Mon - Fri 8:00 AM - 4:30 PM ◆ Phone: (360) 363-8000

PROJECT INFORMATION			
Project Title	Stevens PRD	**Date of Report**	January 6, 2025
File Number	PA24-024	**Attachments** (linked)	Public Hearing Exhibits 1-42
Staff Recommendation	Uphold the SEPA Mitigated Determination of Non-Significance (MDNS) issued on November 6, 2024, for the proposed 59 lot single-family Planned Residential Development (PRD) Subdivision request, subject to the mitigating conditions imposed in the MDNS and subject to all applicable development conditions imposed pursuant to the Marysville Municipal Code (MMC), as outlined in this Staff Recommendation.		

BACKGROUND SUMMARY			
Applicant	KB Home	**Applicant Contact**	Courtney Flora - McCullough Hill, PLLC 701 5th Ave, Suite 6600 Seattle, WA 98104
Appellant	35th Avenue Community Action Group, LLC	**Appellant Contact**	William B. Foster 1907 Everett Ave Everett, WA 98201
Appealed Action	Appeal of the SEPA MDNS issued for a project action proposal to construct a 59 lot single-family PRD Subdivision. The appeal is filed on the grounds that the City knew, or should have reasonably known, that the City's Decision to issue the MDNS were arbitrary, capricious, unlawful, and/or exceeded the City's lawful authority under the United States Constitution Amendment XIV regarding due process, Washington State Constitution Article 11, Section 11 regarding police powers, RCW 82.02.020, RCW 43.21C.030, 43.21C.033, and 43.21C.060, RCW 36.70B.060, Marysville Municipal Code, and common law.		

Location	East of I-5 and 35th Ave NE, north of 98th St NE, and west of 39th Dr NE			**APN**(s)	30051600301400, 30051600301500, 30051600301600, 30051600304500 30051600304501, 30051600305800, 30051600306500, 30051600306600

SUMMARY

1. **Description of Proposal.** Latta Engineering, PLLC (agent) on behalf of KB Home (applicant) requested Planned Residential Development (PRD) Subdivision Approval in order to subdivide an approximately 13.67-acre property into 59 single family lots with associated site improvements.

2. **Project History.**

   2.1. An application for a pre-application request was submitted to the City on March 18, 2024 with comments provided to the applicant on April 15, 2024. A subsequent meeting with staff and the applicant was held to discuss the comments provided.

   2.2. Due to the anticipated concerns from the surrounding property owners, the City held a duly noticed Neighborhood Meeting in Council Chambers on July 31, 2024. Staff documented common citizen concerns.

   2.3. The formal project application was submitted on August 6, 2024, and was deemed complete on August 29, 2024 (Exhibit 016). Public notice of the development application was provided in accordance with MMC 22G.010.090.

   2.4. A Mitigated Determination of Non-Significance (MDNS) was issued on November 6, 2024 (Exhibit 030).

   2.5. A timely appeal was filed on November 19, 2024 (Exhibit 033). In accordance with WAC 197-11-680(3)(a)(v), any SEPA appeal is consolidated with the hearing on the underlying government action in a single simultaneous hearing before the Hearing Examiner.

3. **Project Location.** The project site is comprised of an assemblage of (7) existing lots east of the intersection of 35th Ave NE and north of 98th St NE.

4. **Site Description.** The project site is an assemblage of approximately 13.67 acres with (5) existing residences with accessory structures set to be demolished with development.

   4.1. The topography across the project site is relatively flat with less than a 5 ft. elevation change across the entirety of the site. Vegetation within the development site primarily consists of mature evergreen trees and sparse undergrowth, with landscaped field areas west and adjacent to the existing residences.

   4.2. The property is surrounded by single-family residences on lots ranging from roughly 0.50 acres to 1.50 acres north, east, and south of 98th St NE.

   4.3. According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS), on-site soils primarily consist of Ragnar fine sandy loam.

REVIEW PROCESS

Pursuant to MMC 22E.030.090, review under the State Environmental Policy Act (SEPA) is required for this project because the proposal exceeds 30 new dwelling units. After following the DNS process in WAC 197-11-310, the City issued a Determination of Non-significance under WAC 197-11-350 on November 6, 2024.

An appeal of the SEPA Determination of Non-significance was submitted by William B. Foster on behalf of the appellant, 35th Avenue Community Action Group, LLC, on November 19, 2024. The appeal asserts:

1. *The City knew, or should have reasonably known, that the City's Decision to issue the MDNS were arbitrary, capricious, unlawful, and/or exceeded the City's lawful authority under the United States Constitution Amendment XIV regarding due process, Washington State Constitution Article 11,*

Section 11 regarding police powers, RCW 82.02.020, RCW 43.21C.030, 43.21C.033, and 43.21C.060, RCW 36.70B.060, Marysville Municipal Code, and common law based on the following reasons:

1.1. *The City acted in an arbitrary, capricious, and unlawful manner an/or exceeded the City's lawful authority, and erred in issuance of the MDNS;*

1.2. *The director committed an error of law or misinterpreted the applicable city regulation, ordinance, or other state law or regulation;*

1.3. *The director's findings, conclusions, and/or conditions are not supported by the record; and/or;*

1.4. *Newly discovered evidence alleged to be material to the director's decision which could not reasonably have been produced prior to the director's decision.*

In accordance with WAC 197-11-680(3)(a)(v), any SEPA appeal is consolidated with the hearing on the underlying governmental action in a single simultaneous hearing before the hearing examiner. For clarity, an evaluation and recommendation of the underlying land-use permit application is provided in a separate staff recommendation.

The City suggests the Hearing Examiner conduct a review of the SEPA appeal first, followed by review of the proposed PRD Subdivision.

RESPONSE TO APPELLANT'S CONTENTIONS

The appellant made the following contentions in the appeal:

1. ***The access afforded by the Appellants under current conditions is inadequate. Often times during each day the traffic on 88th Street NE is severely congested and vehicles attempting to reach 36th Avenue NE are unable to do so because of the congestion. This congestion also restricts access to the Appellants' properties by Fire, law enforcement, or other similar emergency service providers. This traffic congestion is further impacted when a train is traveling along the train tracks that parallel State Avenue, resulting in a complete traffic stoppage between Interstate 5 (to the west) and State Avenue (to the east).***

    1.1. **Applicant's Response provided by Kassi Leingang, PE, Senior Project Manager with TranspoGroup (Exhibit 041):** The Stevens Assemblage Traffic Impact Analysis (Kimley-Horn, July 2024) evaluated the 88th Street NE corridor which was shown to meet the identified LOS standards. Note that the TIA evaluates typical conditions, which does not assume a train event is taking place which is typical of all jurisdictions. The TIA also identifies that there is a planned improvement along the 88th Street corridor to address existing congestion concerns. This project is identified to be funded and would include the installation of roundabouts at the three study intersections of 36th Avenue NE and the two I-5 Ramps.

    In addition to the TIA review, the Fire Marshal and Police Department provided feedback for the proposed development which is summarized below.

    - Fire Marshal: The Fire Marshal has reviewed the proposal and has provided a number of access related requirements to which the project will need to adhere. By addressing these requirements, the project will be in compliance and meeting the safety needs; therefore, providing adequate service for both the existing users as well as the proposed dwellings.
    - Marysville Police Department: The Police department conducted a review of public safety access and call volumes in the vicinity of the proposed project (September 2024). The review identified that "recent years show lower call responses to this neighborhood compared to earlier years taken into account in this review."

1.2. **Supplementary Staff Response:** The City of Marysville, nor does any other local jurisdiction, have the ability to alter train operations, including the number of and/or time of operation of train traffic. Given the unpredictability of train traffic and subsequent impossibility of determining, influencing or altering train traffic, traffic impacts are not feasible to fully evaluate train traffic impacts. Being as the purpose of a TIA is to evaluate a typical PM Peak (or other) time period, traffic impacts caused by trains are not evaluated as part of a TIA.

Per Exhibit 040, Tom Maloney, Marysville Fire District Fire Marshal, provided the following response: *MFD response times would be similar to our current response times (fire trucks and aid cars). The plans were reviewed based on current adopted standards. All responses vary based on the availability of fire units and location of the units. Our average response times are within acceptable ranges. Our statistics can be found at www.marysvillefiredistrict.org under public information. In 2023 our average response time was 6-minutes and 51-seconds.*

In addition, per Exhibit 023 (at page 23-24) fire sprinkler systems will be required for units constructed in the development, and the development must meet necessary access-related requirements.

2. ***The addition of 509 additional daily trips will exacerbate the existing conditions to a point where the traffic congestion will result in a level of service (LOS) that is below the LOS that is acceptable in the City.***

2.1. **Applicant's Response provided by Kassi Leingang, PE, Senior Project Manager with TranspoGroup (Exhibit 041):** Level of service impacts at an intersection are reviewed for the City of Marysville during the PM peak hours, when traffic volumes are greatest. The Stevens Assemblage Traffic Impact Analysis (Kimley-Horn, July 2024) estimated the project would add 54 net new trips during the PM peak hour with 34 inbound and 20 outbound. The analysis, as reviewed and approved by City of Marysville staff, shows the study intersections along 88th Street NE are forecast to meet the identified LOS standards with the development of the project.

2.2. **Supplementary Staff Response:** With the submittal of the land use application, a Traffic Impact Analysis (TIA) prepared by Kimley-Horn & Associates, Inc., dated July 2024 (Exhibit 011). The analysis shows that the study intersections currently operate at LOS D or better. The study intersections are all anticipated to operate at LOS D or better under the 2033 horizon year conditions with the improvements to the ramp intersections with 88th Street NE. The TIA was reviewed and accepted by the City's Traffic Engineer.

In accordance with MMC 22D.030.070(6), *Level of Service Requirements – Concurrency Determinations*, the City's Traffic Engineering Manager reviewed the TIA and issued a written concurrency recommendation dated October 16, 2024 (Exhibit 021), informing the developer of the project's impacts and mitigation obligation pursuant to MMC 22D.030, Traffic Impact Fees and Mitigation. Pursuant to MMC 22D.030.070(1)(d), an applicant is required to make a written proposal for mitigation of traffic impacts based on the concurrency recommendation. The applicant accepted the requirements outlined in the traffic concurrency recommendation on October 16, 2024 (Exhibit 025).

Said recommendation determined that the proposed development, as conditioned, would meet concurrency as required per MMC Chapter 22D.030.

3. ***Many of the Appellants' properties obtain water through private wells. The surface water that will be generated by the additional impermeable surfaces that result from the 59 additional dwelling units threatens contamination of these private wells, depriving the residents of potable water.***

3.1. **Applicant's Response provided by Neil Latta, PE (Exhibit 042):** The project design proposes to mitigate stormwater runoff utilizing standard Best Management Practices (BMPs) in accordance with the following requirements:

- MMC 14.15 (Controlling Storm Water Runoff from New Development, Redevelopment and Construction Sites);
- State Dept of Ecology's 2019 Stormwater Management Manual for Western Washington (2019 SWMM); and
- City of Marysville Engineering Design and Development Standards (EDDS)

This project will result in greater than 5,000 sf of new impervious surface area; therefore, it must comply with all 9 Minimum Requirements outlined in the 2019 SWMM. Minimum Requirement #2 (Construction Stormwater Pollution Prevention), Minimum Requirement #3 (Source Control of Pollution) and Minimum Requirement #6 (Runoff Treatment) are most applicable to the public's concerns pertaining to potential groundwater contamination.

A full Construction Stormwater Pollution Prevention plan will be prepared for the project addressing all 13 elements to fully satisfy Minimum Requirement #2 in accordance with the 2019 SMWW.

Appropriate source control BMPs shall be applied to the project to fully satisfy Minimum Requirement #3 in accordance with the 2019 SMWW. The intent of source control BMPs is to prevent stormwater from coming in contact with pollutants. Proposed source control BMPs will include Operational BMPs and Structural Source Control BMPs. These BMPs will be detailed and shown the stormwater site plan and civil construction plans for City review and approval.

Runoff Treatment (Minimum Requirement #6) is required to reduce pollutant loads and concentrations in stormwater run-off using physical, biological, and chemical removal mechanisms so that beneficial uses of receiving waters are maintained. Single family residential subdivision projects are required to meet the Basic Treatment Performance Goal per the 2019 SWMM.

Please note that the storm water site plan design proposed for the Stevens PRD exceeds the Basic Treatment Performance Goal. When site conditions are feasible, storm water infiltration can potentially be the most effective BMP for Runoff Treatment. Moreover, due to the hydrologic benefits of infiltration, the State Dept of Ecology recommends providing runoff treatment by infiltrating into the site's native soils when site conditions are feasible to do so.

As stated above, the storm water runoff management design proposed herein for the project exceeds the Basic Treatment Performance Goal (i.e. full infiltration design meets the Phosphorus Treatment, Enhanced Treatment, and Basic Treatment Performance Goals).

Potential adverse impact on ground water quality was evaluated in the storm water design process (site characterization evaluation and site suitability criteria considerations). A geotechnical investigation was completed by Earth Solution NW, LLC that evaluated the

suitability of the site for infiltration, established the infiltration rate for design, depth to seasonal high groundwater table and other geotechnical information needed to design and assess constructability of the infiltration BMP.

To protect ground water quality, the final infiltration BMP design will include the following to comply with and exceed the 2019 SWMM requirements:

- Perform geotechnical wet season groundwater monitoring program (by Earth Solution NW, LLC) to verify seasonal high water table depth and determine if ground water mounding analysis is required. Four groundwater monitoring wells have already been installed on the site for groundwater monitoring throughout the 2024–2025 wet season (October 2024 to April 2025).
- Perform hydrogeologic site review and design memorandum by professional Hydrogeologist (The Riley Group, Inc) to supplement the stormwater design and address neighbor concerns pertaining to proposed stormwater infiltration BMPs in vicinity of existing wells surrounding our project site.
- Design and construct stormwater management BMPs for the project that exceeds the Basic Treatment Performance Goal required for this project (design shall meet the Phosphorus Treatment and Enhanced Treatment Performance Goals)
- Install pre-treatment BMPs (hydrodynamic separator or filter cartage vault) prior to infiltration facilities to remove oil and influent suspended solids (to reduce potential plugging of the soils).
- Construct infiltration gallery BMPs with imported underlying amended soils to ensure soil suitability for water quality treatment (i.e. soil with sufficient organic content and sorption capacity to remove pollutants).
- Develop an Operation and Maintenance Plan for the stormwater system that includes provisions for regular and perpetual maintenance of the infiltration BMPs, including replacement and/or reconstruction of any media relied upon for Runoff Treatment purposes.

3.2. **Supplementary Staff Response:** All runoff from the site is required to be contained and treated onsite via a stormwater facility. Facilities that treat stormwater are required to be located a minimum of 100 ft. from private wells.

With the submittal of the land use application, a Preliminary Drainage Report, dated August 1, 2024, prepared by Latta Engineering, PLLC, was provided. Said report outlines how all runoff from pollutant generating impervious and pervious areas will be routed to underground stormwater infiltration chamber facilities for flow control and water quality treatment to fully mitigate stormwater runoff in accordance with the 2019 WA Dept. of Ecology Stormwater Management Manual. No untreated runoff would be permitted to discharge off the proposed project site.

The preliminary storm drainage design was performed in accordance with the current State regulations, which the City of Marysville has adopted. Those regulations call for stormwater to generally maintain the surface-runoff patterns that existed historically. This site is underlain by a soil identified as the “Marysville Sand” unit, which is an outwash variety of soil that is typically conducive to stormwater infiltration. The vast majority of rainfall at this site can be expected to infiltrate into the underlying soil in the historic condition, so the State regulations require the site to continue infiltrating this stormwater. Prior to infiltration, stormwater must

be routed through a pre-settling device to remove sediment, and a stormwater treatment mechanism must be provided. Percolation of water through native soil can be an effective treatment mechanism if the soil meets certain criteria. The project will be required to perform lab tests to determine if the underlying soil is suitable for treatment. Regardless of those tests, the preliminary stormwater design calls for a maintenance-layer of sand, to be installed immediately beneath the stormwater facility. This sand will be an engineered-mix, specifically intended to provide the required treatment, in addition to any pollutant removal that will occur via percolation through the native soil.

As part of the development, the existing wells and septic systems in the project area would be decommissioned per the standards of the Snohomish County Health District and Washington State Department of Ecology.

Further, as conditioned in the issued SEPA MDNS, the applicant is required to comply with the following:

- **MDNS Condition No. 6:** The applicant shall be required to prepare and provide a geotechnical wet season groundwater monitoring report to verify seasonal high water table depth and determine if groundwater mounding analysis is required.
- **MDNS Condition No. 7:** The applicant shall be required to complete and provide a hydrogeologic site review and design report, prepared by a professional hydrogeologist, to supplement the stormwater design and address concerns pertaining to proposed stormwater infiltration Best Management Practices (BMPs) in the vicinity of existing wells surrounding the project site.

STAFF RECOMMENDATION

The City of Marysville reviewed and analyzed the original and supplemental information, studies, and reports provided by the applicant; examined the facts; understood the environmental impacts of the proposal; assessed the degree of significance of those impacts; complied with all of the SEPA process requirements and appropriately considered all available information in issuing the SEPA Determination of Non-Significance for the Stevens PRD Subdivision. In accordance with RCW 43.21C.090 and MMC 22E.030.180(1)(g), the threshold determination issued by the City's SEPA official should be given and shall carry substantial weight in any appeal hearing.

Nothing in the appeal establishes, by a preponderance of the evidence, that any part of the finding was clearly erroneous or that the impacts of this proposal are more than moderate. Staff respectfully request that the Hearing Examiner **UPHOLD** the MDNS issued November 6, 2024 (Exhibit 030) for the proposed Stevens Planned Residential Development, subject to the mitigating conditions imposed pursuant to the MDNS and subject to all applicable development conditions imposed pursuant to the MMC.

FINDINGS AND CONCLUSIONS

1. **Description of Proposal.** An application was submitted by Latta Engineering, LLC on behalf of the applicant, KB Home, proposing a 59-lot Planned Residential Development (PRD) single-family detached subdivision. Site improvements include recreational open space areas, construction of internal roads, extension of utilities, and street frontage improvements along 35th Ave NE and 98th St NE.

   1.1. Major subdivisions (creation of more than 9 lots) require a quasi-judicial decision action; therefore, a public hearing is required per MMC 22G.090.

2. **Project Location.** The development site is comprised of an assemblage of (7) existing lots. The proposed development includes the following lots:

   2.1. 9815 35th Ave NE – APN: 30051600301400

   2.2. 9909 35th Ave NE – APN: 30051600304500/30051600304501

   2.3. 9907 35th Ave NE – APN: 30051600305800

   2.4. 3705 98th St NE – APN: 30051600301400

   2.5. 3625 98th St NE – APN: 30051600306600

   2.6. 3609 98th St NE – APN: 30051600306500

   2.7. 9921 35th Ave NE – APN: 30051600301500

3. **Site Description.** The project site is approximately 13.67 acres in size and currently developed with (5) existing residences with accessory structures that are to be demolished with development. The topography across the project site is relatively flat with less than a 5 ft. elevation change across the entirety of the site. Vegetation within the development site primarily consists of mature evergreen trees and sparse undergrowth, with landscaped field areas west and adjacent to the existing residences.

4. **Project History.**

   4.1. An application for a pre-application request was submitted to the City on March 18, 2024, with comments provided to the applicant on April 15, 2024. A subsequent meeting with staff and the applicant was held to discuss the comments provided.

   4.2. Due to the anticipated concerns from the surrounding property owners, the City held a duly noticed Neighborhood Meeting in City Council Chambers on July 31, 2024. Staff documented common citizen concerns.

   4.3. The formal project application was submitted on August 6, 2024, and was deemed complete on August 29, 2024 with the Letter of Completeness (Exhibit 016) provided to the applicant in accordance with MMC 22G.010.050.

5. **Notice of Application.** Public notice of the development application was provided in accordance with MMC 22G.010.090.

   5.1. Numerous public comments have been received throughout the duration of the application review. All public comments received through November 22, 2024, are compiled in Exhibit 037.

   5.2. Staff responses to the common concerns identified in submitted public comments has been provided in the publicly available document, Exhibit 038.

6. **Notice of Public Hearing.** The public hearing for the proposed request was advertised in accordance with MMC 22G.010.110, *Notice of public hearing.*

6.1. A Notice of Public Hearing was published for an open record public hearing on December 6, 2024.

7. **Request for Review.** A Request for Review of the proposed development was sent to the Local, County, State & Federal Agencies and Districts identified on page 1 of this report. The following comments were received (see full comments in Exhibit 022); if above-referenced reviewing agencies are not listed below, no comments were received:

	Nature of Comment
Public Works, Traffic	• *Requirements and recommendations are addressed in the approved Traffic Concurrency Recommendation, dated October 16, 2024.*
Public Works, Development Services	• *Provided information regarding the required improvements which are to be further reviewed with Civil Plan Review.* • *The project is vested under the 2019 Stormwater Management Manual for Western Washington. Formal drainage review will be conducted during Civil Plan Review.* • *Capital facility fees would be required to be paid prior to issuance of the building permit.*
Public Works, Operations	*Provided water connection standards and requirements.*
Public Works, Surface Water	• *For residential projects triggering minimum requirements #6 Runoff Treatment and #7 Flow Control, the stormwater facility lot will be dedicated to the HOA. This policy may be modified depending on facility design. The City will receive an easement to inspect the facility, and, if needed, repair and maintain the facility in an emergency.* • *The City has adopted the 2019 Stormwater Management Manual for Western Washington.* • *Infiltration BMPs require pre-treatment. Appropriate options for treatment can be found in the Stormwater Management Manual for Western Washington 2019.*
Marysville Fire District	• *Due to the single point of access at 36th Ave NE, residential fire sprinklers would be required.* • *Fire hydrants shall be provided along the new and existing roadways at approved locations, at all intersections and with maximum spacing of 600 ft. apart. The location of fire hydrants requires fire marshal approval on civil construction plans.* • *"NO PARKING - FIRE LANE" signs are required on both sides of all roads that are 26 ft. wide or less. The signage shall be identified on the approved Civil Plans.* • *Due to the large volume of public concerns submitted, MFD provided responses to the common concerns (Exhibit 040).*
Marysville Police Department	*Provided a report on incidents located within the great neighborhood area accessed by 35th Ave NE due to volume of concerns received from the public.*
Building Department	*Provided requirements for the building permit submittal.*

8. **State Environmental Policy Act Review.** Pursuant to MMC 22E.030.090, the proposed subdivision is subject to SEPA Review as it would exceed the flexible threshold, which allows for up to 30 dwelling units.

   8.1. A Mitigated Determination of Non-Significance (MDNS) was issued on November 6, 2024 (Exhibit 030).

   8.2. A timely appeal of the MDNS was filed on November 19, 2024 (Exhibit 033). In accordance with WAC 197-11-680(3)(a)(v), any SEPA appeal is consolidated with the hearing on the underlying government action in a single simultaneous hearing before the Hearing Examiner.

9. **Critical Areas.** With application, a Wetland and Fish and Wildlife Habitat Assessment, dated June 20, 2024, prepared by Soundview Consultants, LLC (Exhibit 007), assessed the site for the presences of critical areas. Staff reviewed the provided assessment and concurred with the finding that no critical areas as regulated by MMC 22E.010 were present on the project site.

10. **Access and Circulation.** Access to the development is proposed through the extension of 35th Ave NE along with the improvement of 98th St NE that would continue with new internal plat roads to serve the proposed development.

    10.1. 98th St NE is classified as a local access street and is to be built compliant with SP 3-202-02 of the Engineering Design and Development Standards (EDDS) with half street improvements along the project frontage.

    10.2. 35th Ave NE is to be built compliant with SP 3-218-002.

    10.3. The new roads are to be built compliant with SP 3-218-001.

11. **Traffic Impacts.** With application, a Traffic Impact Analysis (TIA) prepared by Kimley-Horn & Associates, Inc., dated July 2024 (Exhibit 011), was provided. The City's Traffic Engineering Manager reviewed the TIA and issued a written concurrency recommendation dated October 16, 2024 (Exhibit 021), informing the developer of the project's impacts and mitigation obligation pursuant to MMC 22D.030, Traffic Impact Fees and Mitigation.

    Pursuant to MMC 22D.030.070(1)(d), an applicant is required to make a written proposal for mitigation of traffic impacts based on the concurrency recommendation. The applicant accepted the requirements outlined in the traffic concurrency recommendation on October 16, 2024 (Exhibit 025).

    Said recommendation determines that the proposed development, as conditioned, would meet concurrency as required per MMC 22D.030.

12. **Utilities.** Per MMC 14.03.250, utilities are to be extended along the street frontages of the proposed project. Extensions of sewer and water mains as well as a storm drain system for the roadway extension will be required. The following utilities will be provided to the site:

    - ***Storm Drainage:*** With application, a Preliminary Drainage Report, dated August 1, 2024, prepared by Latta Engineering, PLLC (Exhibit 009), was provided. Said report outlines how all runoff from pollutant generating impervious and pervious areas will be routed to underground stormwater infiltration chamber facilities for flow control and water quality treatment to fully mitigate stormwater runoff in accordance with the 2019 WA Dept. of Ecology Stormwater Management Manual. No untreated runoff would be permitted to discharge off the proposed development site.

- ***Water:*** The applicant is proposing to tie into the existing 18-inch ductile iron water main located along the west side of the property and extend the line through the new internal plat road.
- ***Sewer:*** The nearest sewer connection is a 10-inch PVC main located south of the proposed development at the intersection of 35th Ave NE and 94th Pl NE, which is about 1,500 ft. away. The applicant is proposing to extend the sewer main within 35th Ave NE north to the development site and extend the line through the new internal plat roads.

13. **Park Impacts.** Pursuant to MMC 22D.020, the applicant shall mitigate City of Marysville parks impacts through payment of the park impact fee in effect at the time of building permit application.

14. **School Impacts.** Pursuant to MMC 22D.040, the applicant shall mitigate Marysville School District No. 25 impacts through the payment of the school impact fee in effect at the time of building permit application.

15. **Application Review.** MMC 22G.010.140(3) requires the City to determine whether or not the project is consistent with the following items described in the applicable plans and regulations:

15.1. *Type of land use permitted at the site, including uses that may be allowed under certain circumstances, such as planned residential development and conditional uses, if the criteria for their approval have been satisfied.*

Staff Comment: The proposed PRD subdivision is for the creation of single family residential lots. Per MMC 22C.010.060, single family detached units are permitted outright in the Single Family Medium Density (R-4.5) zone; therefore, the proposed development would comply with this provision.

15.2. *Density of residential development in urban growth areas.*

Staff Comment: The base density allowed in the R-4.5 zone is 4.5 dwelling units per acre. Per MMC 22C.010.080(2) and MMC 22C.010.090(1)(b), the maximum net density is the same as the base density, in this case, 4.5 dwelling units per acre, provided that for PRD developments, the maximum density may be increased up to 20% through the application of the Residential Density Incentives (RDI) provisions outlined in MMC 22C.090.

Per the preliminary civil plans (Exhibit 039), the applicant calculated that the net project area as 10.94 acres (476,570 sq. ft.) per the definition of "Net Project Area" of MMC 22A.020.150. The density allowed based on the net project area is calculated as follows:

DENSITY CALCULATIONS	
Base Density – 4.5 DU/Acre	10.94 acres x 4.5 DU/Acre = **49.2 or 49 units/lots**
Max Density Allowed *20% increase of base allowance*	49 units/lots x 20% = **9.8 or 10 units/lots**
TOTAL UNITS/LOTS ALLOWED	**59 UNITS/LOTS**

The applicant has proposed utilizing RDI benefits pursuant to MMC 22C.090.030 to achieve bonus density. The following is the RDI calculation for the proposed development:

RDI CALCULATIONS	
Benefit 6a: Dual Use Storm Detention Tract Active Recreation - 5 bonus units/acre of the storm water facility tract used for active recreation	0.67 acres x 5 = **3.35 Units/Lots**
Benefit 6b: Dual Use Storm Detention Tract Passive Recreation - 2 bonus units/acre of the storm water facility tract used for active recreation	Tract 998 – 0.28 acres x 2 = 0.56 Units/Lots Tract 996 – 0.13 acres x 2 = 0.26 Units/Lots **= 0.82 Units/Lots**
Benefit 7c: Project Design, Installation of Perimeter Fencing - 1 bonus unit per 500 lineal feet of perimeter fencing or landscaping installed	2,978 LF / 500 = **5.96 Units/Lots**
TOTAL RDI UNITS/LOTS *Per MMC 22C.090.050(4) Bonus RDI units must round fractional units down to nearest whole number*	**10.13 or 10 UNITS/LOTS**
TOTAL UNITS PROPOSED	**59 UNITS/LOTS**

15.3. *Availability and adequacy of public facilities identified in the Comprehensive Plan.*

Staff Comment: The Comprehensive Plan designation for the subject property is Single Family Medium. The proposed development and subsequent use of the property would be consistent with the pertinent development policies outlined in the Marysville Comprehensive Plan and is located within the Pinewood Neighborhood Planning Area 6.

Planning Area 6 demonstrates that adequate water and sewer are available to this development and is located within the Marysville School District.

The following development policies outlined in the Comprehensive Plan that are specifically pertinent to the overall subdivision request, and were used to establish appropriate conditions, are as follows:

- **LAND USE ELEMENT – Policies:** LU-3, LU-5, LU-6, LU-20, LU-21, LU-23, LU-28, LU-29, LU-30, LU-31, LU-33, LU-34, LU-38, LU-42
- **HOUSING ELEMENT – Policies:** HO-18, HO-19, HO-22, HO-25, HO-30, HO-32, HO-37
- **ENVIRONMENTAL ELEMENT – Policies:** EN-20, EN-21, EN-26, EN-27, 28, EN-29, EN-30, EN-32, EN-40, EN-41
- **TRANSPORTATION ELEMENT – Policies:** T-3, T-7, T-8, T-25, T-26, T-27, T-29, T-30, T-40, T-41, T-46, T-47, T-48
- **UTILITIES ELEMENT – Policies**: UT-1, UT-3, UT-8, UT-9, UT-10, UT-14
- **PUBLIC FACILITIES & SERVICES ELEMENT – Policies:**
  - **Police, Fire, Library:** PS-1, PS-10, PS-11

- **Schools:** SC-6
- **Water, Sewer, Storm Drainage, Solid Waste:** PF-1, PF-2, PF-7, PF-9, PF-10, PF-19, PF-20, PF-23, PF-26, PF-28

Staff finds that the proposed development, as conditioned, is consistent with the City of Marysville Comprehensive Plan.

15.4. *Development Standards*

Staff Comment: The project site is currently zoned R-4.5. The R-4.5 zone allows single-family residences at a base density of 4.5 dwelling units per acre with an allowable 20% increased based density by utilizing Residential Density Incentives outlined in MMC 22C.090.

The proposed PRD would meet all bulk and dimensional requirements set forth in MMC 22G.080.080(1), *Modification of development regulations*. Demonstrated compliance with said development regulations would be reviewed at time of building permit submittal.

For PRD developments, 15% (476,570 sq. ft. x 15%=71,486 sq. ft.) of the net project area is required to be dedicated as open space with 35% of that total being dedicated as active open space (71,486 x 35%=25,020 sq. ft.) as required by MMC 22G.080.100. As proposed, the total area of dedicated open spaces would exceed the required provisions. Improvements within the open space area would include, but are not limited to, landscaping, walking trails, pickleball court, benches, picnic tables, and playground.

As proposed and conditioned, the PRD meets all of the requirements set forth in MMC 22G.080.050, *Procedures for review and approval*, including subsections: (a) Consistency with Applicable Plans and Laws, (b) Quality Design, (c) Design Criteria (i), (iii), and (iv), (d) Public Facilities, (e) Consistency with adjacent single family development, (f) Perimeter Design, (g) Open Space and Recreation, (h) Streets, Sidewalks, and Parking, (i) Landscaping, and (j) Maintenance Provisions.

The proposed development and subsequent use of the property would comply with the intent of the R-4.5 zone, and as conditioned herein, complies with all of the applicable design and development standards outlined in Title 22, *Unified Development Code*.

As conditioned, the proposed development makes appropriate provisions for the public use and interest, health, safety and general welfare.

16. **Hearing Examiner – Required Findings.** MMC 22G.010.170(3) requires that the Hearing Examiner not approve a proposed development without first making the following findings and conclusions:

16.1. *The development is consistent with the comprehensive plan and meets the requirements and intent of the Marysville Municipal Code.*

Staff Comment: The Comprehensive Plan designation for the subject property is Single Family Medium. The proposed development and subsequent use of the property would be consistent with the pertinent development policies outlined in the Marysville Comprehensive Plan and the intent of the Marysville Municipal Code, as conditioned herein.

16.2. *The development makes adequate provisions for open space, environmentally sensitive areas, drainage, streets and other public ways, transit stops, water supply, sanitary wastes, public utilities and infrastructure, parks and recreation facilities, playgrounds, sites for schools and school grounds.*

Staff Comment: Based on a review of the preliminary plat map and application materials, the development makes adequate provisions for open space, environmentally sensitive areas, drainage, streets and other public ways, transit stops, water supply, sanitary wastes, public utilities and infrastructure, parks and recreation facilities, playgrounds, sites for schools and school grounds.

16.3. *The development is beneficial to the public health, safety and welfare and is in the public interest.*

Staff Comment: Per Finding 15, the proposed PRD subdivision would be beneficial to the public health, safety and welfare and would be in the public interest as the subdivision has been designed in accordance with applicable Marysville Municipal Code requirements.

16.4. *The development does not lower the level of service of transportation and/or neighborhood park facilities below the minimum standards established within the comprehensive plan. If the development results in a level of service lower than those set forth in the comprehensive plan, the development may be approved if improvements or strategies to raise the level of service above the minimum standard are made concurrent with the development. For the purpose of this section, "concurrent with the development" is defined as the required improvements or strategies in place at the time of occupancy, or a financial commitment is in place to complete the improvements or strategies within six years of approval of the development.*

Staff Comment: Policy T-41 outlined in the Traffic Element of the Marysville Comprehensive Plan includes setting acceptable level of service (LOS) for all other intersections of two or more arterials within the City as a LOS D. Based on the TIA, analysis shows that the study intersections currently operate at LOS D or better. The study intersections are all anticipated to operate at LOS D or better under the 2033 horizon year conditions with the improvements to the ramp intersections with 88th Street NE. Further, per Finding 11, the provided TIA was reviewed and accepted by the City's Traffic Engineer.

As conditioned, the development would not lower the level of service of transportation and/or neighborhood park facilities below the minimum standards established within the comprehensive plan.

16.5. *The area, location and features of land proposed for dedication are a direct result of the development proposal, are reasonably needed to mitigate the effects of the development and are proportional to the impacts created by the development.*

Staff Comment: As conditioned, the area, location and features of land proposed for dedication are a direct result of the development proposal, are reasonably needed to mitigate the effects of the development and are proportional to the impacts created by the development.

17. **Preliminary Subdivision Review, Public Hearing – Elements Considered.** MMC 22G.090.130 requires the hearing examiner provide a basis for approval or disapproval of a proposed subdivision, as follows:

17.1. ***Public Use and Interest.*** *Evaluation of the proposed subdivision to determine whether the public use and interest are served by permitting the proposed subdivision.*

Staff Comment: After evaluating the application materials and other supporting documentation available to the City, staff concludes, as conditioned, the public use and interest are served by the proposed PRD subdivision.

17.2. ***Public Health, Safety and General Welfare****. Evaluation of the proposed subdivision to determine whether the public health, safety and general welfare have been served.*

Staff Comment: After evaluation of the application materials and other supporting documentation available to the City, staff concludes that, as conditioned, the public health, safety and general welfare have been served and that the PRD subdivision is consistent with the requirements of RCW 58.17.110.

17.3. ***Comprehensive Plan.*** *Evaluation of all elements of the comprehensive plan and its consistency with the proposed subdivision.*

Staff Comment: The proposed PRD subdivision and development of the parcel relate to all elements of the Comprehensive Plan. Compliance with the various elements of the Comprehensive Plan is specifically demonstrated in Finding 15.3.

17.4. ***Existing Zoning****. Evaluation of existing zoning and its compliance with the proposed subdivision and MMC 22G.090, Article V, Land Division Requirements.*

Staff Comment: The existing zoning and its compliance with the proposed PRD subdivision and Article V of this chapter, Land Division Requirements has been evaluated. Compliance with specific zoning regulations is demonstrated in Finding 15.2.

17.5. ***Natural Environment.*** *Evaluation of the impacts and provision for mitigation of all impacts on all elements of the natural environment including topography, vegetation, soils, geology and all environmental issues as defined in the State Environmental Policy Act, Chapter 197-11 WAC, and MMC 22G.090, Article V, Land Division Requirements.*

Staff Comment: As required by the issued MDNS, the applicant must mitigate for impacts as a result of this development. Further, staff reviewed impacts on all elements of the natural environment including topography, vegetation, soils, geology, and all environmental issues, and determined compliance with MMC 22G.090, Article V, Land Division Requirements, as conditioned herein.

Drainage. *Evaluation of all drainage impacts and provisions made for mitigation of all drainage impacts as defined in the city's drainage codes, and MMC 22G.090, Article V, Land Division Requirements.*

Staff Comment: All drainage impacts have been evaluated, and adequate provisions have been made to mitigate for all drainage impacts as defined in the City's drainage codes, and MMC 22G.090, Article V, Land Division Requirements.

17.6. ***Open Space.*** *Evaluation of all impacts and provision for open space as defined in MMC 22G.090, Article V, Land Division Requirements.*

Staff Comment: As a condition of final PRD subdivision, the applicant must submit copies of restrictions and covenants for the maintenance of the common open space areas pursuant to MMC 22G.090.240 and MMC 22G.080.120.

Further, no division or redivision of land shall be approved unless appropriate provisions are made for, but not limited to, the public health, safety and general welfare, relating to open space, drainage ways, streets, alleys, other public ways, water supplies, sanitary wastes, parks, school facilities and other standards as may be required by this title.

17.7. ***Public Systems Capacity****. Evaluation of all impacts and provisions made for mitigation of impacts on public systems including parks, schools, and community facilities as defined in MMC 22G.090, Article V, Land Division Requirements.*

Staff Comment: The applicant is required to pay mitigation fees for each new dwelling unit in accordance with MMC 22D.020 and MMC 22D.040 in order to mitigate potential impacts on parks, schools, and community facilities.

17.8. ***Public Services**. Evaluation of all impacts and provisions made for mitigation of impacts on public services including streets, all public utilities, and fire and police protection as defined in MMC 22G.090, Article V, Land Division Requirements.*

Staff Comment: The proposed PRD subdivision would construct streets providing appropriate access and circulation to all proposed new lots. Public utilities are to be extended to serve all new units in accordance with City standards. Appropriate improvements for fire safety in accordance with the city's fire code would be provided. Capital improvement fees are required to be collected for water, sewer, and stormwater.

17.9. ***Floodplain.** Identification of subdivisions proposed in the floodplain and compliance with requirements of this chapter and MMC 22E.020, Floodplain Management.*

Staff Comment: The project is not located within an identified floodplain; therefore, this provision would not apply.

RECOMMENDATION

Based on the foregoing findings and conclusions, review of the application materials and other supporting documentation available to the Community Development Department, and the City's regulatory authority to implement the policies, standards, and regulations of the Marysville Comprehensive Plan and Marysville Municipal Code, the Community Development Department respectfully recommends that the Hearing Examiner ***APPROVE*** the proposed Preliminary Planned Residential Development Subdivision, subject to the following conditions:

1. The preliminary configuration shown in the preliminary civil plans (Exhibit 039) shall be the approved plat configuration. The final PRD subdivision shall be processed in strict compliance with the provisions of Article III Final Subdivision Review and Article V Land Division Requirements of MMC 22G.090 and Planned Residential Developments of MMC 22G.080.

2. The final plat shall be approved and recorded within 5 years of the date of preliminary approval. A 2-year extension may be granted in accordance with MMC 22G.090.170.

3. Prior to final PRD approval, the applicant shall submit to the City for its approval, covenants, deed restrictions, homeowners' association bylaws, and other documents providing for preservation and maintenance of all common open space, parking areas, walkways, landscaping, signs, lights, roads, and community facilities consistent with MMC 22G.080.120. All common areas and facilities shall be continuously maintained at a minimum standard at least equal to that required by the City, and shall be approved by the City at the time of initial occupancy. Said restrictive covenants shall also include provisions to address parking enforcement and a statement from a private attorney as the adequacy of the covenants to fulfill the requirement of the PRD.

4. In order to achieve density greater than 4.5 dwelling units per acre, the applicant shall be required to demonstrate compliance with MMC 22C.090 *Residential Density Incentives*. Any and all RDI financial contributions shall be paid prior to final plat being recorded.

   If the proposed RDI tools proposed are not possible to implement, the total number of lots proposed would be reduced accordingly.

5. Residential fire sprinklers shall be required for all lots per MMC 9.04.503.1.5 Exemption 1.

6. The maximum height of solid (more than 50% opaque) free-standing walls, fences, or hedges in any front yard or other location between the street and the façade shall be 3½ feet unless a taller wall is required, per the Community Development Director, to mitigate significant noise and traffic impacts.

7. In development configurations where side yards abut a street, fences taller than 3½ ft. shall be setback at least 5 ft. from the sidewalk to allow for landscaping to soften the view of the fence. Provisions for long-term maintenance of this landscaping shall be addressed on the FINAL plat map.

8. A final landscape plan shall be required to be approved, prior to civil construction plan approval, and designed to comply with the applicable provisions outlined in MMC 22C.120, *Landscaping and Screening* and MMC 22G.090.570

   8.1. All required landscaping shall be bonded prior to final plat approval per MMC 22C.120.060.

9. In order to mitigate impacts upon the future capacity of the road system, the applicant shall be required to submit payment to the City of Marysville, on a proportionate share cost of the future capacity improvements as set forth in MMC 22D.030.070(3), for the development. Traffic impact fees shall be vested at a rate of $6,300.00, per PMPHT.

10. The applicant shall submit payment to the City of Marysville for park impacts caused by the development in accordance with MMC 22D.020, *Parks, Recreation, Open Space and Trail Impact Fees and Mitigation*. Park mitigation fees will be based on the fee schedules in effect at the time an individual building permit application is accepted by the City and will be required to be paid prior to building permit issuance unless deferred until a time preceding final building inspections being granted.

11. The applicant shall submit payment to Marysville School District for school impacts caused by the development in accordance with MMC 22D.040, *School Impact Fees and Mitigation.* School mitigation fees will be based on the fee schedules in effect at the time an individual building permit application is accepted by the City and will be required to be paid prior to building permit issuance unless deferred until a time preceding final building inspections being granted.

12. Credit for impact fees shall be given to compensate for the existing single family residences to be removed during development. Therefore, impact fee credits shall be given to proposed Lots 1 – 5.

13. The project is subject to the (9) mitigation measures of the State Environmental Policy Act (SEPA) Mitigated Determination of Significance (MDNS) (Exhibit 030) issued on November 6, 2024.

14. All necessary power lines, telephones wires, television cables, fire alarm systems and other communication wires, cables or shall be placed in underground location either by direct burial or by means of conduit or duct. All such underground installations or systems shall be approved by the appropriate utility company and shall adhere to all governing applicable regulations including, but not limited to, the applicable City and State regulations and specific requirements of the appropriate utility pursuant to MMC 22G.090.710(1).
